Google

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

[illegible] AND ART DEPARTMENT

[illegible]

WITH APPLICATIONS

[illegible]

Exhibitions and Scholarships.

7. The number of local exhibitions for the year 1879 was 11, of which one was a renewal of an Exhibition held by the same student in a previous year. The number of Science and Art Scholarships was 62, and of Elementary School Scholarships 52.

Courses for Teachers.

8. Short courses of instruction to Science teachers, extending over from 13 to 20 working days each, were given during the summer in the following subjects:—Chemistry, by Dr. Hodgkinson, to 31 teachers; Heat, by Professor Guthrie, to 30 teachers; Electricity, by Professor Guthrie, to 30 teachers; Geology, by Professor Judd, to 30 teachers; Mechanism, by Professor Goodeve, to 20 teachers; and Agriculture, by Professor H. Tanner, to 48 teachers. The classes of teachers in training attending the lectures and laboratories of some of the Professors of the Royal School of Mines have been continued, the numbers being for the session 1879–80 as follows:—Chemistry 15; Biology 11; Physics 12; Mechanics 11; Geology 10.

9. Four teachers are attending the laboratories at Owen's College, Manchester, under the Minute of 5th June 1877.

10. Further details with regard to these courses and to the instruction in Science in general will be found in Lieut.-Col. Donnelly's report, Appendix B., page 71, in which also a statement is made (page 82) with reference to the original investigations carried on in the Science Schools, South Kensington, during the last two years.

(*b.*) *Advanced Scientific Instruction.*

Royal School of Mines.

11. *Royal School of Mines.*—The report of the registrar of the school, given at p. 597, Appendix F., shows that the number of Royal exhibitioners and students who entered the school, with the view of becoming associates, was 23. The number in the previous year was 36. There were also 168 students who entered for the special courses of instruction, which were carried on as usual, partly at the Museum in Jermyn Street, and partly at South Kensington.

Royal College of Chemistry.

12. Dr. Frankland reports that the progress of the students engaged in practical work in the Chemical Schools at South Kensington was on the whole satisfactory. In the research department important investigations were successfully carried out. Details of the work done will be found in Dr. Frankland's report at page 598. The usual courses of lectures were given.

Metallurgical Laboratory.

13. The Metallurgical Laboratory has been well attended by students.

14. *Royal College of Science, Dublin.*—The usual courses of lectures were delivered during the year, and were attended by 60 persons, of whom 21 were associate students prosecuting the full three years' course, with the object of obtaining the diploma of Associate. The reports of the Council and of the Secretary are given in Appendix H., pages 611-13. Royal College of Science, Dublin.

II.—ART DIVISION.

Aid given towards the Promotion of Instruction in Elementary Drawing as a Part of National Education, and in Fine Art as applied to Industry.

15. *The National Art Training School.*—During the year 1878-79, 38 students in training to become Art Teachers and 12 national scholars in training to become designers or Art workmen, received allowances to enable them to study in the School and Museums; 52 students were admitted on payment of half fees; and 122 others, including the students in training, the National Scholars, and 21 men of the corps of Royal Engineers received gratuitous instruction. National Art Training School.

At the annual examinations for advanced or third grade Art certificates, held in February and July 1879, 30 students of the Training School obtained certificates qualifying the holders of them to earn payments from the Department as Teachers in Schools of Art.

The general and fee-paying students won 1 gold, 5 silver, 7 bronze medals, and 20 Queen's prizes in the National Competition, besides 89 prizes of books, &c. for works sent in for examination. The students in training and National Scholars won in the same competition 5 gold medals, 9 silver medals, 22 bronze medals, and 18 Queen's prizes of books.

The number of students was 824 (376 males and 448 females); and the fees received amounted to 3,487*l.* 17*s.* 6*d.*, of which sum 326*l.* 14*s.* was paid by evening students, and 3,161*l.* 3*s.* 6*d.*, by day students.

16. *The Etching Class.*—This class has been conducted during the past session by Mr. A. Legros, Slade Professor of Fine Art in University College, London, and has been attended by an average of 9 students of the Training School. The *Wood Engraving Class*, which was carried on for the two previous sessions under the instruction of Mr. C. Roberts, has been discontinued. Etching Class.

17. *Schools of Art.*—New schools have been established during 1879, at Burnley, Chesterfield, Liskeard, Liverpool (North District), Sleaford, Plymouth, and Torquay. The total number of Schools of Art in operation throughout Schools of Art.

the kingdom was 146. The total number of students in these schools and their branch classes was 29,191.

The annual increase reported in previous years in the work done in the schools and their branches continues to be maintained. At the annual examination in April 1879, 18,689 students submitted 157,566 drawings or models; the corresponding numbers in 1878 having been 18,234 students, and 144,373 works. In this competition 15,987 students, on account of whose instruction payments were made to the committees of the Schools, were of the industrial classes. In the examinations in 2nd grade drawing 4,868 students of Schools of Art were successful, and 1,401 obtained prizes, showing a slight decrease as compared with the numbers in 1878, which were 4,889 students and 1,517 prizes.

Fees paid by Students in Schools of Art.

The amount of fees paid by students in Schools of Art in the last three years is as follows:—

1877.	1878.	1879.
35,346*l.*	34,630*l.*	35,027*l.*

National Competition.

18. *National Competition.* — The number of works selected for the National Competition was 1,395, composed of drawings from the antique, designs, and studies in light and shade or colour. The number in 1878 was 1,500.

The Report of the Examiners will be found in App. C., page 508.

Art Classes.

19. *Art Classes.*—The number of students was 29,393 in 732 classes, the corresponding numbers in 1878 having been 27,152 in 871 classes. 4,192 students in these classes passed the examination of the 2nd grade, 906 of whom obtained 2nd grade prizes, and 434 obtained prizes for works sent up for inspection.

Elementary Schools.

20. *Elementary Day Schools.* — In 4,489 elementary schools 725,129 children were taught drawing, and 541,729 were examined at the annual examination in March 1879. These numbers, compared with those of 1878, present an increase of 319 schools, 64,598 children taught, and 38,286 examined; the corresponding totals in 1878 having been 4,170, 660,531, and 503,443. The total amount of the grants in aid of instruction in drawing in Elementary Schools in 1879 was 34,057*l.*, showing an increase of 5,244*l.* on the amount granted in 1878, namely, 28,813*l.*

Training Colleges.

21. *Training Colleges for Elementary School Teachers.* —At the examination of 48 Training Colleges, in November, 958 students in training, teachers, and pupil-teachers obtained certificates for drawing. The total amount granted to the Training Colleges was 1,261*l.* 10*s.*, being 322*l.* less than in 1878, when the total was 1,583*l.*

Grants towards cost of examples.

22. ***Grants in aid of the Purchase of Examples, Apparatus, and Fittings.***—In 1877 the sum granted towards the cost of purchasing Art examples &c., was 3,354*l.* 13*s.* 8*d.* on 607 requisitions; in 1878, 2,229*l.* 18*s.* 9*d.* on 507 requisitions, and in 1879, 1,362*l.* 12*s.* 10*d.* on 439 requisitions. These grants were supplemented by payments from Local Committees, who defrayed part of the cost of all the Examples purchased with the aid of the Department. The amount of this aid is at present limited to 50 per cent. of the cost of the articles.

Total number of persons instructed.

23. The grand totals of persons taught drawing, painting, or modelling through the agency of the Department, have been as follows during the last three years:—

1877.	1878.	1879.
610,620	727,874	795,444.

Payments on Results of Examinations.

24. ***Payments on Results.***—The following table shows the number of separate payments made on the results of examination:—

Nature of Payments.	1877.	1878.	1879.
1st Grade.—1*s.*, 1*s.* 6*d.*, 2*s.* 6*d.*, and 5*s.* on account of children taught and examined in Elementary Day Schools.	332,298*	365,785*	421,838*
2nd Grade.—10*s.* on account of students in Schools of Art and Art Classes; Pupil-Teachers in Elementary Day Schools, and students in Training Colleges.	16,505	15,830	16,780
Local Advanced Art Examination, 1*l.*, 2*l.*, or 3*l.* per student successful.	206	224	286
3rd Grade.—15*s.* on account of elementary works executed in Schools of Art, Art Classes, and Science Classes.	3,390†	2,907†	2,953†
3rd Grade.—20*s.* on account of advanced works executed in Art classes.	53	31	120
3rd Grade.—40*s.*‡ on account of advanced works executed in Schools of Art and in Science Classes.	958†	830†	746†
3rd Grade.—3*l.* on account of free studentships in Schools of Art.	160	151	139
3rd Grade payment of 5*l.* for each student prepared for a National Scholarship.	6	—	8
3rd Grade Certificate.—Payment of 10*l.* for each student obtaining an Art-Teacher's Certificate.	20	39	49
Total - -	353,596	385,797	442,919

* These numbers are the total numbers of the children on whose account payments were made, but as in many cases more than one payment per child has been allowed since 1876, the actual *number of payments* has been greater than the number above given.

† These are the numbers of those students who earned full payments under the rules of the Directory, with the addition of one payment to each school for those students who earned less than the full grant.

‡ This payment was raised in 1877 from 30*s.* to 40*s.*

Prizes.

25. *Prizes.*—The number of prizes awarded has been as follows :—

Nature of Prize.	1877.	1878.	1879.
1st Grade Prizes - -	27,041	25,062	30,541
2nd Grade Prizes - -	5,145	6,497	6,668
3rd Grade Prizes - -	1,107	1,236	1,335
Local Advanced Art Prizes -	—	35	36
National Competition Prizes -	244	299	304

26. It will be seen from the summary (at p. 502 of the Appendix) of returns for the five years 1875–79 that during that period the number of Schools and other institutions in which instruction is given in drawing or in higher Art, with the aid of the Department, and subject to its inspection, has increased from 3,904 to 5,415, while the total amount of the aid given by the Department in the form of payments on the results of this instruction, as tested by examinations, has risen from 38,528*l.* in 1875 to 56,692*l.* in 1879. The details relating to instruction in Art will be found in the Report of Mr. H. A. Bowler, at page 278, and its Appendices.

III.—SOUTH KENSINGTON MUSEUM.

New Buildings.

27. *New Buildings.*—Sir Philip Cunliffe-Owen, the Director of the Museum, refers to the progress made in the buildings. These when completed will afford ample accommodation for the Art, Educational, and Dyce and Forster Libraries.

India Museum.

28. *India Museum.*—The Secretary of State for India in Council having decided that this Collection should no longer continue to be administered by the India Office, it was determined that a large portion of it, comprising all the examples of industrial Art, should be transferred to our charge, and henceforth be considered a section of the South Kensington Museum. This transfer took place in the latter part of 1879, and the re-arrangement of the objects was at once put in hand. They will, for the present, remain in the

galleries to the east of the Horticultural Gardens, which by the liberality of the Commissioners for the Exhibition of 1851, have been placed at our disposal for this purpose at half the rent heretofore paid by the India Office.

Art Museum. Purchases.

29. *Art Museum.—Acquisitions.*—The most important acquisitions by purchase during the year have been in the divisions of Italian sculpture and Spanish industrial Art. Under the latter head are comprised some fine examples of goldsmiths' work, and numerous textiles. A silver toilet service of English 17th century work has been received under a bequest of the late Sir Walter C. Trevelyan, Bart. The loans during the year do not call for special remark.

Paintings.

30. *Oil and Water-colour Paintings.*—The report of Mr. Poynter, R.A., as to his charge of the British and Foreign pictures and drawings in the Fine Arts Collections will be found at p. 579.

Circulation.

31. *Circulation of Art objects.*—Collections have been lent to seven permanent museums, and to 22 local institutions. Statements of the attendance, receipts, &c. at these exhibitions will be found at p. 563. This branch of the operations of the Department becomes every year more important, and increasing efforts are made to meet the pressing applications for aid received from all parts of the country.

National Art Library.

32. *National Art Library.*—The detailed report of Mr. R. Soden Smith, the keeper of the Library, will be found at p. 536. It shows that the number of readers has increased, and that important additions have been made to each division of the Library.

Dyce and Forster Libraries.

33. *Dyce and Forster Libraries.*—The number of persons using these libraries has increased, notwithstanding the very limited accommodation which can be provided for readers in the present rooms. The reading room has been kept open till 6 daily during the summer months.

Educational Library.

34. *Educational Library.*—Mr. A. C. King, keeper of the Educational Division, reports that 1,306 books have been added during 1879 by donation, loan, or purchase. The number of readers was 24,733 against 24,791 in 1878. An analytical table of the contents of the library will be found at p. 540.

Educational Collections.

35. *Educational Collections.*—The collection of school furniture and fittings has been again removed, owing to the gallery in which it was shown being added to the space occupied by the National Portraits Commission. It is now imperfectly arranged in the entrance corridors and in a temporary wooden building.

Building Materials, Ship, and Machinery Models.

36. *The Collections of Building Materials, Ship, and Machinery Models, &c.*—Mr. Sandham, the officer in charge, reports numerous additions, chiefly by loan, to each of these divisions of the Museum.

Museum of Economic Fish Culture.

37. *The Museum of Economic Fish Culture.*—In these collections, which are the property of Mr. Frank Buckland, Inspector of Fisheries under the Home Office, the processes of the artificial breeding of fish continue to be successfully carried out.

Publications.

38. *Publications.*—A complete list will be found at p. 529 of the Appendix.

39. Messrs. Chapman and Hall have published a Handbook on the Industrial Arts of Spain by Señor Riaño, in continuation of the series mentioned in their Lordships' Report for 1875, and a new and enlarged edition of that on Persian Art.

Lectures.

40. *Public Lectures.*—The usual courses of Lectures on the Anatomy of the Human Form, and on the History and Development of Ornamental Art, were given by Mr. Bellamy and Dr. Zerffi respectively.

The attendance was as follows:—

Mr. Bellamy - - - -	1,461
Dr. Zerffi - - - -	2,921
	4,382

Visitors.

41. *Visitors.* The total number of visitors to the Museum was 879,395, a falling off as compared with the previous year of 5,107.

Returns of the attendance will be found at page 575, Appendix D.

IV.—Bethnal Green Branch Museum.

Loans.

42. On the dispersion of the loan collection of decorative furniture referred to in the last report of the Department, the space left vacant was occupied by the ancient and modern ironwork from South Kensington, which was thus more thoroughly displayed than had been possible for some years. Among these examples were included the gates by Huntingdon Shaw, formerly in the grounds of Hampton Court Palace. Many new loans of pictures have been received, and the walls of the picture galleries are well covered.

Food Collection.

43. *The Food Collection.*—Many desirable contributions have been received and analyses made of little known products.

44. *Animal Products Collection.*—No change of importance has taken place, but additions have been made to the collections of specimens of raw and manufactured silks. Animal Products Collection.

45. *Collection of Economic Entomology.*—This has been thoroughly revised and placed in the best possible order. Economic Entomology.

46. The number of visitors to the Museum during the year was 444,021, being a decrease of 55,360 on that of last year. Visitors.

V.—Museums in connexion with the Science and Art Department, supported by the State.

47. *Museum of Practical Geology.*—The curator of the Museum reports that the number of visitors during the year was 38,293, viz., 24,023 in the morning, and 14,270 in the evening. In 1878 the total number amounted to 40,211. Lists of the donations to the Museum and library are appended to the report. Museum of Practical Geology.

48. Mr. Etheridge's report on the Palæontological Department will be found at page 584; and the report of Professor Huxley on the Naturalist's Department at page 585. Palæontological Department. Naturalist's Department.

49. *Edinburgh Museum of Science and Art.*—The number of visitors during the year amounted to 647,294, or 249,111 more than in 1878. The large increase in the number of visitors was doubtless mainly due to the attractions of the Indian Gifts graciously lent to the Edinburgh Museum by His Royal Highness The Prince of Wales. The Piot collection of antique glass forms one of the most important acquisitions yet made for this Museum. Details will be found in the Director's report at page 602. Edinburgh Museum.

Dr. Traquair's report on the *Natural History Collections*, with lists of purchases, &c., will be found at page 607. The additions to these collections, both by purchase and gift, are stated to have been of an important character. Natural History Collections.

Science and Art Museum, Dublin.

50. The Director of the Science and Art Museum, Dublin, including the Natural History Museum, the National Library of Ireland, the Botanic Gardens, Glasnevin, and the Metropolitan School of Art, has reported on the Institutions under his charge for the year 1879. The reports will be found at pp. 618–35. Science and Art Museum Dublin.

51. Important additions have also been made by purchase and donation to the Natural History Museum. The Natural History Museum.

number of visitors during the year amounted to 163,881, being an increase of 40,237 on that for the previous year.

National Library of Ireland.

52. *National Library of Ireland.*—There were 31,120 readers in the Library in 1879, being an increase of 3,668 on the number for the previous year.

Glasnevin Botanic Gardens.

53. *Glasnevin Botanic Gardens.*—The usual exchange of plants and seeds with similar establishments at home and abroad has been kept up. The number of visitors during the year was 223,725, being 9,639 more than that for last year:

VI.—Geological Survey of the United Kingdom.

Area surveyed.

54. *Extent of Area surveyed.*—Professor Ramsay, the Director-General of the Geological Survey, reports that the total area surveyed in England and Wales during the past year amounts to 1,726 square miles, a decrease of 221 square miles as compared with the return for 1878; in Scotland 604¾ square miles, being an increase of 28¼ square miles upon the number for 1878; and in Ireland 560 square miles of fresh ground have been surveyed, and 1,394 square miles revised. The total area for the United Kingdom, exclusive of the 1,394 square miles re-surveyed in Ireland, amounts to 2,890¾ square miles, or 323¾ square miles less than in 1878.

Maps.

55. The preparation and publication of maps and memoirs have been continued. Full details of the progress made will be found in the Directors' reports at pages 580–596 of the Appendix. The index maps at page 587, also show the present state of the survey throughout the Kingdom.

Mining Record Office.

56. *Mining Record Office.*—The report of Mr. Robert Hunt, the Keeper of the Mining Records, upon his work in the mining districts of the West of England, and in Lincolnshire, Yorkshire, Derbyshire, and Staffordshire will be found at page 585. A list of the plans, &c. deposited in the office during the year is given at page 596.

VII.—Institutions and Societies which receive Aid from the State, subject to the Superintendence of the Science and Art Department.

57. *Royal Zoological Society of Ireland.*—Extracts from the report of the Council of this Society are given at page 636. The number of visitors to the gardens was 103,155, and the receipts for admission were 1,298*l.* 1*s.* 5*d.*

58. *Royal Hibernian Academy of Arts.*—The Council regret to state that a slight falling off is shown in the development of this Academy as compared with the general results of the last two years. The annual exhibition of works contained an unusual number of pictures of increased size and importance, and was well attended.

The report of the Council will be found at p. 640.

VIII.—Summary.

Attendance at Schools and Classes of Science and Art.

59. The numbers of persons who have during the year 1879 attended the schools and classes of Science and Art in connexion with the Department, are as follows, viz.:—59,519 attending Science schools and classes in 1879 as against 57,230 in 1878 (see §§ 1 to 4 above), and 795,444 receiving instruction in Art, showing an increase upon the previous year of 67,570. At the Royal School of Mines there were 23 regular and 168 occasional students; at the Chemical Department, Science Schools, 285 students; at the Metallurgical Laboratory, 74. At the Royal College of Science for Ireland there were 21 associate or regular students, and 39 occasional students.

Lectures.

60. The lectures delivered in the Lecture Theatre of the South Kensington Museum were attended by 4,382 persons. The evening lectures to working men at the Royal School of Mines were attended by 1,174 persons, being 511 less than last year; and 189 Science teachers attended the special courses of lectures provided for their instruction in the new Science schools at South Kensington.

61. The various courses of lectures delivered in connexion with the Department in Dublin were attended by about 703 persons.

62. The total number of persons, therefore, who received direct instruction as students, or by means of lectures, in connexion with the Science and Art Department in 1879, is 862,021, showing an increase as compared with the number in the previous year of 67,474, or more than 8 per cent.

Libraries.

63. The attendance at the Art and Educational Libraries at South Kensington and at the National Library of Ireland in 1879 has been 83,851, or an increase of 7,787 over that of last year.

Number of Visitors at Museums.

64. The museums and collections under the superintendence of the Department in London, Dublin and Edinburgh, were last year visited by 2,499,764 persons, showing an increase of 169,887 on the number in 1878.

Local exhibitions.

65. The returns received of the number of visitors at the Local Art and Industrial Exhibitions, to which objects were contributed from the South Kensington Museum, show an attendance of 581,922.

Total attendance.

66. The total number of persons who during the year 1879 attended the different institutions and exhibitions in connexion with the Department, has been upwards of 3,943,707. This total, compared with that of the previous year, presents an increase of 354,220.

Expenditure.

67. The expenditure of the Department during the financial year 1879–80, exclusive of the vote for the Geological Survey (which was 22,895*l.* 11*s.* 3*d.*), amounted to 295,229*l.* 12*s.* 8*d.*

All which is humbly submitted to Your Majesty.

South Kensington, this 16th day of July 1880

APPENDIX A.

MINUTES AND CORRESPONDENCE.

DONATION BY PROFESSOR TYNDALL, F.R.S.

At South Kensington, the 22nd day of October 1878.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

Professor Tyndall having offered to the Science and Art Department a donation of 100*l.* for the foundation of a prize, my Lords caused the following letter to be written :—

SIR, 24th October 1878.

I AM directed by the Lords of the Committee of Council on Education to convey to you the expression of their high appreciation of your liberal offer to found a prize in connexion with the Physical Laboratory at South Kensington.

Their Lordships have instructed the Director of the Science Division to arrange with yourself the various details in connexion with the prize.

I have, &c.

(Signed) NORMAN MACLEOD.

Professor Tyndall, LL.D., F.R.S.
&c. &c. &c.

ASTRONOMICAL PHYSICS.

At South Kensington, the 28th day of February 1879.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

My Lords consider the report made by Professor Stokes, Sec. R.S., Professor Balfour Stewart, F.R.S., and General Strachey, R.E., C.S.I., F.R.S., on Observations in Astronomical Physics, with the documents relating thereto, which were referred to them, viz. :—The eighth report of the Royal Commission on Scientific Instruction and the Advancement of Science as far as relates to such observations ; the memorial addressed to my Lords by Professor J. C. Adams and 12 other eminent astronomers and physicists ; and the correspondence with the India Office on the same subject : they consider also the representations made in March 1876 by a deputation from the Council of the British Association to His Grace the Lord President, with a view to induce the

Appendix A.

MINUTES AND CORRESPONDENCE.

Government to adopt the above-mentioned recommendations of the Royal Commission.

The Lords Commissioners of Her Majesty's Treasury having assented to the provision in the estimates of the Science and Art Department for the year 1879–80 of a small sum to defray the expenses of a Committee to advise on the methods of carrying on the observations, &c., my Lords direct that Professors Stokes and Balfour Stewart shall be requested to act thereon; and that the Committee shall consist of those gentlemen, with Mr. Norman Lockyer, F.R.S., and Captain Abney, R.E., F.R.S. They also direct that Lieut.-Col. Donnelly, R.E., be associated with the Committee for administrative purposes.

It does not appear advisable to frame detailed instructions for the Committee at the present time; but rather to leave it to them to carry forward, as far as may be, the recommendations contained in the report made by Professors Stokes and Balfour Stewart and General Strachey, with the funds provided in the estimates, supplemented by such instruments as are furnished by the India Office, or the Astronomer Royal, or from the science collections of the Department. They will also receive such assistance as can be afforded by the staff of the Department and in the laboratories of the Science School.

The Committee will see that one of their first duties will be to arrange for the reduction of the Indian observations; and they are authorised to place themselves in communication with the India Office on the subject.

My Lords will request General Strachey, on his return from India, to associate himself with the Committee.

NEWTON AND ALLEN MEMORIAL PRIZE.

At South Kensington the 13th day of May 1879.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

My Lords consider the proposal made by Mr. John Burnett (Amalgamated Society of Engineers, Machinists, Millwrights, Smiths, and Patternmakers) respecting the foundation of a prize to be called the Newton and Allen Memorial Prize, for which a sum of 170*l.* is available.

My Lords will, as requested, hold these funds in trust, and apply the interest annually as a prize in connexion with the May examinations of the Science and Art Department on the conditions proposed, viz.:—

1. That the prize be called the Newton and Allen Memorial Prize.
2. That it be awarded to that student among a given list of competitors who does best in the subjects, Steam, Machine Construction and Drawing, and Mathematics, the system of award in marks, &c., being the same as that given in the Science Directory for Royal Exhibitions.
3. That the list of competitors be furnished to the Department by the Council of the Society or their secretary annually before the 1st May.
4. That the prize be in books selected from the prize list of the Department, or in money, at the option of the successful student.

FOLEY BEQUEST.

LIEUT.-COLONEL DONNELLY, R.E., to the Right Hon. the LORD MAYOR OF DUBLIN.

MY LORD, 14th August 1879.

I AM directed by the Lords of the Committee of Council on Education to state that it having been found impossible, with the means at its command, for the Science and Art Department to repair and send to the Science and Art Museum in Dublin, the whole of the casts bequeathed by the late Mr. Foley, R.A., or to provide space for them when there, a committee of sculptors was appointed to make a selection of such as could be put in a state for exhibition for 500*l*., the sum of money allocated by the Lords Commissioners of Her Majesty's Treasury for the purpose. It is believed that all the principal works, of which the originals are not already in Dublin, are included in the list of works selected, and which have been sent to Leinster House. But, as will be seen from the accompanying list, there are a number of casts still at South Kensington. It is not the intention of their Lordships to retain any of them for this Museum. The executors to whom they were offered under the terms of the will have declined them, but have sanctioned their being offered to Schools of Art and other public institutions. Before doing this, however, my Lords would be glad to know if the corporation of the city of Dublin desire to have any of them on the same terms that they will be offered to Schools of Art, viz., that they shall defray the cost of packing and removal.

To assist the corporation in coming to a decision, Mr. Brucciani's estimate for the repair of each cast is added to the list.

I have, &c.,

(Signed) J. F. D. DONNELLY,
Lieut.Colonel, R.E.

CASE OF MR. GOFFIN.

Circular to Science and Art Committees.

At Whitehall the 19th day of August 1879.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

1. The Lords of the Committee of Council on Education desire to call the attention of the Local Committees of Science and Art Schools and Classes to the accompanying report of a Select Committee of the House of Commons; and especially to that part of it relating to the conduct of examinations.

2. This Committee was specially appointed to inquire into the circumstances leading to the suspension of the certificate of Mr. Goffin, Head Master of the United Westminster Schools, as there seemed strong reasons for believing that a thorough investigation into his system of preparation would lead to the detection of wholesale and long-practised frauds. This belief has been thoroughly borne out by the unanimous verdict of the Select Committee.

3. A perusal of the evidence, both oral and documentary, on which this report is based with the previous Parliamentary papers on the subject must render it evident to the Committees of Science and Art Schools that the frauds committed by Mr. Goffin were rendered possible by a want of necessary care and vigilance on the part of the committees under whose superintendence he taught, arising no doubt from the

Appendix A.

MINUTES AND CORRESPONDENCE.

thorough confidence which they seemed to have placed in his honesty and trustworthiness.

4. No evidence whatever has been produced to show that Mr. Goffin obtained an illegitimate knowledge of the examination papers either from the examiners, or the printers, or the staff of the Science and Art Department: on the contrary the time at which he communicated to his pupils answers to the questions set, makes it almost certain that he obtained his information after the papers had been sent through the post to the Local Committeee, and during the time the Local Secretary was responsible for their safe custody.

5. It is equally clear that no adequate supervision was kept by the committee over the attendance registers, which (although as it now appears fraudulently falsified by Mr. Goffin), had attached to them the signatures of members of the committee certifying that they were correct. My Lords cannot state too plainly, that for the proper keeping of the attendance register, they must rely solely upon the local body who undertake the superintendence of the classes, and on whose certificates that the registers are properly kept, the payments are made.

6. In the case of Mr. Goffin, the committees who had undertaken to exercise a proper supervision over him were content with a most perfunctory discharge of their duties.

7. My Lords are disposed to believe that this is an entirely exceptional case—that notwithstanding the early delivery of the examination papers, an arrangement made to secure the candidates and teachers against disappointment and loss through delays in the post, it has seldom been possible for a teacher to obtain access to, or information of, the contents of the papers—and that even when by any accident the packets containing them passed through a teacher's hands previous to the examination, his integrity and honesty were proof against the temptation to take unfair advantage of the confidence reposed in him. Still my Lords cannot but agree with the Committee of the House of Commons, that further precautions are necessary to prevent a possibility of the recurrence of these disgraceful practices. A change has already been made by which the period between the reception of the examination papers by the Secretary of the Committee, and the examination itself is considerably diminished. Other precautions are now under consideration.

8. A general revision of the Local Committees of Schools seems however now to be necessary, in order to secure the co-operation on them of such persons only as can, and will, give both their time and attention conscientiously to the work. My Lords cannot sufficiently impress on those who thus voluntarily undertake to superintend classes, that the duties they assume are a serious reality, and involve grave responsibilities, public money being paid on the faith of their certificate that it has been properly earned.

9. The accompanying form, No. 88, somewhat modified, and rendered more precise than it was formerly, is therefore circulated to all committees for signature. My Lords regret the unnecessary trouble that this may in many cases entail. It is, however, necessary that the new form should be signed by all committees alike.

10. My Lords take this opportunity of pointing out, that under the present system of conducting Science and Art Examinations, much must at all times be left to local management, and confidence must be largely reposed in it, unless the State is prepared to incur a greatly increased expenditure. Under this, as under any other system, irregularities will from time to time occur, and in their investigation my Lords are anxious that their officers should, if it be possible, act in concert with those gentlemen who are charged with the local management and supervision of the classes. This, however, is not always practicable, as

circumstances may often render it imperative, as in the recent case, that the inquiry should be held instantly.

11. It must, however, be clearly understood that while my Lords are ready to give the local committees, or teachers concerned, all necessary information as to the grounds of any proposed decision, they alone are responsible to Parliament, both as to the persons whom they recognise as qualified to teach, as well as to the conditions upon which the funds placed at their disposal for the encouragement of Science and Art instruction are distributed. So long as my Lords are charged with this reponsibility, they cannot allow any other body to interpose in the exercise of their discretion. In the Directories for Science and Art annually issued by my Lords, one of the conditions upon which aid to classes is granted, is that the Department is the sole judge with regard to all grants and awards. On this understanding alone, grants are paid and classes recognised.

REPORT OF THE SELECT COMMITTEE OF THE HOUSE OF COMMONS.

THE SELECT COMMITTEE appointed to inquire into and report upon the circumstances relating to the suspension of the certificate of Mr. Goffin by the Science and Art Department, have agreed to the following report:

Your Committee are satisfied from evidence taken on oath, and from documents laid before them:—

(*a.*) That Mr. Goffin the head-master of the United Westminster Schools, did disclose to his pupils in certain science classes, just previous to the examinations, the answers to a large number of questions in the examination papers.

(*b.*) That the information which he thus gave was of such a nature that he must, before imparting it to his classes, have known the contents of the examination papers.

(*c.*) That the registers containing the attendance roll of the pupils of Mr. Goffin, were in certain cases falsified by Mr. Goffin and his assistants to obtain payment on pupils who had not made the necessary number of attendances.

(*d.*) That the statements in the petitions signed by pupils and teachers on Mr. Goffin's behalf, and presented to the Governors of the United Westminster Schools, were false, and were known by some of the signatories to be so.

Previous to his appointment in 1874, as head-master of the United Westminster Schools, Mr. Goffin was master of St. John's School, Woking. Your Committee have taken evidence as to his system of teaching science there, and from that evidence it is clear—

(*a.*) That a large number of pupils, including mere children, were enabled to pass examinations in a great number of science subjects of which they knew scarcely anything, by being systematically taught by heart, on the day of, or the day previous to the examination, answers to the questions set.

(*b.*) That fraudulent fabrication of the attendance registers was systematically practised in order to obtain payment upon the pupils who by another fraud had been enabled to pass the examination.

The investigations now held have disclosed the fact that Mr. Goffin has carried on a course of fraud in a manner and to an extent which must have greatly lowered the tone of morality among a large body of scholars and teachers,

Your Committee record their emphatic opinion that fraud, thus reduced to a system, and almost elevated to the dignity of an art, requires

Appendix A.

MINUTES AND CORRESPONDENCE.

the immediate attention of the Education Department, with a view to the adoption of such further precautions as will prevent a repetition of these disgraceful practices.

Your Committee further express a hope that the Department will deal as leniently as their public duty will allow with the teachers who, in the course of this inquiry, have by their evidence exposed themselves to the charge of complicity with some of Mr. Goffin's proceedings.

1st August 1879.

The following are the titles of the Parliamentary papers relating to the case.

Copy of all papers and correspondence which has passed between the Science and Art Department and the Committee of Class No. 3150, relating to the examination held on 16th May 1878, together with copy of the memorandum made by the Department in reference to the case.—Ordered to be printed 5th March 1879. No. 86. Science and Art Department.

Copy of reports and correspondence and memorandum referred to in Parliamentary paper, No. 86, "Science and Art Department," pp. 36 and 37.—Ordered to be printed 14th May 1879. No. 182. Mr. Goffin.

Report from the Select Committee on Mr. Goffin's certificate, together with the proceedings of the Committee, minutes of evidence, and appendix.—Ordered to be printed 1st August 1879. No. 334. Mr. Goffin's certificate. Price 3*s.* 4*d.*

RESOLUTION of the GOVERNORS of the UNITED WESTMINSTER SCHOOLS.

United Westminster Schools *re* Goffin.

At a special meeting of the Governors held at the Irish Chamber, Guildhall, on the 14th day of October 1879, it was—

Resolved, that this Board feel that the decision in Mr. Goffin's case by the Parliamentary Committee cannot be regarded as final, owing to the fact that the inquiry was conducted with closed doors, that he was not allowed to be present except while giving his evidence, that he was not heard by counsel or permitted to cross-examine witnesses, and that while more than 20 witnesses tendered themselves to give evidence on his behalf, only one was allowed to be heard. They cannot therefore conscientiously come to a vote of dismissal which would entirely ruin an officer whom they have hitherto trusted as a high minded man. They therefore request the Department from which the charge emanated to give Mr. Goffin the opportunity which he desires of vindicating his character by a trial in a court of law.

Resolved that a copy of this resolution be sent to the Science and Art Department.

(Signed) C. SPENCER SMITH,
Clerk to the Governors.

Alexandra Street, Westminster,
15th October 1879.

At South Kensington 21st day of November 1879.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

1. The Lords of the Committee of Council on Education have had before them the resolutions adopted by the Governors of the United

Westminster Schools at their Meeting of the 14th October last with reference to Mr. Goffin.

2. In these resolutions the Governors whilst impugning the course of procedure adopted by the Select Committee of the House of Commons in their inquiry, refuse to accept its decision as final, and call on my Lords to give Mr. Goffin an opportunity of vindicating his character in a court of law.

3. At the time when the Vice-President moved for the appointment of a Select Committee to inquire into and report upon the circumstances relating to the suspension of Mr. Goffin's certificate, Sir S. Waterlow, M.P., the Chairman of the Board of Governors, and advowedly acting on their behalf, had also given notice that he would move for a Committee for the same purpose.

4. While serving on the Select Committee Sir S. Waterlow was in constant communication with Mr. Goffin and those acting for him. Yet at the close of the proceedings he himself proposed a draft report stating that the Science and Art Department was fully justified in suspending Mr. Goffin's certificate.

5. The Committee of the House of Commons thus unanimously confirmed the opinion formed by the Committee of Council on Education of Mr. Goffin's guilt. If the Governors are dissatisfied with the unanimous decision of the tribunal to whom they specially appealed, it rests with them to carry Mr. Goffin's case to another court.

6. The Governors in a letter in July 1878 stated that unless the charges against Mr. Goffin were withdrawn he would take steps to vindicate his character in a court of law, an opportunity of doing which it appears he still desires. The charges have not been withdrawn, but on the contrary the suspension of Mr. Goffin's certificate has been made absolute. Yet the indicated legal proceedings have not taken place. The whole of the evidence taken before the Select Committee was given on oath. If the Governors believe this evidence to be false an opportunity of vindicating Mr. Goffin's character is at once offered by a prosecution for perjury of the witnesses who gave this evidence.

7. My Lords must request the Governors to recollect that the last payments on account of Science and Art instruction were made, not to Mr. Goffin but to the Chairman and to the Secretary of the Governors, on the strength of a certificate signed by two of the Governors and the Secretary, stating that all the regulations of the Department had been complied with.

8. My Lords remark that the minutes of evidence taken by a Committee of the Governors, on which that body first grounded their opinion of Mr. Goffin's innocence, show the perfunctory nature of their inquiry, and do not bear out the statements in the Governor's letter of July 1878, said to be founded thereon. If, however, with a view to justify their conduct in retaining at the head of an important public institution a man who has been found by a Committee of the House of Commons to be guilty of the grave charges that are brought against him, the Governors of the United Westminster Schools desire to have the proceedings of that tribunal, to which they themselves appealed, revised, it is for them now to take such steps as they may consider advisable.

9. My Lords regard the report of the Select Committee in the case of Mr. Goffin as final, and they therefore decline to enter into any further correspondence with the Governors on the subject.

Appendix A.

MINUTES AND CORRESPONDENCE.

CORRESPONDENCE relating to the AGREEMENT between the SCIENCE AND ART DEPARTMENT and the ROYAL DUBLIN SOCIETY.

1.—MR. NORMAN MACLEOD to the SECRETARY, H. M. TREASURY.

Science and Art Department, London, S.W.,
9th June 1879.

SIR,

WITH reference to the letter from this Department of the 27th May, enclosing a draft memorandum of the terms of the agreement with the Royal Dublin Society, I am directed by the Lords of the Committee of Council on Education to transmit, for the information of the Lords Commissioners of Her Majesty's Treasury, the enclosed complete copies of the agreement containing the plan referred to.

I have, &c.
(Signed) NORMAN MACLEOD.

TERMS OF AGREEMENT.

1. In consideration of the payment of 25,000*l.*, the Government to be discharged from all claims under clauses 9 and 10 of the agreement of 5th March 1877.

2. The Royal Dublin Society to retain the right to office accommodation for its functions in Agriculture, reserved to it by section 1 of the agreement of the 5th March, provided that such office accommodation be the same with, and no greater than, such as would be necessary for the Society's functions in Science; and provided that, if hereafter any amalgamation takes place between any section of the Royal Dublin Society and another society, such amalgamation shall not entitle the other society to any rights of occupation in Leinster House unless a special sanction be obtained from the Government.

3. The Royal Dublin Society to have the rooms in Leinster House indicated by a cross on the subjoined plans, viz., four rooms on the ground floor (A, B, C, and E), one room on the first floor (*b*), and suitable accommodation in the basement for a servant and stores. The Trustees of the Library and the Visitors of the Museum to have the right to hold their meetings in one of the rooms on the ground floor, either B or C.

4. The Royal Dublin Society to have the use, but not the exclusive use, of the entrance hall and passages to these rooms, not only for the purposes of access to their rooms, but to place the statuary and other works of Art reserved to the Society by section 2 of the agreement of the 5th March. Accommodation to be provided for hats and coats in the hall. Subject to these requirements of the Society, the space to be available for the Science and Art Museum. When the Library is removed, apartments to be allocated to a resident officer of the Royal Dublin Society. In the meantime provision to be made by the Science and Art Department for the ordinary cleaning of the Society's rooms in Leinster House.

5. The appropriation of rooms to be liable to revision by the Lords of the Committee of Council on Education when the new Science and Art Museum is built, provided that the Royal Dublin Society does not receive less accommodation by such new arrangement. Nothing in this agreement shall affect the operation of clause 1 of the agreement of the 5th March 1877, except so far as it applies to Agriculture.

6. The Agricultural shows to be removed from Kildare Street within a year from the payment of the first instalment of 10,000*l.*; it being understood that the offer of temporary office accommodation made by letter dated 26th

November 1878 to the Irish Government for the Agricultural section in Kildare Street is not renewed. Appendix A. MINUTES AND CORRESPONDENCE.

7. The Treasury to withdraw the present limit of an expenditure of 300*l.* per annum on the printing of the scientific proceedings and transactions of the Society; that is to say, that all strictly scientific proceedings and transactions of the Society received within the period mentioned in the agreement will be printed in as good a manner as those of the Royal Society, and 1,000 copies furnished to the Society free of expense. But the Society to be at liberty to get further copies struck off at its own expense.

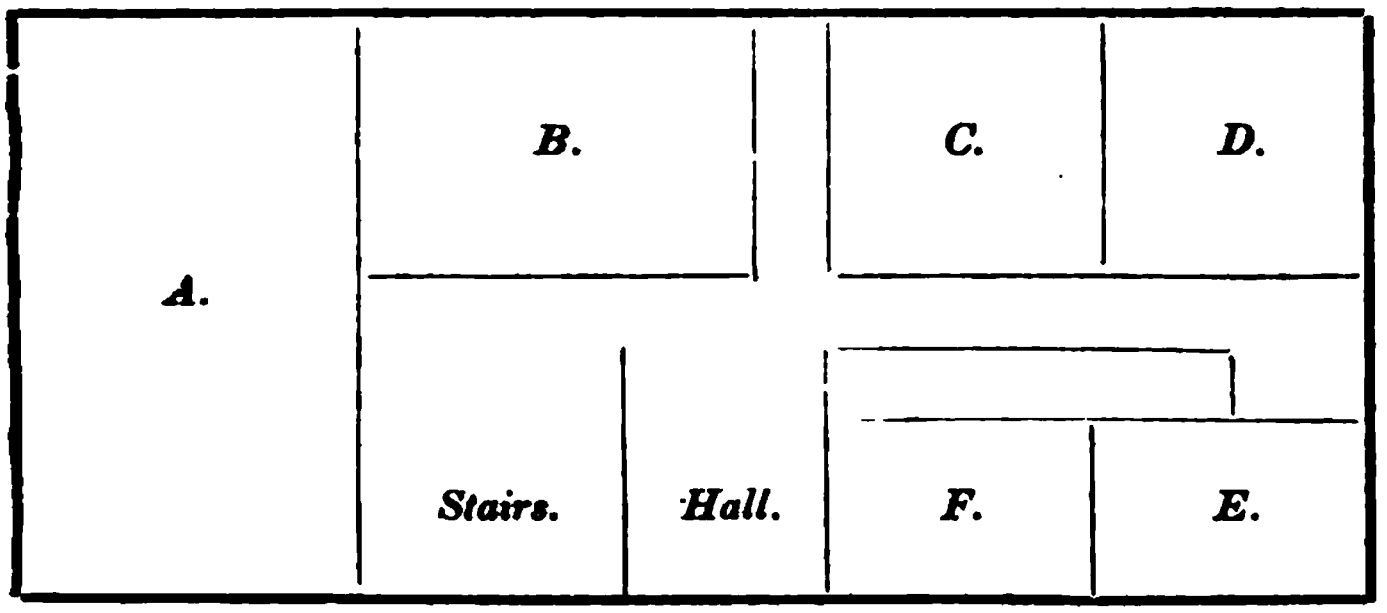
8. The payment of 25,000*l.* to be in three instalments; 10,000*l.* this year, 10,000*l.* in 1880, and 5,000*l.* in 1881.

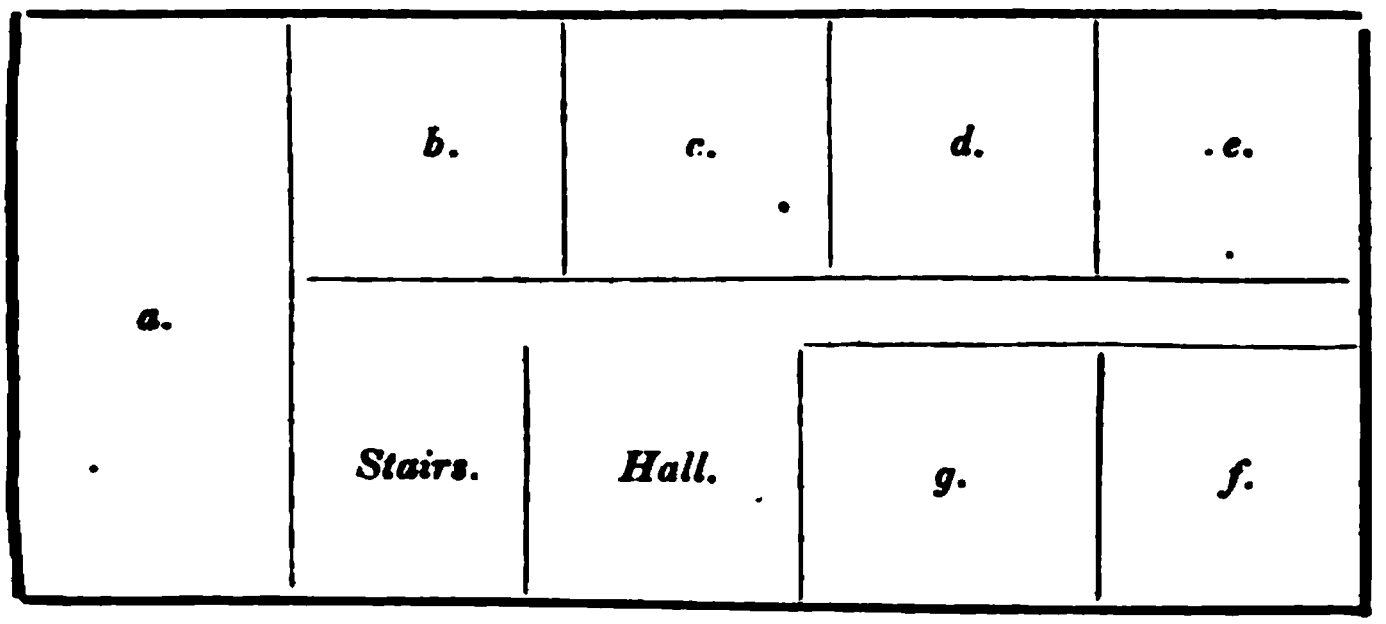
(Signed) GEORGE HAMILTON,
Vice-President of the Committee of Council on Education.

27th May 1879.

(Signed) G. JOHNSTONE STONEY,
Hon. Secretary of the Royal Dublin Society.

29th May 1879.





2.—SIR R. R. W. LINGEN, K.C.B., to LORD GEORGE HAMILTON, M.P.

MY LORD, Treasury Chambers, 12th June 1879.

WITH reference to your Lordship's letters of the 27th ultimo and 9th instant, enclosing a printed copy of a draft memorandum of agreement with the Royal Dublin Society, I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, for the information of the Lords of the Committee of Council on Education, that my Lords are pleased to sanction the terms of the draft memorandum, and they have given the necessary directions in the matter to the Board of Public Works, Ireland, and to the Controller of the Stationery Office.

Appendix A.

MINUTES AND CORRESPONDENCE.

My Lords will cause a supplementary estimate to be presented in the month of July next for the first instalment of 10,000*l*., payable this year under clauses 1 and 8 of the memorandum, and in the event of this sum being voted by Parliament, the Royal Dublin Society may expect to receive it some time in the month of August next.

I am, &c.
(Signed) R. R. W. LINGEN.

3.—MR. R. H. WYATT to MR. G. JOHNSTONE STONEY.

(Copy received from Mr. Wyatt on 27th June.)

28, Parliament Street, Westminster,
20th June 1879.

DEAR SIR,

I HAVE re-drawn this agreement, embodying the new terms as I understand them.

Will you kindly look at the enclosed copy of my draft and let me have your views thereon.

I am, &c.
(Signed) R. H. WYATT.

AN AGREEMENT made this day of 187 , between the Department of Science and Art incorporated by Royal Charter bearing date the 30th day of April 1864, in this agreement referred to as the Department, and the Commissioners of Public Works in Ireland (in this agreement referred to as the Commissioners) of the one part, and the Royal Dublin Society for the Promotion of Husbandry and other useful Arts and Sciences in Ireland, in this agreement called the Society, of the other part.

WHEREAS in consequence of representations made to Her Majesty's Government, and of the recommendations contained in the report made in the year 1868 by the Commission presided over by his Grace the Duke of Leinster, the Lords of the Committee of Council on Education framed a scheme which met with the approval of Her Majesty's Government for the purpose of augmenting and extending facilities for Science and Art instruction in Ireland.

And whereas the terms of the said scheme as far as they affected the Society were submitted to it and with the modifications received its sanction.

And whereas in the session of Parliament of 1877 the Dublin Science and Art Museum Act, 1877, was passed for the purpose of carrying into effect the arrangement come to between Her Majesty's Government and the Society, and in the 16th section of the Act it is declared, "that for the purpose of "giving effect to the objects of this Act, and generally in furtherance of or in "connexion with the same, it shall be lawful for the Commissioners of Public "Works in Ireland, or the Department and the Society respectively, to enter "into all or any agreements, contracts, and arrangements (not inconsistent "with the prvisions of this Act) which they may think fit, and to do all acts, "matters, and things necessary to carry the same into effect, and every such "agreement, contract, and arrangement shall be of the same force and effect "as if the same had been contained in this Act."

And whereas some of the objects and provisions of the said Act have been carried into effect.

And whereas il pursuance of the powers so conferred on the parties hereto it is agreed as folows :—

1. The memorandum of agreement dated the 5th of March 1877, and signed by the Right Hon. William Henry Smith (then Secretary to the Treasury) and G. Johnstone Stoney, Secretary to the Royal Dublin Society, shall, so far as the provisions thereof remain unperformed, but without prejudice to anything done in pursuance thereof, be and the same is hereby annulled and superseded.

2. The Society shall have such accommodation in Leinster House, free of rent and taxes, as in the judgment of the Lord President of the Council and the Vice-President of the Committee of Council on Education is sufficient for the functions of the Society still remaining to it in Science and Agriculture, provided that the office accommodation for Agriculture be the same with, and no greater than, such as would be necessary for the Society's functions in Science, and provided that if hereafter any amalgamation takes place between any section of the Royal Dublin Society and another society, such amalgamation shall not entitle the other society to any rights of occupation in Leinster House, unless a special sanction be obtained from the Government. The conditions of occupation shall be the same as those accorded to the learned societies in Burlington House.

3. For the present the Society shall have the following accommodation in Leinster House, viz., the four rooms on the ground-floor marked A, B, C, and E on subjoined plan, and one room on the first floor marked *b*, and suitable accommodation in the basement for a servant and stores, and the Trustees of the Library and the Visitors of the Museum shall have the right to hold their meetings in either of the said rooms on the ground-floor marked B and C on the said plan hereto annexed.

4. The Society shall have the use, but not the exclusive use, of the entrance hall and passages to these rooms not only for the purposes of access to their rooms, but to place the statuary and other works of Art reserved to the Society by section 2 of the agreement of 5th March, and the Department shall provide reasonable accommodation for hats and coats in the hall. Subject to these requirements of the Society the space shall be available for the Science and Art Museum.

5. When the Library is removed from Leinster House the Department shall allocate to a resident officer of the Society suitable apartments. In the meantime provision shall be made by the Department for the ordinary cleaning of the Society's rooms in Leinster House.

6. The appropriation of rooms shall be liable to revision by the Lords of the Committee of Council on Education, when the new Science and Art Museum is built, provided that the Society does not receive less accommodation by such new arrangement.

7. The grant of 10,000*l.* already paid to the Society for their lands shall be invested by the Society with the approval of the Treasury, and be made subject to the trusts of the present charters, or any alteration of them, in full compensation for any proprietary right of the Society in the lands, buildings, or connexions, with the exception of the scientific serials, the transactions, &c. of other learned societies, and the works of Art at present in Leinster House, of which last a list is appended hereto. The Society shall afford full and free access to the public at all reasonable times to the serials and transactions above referred to.

8. The Commissioners shall pay to the Society out of moneys provided by Parliament the sum of 25,000*l.* in three instalments, viz.:—10,000*l.* in the present year (1879), 10,000*l.* in the year 1880, and 5,000*l.* in the year 1881, and in consideration of the payment of such sum of 25,000*l.* the Society shall discontinue to hold Agricultural shows in Kildare Street, Dublin, and shall provide lands and buildings for holding such shows elsewhere, and the Government and every department thereof shall be discharged from any further claims in respect of the removal of such shows, and providing accommodation elsewhere for the same, or in anywise incidental thereto.

9. The Agricultural shows shall be removed from Kildare Street within a year from the payment of the first instalment of 10,000*l.*, it being understood that the proposal to provide temporary office accommodation for the agricultural section of the Society in Kildare Street is not renewed.

10. The opinion of the Librarian of the British Museum shall be taken as to any earlier editions of modern books or duplicates which in his judgment are not required for the National Library, and such books shall be re-transferred to the Society.

11. The Society shall in future provide its own staff of officers and its own printing, but the Government will authorise the Stationery Office to continue

Appendix A. — Minutes and Correspondence.

to print the proceedings and transactions of the Society, limiting them strictly to its scientific work, for a period of five years from the date of the transfer of the collections, with a view of assisting the Society to re-organise itself on an independent basis, and such printing shall be executed in as good a manner as that of the Royal Society, and 1,000 copies shall be furnished to the Society free of expense, but the Society shall be at liberty to get further copies struck off at their own expense.

12. The lecture hall, laboratory, and the necessary offices shall be reserved to the Society, or an equivalent provided.

13. The existing privileges of passing through Leinster Lawn shall be reserved to members of the Society.

14. Subject to the consent of the director the collections in the Botanic Gardens and the Natural History Museum shall be available as heretofore in illustration of the papers read before the Society.

15. Members who joined the Society before the 1st day of January 1878, of whom a certified list shall be furnished by the Society to the Department annually before the 1st April, shall be allowed to borrow books from the Library, subject to regulations to be laid down by the Trustees of the Library and the Department, and shall have free admittance to the Museum at all times at which it is open to the public.

16. The Library shall be under the superintendence of a Council of 12 Trustees, eight of whom shall be appointed by the Society and four by the Department, and the officers of the Library shall be appointed by the Council of Trustees.

17. Any vacancy in the office of Trustee occasioned by death, resignation, removal, disqualification, or any other cause whatever, shall be filled up with all convenient speed by the appointment of a new Trustee by the Society or by the Department, as the case may be, by whom the Trustee whose vacancy is to be filled up may have been originally appointed.

18. In order to aid the Lords of the Committee of Council on Education in the administration of the Science and Art Museum, the Natural History Collection, and the Botanic Gardens, a Board of Visitors shall be constituted, consisting of 12 members, four to be appointed by the Lord Lieutenant, five by the Society, and three by the Royal Irish Academy. The members so to be appointed shall go out of office at the expiration of five years from the date of their appointment, but shall be eligible for re-appointment, and a president shall be elected from the said 12 members annually by the Board. The duties of the Board of Visitors shall be to make annual reports to the Department on the condition, management, and requirements of the Museum, and to advise on points affecting the administration, and a copy of such reports shall be laid before Parliament by the Department.

19. Any vacancy on the Board of Visitors occasioned by death, resignation, removal, disqualification, or any other cause whatever, shall be filled up with all convenient speed by the appointment of a new member by the person or body by whom or which the member whose vacancy is to be filled up may have been originally appointed.

20. The Department shall, at the request of the Society, join in a recommendation to Her Majesty to grant such a new charter or charters as in the opinion of the Society may be required by the altered circumstances and condition of the Society.

21. If any differences shall arise between the parties hereto, such differences shall be left to the sole arbitrament of the Lord President of the Council for the time being.

4.—Mr. G. Johnstone Stoney to Mr. R. H. Wyatt.

(Copy received from Mr. Wyatt, 4th July.)

Royal Dublin Society, Kildare Street,
1st July 1879.

My dear Sir,

Immediately on receipt of your note of the 25th ultimo, enclosing draft agreement, we submitted it to our counsel in order to comply with your request that we should let you know our views thereon.

I have now the pleasure of returning it as amended by him where he thought it essential, and we trust that such alterations as he found it necessary to make, will meet with your full approval.

Yours, &c.

(Signed) G. JOHNSTONE STONEY.

AN AGREEMENT made this day of 187 , between the Department of Science and Art incorporated by Royal Charter bearing date the 30th day of April 1864, in this agreement referred to as the Department, and the Commissioners of Public Works in Ireland (in this agreement referred to as the Commissioners) of the one part, and the Royal Dublin Society for the promotion of Husbandry and other useful Arts and Sciences in Ireland, in this agreement called the Society, of the other part.

WHEREAS in consequence of representations made to Her Majesty's Government and of the recommendations contained in the report made in the year 1868 by the commission presided over by his Grace the Duke of Leinster, the Lords of the Committee of Council on Education framed a scheme, which met with the approval of Her Majesty's Government, for the purpose of augmenting and extending facilities for Science and Art instruction in Ireland.

And whereas the terms of the said scheme as far as they affected the Society were submitted to it in a letter from the Vice-President of the Committee of Council on Education to the secretaries of the Society, dated 9th February 1876, and with modifications received its sanction in a memorandum of provisions supplementary to said letter, dated 5th March 1877.

And whereas in the Session of Parliament of 1877 the Dublin Science and Art Museum Act, 1877, was passed for the purpose of carrying into effect the arrangement come to between Her Majesty's Government and the Society, and in the 16th section of the Act it is declared, "that for the purpose of "giving effect to the objects of this Act, and generally in furtherance of or "in connexion with the same, it shall be lawful for the Commissioners of "Public Works in Ireland, or the Department and the Society respectively, "to enter into all or any agreements, contracts, and arrangements (not "inconsistent with the provisions of this Act) which they may think fit, and "to do all acts, matters, and things necessary to carry the same into effect; "and every such agreement, contract, and arrangement shall be of the same "force and effect as if the same had been contained in this Act."

And whereas some of the objects and provisions of the said Act have been carried into effect.

Now these presents witness that in pursuance of the powers so conferred on the parties hereto it is agreed as follows :—

1. The Society shall have such accommodation in Leinster House free of rent and taxes as is sufficient for the functions of the Society still remaining to it in Science and Agriculture, provided that the office accommodation for Agriculture be the same with and no greater than such as would be necessary for the Society's functions in Science, and provided that if hereafter any amalgamation shall take place between any section of the Royal Dublin Society and another society, such amalgamation shall not entitle the other Society to any rights of occupation in Leinster House unless a special sanction be obtained from the Government. The conditions of occupation shall, for the present, be as nearly as practicable the same as are accorded to the Learned Societies in Burlington House, and when the Library is removed from Leinster House shall be identical therewith.

2. The Society shall have the following accommodation in Leinster House, viz., the four rooms on the ground floor, A, B, C, and E on subjoined plan, and one room on the first floor marked *b*, and suitable accommodation in the basement for a servant and stores, and the Trustees of the National Library and the Visitors of the Museum shall have the right to hold their meetings in one of the said rooms on the ground floor marked B and C on the said plan hereto annexed.

Appendix A.

MINUTES AND CORRESPONDENCE.

3. The Society shall have the use, but not the exclusive use, of the entrance hall and passages to these rooms, not only for the purposes of access to their rooms, but to place therein the statuary and other works of Art reserved to the Society by section 4 of the Dublin Science and Art Museum Act, 1877, and reasonable accommodation for hats and coats in the hall shall be provided by the Department. Subject to these requirements of the Society, the said space shall, for the present, be available for the purpose of the Museum of Science and Art.

4. When the library is removed from Leinster House, suitable apartments therein shall be allocated to a resident officer of the Society. In the meantime provision shall be made by the Department for the ordinary cleaning of the Society's rooms in Leinster House.

5. The appropriation of rooms shall be liable to revision by the Lords of the Committee of Council on Education when the new Science and Art Museum is built, provided that the Society shall not receive less accommodation by such new arrangement than that provided, or agreed to be provided, by the several clauses herein-before contained.

6. The Society shall afford full and free access to the public at all reasonable times to the scientific serials and the transactions and other publications of other Learned Societies reserved to them by the 4th section of the Dublin Science and Art Museum Act, 1877.

7. The Commissioners shall pay to the Society out of moneys provided by Parliament the sum of 25,000*l.* in three instalments, viz., 10,000*l.* in the present year (1879), 10,000*l.* in the year 1880, and 5,000*l.* in the year 1881, and in consideration of the payment of such sum of 25,000*l.* the Society shall discontinue to hold agricultural shows in Kildare Street, Dublin, and shall provide lands and buildings for holding such shows elsewhere, and the Government and every department thereof shall be discharged from any further claims in respect of the removal of such shows and providing accommodation elsewhere for the same, or in anywise incidental thereto.

8. The agricultural shows shall be removed from Kildare Street within a year from the payment of the first instalment of 10,000*l.*

9. The opinion of the Librarian of the British Museum shall be taken as to any earlier editions of modern books or duplicates which in his judgment are not required for the National Library, and such books shall be re-transferred to the Society.

10. The Society shall in future provide its own staff of officers and its own printing, but the Government will authorise the Stationery Office to continue to print the proceedings and transactions of the Society, limiting them strictly to its scientific work, for a period of five years from the date of the transfer of the collections, with the view of assisting the Society to re-organise itself on an independent basis, and such printing shall be executed in as good a manner as that of the Royal Society, and 1,000 copies shall be furnished to the Society free of expense, but the Society shall be at liberty to get further copies struck off at its own expense.

11. The lecture hall, laboratory, and the necessary offices are reserved to the Society, or an equivalent will be provided.

12. The privilege of passing through Leinster Lawn and the courtyard of Leinster House is reserved to members of the Society.

13. Subject to the consent of the Director the collections in the Botanical Gardens and the National History Museum shall be available as heretofore in illustration of the papers read before the Society.

14. Members who joined the Society before the 1st day of January 1878, of whom a certified list shall be furnished by the Society to the Trustees of the Library annually before the 1st April, shall be allowed to borrow books from the Library, subject to regulations to be laid down by the Trustees of the Library, and shall have free admittance to the Museum at all times at which it is open to the public.

15. The National Library shall be under the superintendence of a Council of twelve Trustees, eight of whom shall be appointed by the Society, and four by the Department, and the officers of the Library shall be appointed by

the Council of Trustees. The Trustees to be appointed by the Society shall be appointed in such manner and shall hold office for such term as the Society shall from time to time determine by byelaw.

16. Any vacancy in the office of Trustee occasioned by death, resignation, removal, disqualification, or any other cause whatever, shall be filled up with all convenient speed by the appointment of a new Trustee by the body by whom the Trustee whose vacancy is to be filled up shall have been originally appointed.

17. In order to aid the Lords of the Committee of Council on Education in the administration of the Science and Art Museum, the Natural History Collection, and the Botanic Gardens, a Board of Visitors shall be constituted, consisting of twelve members, four to be appointed by the Lord Lieutenant, five by the Society, and three by the Royal Irish Academy. The members so to be appointed by the Society shall be appointed in such manner and shall hold office for such term as the Society shall from time to time determine by byelaw. A president shall be elected annually by the Board from the said twelve members. The duties of the Board of Visitors shall be to make annual reports to the Department on the condition, management, and requirements of the Museum, and to advise on points affecting the administration, and a copy of such reports shall be laid before Parliament by the Department.

18. Any vacancy on the Board of Visitors occasioned by death, resignation, removal, disqualification, or any other cause whatever, shall be filled up with all convenient speed by the appointment of a new member by the person or body by whom or which the member whose vacancy is to be filled up shall have been originally appointed.

19. Nothing herein contained shall prevent the Commissioners or the Department of Science and Art, and the Society respectively from entering into any further or other agreements not inconsistent with the provisions of the said Act either in modification of, substitution for, or addition to the provisions herein contained, or any of them, or otherwise for the purpose of giving effect to the said Act, or in furtherance of or in connexion with the same.

5.—Mr. R. H. Wyatt to Mr. G. Johnstone Stoney.

(Copy received from Mr. Wyatt.)

Science and Art Department and Royal Dublin Society.

Dear Sir, 28, Parliament Street, 5th August 1879.

I submitted your proposed amendments to my draft agreement to the Committee of Council on Education, and I understand that their Lordships will make no objection to the proposed alterations, with the exception of those specified in the next paragraph of this letter.

The alterations they object to are as follows:—the numbers of the clauses being taken as in the unaltered agreement.

1. The omission in clause 2 of the words "in the judgment of the Lord "President of the Council, and the Vice-President of the Committee of "Council on Education."

2. The insertion of the words "for the present" between the words "shall" and "be available" in clause 4.

3. The omission of the word "Department" and the substitution therefor of the words "Trustees of the National Library" in clause 15.

4. The omission of the words "and the Department" towards the end of clause 15.

I presume that the latter part of clause 9 is omitted because it is unnecessary, and not because there is any doubt as to the absolute withdrawal of the offer of office accommodation for the Agricultural Section in Kildare Street. There is no note on the draft returned to me opposite this alteration.

Appendix A.

MINUTES AND CORRESPONDENCE.

I see no objection to the omission of the clauses providing for the grant of a new charter or charters if this is the wish of the Society. But as much stress was laid at one time by the Delegates on this point, I should wish it to be made clear that they desire the clause to be struck out.

There is no note on the draft opposite to this alteration.

I send you herewith a print of the agreement embodying all your alterations except those enumerated above.

Yours, &c.
(Signed) R. H. WYATT.

6.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

Royal Dublin Society, Kildare Street,
11th August 1879.

DEAR SIR,

I HAVE submitted your letter of the 5th instant and its enclosure to the Delegates.

The Delegates desire me to express their satisfaction at finding that the draft as amended by our counsel has met with your concurrence, with but few exceptions.

You have rightly understood the intention of the Delegates in omitting the latter part of clause 9 of the original draft (clause 8 as printed). It was unnecessary, as being quite understood.

Similarly with respect to the clause of your original draft referring to the charters. It was struck out because counsel considered it is not necessary for the Department to join in the recommendation which the Government have, in clause 15 of the agreement of the 5th March 1877, undertaken to make to Her Majesty in relation to the charter or charters which the Society still intends to apply for.

With reference to your proposal, regarding clause 1 of the draft as printed, this clause must be read in connexion with the subsequent clauses, and especially clause 5. Our counsel considered that the words which you propose to introduce could not be inserted in clause 1, without imperilling the future right of the Society to its accommodation. In making the present allocation of rooms the Government *has* exercised the discretion reserved to it by clause 1 of the agreement of the 5th March 1877, and by clause 5 of the present draft the Society leaves to the Department the same discretion as to the extent of any increased accommodation which the Society shall hereafter get.

In clause 3 (as printed) the delegates propose to substitute the words "until the Library is removed" instead of "for the present" to which you have objected. These words will express more accurately the agreement come to. The words, "This is already provided for by the Act," at the end of clause 5, should be omitted, having been obviously inserted by mistake.

It appears to the Delegates that clause 14 as submitted by them, is to be preferred, but they accept the amendments proposed by you.

Faithfully yours,
(Signed) G. JOHNSTONE STONEY,
Honorary Secretary.

7.—LIEUT.-COLONEL DONNELLY, R. E., to MR. R. H. WYATT.

Science and Art Department, London, S.W.,
19th August 1879.

SIR,

IN reply to your letter dated the 12th August, enclosing copy of a letter from Mr. G. J. Stoney, dated 11th August, on the subject of the draft agreement with the Royal Dublin Society, I am directed by the Lords of the Committee of Council on Education to inform you—

1. It does not appear clearly what is meant by the following paragraph of Mr. Stoney's letter. "It" (the clause in your original draft referring to the

charters) "was struck out because counsel considered that it is not necessary "for the Department to join in the recommendation which the Government "have, in clause 15 of the agreement of the 5th March 1877, undertaken to "make to Her Majesty in relation to the charter or charters which the "Society still intends to apply for."

The Department, or the Lords of the Committee of Council on Education, are the Government as far as this matter is concerned. And my Lords understood that the first paragraph in your draft agreement which provided for annulling and superseding the agreement of the 5th March 1877, was struck out by the Royal Dublin Society on the ground that that last-named agreement had "been put an end to by the Act."

My Lords can have no objection to the withdrawal of this clause in the agreement if it be the wish of the Society. But if it be not clear that the agreement of the 5th March 1877 is wholly annulled and superseded by the Act, it should be clearly so stated in this new agreement, and the clause in draft providing for this should be re-introduced.

II. The next paragraph of Mr. Stoney's letter states "with reference to "your proposal regarding clause 1 of the draft as printed, this clause must "be read in connexion with the subsequent clauses, and especially clause 5. "Our counsel considered that the words which you propose to introduce "could not be inserted in clause 1 without imperilling the future right of the "Society to its accommodation. In making the present allocation of rooms "the Government *has* exercised the discretion reserved to it by clause 1 of "the agreement of the 5th March 1877, and by clause 5 of the present draft "the Society leaves to the Department the same discretion as to the extent "of any increased accommodation which the Society shall hereafter get."

Now, my Lords consented to the omission of the words "for the present," in the 3rd clause of your draft agreement (now the 2nd clause), at the request of the Royal Dublin Society, as they considered it unnecessary to insist on their retention if the words "in the judgment of the Lord President of the Council and the Vice-President of the Committee of Council on Education" were retained in the preceding clause.

It seems to my Lords that it would be better that these words should be retained. With a view, however, of removing difficulties in the way of the completion of the agreement they will not insist on this point.

III. In order to make clause 2 read with clause 5, it would appear necessary that it should commence with the words "until the new Science and Art "Museum is built."

IV. My Lords cannot consent to the insertion of the words "for the present," or "until the Library is removed," in clause 3. The insertion of these words would convey the idea that, when the Library is removed, the Society are to have the exclusive use of, and right over, the entrance hall and passages to the rooms. This was never intended and cannot now be granted.

V. Through an oversight it was not remarked that the last clause in your original draft had been struck out. This ran as follows:—"If any difference "shall arise between the parties hereto such difference shall be left to the sole "arbitrament of the Lord President of the Council for the time being." My Lords are of opinion that this clause should not be omitted but that such arbitration should be provided for.

I am, &c.
(Signed) J. F. D. DONNELLY,
Lieut.-Colonel, R.E.

8.—MR. G. JOHNSTONE STONEY to LORD GEORGE HAMILTON, M.P.

Royal Dublin Society, Kildare Street,
4th October 1879.

MY LORD,

I AM directed by the Council of the Royal Dublin Society to inform your Lordship that they have by the annexed resolution appointed a deputation to meet your Lordship, if you visit the Royal Dublin Society during your stay in Ireland; and I am to request that you will be so good as to acquaint

Appendix A. — Minutes and Correspondence.

the Society with the time of your visit in order that the deputation may be in attendance.

I remain, &c.
(Signed) G. Johnstone Stoney,
Honorary Secretary.

Copy of a Minute of Council.

Sir Geo. F. Hodson, Bart., V.P. in the Chair.

Royal Dublin Society, Kildare Street,
2nd October 1879.

"Resolved that in the event of a visit to the Royal Dublin Society by Lord George Hamilton during his stay in Ireland, a deputation, consisting of the gentlemen who recently went to London as Delegates, be appointed to attend on such occasion, and that Mr. Stoney be requested to intimate that this arrangement has been made."

9.—Mr. R. H. Wyatt to Mr. G. Johntsone Stoney.

(Copy received from Mr. Wyatt.)

Science and Art Department and Royal Dublin Society.

My dear Sir, 29, Parliament Street, S. W., 17th October 1879.

My holiday is over, and I shall now be very glad to get this matter finally settled. I am glad to see that there are very few points in difference between the contracting parties.

I sent a copy of your letter of the 11th August to the Department, and I beg to send you an extract of their reply upon the only points in difference.

Upon hearing from you that you agree to the stipulations of the Department I will get the agreement engrossed for execution.

I may mention that I propose to reinstate my clause declaring that the agreement of 1877 shall be annulled, for although the Act does in part supersede that agreement, it does not wholly do so.

Yours, &c.
(Signed) R. H. Wyatt.

10.—Mr. Norman MacLeod to Mr. R. H. Wyatt.

Science and Art Department, London, S.W.,
Sir, 27th October 1879.

With reference to the correspondence concerning the agreement between this Department and the Royal Dublin Society, I am directed to request that you will inform me what is the present state of the question.

I am, &c.
(Signed) Norman MacLeod.

11.—Mr. G. Johnstone Stoney to Mr. R. H. Wyatt.

(Copy received by the Department from Mr. Wyatt, 29th October 1879.)

Royal Dublin Society, Kildare Street,
Sir, 25th October 1879.

The Delegates of the Royal Dublin Society have considered your letter of the 17th instant and its enclosures, and they trust that the copy of the agreement as I now enclose it will be acceptable to the Department.

The Delegates consent to re-insert clause 20, relating to the charters, in compliance with the wish of my Lords, and acquiescing with my Lords in the desirableness of having a ready mode of settling any difference should such arise, they propose that clause 21 be re-inserted, substituting the Lord Lieutenant as the referee instead of the Lord President. This will, amongst other advantages, obviate the heavy expense and great inconvenience of sending deputations to London.

The Delegates regret that the objection raised by their Counsel to the words in clause I., which have been struck out, apply with equal force to the insertion of the words "until the new Science and Art Museum is built," which my Lords now propose to insert at the beginning of clause 2, and on account of the insecurity in which these words would leave the Society the Delegates are unable to consent to them.

The Delegates must again urge that "for the present," or "until the re-"moval of the Library," or some equivalent clause should form part of the last sentence of clause 3. My Lords, in objecting to this essential clause, observe that the exclusive use of and right over the entrance hall and passages to the Society's rooms "was never intended." But this is a misapprehension, for the main intention of the provision in the 1st clause of the agreement of 1877, that the condition of occupation should be the same as at Burlington House, was that if part of the house were occupied otherwise than by the Society after the removal of the Library (as proposed in Lord Sandon's original letter), a separate entrance should be provided for the other occupants, so as to leave the Society with its own building completely under its control, and as independent as the societies at Burlington House.

The Delegates do not understand the last paragraph of your letter of the 17th instant, or the object or effect of inserting the clause you therein propose, and beg to be informed of this before they give their consent.

I am, &c.
(Signed) G. Johnstone Stoney,
Hon. Secretary.

12.—Mr. Norman MacLeod to Mr. G. Johnstone Stoney.

Science and Art Department, London, S.W.,
Sir, 1st November 1879.

In reply to your letter of the 4th ultimo, addressed to the Vice-President of the Committee of Council on Education, I am directed to inform you that Lord George Hamilton will be glad to meet the deputation from the Royal Dublin Society at Leinster House on Saturday next, the 8th instant, at 11 o'clock a.m.

I am, &c.
(Signed) Norman MacLeod

13.—Mr. R. H. Wyatt to Mr. Norman MacLeod.

Science and Art Department and Royal Dublin Society.

28, Parliament Street, Westminster, S.W.,
Sir, 10th November 1879.

On Saturday afternoon a letter, dated the 3rd instant, of which I send you copy, was received here. There has evidently been some delay either in the postage or delivery of the letter.

I am, &c.
(Signed) R. H. Wyatt.

Enclosure.

Mr. G. Johnstone Stoney to Mr. R. H. Wyatt.

Royal Dublin Society, Kildare Street,
My dear Sir, 3rd November 1879.

The Delegates would feel very much obliged to you if you would let them know by Friday next at farthest, what determination has been come to with reference to the last draft of the agreement, as I enclosed it to you on the 25th ultimo.

The reason the Delegates are anxious to have your answer by Friday is that Lord George Hamilton has signified his intention of visiting the Society on Saturday, and that the Delegates would wish to avoid bringing any matter which has been settled under his notice.

Appendix A.

MINUTES AND CORRESPONDENCE.

With reference to a clause annulling the agreement of 1877, the Delegates see no objection to such a clause, provided that it is drawn in such a way as will not take away from the Society its right under clause 15 of that agreement to ask the Irish Government (through whom all *Irish* Charters must be obtained) for its co-operation, and provided provisional appointments made *ad interim*, pending the signing of the formal agreement, such as the provisional appointments of Trustees of the Library and of Visitors of the Museum, shall need the confirmation of the Society *after the agreement is signed*, so that the promise given in your letter of the 6th June 1877 may be carried out.

Believe me, &c.,
(Signed) G. JOHNSTONE STONEY,
Hon. Secretary.

14.—MR. NORMAN MACLEOD to MR. R. H. WYATT.

Science and Art Department, London, S.W.,
28th November 1879.

SIR,

THE Lords of the Committee of Council on Education have had under their consideration your letters of the 28th October and 10th November, enclosing copies of letters from the Royal Dublin Society of the 25th October and 3rd November (the latter apparently delayed in the post), on the subject of the draft agreement. Dealing with the last-mentioned letter first, my Lords find that the Secretary of the Royal Dublin Society states on behalf of the Delegates "With reference to a clause annulling the agreement of 1877, the "Delegates see no objection to such a clause provided that . . . . . "provisional appointments, made *ad interim*, pending the signing of the "formal agreement, such as the provisional appointments of Trustees of the "Library, and of Visitors of the Museum, shall need the confirmation of the "Society *after the agreement is signed*, so that the promise given in your "letter of the 6th June 1877 may be carried out."

The promise in your letter of the 6th June 1877 was to the effect that "the memorandum and letter can and will be carried out under the power to "make agreements contained in the Bill, as soon as conveniently may be "after it shall have become law."

Appointments as Visitors to the Museum and Trustees of the Library were made in accordance with the letter referred to in the beginning of 1878. And it does not appear how it will tend to carry out your promise now to make these appointments retrospectively provisional.

My Lords are not aware—but this is a point on which you will no doubt advise them—that acts performed in accordance with a written undertaking between two parties require to be confirmed after the agreement has been put in legal phraseology. If the necessity exists in this instance, it must exist in all the other matters which form the subject of the agreement, and which have been already carried out.

On the other hand, the Royal Dublin Society in nominating their quota of both bodies did not suggest that it was a provisional arrangement, nor was any intimation given to the various noblemen and gentlemen when they were appointed that their appointments were merely *ad interim*, pending the completion of a formal agreement to do what was then being done. And they may very naturally be annoyed at having been placed in this false and ambiguous position.

Under these circumstances, and if my Lords are correct in the foregoing assumption that the confirmation is legally unnecessary, they must decline to accept this proviso as regards any trustees appointed by the Government or the Royal Irish Academy.

My Lords, however, can have no objection to the Royal Dublin Society exercising their discretion as regards their own appointments.

As respects the clause annulling previous agreements, the delegates say they "see no objection to such a clause, provided that it is drawn in such a

" way as will not take away from the Society its right under clause 15 of " that agreement to ask the Irish Government (through whom all Irish " charters must be obtained) for its co-operation."

The Lords of the Committee of Council on Education are prepared to re-insert the clause which was struck out by the Delegates, or one to the same effect, undertaking that, in the words of the agreement of the 5th March 1877, " the Government will be prepared, at the request of the Society, to recom- " mend to Her Majesty to grant such a new charter or charters as in the " opinion of the Government may be required by the altered circumstances " and condition of the Society." As the undertaking or agreement is made by one department of the Government on behalf of the Government of the country as a whole, it is not apparent why the fact that Irish charters must be obtained through the Irish Government should influence the form of the agreement any more than the fact that an English charter must be obtained through the Lord Chancellor of England.

Reverting now to the letter from the Delegates, it is perhaps as well to point out that my Lords have no wish to re-introduce the clause about charters. This is a matter purely for the Royal Dublin Society. But my Lords are of opinion that an annulling clause, as proposed by you, is absolutely necessary to prevent future misunderstandings.

With regard to the arbitration clause, as it would be an unusual arrange- ment to make one department of the State arbitrators in respect of the action of another department, my Lords are of opinion that if the Royal Dublin Society object to the clause in the form proposed by you, it would be better to omit it altogether.

As respects clause 2 of the draft agreement as it at present stands, the Delegates say " They regret that the objection raised by their counsel to the " words in clause I. which have been struck out, apply with equal force to " the insertion of the words ' until the new Science and Art Museum is built,' " which my Lords now propose to insert at the beginning of clause 2, and on " account of the insecurity in which these words would leave the Society the " Delegates are unable to consent to them."

If the insertion of the words "until the new Science and Art Museum is built" does, as a matter of legal drafting, introduce any insecurity, my Lords trust you will be able to find others not open to this objection. But it must be made quite clear that the appropriation of rooms provided for in this is provisional—that is to say, that, as stated in the " terms of agreement " signed on the 29th May last by Lord George Hamilton and Mr. G. Johnstone Stoney, the appropriation of rooms is liable to revision by my Lords when the new Science and Art Museum is built, provided that the Royal Dublin Society does not receive less accommodation by such new arrangement. Clause 2 of the draft agreement as it at present stands, seems to conflict with clause 5, in that the re-appropriation provided for by the latter is not contemplated in the former clause. My Lords desire that this should be made clear, but of course do not wish to introduce any other uncertainty.

As respects clause 3 of the draft agreement, as it at present stands, the Delegates urge that "for the present," or " until the removal of the Library," or some equivalent words should form part of its last sentence, on the ground that it is a misapprehension on the part of my Lords to suppose that it was never intended to give the Royal Dublin Society the exclusive use of and right over the entrance hall and passages to the rooms. And the delegates found their contention on this point, on the argument that " the main inten- " tion of the provision in the first clause of the agreement of 1877, that the " condition of occupation should be the same as at Burlington House, was " that if part of the house were occupied otherwise than by the Society, after " the removal of the Library (as proposed in Lord Sandon's original letter) a " separate entrance should be provided for the other occupants, so as to leave " the Society with its own building completely under its control, and as inde- " pendent as the societies at Burlington House."

Now, as the draft agreement at present under correspondence is, as far as relates to accommodation in Leinster House, simply for the purpose of reducing to legal phraseology the " terms of agreement " signed by Lord

Appendix A.

MINUTES AND CORRESPONDENCE.

G. Hamilton and Mr. G. Johnstone Stoney on the 29th May last, it would be sufficient on this head to point out that clause 4 of those terms is quite clear and explicit in this matter. It states "the Royal Dublin Society "to have the use, but not the exclusive use, of the entrance hall and passages "to these rooms, not only for the purposes of access to their rooms, but to "place the statuary and other works of art reserved to the Society by section "2 of the agreement of 5th March. Accommodation to be provided for hats "and coats in the hall. Subject to these requirements of the Society, the "space to be available for the Science and Art Museum."

But in order to prevent any misunderstanding in this rather important matter, it may be as well to point out to the delegates that the whole of the previous correspondence and agreements show that it was never contemplated or suggested that the Royal Dublin Society should have the exclusive control of the entrance hall and passages, still less that the whole of Leinster House should be the Society's "own building completely under its control."

Paragraphs 4 and 8 of Lord Sandon's letter of the 9th February 1876 show that the idea at that time was to provide for the Royal Irish Academy and the offices of the Geological Survey in addition to the Royal Dublin Society in Leinster House, and there is no mention of separate entrances. The memorandum of provisions supplementary to those contained in Lord Sandon's letter before referred to, which was accepted by the Delegates from the Society and Mr. Smith on behalf of the Government, on the 5th March 1877, and which fixed the sum of money to be given to the Society "in full compensation "for any proprietary rights of the Society in the land and buildings," commences as follows:—"The Government will allot to the Royal Dublin "Society in Leinster House such accommodation, free of rent and taxes, as, "in the judgment of the Government, is sufficient for the functions of the "Society still remaining to it in Science and Agriculture."

The provision in this 1st clause referred to by the Delegates that "the "conditions of occupation will be the same as those accorded to the Learned "Societies in Burlington House," immediately follows that sentence. It was inserted by Mr. Smith, then Secretary of the Treasury, as he has stated, with the view of defining the conditions of tenure, and not with a view of fixing the amount or nature of the accommodation. But, whatever may have been the intention of inserting the provision, it is evident that it cannot be construed as giving the Society the control of the whole building. Such a construction of the sentence would render it not explanatory but destructive of the preceding part of the clause. In this memorandum again there is no mention or suggestion of a separate entrance.

Before Burlington House was pulled down the Royal Society and the Linnean Society both occupied rooms in it and had the entrance hall and door in common. The separate suites of rooms, or rather houses, in the block of buildings now called Burlington House, were built specially for the several societies, one entrance gateway being common to all. But the fact that it was proposed from the first that Leinster House should be occupied by two societies and departmental offices shows that such an arrangement as exists in the block of buildings called Burlington House could never have been intended; and, as far as my Lords are aware, this claim now under consideration has never been even alluded to in any of the lengthened previous correspondence. In Appendix A. to Mr. G. J. Stoney's letter to Mr. Robinson of the 20th January 1879, which discussed very fully this question of accommodation, the only claim founded on the reference to Burlington House was with regard to apartments for a superior officer and porter, and in that Appendix his Grace the Lord Lieutenant is requested to "allocate to the Society the use, "as heretofore, but not the exclusive use, of the entrance hall and passages of "the building."

It is, however, scarcely necessary to enter further on this point, for should any allusion in the correspondence, &c., have been overlooked, it cannot affect the present agreement; for all questions with regard to accommodation were finally settled by the "terms of agreement" of the 29th May last, which terms of agreement are, my Lords presume, legally binding on both parties in default of any more formal document being framed.

My Lords are most anxious that this business should be settled without delay. It is evident that no progress can be made unless care be taken in framing the legal document which is to embody agreements already made, and in great part acted on, to avoid the re-opening of matters finally settled by those agreements.

My Lords therefore empower you, as soon as you have satisfied yourself on the legal points raised, to communicate this letter to the Delegates, with a view to impress on them the necessity for not introducing new questions.

I am, &c.
(Signed) NORMAN MACLEOD.

15.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt, 28th December 1879).

Royal Dublin Society, Kildare Street,
24th December 1879.

MY DEAR SIR,

Mr. MacLeod's letter is so very long, and makes so many statements which require answers from the Delegates, that their reply is necessarily long. It was found convenient to have it set up in type, and I avail myself of this circumstance to send it to you in its printed form, which will make it more easy for you to read and consider.

I enclose with it two copies, and am desired to request that you will place one of these in Mr. Smith's hands and the other in the hands of Lord George Hamilton.

Believe me, &c.
(Signed) G. JOHNSTONE STONEY.

ENCLOSURE I.

MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

SIR, Royal Dublin Society, December 23rd, 1879.

THE Delegates of the Royal Dublin Society have had under their most careful consideration your letter of 6th instant, and its enclosure, namely, the letter from the Science and Art Department to you of the 28th ult.; and, following the order of that letter, they have instructed me to give the following replies to the several matters dealt with in it.

1. Paragraphs 1, 2, 3, 4, 5, 6, and 7 of Mr. MacLeod's letter deal with the claim of the Society, that appointments made *ad interim*, pending the signing of formal agreements, such as the provisional appointments of Trustees of the Library and of Visitors of the Museum, shall need the confirmation of the Society after the agreement is signed, so that the promise given in your letter of 6th June 1877 may be carried out. The Delegates receive with satisfaction the declaration which my Lords make in § 7, that they "can have no objec-"tion to the Royal Dublin Society exercising their discretion as regards their "own appointments;" and the Delegates request you to make this clear by the terms of the agreement.

In regard to § 6, in which my Lords "decline to accept this proviso, as "regards any trustees appointed by the Government or the Royal Irish "Academy," the Delegates desire me to say that this is perfectly satisfactory to them, and to observe, that neither they nor anyone else acting on behalf of the Royal Dublin Society has at any time sought to interfere with matters that concern other corporations.

2. After the explanation which my Lords have given in § 9 of their letter, the Delegates no longer feel any difficulty in assenting to the clause with respect to charters as drafted by you, viz.:—"The Department shall, at the "request of the Society, join in a recommendation to Her Majesty to grant "such a new charter or charters, as in the opinion of the Society may be "required by the altered circumstances and conditions of the Society;" and to an annulling clause, which shall leave the Society the right to appoint Trustees and Visitors after the agreement is signed. Would not the simplest way of making this clear be to provide that the persons who have been

Appendix A. — MINUTES AND CORRESPONDENCE.

provisionally appointed by the Society, shall retain their seats only until other appointments are made by the Society? The Society, on its part, will lose no time, after the agreement is signed, in making its appointments under the agreement.

3. As my Lords, in § 11, object to the proposal of the Delegates to make the Lord Lieutenant of Ireland, arbitrator, the Delegates suggest that the Chancery Division of the High Court of Justice in Ireland shall be made arbitrator. This is the arrangement which, in the opinion of the Delegates, would most effectually secure that justice shall be done to all parties to the agreement, if any disputed case should arise. If, however, my Lords object to this, which the Delegates believe would be the best arrangement, the Delegates assent to the omission of an arbitration clause, as proposed by my Lords.

4. In § 16 of his letter Mr. MacLeod says, "that the whole of the previous "correspondence and agreements show that it was never contemplated or "suggested that the Royal Dublin Society should have the exclusive control "of the entrance hall and passages, still less that the whole of Leinster House "should be the Society's 'own building, completely under its control.'"

I am desired by the Delegates to point out that two statements are made here, with the second of which the Delegates have no concern, as it is irrelevant, the Society having at no time claimed under its agreements the whole of Leinster House.

But with the first of the two statements the Society is vitally concerned. So far from that statement being correct, it was, on the contrary, in the interviews with the Government in 1877, which issued in the agreement of the 5th March 1877, not only "contemplated and suggested," but required by the Delegates and promised by the Government, that the final outcome of the whole transaction should be, that the Society should have its portion of the building, including the entrance to it, as exclusively to itself and under its control as are the portions of Burlington House under the control of the several societies located there; in other words, as completely under its control as are the houses in a street under the control of the several occupiers of them. The promise of the Government was, that the final result, when the Library is removed, shall be that the Society shall occupy its portion of Leinster House in this and all other respects under precisely the same conditions as the London Learned Societies occupy theirs at Burlington House. It was exclusively to effect this that the words referred to by Mr. MacLeod were introduced into the agreement of 1877, viz.: "The conditions of occupation "will be the same as those accorded to the Learned Societies in Burlington "House."

With respect to the supposition of Mr. MacLeod, that this is a claim not before made, the Delegates refer:—(1.) To the long discussion on this point during the negotiations between the Government and the Delegates in 1877, which occupied the greater part of one sitting, and resulted in the introduction of the foregoing clause. (2) To the report of the Delegates printed at p. 110 of the 26th Report of the Department, in which the following passages occur: The first of the fundamental conditions upon which alone the Delegates consented to treat were:—

> "That the arrangements to be then agreed upon should be such, and should be worked out so as to give to the Society as absolute independence of all Government Departments as the Learned Societies at Burlington House enjoy; inasmuch as the Society was to cease to be the agent for the Government to administer Science and Art grants in Ireland.
>
> "To this the representatives of the Government assented."
>
> * * * * * * *
>
> "Clause 1 of the agreement of the 5th March 1877 was then drawn up. In the first portion of this clause the Government reserved to themselves the right to determine whether the Society did require the increased accommodation when the Library should be removed. And in the second part they engaged that the Society should be secured from all interference, under the same conditions as are accorded to

the Learned Societies in Burlington House, *where each society has complete command of a separate building.*"

(3.) The Delegates have also to refer my Lords to the letter from the Council of the Society to the Department, printed at p. 116, consenting to sign the further agreement of May 1879, in which the following passage occurs :—

> "The Council has hereby consented *temporarily* to accept for the Society conditions of occupation in Leinster House, which do not secure to it the complete autonomy and independence reserved to it under clause 1 of the agreement of 5th March 1877. They have accepted this arrangement because of the limited accommodation available *until the Library is removed*, and from an anxious desire to aid the Science and Art Department in giving early effect to the national benefits promised by Lord Sandon's letter." . . . .

(4.) And finally, the Delegates have to refer to the terms of the further agreement of May 1879, in which it is provided:—

> "*Nothing in this agreement* shall affect the operation of clause 1 of the agreement of the 5th March 1877, except so far as applies to Agriculture."

These words were introduced by the Lord President, when the Delegates had explained to him that in proposing clause 4 of the further agreement (that relating to the hall and passages), the Government asked the Society to accept conditions of occupation which fell short of those to which the Society was entitled under clause 1 of the original agreement; that the Delegates on the part of the Society were ready to assent to this, as the only practicable arrangement so long as the Library is in the house, but had no authority to contract away the rights of the Society to enforce ultimately (*i.e.*, when the Library is removed) the complete fulfilment of these conditions. They therefore declined to accept the further agreement unless it contained a reservation of this right, and the words proposed by the Lord President were thereupon introduced. The Society has, by the further agreement, postponed the enforcement of this right, "because of the limited accommodation available "until the Library is removed, and from an anxious desire to aid the Science "and Art Department in giving early effect to the national benefits promised "by Lord Sandon's letter." But the Society considers it essential to its future independence, to secure which was made a condition precedent to its entering into any contract whatever for the transfer of its property (*see* Blue Book, Condition 1, p. 111), that in this and all other important respects, the conditions under which it occupies its portion of Leinster House shall be ultimately identical with those enjoyed by the Learned Societies at Burlington House. The Delegates, therefore, think themselves justified in requiring, and bound to require, that words shall be introduced into the instrument you are preparing expressly providing that none of the clauses embodying the provisions of the further agreement of May last, shall interfere with the right of the Society to the conditions of occupation specified in clause 1 of the original agreement, whenever the Society chooses to insist upon them; which it intends to do so soon as the Library is removed from Leinster House, as directed by the Act of Parliament.

Lord Sandon's letter of the 9th February 1876, to which reference is made by the Department in § 17 of their letter, has no bearing on the present question, as all parts of that letter which contemplated the assumption of the property of the Society without adequate compensation to it, were superseded by the agreement of 1877 and the Act of the same year under which the property was transferred. The Act provides that the Society is to be maintained, and that the premises are to be held by the Commissioners of Works, and the collections by the Department of Science and Art, in trust for its use and for that of the public, the limits of the Society's use being those defined by the agreement of March 1877, which the Government undertook, through their parliamentary agent, to make an agreement under the Act, one of the provisions of the agreement being that the Society, within its portion of Leinster House, is to enjoy conditions of occupation the same as those of the Learned Societies at Burlington House—a right which the Delegates on

Appendix A.

MINUTES AND CORRESPONDENCE.

behalf of the Society agreed to postpone, but had no authority to resign, in negotiating the further agreement of May 1879.

In § 19 of his letter, Mr. MacLeod informs you that the clause in question "was inserted by Mr. Smith, then Secretary of the Treasury, as he has "stated, with the view of defining the conditions of tenure, and not with a "view of fixing the amount or nature of the accommodation."

The Delegates desire me to say that there is some mistake here. Either Mr. Smith has been misunderstood, or he has spoken without perceiving that conditions of occupation and conditions of tenure are different, and without remembering the circumstances under which the clause defining the conditions of occupation was inserted.

The conditions of tenure of the Royal Dublin Society have nothing whatever in common with the conditions of tenure of the societies at Burlington House. The use of Burlington House is a gift from the public to the Royal Academy and the Learned Societies in London; the use of a suitable part of Leinster House was *reserved* to the Royal Dublin Society *under agreement and by Act of Parliament* as one of the conditions under which it parted with other parts of its property. Hence, the interpretation which Mr. MacLeod desires now to put upon the phrase "conditions of occupation" is, from the nature of the negotiations, untenable. It could not mean that two different tenures are the same, even if the words admitted of that interpretation, which they do not.

In consequence, however, of Mr. MacLeod's reference to a statement made by Mr. Smith, the Delegates desire me to request that you will lay before Mr. Smith the following narrative of what took place in negotiating this clause, in order to revive his memory of the circumstances.

There were five interviews between the Government and the Delegates in negotiating the agreement of 1877. At the first interview the Delegates stated the conditions under which alone the Society would treat for the transfer of its property, and these conditions were accepted by the Government as the basis on which the agreement should be drawn up. The first of these was—

> "That the arrangements to be then agreed upon should be such, and should be worked out so as to give to the Society as absolute independence of al. Government departments as the Learned Societies at Burlington House enjoy; inasmuch as the Society was to cease to be the agent for the Government to administer Science and Art grants in Ireland. (Blue Book, p. 111.)

The Delegates asked that, with a view to the independence of the Society and its probable future work (Blue Book, p. 111), the whole of Leinster House should be provisionally reserved to the Society when the Library is removed. The Government stated that this must be left to the future determination of the Government, and the Delegates said that they would take time to consider. The Government formulated the first clause of the agreement, as they proposed it, in the following words: —"The Government will allot to "the Society in Leinster House such accommodation, free of rent, as in the "judgment of the Government is sufficient for the functions of the Society "still remaining to it"—words which were afterwards somewhat modified.

At the next sitting, the Delegates informed the Government that they had visited the Royal and other societies located at Burlington House, and had ascertained from the officers of those societies that the way in which the Government had determined the amount and kind of accommodation to be provided was by getting a statement from each society of what it required, and providing all that was so asked for. The Delegates said that, with this precedent before them, they would acquiesce in the provision, leaving it to the judgment of the Government to decide on the sufficiency of the accommodation to be provided for the Society when the Library is removed; but that, in case any part of the house was to be occupied by others, it would be essential for the complete independence of the Society that the two parts of the house should be completely separated, with distinct entrances, like the buildings of the several societies in Burlington House. When much had been said on this subject, Sir Michael Hicks Beach wound up by saying: In short, what you wish is that the conditions of your occupation in Leinster House

shall be the same as those of the Learned Societies in Burlington House. To which the Delegates replied: Exactly so. And he then proposed the clause: "The conditions of occupation will be the same as those accorded to the "Learned Societies in Burlington House." To which the Delegates assented.

It is important to observe, that when this agreement was negotiated there had not been any suggestion that the Society could be deprived of any of its rooms—the whole question was, as to what *extension* of its accommodation should be made; nor was there any idea of other occupants of the building except the National Library and the Society, until the Library should be removed; nor that any new occupants would be then introduced, unless they were either the Royal Irish Academy, or the officers of the Geological Survey. When that negotiation was entered into, events which have since happened would have appeared impossible to the delegates. They could not have imagined that the Department, while the house was still crowded up by the Library, would have suddenly taken possession of some of the Society's offices, and of the apartments of its resident officer, as they have done, without consultation with the Society, and without compensating it even for the pecuniary part of its loss. The Society has been extremely patient under these events, from its anxious desire to see early effect given to the national benefits promised by Lord Sandon's letter. But these events having occurred, it is now even more essential than it was in 1877, for the whole future of the Society, to require that there shall be no falling short from the full independence within its own portion of the building, when the Library is removed, secured to it under clause 1 of the agreement of 1877, and renewed to it under the further agreement of 1879. The Delegates in 1877 pointed out that the building is such as to make its separation into two buildings easy, since there is already an entrance at the south end, the end next the Museum, with stairs and every other requisite, by which access can be given to the part of the building which will not be in the occupation of the Society. The Delegates also pointed out on that occasion that after the removal of the Library but little space would remain over, when the Society is adequately provided for.

I am, finally, desired by the Delegates to request that you will represent to my Lords, that the Royal Dublin Society, as it is the oldest, has probably also been the most useful Society in Ireland in the past, and that it has before it the prospect of an even more useful career in the future, if only the Department do not thwart it in acquiring that complete independence for which it has made such praiseworthy sacrifices, which, moreover, is essential to its healthy action, and which, we trust, will have the sympathy of Her Majesty's Government, as it is both a good example in Ireland and a security that the Society will not seek to become a pensioner of the Public Treasury.

With regard to the allocation of rooms in clause 3 of the further agreement (of May 1879), the Delegates hold that that allocation is by clause 5 of the same agreement made liable to revision when the Library is removed, under the following conditions: (1.) That the Society shall not receive less accommodation (5th clause of further agreement); (2.) That the Society will receive further accommodation, if in the judgment of the Government its functions require it (1st clause of original agreement); (3.) That accommodation for a resident officer, of which it has been deprived, shall be restored to it (4th clause of further agreement); and (4.) That the conditions of its occupation shall be made the same as those of the Learned Societies in Burlington House (1st clause of original agreement). The Delegates can have no objection to an explicit repetition of this liability at the commencement of clause 2 of the instrument which you are now preparing, as proposed by Mr. MacLeod in paragraphs 12 and 13 of his letter, if the limiting conditions are set forth as well as the liability.

I ought, perhaps, before concluding, to observe, that the resignation of the Society's proprietary rights, referred to in § 17 of Mr. MacLeod's letter, has no bearing on the matter in hand. Formerly the Society held its property in trust for its own use and that of the public; now the Commissioners of Works, under the Act, hold the buildings in trust for the purposes of the Act the chief of which, as regards the house, is "to maintain the Society." But

Appendix A. — Minutes and Correspondence.

the matter now to be dealt with is exclusively this use. And again, the state of things at Burlington House in former times, adduced by Mr. MacLeod in § 20, has no connexion with the matter in hand. Nor has the quotation cited by Mr. MacLeod from the Appendix of the Council's letter to the Lord Lieutenant of the 20th January 1879 any such meaning as he attributes to it. This document has reference to temporary arrangements pending the removal of the Library, and recites :—

> "The Council, having regard to the crowded state of Leinster House during the continuance in it of the National Library, and to the circumstance that no building for the Science and Art Museum or for its officers has yet been erected,"

have expressed their willingness to postpone their claim to adequate accommodation. And again, the paragraph from which the quotation is made begins with the words—"The Council, having regard to the stinted accommo- "dation."

The Society's Delegates desire me now to express to you their earnest hope that you will procure, without further postponement, the fulfilment of your undertaking and assurances given through them to the Society, to have all its rights as guaranteed to it legally secured to it.

I remain, &c.
(Signed) G. Johnstone Stoney,
Hon. Sec.

Enclosure II.

Mr. R. H. Wyatt to Mr. G. Johnstone Stoney.

28, Parliament Street, Westminster, S.W.,
27th December 1879.

My dear Sir,

Your letter of the 24th inst. arrived on Christmas Day, which I need scarcely say is observed as a clear holiday.

I have carefully perused your printed reply, "dated 23rd inst." to Mr. Mac Leod's letter of 28th ultimo, and I regret to see that there are still points to be adjusted between the Society and the Science and Art Department before I can complete my task.

I will at once forward a copy of your printed letter to Mr. MacLeod, and copies to Lord George Hamilton and Mr. Smith, but I fear the latter will be out of town for some days. If you can spare me another print of your letter I shall be glad if you will let me have one.

Believe me, &c.
(Signed) R. H. Wyatt.

16.—Mr. Norman MacLeod to Mr. R. H. Wyatt.

Science and Art Department, London, S.W.,
17th February 1880.

Sir,

In reply to your letter of the 27th December last on the subject of the agreement with the Royal Dublin Society, I am directed by the Lords of the Committee of Council on Education, to inform you that:—

1. Their Lordships concur in the opinion you have expressed as to the necessity of a clause annulling former agreements. This clause has, they understand, been accepted by the Delegates of the Society and will form clause 1 of the agreement.

2. Their Lordships agree, in accordance with the wish of the Delegates, to the omission from the next clause (clause 1 as it stands in the last printed form of the agreement) of the words "in the judgment of the Lord President of "the Council and the Vice-President of the Committee of Council on Educa- "tion," though these words formed part of the agreement of the 5th March 1877. But they consider that to prevent any misapprehension, the last sentence of this clause should stand precisely as it does in the agreement signed by Mr. W. H. Smith and Mr. G. Johnstone Stoney on the 5th March

1877, and to which the sanction of the Lords Commissioners of Her Majesty's Treasury was given, viz:—"that the conditions of occupation shall be the same as those accorded to the Learned Societies in Burlington House."

3. My Lords agree to the omission, in accordance with the wish of the Delegates, of the words "until the new Science and Art Museum is built," proposed to be added to the commencement of the next clause (clause 2 of the print), though my Lords believe these words would have made the purport of the agreement clearer.

4. My lords object absolutely to the introduction of the words "for the present" in the last sentence of clause 3 of the print. The reasons for this objection have been already given; and they must insist on the form of the agreement of the 29th May 1879, signed by the Vice-President and Mr. G. Johnstone Stoney, being adhered to.

5. The last sentence of clause 5 of the print, is an evident printer's error, and has been struck out.

6. My Lords have no objection to the introduction into clauses 15 and 17 of the print, of the words proposed by you to carry out the wishes of the Delegates to make the existing appointments by the Society of Trustees and Visitors provisional, and to be renewed on the signing of the agreement.

7. My Lords consent to the re-introduction of the clause with regard to a new charter.

I enclose a copy of the last print of the agreement showing in manuscript the alterations now made,* and also copies of the agreement revised with the alterations embodied. My Lords trust that you will impress on the Delegates of the Royal Dublin Society the necessity for executing this agreement without delay. It is, or should be, simply the embodiment in legal form of the terms of agreement signed by the Vice-President and Mr. Stoney on the 29th May 1879, with such of the provisions of the previous agreement and Lord Sandon's letter as have not been modified by it or have not been already carried out or provided for by the Act of 1877.

Any new provisions must form the subject of a separate negotiation, which cannot be entered on till this agreement is executed.

I am, &c.
(Signed) NORMAN MACLEOD.

ENCLOSURE.

AN AGREEMENT made this day of 187 , between the DEPARTMENT OF SCIENCE AND ART incorporated by Royal Charter bearing date the 30th day of April 1864, in this Agreement referred to as the Department, and the COMMISSIONERS OF PUBLIC WORKS IN IRELAND (in this Agreement referred to as the Commissioners) of the one part, and the ROYAL DUBLIN SOCIETY FOR THE PROMOTION OF HUSBANDRY AND OTHER USEFUL ARTS AND SCIENCES IN IRELAND, in this Agreement called the Society, of the other part.

WHEREAS in consequence of representations made to Her Majesty's Government, and of the recommendations contained in the report made in the year 1868 by the Commission presided over by His Grace the Duke of Leinster, the Lords of the Committee of Council on Education framed a scheme, which met with the approval of Her Majesty's Government, for the purpose of augmenting and extending facilities for Science and Art instruction in Ireland.

And whereas the terms of the said scheme, as far as they affected the Society, were submitted to it in a letter from the Vice-President of the Committee of Council on Education to the Secretaries of the Society, dated 9th February 1876, and with modifications received its sanction in a Memorandum of Provisions supplementary to the said letter dated 5th March 1877.

---

* It has not been thought necessary to reprint this document as the alterations can be readily seen from the revised agreement.

Appendix A.

MINUTES AND CORRESPONDENCE.

And whereas in the Session of Parliament of 1877, the Dublin Science and Art Museum Act, 1877, was passed for the purpose of carrying into effect the arrangement come to between Her Majesty's Government and the Society, and in the 16th section of the Act it is declared "that for the "purpose of giving effect to the objects of this Act, and generally in further "ance of or in connexion with the same, it shall be lawful for the Commis- "sioners of Public Works in Ireland, or the Department and the Society "respectively, to enter into all or any agreements, contracts, and arrange- "ments (not inconsistent with the provisions of this Act) which they may "think fit, and to do all acts, matters, and things necessary to carry the "same into effect, and every such agreement, contract, and arrangement "shall be of the same force and effect as if the same had been contained "in this Act."

And whereas some of the objects and provisions of the said Act have been carried into effect.

Now these presents witness that in pursuance of the powers so conferred on the parties hereto it is agreed as follows :—

1. The memorandum of agreement dated the 5th March 1877, and signed by the Right Hon. William Henry Smith (then Secretary to the Treasury) and G. Johnstone Stoney, Secretary to the Royal Dublin Society, shall, so far as the provisions thereof remain unperformed, but without prejudice to anything done in pursuance thereof, be and the same is hereby annulled and superseded.

2. The Society shall have such accommodation in Leinster House, free of rent and taxes, as is sufficient for the functions of the Society still remaining to it in Science and Agriculture, provided that the office accommodation for Agriculture be the same with and no greater than such as would be necessary for the Society's functions in Science, and provided that if hereafter any amalgamation shall take place between any section of the Royal Dublin Society and another society, such amalgamation shall not entitle the other Society to any rights of occupation in Leinster House, unless a special sanction be obtained from the Government. The conditions of occupation shall be the same as those accorded to the learned societies in Burlington House.

3. The Society shall have the following accommodation in Leinster House, viz., the four rooms on the ground floor marked A, B, C, and E, on subjoined plan, and one room on the first floor marked *b*, and suitable accommodation in the basement for a servant and stores, and the Trustees of the National Library and the Visitors of the Museum shall have the right to hold their meetings in one of the said rooms on the ground floor, marked B and C on the said plan hereto annexed.

4. The Society shall have the use, but not the exclusive use, of the entrance hall and passages to these rooms, not only for the purposes of access to their rooms, but to place therein the statuary and other works of art reserved to the Society by section 4 of the Dublin Science and Art Museum Act, 1877, and reasonable accommodation for hats and coats in the hall shall be provided by the Department. Subject to these requirements of the Society, the said space shall be available for the purposes of the Museum of Science and Art.

5. When the Library is removed from Leinster House, suitable apartments therein shall be allocated to a resident officer of the Society. In the meantime provision shall be made by the Department for the ordinary cleaning of the Society's rooms in Leinster House.

6. The appropriation of rooms shall be liable to revision by the Lords of the Committee of Council on Education when the new Science and Art Museum is built, provided that the Society shall not receive less accommodation by such new arrangement than that provided, or agreed to be provided, by the several clauses herein-before contained.

7. The Society shall afford full and free access to the public at all reasonable times to the scientific serials and the transactions and other publications of other Learned Societies reserved to them by the 4th section of the Dublin Science and Art Museum Act, 1877.

8. The Commissioners shall pay to the Society out of moneys provided by Parliament the sum of 25,000*l.* in three instalments, viz., 10,000*l.* in the present year (1879), 10,000*l.* in the year 1880, and 5,000*l.* in the year 1881, and in consideration of the payment of such sum of 25,000*l.* the Society shall discontinue to hold agricultural shows in Kildare Street, Dublin, and shall provide lands and buildings for holding such shows elsewhere, and the Government and every department thereof shall be discharged from any further claims in respect of the removal of such shows and providing accommodation elsewhere for the same, or in anywise incidental thereto.

9. The agricultural shows shall be removed from Kildare Street within a year from the payment of the first instalment of 10,000*l.*

10. The opinion of the Librarian of the British Museum shall be taken as to any earlier editions of modern books or duplicates which in his judgment are not required for the National Library, and such books shall be re-transferred to the Society.

11. The Society shall in future provide its own staff of officers, and its own printing, but the Government will authorise the Stationery Office to continue to print the proceedings and transactions of the Society, limiting them strictly to its scientific work, for a period of five years from the date of the transfer of the collections, with the view of assisting the Society to re-organise itself on an independent basis, and such printing shall be executed in as good a manner as that of the Royal Society, and 1,000 copies shall be furnished to the Society free of expense, but the Society shall be at liberty to get further copies struck off at its own expense.

12. The lecture hall, laboratory, and the necessary offices are reserved to the Society, or an equivalent will be provided.

13. The privilege of passing through Leinster Lawn and the courtyard of Leinster House is reserved to members of the Society.

14. Subject to the consent of the director the collections in the Botanic Gardens and the Natural History Museum shall be available as heretofore in illustration of the papers read before the Society.

15. Members who joined the Society before the 1st day of January 1878, of whom a certified list shall be furnished by the Society to the Department annually before the 1st April, shall be allowed to borrow books from the Library, subject to regulations to be laid down by the Trustees of the Library and the Department, and shall have free admittance to the Museum at all times at which it is open to the public.

16. The National Library shall be under the superintendence of a council of 12 Trustees, eight of whom shall be appointed by the Society and four by the Department, and the officers of the Library shall be appointed by the council of Trustees. The Trustees to be appointed by the Society shall be appointed in such manner and shall hold office for such term as the Society shall from time to time determine by byelaw. And the Trustees appointed by the Society prior to the date of this agreement shall retain their seats only until other appointments shall have been made by the Society.

17. Any vacancy in the office of Trustee occasioned by death, resignation, removal, disqualification, or any other cause whatever shall be filled up with all convenient speed by the appointment of a new Trustee by the body by whom the Trustee whose vacancy is to be filled up shall have been originally appointed.

18. In order to aid the Lords of the Committee of Council on Education in the administration of the Science and Art Museum, the Natural History Collection, and the Botanic Gardens, a Board of Visitors shall be constituted consisting of 12 members, four to be appointed by the Lord Lieutenant, five by the Society and three by the Royal Irish Academy. The members so to be appointed by the Society shall be appointed in such manner and shall hold office for such term as the Society shall from time to time determine by byelaw. And the Visitors appointed by the Society prior to the date of this agreement shall retain their seats only until other appointments have been made by the Society. A President shall be elected annually by the Board from the said 12 members. The duties of the Board of Visitors shall be to

Appendix A.

MINUTES AND CORRESPONDENCE.

make annual reports to the Department on the condition, management, and requirements of the Museum, and to advise on points affecting the administration, and a copy of such reports shall be laid before Parliament by the Department.

19. Any vacancy on the Board of Visitors occasioned by death, resignation, removal, disqualification, or any other cause whatever shall be filled up with all convenient speed by the appointment of a new member by the person or body by whom or which the member whose vacancy is to be filled up shall have been originally appointed.

20. The Department shall at the request of the Society join in a recommendation to Her Majesty to grant such a new charter or charters as in the opinion of the Society may be required by the altered circumstances and conditions of the Society.

21. Nothing herein contained shall prevent the Commissioners or the Department of Science and Art and the Society respectively from entering into any further or other agreements not inconsistent with the provisions of the said Act, either in modification of, substitution for, or addition to the provisions herein contained, or any of them, or otherwise for the purpose of giving effect to the said Act, or in furtherance of or in connexion with the same.

17.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt 27th February.)

Royal Dublin Society, Kildare Street,
25th February 1880.

SIR,

I HAVE laid your letter of the 20th instant and its enclosures before the Delegates of the Royal Dublin Society.

The Delegates entirely agree with my Lords in the opinion they express in clauses 4 and 7 of their letter to you of the 17th inst., that the present agreement is to be the embodiment in legal form of the terms of the agreement of May last; and in accordance therewith the Delegates have inserted in clause 2 of the amended draft which you enclosed to us the following provision taken from the agreement of May last, viz:—"Nothing in clauses 3, 4, or 6 of this agreement shall affect the operation of this clause."

The Delegates have also made the obvious corrections in reference to dates which are required in clauses 8 and 9, and have corrected a printer's error in the recital.

I am desired to return the draft to you with these necessary amendments, and to signify that the agreement as thus amended is agreed to by the Delegates on behalf of the Society.

I am, &c.
(Signed) G. JOHNSTONE STONEY,
Honorary Secretary.

ENCLOSURE.

(*Those paragraphs only of the Agreement in which alterations were made are reprinted. The remainder stands as at pp. 29–32. The alterations are shewn in italics.*)

AGREEMENT.

AN AGREEMENT made this day of 1880, between the DEPARTMENT OF SCIENCE AND ART incorporated by Royal Charter bearing date the 30th day of April 1864, in this Agreement referred to as the Department, and the COMMISSIONERS OF PUBLIC WORKS IN IRELAND (in this Agreement referred to as the Commissioners) of the one part, and the ROYAL DUBLIN SOCIETY FOR THE PROMOTION OF HUSBANDRY AND OTHER USEFUL ARTS AND SCIENCES IN IRELAND, in this Agreement called the Society, of the other part.

. . . . . .

2. The Society shall have such accommodation in Leinster House free of rent and taxes as is sufficient for the functions of the Society still

remaining to it in Science and Agriculture, provided that the office accommodation for Agriculture be the same with and no greater than such as would be necessary for the Society's functions in Science, and provided that if hereafter any amalgamation shall take place between any section of the Royal Dublin Society and another society, such amalgamation shall not entitle the other society to any rights of occupation in Leinster House unless a special sanction be obtained from the Government. The conditions of occupation shall be the same as those accorded to the Learned Societies in Burlington House. *Nothing in clauses three, four, or six of this agreement shall affect the operation of this clause.*

. . . . . .

8. The Commissioners shall pay to the Society out of moneys provided by Parliament the sum of 15,000*l.* *in two instalments in addition to* 10,000*l.* *paid in the year* 1879, *viz.*, 10,000*l.* *in the year* 1880 *and* 5,000*l.* *in the year* 1881, *and in consideration of the payment of such sums amounting to* 25,000*l.*, the Society shall discontinue to hold agricultural shows in Kildare Street, Dublin, and shall provide lands and buildings for holding such shows elsewhere, and the Government and every department thereof shall be discharged from any further claims in respect of the removal of such shows and providing accommodation elsewhere for the same or in anywise incidental thereto.

9. The agricultural shows shall be removed from Kildare Street within a year from the payment of the first instalment of 10,000*l.* *which was received by the Society on the 7th of October* 1879.

. . . . . .

18.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt 27th February.)

Royal Dublin Society, Kildare Street,
25th February 1880.

MY DEAR SIR,

WE shall have a meeting of the Society on Thursday of next week, and I write this note on the chance that you will find it possible to have the agreement executed in time to have it announced at that meeting. I need not say that this would be very desirable if it can be accomplished.

Believe me, &c.

(Signed) G. JOHNSTONE STONEY.

19.—MR. R. H. WYATT to MR. G. JOHNSTONE STONEY.

(Copy received from Mr. Wyatt.)

SCIENCE AND ART DEPARTMENT and ROYAL DUBLIN SOCIETY.

28, Parliament Street, S.W.,
5th March 1880.

DEAR SIR,

I HAVE again gone through all the papers relating to this matter and considered your proposed addition to clause 2 of the agreement, and I am sorry to say I have two objections to it.

1. It would in all probability lead to legal proceedings. You will remember that the agreement of the 5th March 1877 made the Government sole judges as to the sufficiency of the accommodation to be afforded to the Society in Leinster House. That condition having been given up I endeavoured to make the subsequent clauses clear so as to prevent the possibility of any litigation. The effect of your proposed alteration would be to prevent any reference to those subsequent clauses should any dispute arise under clause 2.

2. As a matter of drafting I could not consent to say that one part of an agreement should not affect another part. Again I venture to think you must have overlooked the last part of clause 6, which surely is sufficient for your purpose.

Your other alterations in clauses 8 and 9 I see no objection to.

Appendix A.

MINUTES AND CORRESPONDENCE.

As the agreement of the 5th March 1877 is declared by clause 1 of the agreement to be annulled, and as the present agreement will also supersede that of May 1879, I think it would be well to amend clause 1 by declaring that the last-mentioned agreement should also be annulled, and I will amend the draft accordingly, and on hearing from you that you give up the suggested addition to clause 2 I will at once ask permission to get the agreement engrossed in duplicate for execution.

I will send a copy of this letter to the Science and Art Department that they may see my objection to your proposed alteration.

I am, &c.
(Signed) R. H. WYATT.

20.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt.)

Royal Dublin Society, Kildare Street,
9th March 1880.

SIR,.

I HAVE laid your letter of the 5th inst. before the Delegates of the Royal Dublin Society, and am desired to invite your attention to the contents of our letter to you of the 23rd December 1879, which you appear to have overlooked, in which the Delegates stated the circumstances under which the clause of the agreement of 1877 was introduced which secures to the Society conditions of occupation the same as those of the Learned Societies in Burlington House.

As explained to the Government at the time when that clause was negotiated the most important of these conditions in the view of the Society is that of occupying its own building alone, and with as complete independence as the societies at Burlington House enjoy, and the above clause was introduced with this view after this had been assented to by the Government, and after the Delegates had pointed out that Leinster House is such as to admit easily of being divided completely into two distinct buildings with separate entrances like the buildings assigned to the several societies at Burlington House.

The negotiations of 1877 were entered into by the Society at the request of the Government, and the first condition made on behalf of the Society and accepted by the Government as a condition precedent to entering into any negotiations for the transfer of the Society's property was that the ultimate result of the negotiations should be to remove the Library (that is the property then within Leinster House which was to become public property) into another building, and to place the Society so soon as this should be done in a position of as complete independence of all Departments of Government as the societies at Burlington House are.

It was to carry out this that the clause in question was introduced, and with the same end, that is with a view to the independence of the Society, the Delegates further required that any money compensation to be paid by the Government should take the form of a sum paid down, and not of an annuity. The Government on other grounds wished that this should be the case, and this also was agreed to, and has been carried out.

In negotiating the further agreement of May last the Delegates again on behalf of the Society declined to enter into that further agreement unless this right were reserved, which was thereupon done in these words: "Nothing in "this agreement shall affect the operation of clause 1 of the agreement of the "5th March 1877 except so far as it applies to Agriculture."

The Society is again asked in your letter of the 5th inst. to resign this right. The Society has no intention of doing so and the Delegates desire me to call upon you to fulfil the undertaking which you gave them three years ago (that you would legally secure to the Society all its rights), by now introducing into the instrument you are drawing up words which shall secure to the Society its right to conditions of occupation the same as those accorded to the Learned Societies at Burlington House, notwithstanding anything to the contrary in those clauses which you have adopted into your draft from the further agreement of May last.

As this matter is of the last importance to the Society, and will not admit of further postponement, the Delegates desire me to request you to write to them by return of post, undertaking to frame the pending agreement in accordance with your engagement of 1877, securing the Society's right to conditions of occupation the same as those at Burlington House, whenever the Society calls upon the Government to provide them.

The reason the Delegates find it necessary to ask you to answer by return of post is that the Council of the Society will meet on Thursday next, the 11th inst., at which meeting the Delegates believe that the Council will direct that a special general meeting of the Society shall be summoned to take such action in the matter as the circumstances may appear to require.

I am, &c.

(Signed) G. JOHNSTONE STONEY,
Honorary Secretary.

21.—MR. R. H. WYATT to MR. G. JOHNSTONE STONEY.

(Copy received from Mr. Wyatt.)

SCIENCE AND ART DEPARTMENT and ROYAL DUBLIN SOCIETY.

28, Parliament Street, Westminster,
10th March 1880.

SIR,

ON receipt of your letter of the 25th February last in which you say, "the Delegates entirely agree with my Lords in the opinion they express in "the clauses 4 and 7 of their letter to you of the 17th inst. that the present "agreement is to be the embodiment in legal form of the terms of the agree-"ment of May last," I hoped to have had no difficulty in carrying out what appeared to be the desire of both parties, namely, to put into legal form the terms of the agreement of May last.

You must forgive my saying that I cannot in the discharge of the duties imposed upon me recognize any "understandings or assurances" which are not embodied in the agreements.

In my draft I have endeavoured as far as possible to adopt the precise language used in the agreements signed by the respective parties. Indeed I am not sure that I have not carried this principle a little too far, because at the end of article 5 of the agreement of May 1879 I find these words "nothing in "this Act shall affect the operation of clause 1 of the agreement of the 5th "March 1877, except so far as it applies to Agriculture," and in looking to article 1 of the agreement of 1877 I see the Government are made the judges of "what accommodation is sufficient for the functions of the Society."

In your letter of this morning you refer me to this proviso, but I venture to think you must have overlooked the above power reserved to the Government.

If you wish me to give effect to that proviso you must adopt the whole of clause 1 of the agreement of 1877 "except so far as relates to Agriculture."

When by the agreement of May 1879 the amount of accommodation to be afforded to the Society was defined, the Science and Art Department were willing, at the request of the Society, to allow the omission of the words in article 1 of the agreement of 1877 which made the Government the judges of what would be sufficient accommodation; therefore it would not be right to say that those provisions which prescribed that accommodation should have no controlling effect upon article 2 of the draft now under consideration from which the discretion of the Government had been omitted.

I hope this will make more clear to you what I intended to convey by my last letter, namely, that if the Society at any time hereafter should deem the accommodation defined in the agreement of 1879 insufficient, they could resort to a court of law for the purpose of getting additional accommodation, and the effect of your proposed addition to clause 2 would be to declare that the agreement of May 1879 in this respect should be a nullity and notwithstanding the payment of 25,000*l.* as part of the consideration for the modification of the agreement of 1877. This I feel satisfied the Society do not intend, and

Appendix A. — MINUTES AND CORRESPONDENCE.

it is, therefore, simply a question of wording, and if you will submit to me any words which will not have the effect of annulling the agreement of May 1879, I shall be happy to consider them, but I must endeavour to prevent those whom I have the honour to represent from being driven to a court of law to define their respective rights.

I am, &c.
(Signed) R. H. WYATT.

22.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt 14th March.)

Royal Dublin Society, Kildare Street,
11th March 1880.

SIR,

I HAVE laid your letter received to-day before the Council of the Royal Dublin Society, along with a report from the Delegates of the circumstances which led up to it, and the Council have unanimously passed the enclosed resolution in relation thereto.

In relation to part of your letter I am directed to point out that clause 1 of the agreement of 1877 contains two stipulations, one leaving to the Government the right of determining what amount of accommodation is sufficient for the Society, the other providing that the conditions of occupation shall be the same as those at Burlington House.

The Government in the agreement of May last *have exercised* their right as to the determining on the amount of the accommodation so far as a minimum is concerned, and have provided for exercising it when the Library is removed so far as a maximum is concerned. That part of clause 1 is therefore now out of date. But the portion providing that the conditions of occupation are to be the same as those at Burlington House has not yet been fulfilled, and it is this part accordingly the future fulfilments of which it is essential to ensure, as was done by the latter part of clause 5 of the agreement of May last.

The 25,000*l.* referred to in your letter has nothing whatever to do with the matter now in hand. It had relation exclusively, as you will see on reference to the agreement of May last, to the Society's rights in relation to Agriculture.

The Council passed a further resolution to-day, ordering a general meeting of the Society to be summoned for Thursday the 25th instant, if within a week from this date you are unable to obtain authority to introduce words, either those proposed by the Delegates or others, securing to their satisfaction the right of the Society to conditions of occupation when the Library is removed better than those yet provided for it, and which shall be the same as those accorded to the Learned Societies at Burlington House, which the Government undertook to give in the agreement of 1877, and provided for in the agreement of May last.

Having regard to the pressure of time, I shall hope to hear from you on the earliest possible day.

If you prefer, the Delegates would be willing to leave the existing documents without a word changed, and to execute an agreement simply reciting Lord Sandon's letter, the agreement of 1877, your letter of the 6th June 1877, and the agreement of May last, in their existing form, and declaring that the provisions of them shall be binding as an agreement under the Act, except so far as Lord Sandon's letter does not propose advantages to be claimed by the Royal Dublin Society, and except so far as the agreement of May last has annulled portions of the agreement of 1877.

It cannot be disputed that the Society is entitled to this agreement.

You will observe that the sole question at issue has reference to the hall and passages of the premises which the Society is to occupy when the Library is removed, to which under the agreements it is undoubtedly entitled.

I am, &c.
(Signed) G. JOHNSTONE STONEY,
Hon. Secretary.

ENCLOSURE.

RESOLUTION of the Council of the Royal Dublin Society, March 11th 1880.

"Resolved, that the Council having heard the statement of the Delegates, and full details as to the clause required by them relating to the conditions of occupation in Leinster House, is unanimously of opinion that the clause is necessary to confirm to the Society the full agreements come to in relation to the Society's accommodation in Leinster House, and that the Delegates should accordingly insist upon the insertion of the clause, or of a clause to that effect."

23.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt, 16th March.)

Royal Dublin Society, Kildare Street,
12th March 1880.

SIR,

I DO not know whether I made it clear in my letter of yesterday's date that the Royal Dublin Society has no objection to acquiesce in the proposal contained in your last letter, that you should introduce into the instrument you are preparing the whole of clause 1 of the agreement of 1877, including both that part which contains the words "as in the judgment of the Government," as well as that part which defines the conditions of the Society's occupation; provided that the whole clause is inserted as it actually stands, *i.e.*, as a stipulation *made in 1877*; and provided that the stipulation of May last is added, that "nothing in the agreement of May last shall affect the "operation of the clause." Perhaps the clause might best be made to take its correct date by using some such words as the following:—

The Government will allot to the Royal Dublin Society in Leinster House such accommodation, free of rent and taxes, as in the judgment of the Government is sufficient for the functions of the Society still remaining to it in Science, so far as this has not been done since the 5th March 1877. The conditions of occupation shall be the same as those accorded to the Learned Societies in Burlington House, so far as these conditions have not been accorded to the Society since the 5th March 1877. Nothing in clauses 3, 4, or 6 of this agreement shall affect the operation of this clause.

I apprehend that there is nothing in the agreement of May last which could interfere with the operation of the part of clause 1 of the agreement of 1877 which provides that the Government were to exercise their judgment subsequently to the 5th March 1877. This part, so far from being interfered with, was given effect to; but it is plain that several of the stipulations of May last if made to outlast the removal of the Library would be fatal to the operation of the portion of the clause which promises to the Society satisfactory conditions of occupation.

I write this further letter because the Delegates are anxious to contribute to the utmost of their power towards obtaining a conclusion of this business in time to avoid its discussion by the Society.

The Delegates observe in your last letter that you seem to have forgotten that the Government are not your sole clients in this business, inasmuch as you voluntarily undertook to act as solicitor for the Society also, and to secure to it its full rights, upon the faith of which undertaking by you the Society did not employ any other solicitor.

If it will facilitate the transaction, the Delegates are willing that the clause about conditions of occupation shall be framed in the words to which they before consented, making it clear that the right of the Society to conditions of occupation the same as at Burlington House cannot be fully enforced till the Library is removed. This portion would then run as follows:—The conditions of occupation shall for the present be as nearly as practicable the same as are accorded to the Learned Societies at Burlington House, and

Appendix A. — Minutes and Correspondence.

when the Library is removed from Leinster House shall be identical therewith. Nothing in clauses 3, 4, or 6 of this agreement shall affect the operation of this clause.

I am, &c.
(Signed) G. Johnstone Stoney.

24.—Mr. R. H. Wyatt to Mr. G. Johnstone Stoney.

(Copy received from Mr. Wyatt, 16th March.)

Science and Art Department and Royal Dublin Society.

28, Parliament Street, Westminster, S.W.,
15th March 1880.

Dear Sir,

I beg leave to acknowledge the receipt of your letters dated respectively the 11th and 12th instant, which I am unable to answer without communicating with the Science and Art Department upon the new points raised by the Delegates, and I trust to be able to send you an answer in a day or two, but I must be permitted to at once express my surprise and regret that you should have been desired by the Delegates to say they observe in my last letter that I seem to have forgotton that the Government are not my sole clients in this business. I have at no time forgotten this fact, but I would have the Delegates remembert hat I can only arrive at the intentions of the respective parties to this agreement from written documents, and during the whole of the lengthened correspondence which has passed between the Department and the Society almost every letter has contained some new proposition, and it was not till I received your letter of the 11 inst. that I clearly understood "that the sole question at issue has reference to the hall " and passages of the premises which the Society is to occupy when the Library " is removed." I have sent copies of both of your letters to the Science and Art Department.

I am, &c.
(Signed) R. H. Wyatt.

25.—Lieut.-Colonel Donnelly, R. E., to Mr. R. H. Wyatt.

Science and Art Department, South Kensington,
17th March, 1880.

Sir,

The Lords of the Committee of Council on Education have had under their consideration Mr. G. Johnstone Stoney's letter to you, dated the 11th instant, which you have forwarded. They direct me to say that they cannot but regret that further difficulties have arisen in the completion of the agreement.

The Delegates of the Royal Dublin Society place upon the words "conditions of occupation" the construction that they give, or were intended to give, the Society now, or when the Library is removed, the entire control and right over the entrance hall and passages of Leinster House, which would virtually place the Society in possession of the whole building. This construction my Lords cannot admit, and they cannot sanction the proposal of the Delegates to add a clause to the new agreement being prepared by you to give effect to it.

The words conditions of occupation occur in the first clause of the agreement of 1877, signed by Mr. W. H. Smith, then Secretary of the Treasury, and Mr. Stoney.

"The Government will allot to the Royal Dublin Society in Leinster House such accommodation, free of rent and taxes, as in the judgment of the Government is sufficient for the functions of the Society still remaining to it in Science and Agriculture. The conditions of occupation will be the same as those accorded to the Learned Societies in Burlington House."

Another question with regard to accommodation under this clause having been raised, it was pointed out as long ago as February 1879 (*see* last report

of the Science and Art Department, letter No. 103, page 92), before, that is, the agreement of May 1879 was negotiated, that the words "conditions of occupation" did not mean amount of accommodation, but conditions of tenure, that is to say, that the Royal Dublin Society should occupy the space allocated to it in Leinster House on the same conditions as the Learned Societies occupy Burlington House. In this interpretation Mr. W. H. Smith fully concurred (*see* telegram No. 105, page 94, of the same Blue Book). And it would appear that the Delegates themselves did not think at that time that the words "conditions of occupation" bore the construction now put upon them. For in Appendix A. to Mr. G. J. Stoney's letter of the 20th January 1879 occurs the following sentence:—

"The Council also request that his Grace will allocate to the Society the use as heretofore, but not the exclusive use, of the entrance hall and passages of the building."

Nor, indeed, when the words are taken in connexion with the context is it easy to understand how they can be supposed to support the claim now based on them. For how, if the amount of the accommodation to be allotted to the Society was to be left to the discretion of the Government, can it be held that the conditions of occupation gave the Society the complete control of the entrance hall and passages, notwithstanding that the Government in the exercise of its discretion gave the Society the use, but not the exclusive use, of them? The fact that the Government have exercised their discretion as to the specific rooms to be allocated to the Society till the Library is removed can, it need scarcely be said, in no way affect the question.

Whatever opinion the Delegates may have had of the meaning to be attached to the words "conditions of occupation," it will be seen from what has been said, that they can have had no doubt of the construction placed on them by the Government when the agreement of 1879 was being negotiated, and yet the clause before referred to was distinctly re-affirmed as it stood, except so far as it relates to Agriculture, at the request of the Delegates. And further it was agreed as follows:—

"The Royal Dublin Society to have the use, but not the exclusive use, of the entrance hall and passages to these rooms, not only for the purpose of access to their rooms, but to place the statuary and other works of art reserved to the Society by section 2 of the agreement of 5th March.

"Accommodation to be provided for hats and coats in the hall. Subject to these requirements of the Society the space to be available for the Science and Art Museum."

My Lords have thought it necessary to enter at so great a length on this question though it has been fully discussed in previous letters, because they desire that there may be no misapprehension in the matter, and that it may be clearly understood that in refusing to consent to the proposal of the Delegates to give the Society by the agreement now being prepared by you the entire control of the entrance hall and passages of Leinster House, my Lords are only refusing the introduction of a clause which would give the Society a right, which it is clear it has not, and has no reason to expect, under the existing agreements.

It does not appear, however, that any good purpose would be served by discussing the question further. Under these circumstances my Lords have reluctantly come to the conclusion that the only course now open is to adopt the suggestion made in Mr. Stoney's letter to you, of the 11th instant, and to execute an agreement reciting Lord Sandon's letter, the agreement of 1877, your letter of the 6th June 1877 (if this be in any way necessary), and the agreement of May last without alteration, and declaring that their provisions shall be binding as an agreement under the Act, except so far as Lord Sandon's letter does not affect the Royal Dublin Society, and except so far as the agreement of May last has annulled portions of the agreement of 1877.

I am, &c.

(Signed) J. F. D. Donnelly.

Appendix A.

MINUTES AND CORRESPONDENCE.

26.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Received from Mr. Wyatt, 19th March.)

Royal Dublin Society, Kildare Street,
17th March 1880.

MY DEAR SIR,

THE Delegates have met to consider your letter dated the 15th inst., in which you explain that you had not till now understood that the point at issue has reference to the hall and passages of the premises which the Society is to occupy when the Library is removed, and that you are unable to send us an answer without communicating with the Science and Art Department.

The Delegates wishing not to embarrass the Government, which they know also the wish of the Council, are anxious that the discussion of this matter in the Society shall not take place without your having had time to settle it, after understanding it; and they have therefore asked that a meeting of Council be convened for Saturday next, at which they will suggest to the Council a postponement of the day for the meeting af the Society.

Believe me, &c.

(Signed) G. JOHNSTONE STONEY.

27.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt on 27th March 1880.)

Royal Dublin Society, Kildare Street,
March 23rd 1880.

SIR,

I am directed by the Delegates to acknowledge with surprise and regret your letter of the 18th inst. and its enclosure, in which my Lords of the Department of Science and Art append a condition to their consent to ratify the agreements as they stand, viz.; the condition that it shall be clearly understood that the control of the Society over the entrance hall and passages of the portions of Leinster House which it is to occupy when the Library is removed "is a right which it is clear it has not and has no reason to expect under the existing agreements."

The Society will not accept this condition and thus give up its rights.

The Delegates have already in their letter to you of December 23rd, 1879, refuted the misinterpretation of the agreement of 1877, and misquotation of the Society's letter of the 20th January, 1879, by repeating which the Department seeks to support this erroneous view.

The Department now further say in their letter to you "Whatever opinion the Delegates may have had of the meaning to be attached to the words conditions of occupation, it will be seen from what has been said, that they can have had no doubt of the construction placed on them by the Government when the agreement of 1879 was being negotiated, and yet the clause before referred to was distinctly reaffirmed as it stood, except so far as it relates to Agriculture, at the request of the Delegates." The provision which was introduced, not merely at the request of the Delegates, but as the condition on which alone they would sign any agreement consenting to a temporary joint occupation, was in the following explicit words: "Nothing in this agreement shall affect the operation of clause 1 of the agreement of 5 March 1877 except so far as it applies to Agriculture." The Delegates when they insisted on these or other equivalent words explained why they did so as follows, viz., that they had no authority to resign the right of the Society ultimately to as complete command of as separate a building as the societies at Burlington House enjoy. And they read out to my Lords, as explaining the position of the Society, the following extract from their report (printed at page 110 of the Department's Blue Book) which had been previously sent in writing to my Lords, viz.:—

* The Delegates, in 1877, acting under the instructions given to them, laid down at the outset the following conditions as those under which

---

* The parts of this passage which are marked with a line down the side were read in full to my Lords; the part between which is not so marked was abbreviated.

alone they could treat with the Government, and Government on its side expressed its full acceptance of them. These conditions were two in number.

1st. *That the arrangements to be then agreed upon should be such and should be worked out so as to give to the Society as absolute independence of all Government Departments as the Learned Societies at Burlington House enjoy,* inasmuch as the Society was to cease to be the agent for the Government to administer Science and Art grants in Ireland.

To this the representatives of the Government assented.

2nd. The second condition was that the Society should be placed in a position of healthy efficiency to carry on the following work to which it would be able to devote increased attention when relieved from the charge of its great collections.

(*a.*) The whole of its agricultural work.

(*b.*) Scientific work in all its branches, whether such as in London is undertaken by the Royal Society, the Royal Institution, or the Society of Arts. It was explained that the intention was that there should be within the Society sections representing individual sciences, or convenient groups of sciences, that these should meet simultaneously in different rooms, and that an effort would be made to induce the Societies in Dublin which are devoted to special sciences, to merge themselves in these sections, or at least to cooperate with them in such a manner as would obtain many of the benefits of union, so as to bring together at the meetings of the Royal Dublin Society all the scientific workers in Dublin.

This was also fully assented to by the Government, and in furtherance of it the scientific transactions and serials were reserved to the Society; the laboratory, was also reserved, and scientific printing promised. Moreover, the probable requirements for this proposed field of operations were alleged by the Society's Delegates as explaining why the Council had stated (in letter No. 19) that it would be advisable to reserve provisionally, for the future use of the Society, the whole of Leinster House.

Clause 1 of the agreement of the 5th March, 1877, was then drawn up. In the first portion of this clause the Government reserved to themselves the right to determine whether the Society did require the increased accommodation when the Library should be removed. *And in the second part they engaged that the Society should be secured from all interference under the same conditions as are accorded to the Learned Societies in Burlington House, where each Society has complete command of a separate building.*

The Society thus quite clearly, both verbally and in writing, defined its claims when negotiating the further agreement of May last, and it was after this clear definition of the Society's claims that the words preserving the rights of the Society under clause 1 of the agreement of 1877 were introduced. The colour which the Department now seeks to give to this transaction is accordingly entirely erroneous.

The present position of this question is that you have prepared an instrument embodying the Society's agreements in legal form, every part of which is complete and has been assented to by the Department and by the Society with the following sole exception, viz., that (*a*) the Society requires you not to omit the provision of the agreement of May last which lays down that nothing in that agreement shall affect the operation of clause 1 of the previous agreement, and that (*b*) the Department refuses to allow the insertion of this clause although it stands part of the agreement of May last.

The Delegates again call upon you to insert that clause or to procure the *unconditional* affirmation of an agreement reciting Lord Sandon's letter, your letter of the 6th June 1877, and the agreements of 1877 and 1879.

Without altering any word, and providing (*a*) that such of the proposals of the two letters as the Society shall require shall be carried into effect, and (*b*) that the two agreements shall be binding as agreements made at their

Appendix A. — Minutes and Correspondence.

respective dates, and so far as the second has not annulled provisions of the former, the Council will anxiously await your reply to this letter, to determine the course to be taken by them.

I am, &c.
(Signed) G. Johnstone Stoney,
Hon. Secretary.

28.—Mr. Norman MacLeod to Mr. Wyatt.

Science and Art Department, London, S.W.
14th April, 1880.

Sir,

With reference to Mr. Stoney's letter of the 23rd ultimo, forwarded by you on the 26th, I am directed by the Lords of the Committee of Council on Education to request that you will point out to the Delegates of the Royal Dublin Society that they must have entirely misunderstood the Department's letter of the 17th March, if they are under the impression that my Lords have appended, or have asked you to append, a condition to their consent to ratify the agreements as they stand.

On the contrary, the Department letter states that my Lords have come to the conclusion "that the only course now open is to adopt the suggestion "made in Mr. Stoney's letter to you of the 11th instant, and to execute an "agreement reciting Lord Sandon's letter, the agreement of 1877, your "letter of the 6th June 1877 (if this be in any way necessary) and the "agreement of May last without alteration, and declaring that their provisions shall be binding as an agreement under the Act, except so far as "Lord Sandon's letter does not affect the Royal Dublin Society, and except "so far as the agreement of May last has annulled portions of the agreement "of 1877." So far as my Lords are aware, these words, if not absolutely identical with those used by Mr. Stoney in his letter of the 11th March, in no way vary the proposal which was made by him on the part of the Delegates, and which it was the intention of my Lords to accept.

While accepting the proposal of the Delegates the Department letter pointed out that "the ratification of the agreements as they stand" would not in the opinion of my Lords give the Society certain rights which the Delegates seemed to fancy it would. And it was considered necessary to do this because, as you are aware, it has been assumed by the Delegates in the preceding correspondence that statements made either in writing or by word of mouth, by one of the parties to an agreement previous to and during its negotiation might be used not only to explain, but even to override the distinct terms of the agreement subsequently signed.

It is however obvious that an opinion, expressed with a view to prevent misapprehension as to what certain existing agreements convey, is a very different matter to appending a condition to the ratification of those agreements.

I am to request you will inform the Delegates that my Lords are still prepared to ratify the existing agreements as stated in the Department letter of the 17th March, and without any further condition.

As respects the instrument prepared by you embodying these agreements, Mr. Stoney in his letter of the 23rd March, states :—

"The present position of this question is that you have prepared an instrument embodying the Society's agreements in legal form, every part of which is complete and has been assented to by the Department and by the Society with the following sole exception, viz., that (*a*) the Society requires you not to omit the provisions of the agreement of May last which lays down that nothing in that agreement shall affect the operation of clause 1 of the previous agreement, and that (*b*) the Department refuses to allow the insertion of this clause although it stands part of the agreement of May last."

A reference to your letter of the 5th and 10th March, of which you sent copies to the Department, should show the Delegates that there was no such refusal on its part. The objection to the proposal made by the Delegates was taken by you for the reasons stated in your letters, with which my Lords

entirely agree. The transfer of a set of words from one context to another may, and in this case would, completely alter their effect. The refusal to allow of such a transfer under these circumstances can scarcely with justice be spoken of as a refusal to allow of the insertion of a clause which stands part of one of the agreements, especially when the intention of this clause has been fully secured by the instrument drafted by you, for it cannot be maintained that by it clause 1 of the agreement of 1877 is affected except as provided by the agreement of 1879.

In conclusion I am to request you will inform the Delegates that my Lords are prepared to ratify the existing agreements, as before stated, or to approve the instrument prepared by you embodying those agreements.

I am, &c.
(Signed) NORMAN MACLEOD.

29.—MR. G. JOHNSTONE STONEY to MR. R. H. WYATT.

(Copy received from Mr. Wyatt 24th April.)

Royal Dublin Society, Kildare Street,
23rd April 1880.

SIR,

I HAVE submitted to the Delegates your letter of 21st instant and its enclosure, viz., the letter from the Department of the 14th instant, which only reached us yesterday.

In the latter my Lords dispute the correctness of the statement of the Delegates that—

> "The present position of this question is that you have prepared an instrument embodying the Society's agreements in legal form, every part of which is complete and has been assented to by the Department and by the Society with the following sole exception, viz. : that (*a*) the Society requires you not to omit the provisions of the agreement of May last, which lays down that nothing in that agreement shall affect the operation of clause 1 of the previous agreement, and that (*b*) the Department refuses to allow the insertion of this clause, although it stands part of the agreement of May last."

My Lords profess "that there was no such refusal on their part," and that they only object "to the transfer of a set of words from a context to another," such as "would completely alter their effect."

The Delegates do not attach importance to the place in the document which you are preparing, in which the proviso is to occur, which is embodied in the following words of the agreement of May last.

> "Nothing in 'that' agreement shall affect the operation of clause 1 of the agreement of the 5th March 1877, except so far as it applies to Agriculture."

What the Delegates allege is that the insertion of this proviso somewhere is essential, and as my Lords now state they do not object to its insertion, but only to the context in which the Delegates placed it, the Delegates request that you will insert, wherever you think best, the words—

Nothing in clauses 3, 4, or 6 of this agreement (*i.e.*, the document you are preparing) shall affect the operation of clause 2 of this agreement.

The Delegates request that this matter may now be concluded without further postponement.

I am, &c.
(Signed) G. JOHNSTONE STONEY,
Hon. Secretary.

30.—MR. R. H. WYATT to MR. G. JOHNSTONE STONEY.

(Copy received from Mr. Wyatt.)

SCIENCE AND ART DEPARTMENT AND ROYAL DUBLIN SOCIETY.

28, Parliament Street, S.W.,
26th April 1880.

DEAR SIR,

I SENT a copy of your letter dated the 23rd instant, and received by me on the 24th instant, to the Science and Art Department, and I think I am

Appendix A. — Minutes and Correspondence.

now in a position to say that the only point in difference is that your Society claim the *exclusive* use of the Entrance Hall and passages in Leinster House, whilst the Department contend that this was never contemplated, and in confirmation of their views they refer me to Art. 4 of the agreement of the 27th May 1879, which declares:

> "The Royal Dublin Society to have the use, *but not the exclusive use*, of the Entrance Hall and passages, &c."

It is true that the proviso to the 5th Article of the same agreement declares:

> "Nothing in this agreement shall affect the operation of clause 1 of the agreement of the 5th March 1877, except so far as it applies to agriculture."

Now it is scarcely necessary for me to point out that no court of law would hold that that proviso annuls the previous part of the agreement, but if I am wrong in my contention then the proviso would revive that portion of Article 1 of the agreement of the 5th March, which makes the Government the sole judges as to the amount of accommodation which the Society is to have in Leinster House, and would practically render abortive all that was done in May 1879.

In this state of things I can only act on the proposal in your letter of the 11th March with regard to setting out the agreements *in extenso*, and which proposal was acceeded to by the Department by their letter of the same month.

At the same time I must repeat my protest against this mode of procedure, as it must in my opinion lead to litigation.

Yours, &c.
(Signed) R. H. Wyatt.

CORRESPONDENCE relating to the FURNITURE in LEINSTER HOUSE.

1.—MR. G. JOHNSTONE STONEY to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Royal Dublin Society, Kildare Street,
8th January 1880.

SIR,

THE attention of the Council of the Royal Dublin Society has for the first time been called to a letter, dated 12th February 1878, from Mr. MacLeod to the Secretary, Office of Public Works, Dublin, printed in Appendix A. to the 27th Report of the Department, in which the following paragraph occurs,—"As respects the furniture, their Lordships are not "aware that any of it can, under the agreement, be considered as the pro- "perty of the Royal Dublin Society, but they see no objection to such of it "as is necessary being used for the Society." The Council desire me to request an explanation of this claim, and to inform my Lords that the furniture in Leinster House forms no part of the property transferred by the Act or agreements, and, further, that the terms of the agreement of March 1877 were drawn up with the *expressed* understanding between the Government and the Delegates that the furniture should be the exclusive property of the Society.

I am, &c.
(Signed) G. JOHNSTONE STONEY,
Hon. Secretary.

2.—MR. NORMAN MACLEOD to MR. G. JOHNSTONE STONEY.

Science and Art Department, London, S.W.,
4th February 1880.

SIR,

IN reply to your letter of the 8th January 1880, I am directed by the Lords of the Committee of Council on Education to inform you that they are advised by Mr. Wyatt that, in his opinion, the property in the furniture was not transferred to the Government by the Act of 1877.

I am at the same time to point out to you that it was never proposed, as will be seen from the correspondence with the Board of Works, to deprive the Society of the use of any furniture that was required by it. On the contrary, when the old fire-proof safe was required by the Department, another was provided for the Society.

My Lords are unable to admit that there is an "*expressed* undertaking" in the agreement of the 5th March 1877 that the furniture should be the exclusive property of the Society; and they presume that all property purchased by the Society whilst in the receipt of State aid, and which has neither on the one hand been transferred to the Government, nor on the other expressly reserved to the Society, will remain vested as it was before the passing of the Act of 1877.

I am, &c.
(Signed) NORMAN MACLEOD.

3.—MR. G. F. DUNCOMBE to MR. G. JOHNSTONE STONEY.

Science and Art Department, London, S.W.,
13th February 1880.

SIR,

I AM directed to inform you that a clerical error occurred in Mr. MacLeod's letter of the 4th instant, with regard to the furniture in Leinster House.

Appendix A. MINUTES AND CORRESPONDENCE.

The words "*expressed* undertaking" in the third paragraph, should read "*expressed* understanding."

I am, &c.
(Signed) G. F. DUNCOMBE.

4.—MR. G. JOHNSTONE STONEY to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Royal Dublin Society, Kildare Street,
February 20th, 1880.

SIR,

THE Council of the Royal Dublin Society have had before them your letter of the 4th inst., in which you inform the Council that "my Lords are "unable to admit that there is an 'expressed understanding' in the agree- "ment of the 5th March 1877 that the furniture should be the exclusive "property of the Society" I am instructed to acquaint you for the information of my Lords that in negotiating the agreement of the 5th March 1877 the ownership of the furniture was considered. The representatives of Government on that occasion expressly stated to the Delegates of the Society that the furniture in Leinster House should be the exclusive property of the Society, and added that the Government did not want to become brokers of old furniture. I am desired to say that acting upon this expressed understanding the Society will retain this property as theirs.

I am, &c.
(Signed) G. JOHNSTONE STONEY,
Honorary Secretary.

5.—MR. NORMAN MACLEOD to MR. G. JOHNSTONE STONEY.

Science and Art Department, London, S.W.,
27th February 1880.

SIR,

I AM directed by the Lords of the Committee of Council on Education to acknowledge the receipt of your letter of the 20th instant, and to state that their Lordships have no objection, as has already been intimated to the Royal Dublin Society, to the furniture in the rooms occupied by the Society in Leinster House being retained by it for the use of its members.

I am, &c.,
(Signed) NORMAN MACLEOD.

CORRESPONDENCE relating to the ADMINISTRATION of the NATIONAL LIBRARY of IRELAND.

1.—MR. NORMAN MACLEOD to the DIRECTOR, SCIENCE AND ART MUSEUM, DUBLIN.

Science and Art Department, South Kensington,
16th June 1879.

SIR,

I AM directed to acknowledge the receipt of your letter of the 11th instant, on the subject of the return or replacement of books borrowed from the National Library of Ireland by members of the Royal Dublin Society, and I am to request you will bring the matter before the Trustees of the National Library, and when informing my Lords of their recommendations on the subject that you will also state what are the present rules for the return of books borrowed by members of the Royal Dublin Society, and what arrangements will be made for taking stock annually.

I am, &c.
(Signed) NORMAN MACLEOD.

2.—MR. NORMAN MACLEOD to the DIRECTOR, MUSEUM OF SCIENCE AND ART, DUBLIN.

Science and Art Department, South Kensington,
19th June 1879.

SIR,

I AM directed by the Lords of the Committee of Council to acknowledge the receipt of your letter of the 4th instant, and to state that in the absence of any argument against it, my Lords still adhere to their opinion as to the advisability of adopting the system of binding different classes of books in different colours, but as the Trustees of the National Library of Ireland are not in favour of the system, my Lords will not press the point.

I am, &c.
(Signed) NORMAN MACLEOD.

3.—MR. NORMAN MACLEOD to the DIRECTOR, SCIENCE AND ART MUSEUM, DUBLIN.

Science and Art Department, South Kensington,
24th June 1879.

SIR,

I AM directed by the Lords of the Committee of Council on Education to request that you will bring the accompanying copy of the agreement recently entered into between their Lordships and the Royal Dublin Society under the notice of the Trustees of the National Library.

See copy of Agreement, page 1.

As my Lords are of opinion that it is absolutely essential that you should have three rooms for the accommodation of yourself and your staff in Leinster House, they find that it will be necessary to allocate for that purpose the room on the first floor immediately over your present office, and which they believe is now occupied by the librarian. Their Lordships would be glad to know which room the Trustees would wish to give the librarian in place of it, or what arrangements they would propose to make under the circumstances, that the necessary instructions may be given to the Office of Works.

My Lords desire that you will inform the Trustees that they greatly regret to have thus to temporarily curtail the limited accommodation at present available for the National Library, and they had hoped that, as stated in Mr. G. J. Stoney's letter of the 1st June 1878, the Society would under the circumstances have been satisfied, till the removal of the Library from Leinster House, with three rooms on the ground floor. But so much stress was laid by the deputation on the necessity for having four rooms that their Lordships were compelled to yield.

I am, &c.
(Signed) NORMAN MACLEOD.

Appendix A.

MINUTES AND CORRESPONDENCE.

4.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin,
Leinster House, 2nd July 1879.

SIR,

I DULY submitted to the Council of Trustees your letter of the 16th ult., relative to the recovery of books borrowed from, and to the taking of stock in, the above Library, upon which they passed the following resolution, viz.:—

"That it appears to the Trustees that the only way of recovering a book, in the rare event of its not being restored by a borrower, after application, is to take legal proceedings against him."

With reference to this resolution, I would remark that as the property in the books in the National Library is legally vested in the Science and Art Department, it rests with them to take legal proceedings against any defaulter. Although cases requiring this measure will be extremely rare, yet as *one* such is likely soon to arise, instructions should be given as to the legal official by whom proceedings should be taken.

With regard to the taking of stock in the National Library, the Trustees *resolved*—

"That the Trustees are of opinion that it would be so difficult as to be almost impracticable to take stock from time to time satisfactorily until the Library is removed to a commodious building."

I am, &c.
(Signed) W. E. STEELE,
General Director.

5.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin,
Leinster House, 2nd July 1879.

SIR,

I DID not fail to submit to the Council of Trustees of the National Library your letter of the 24th ultimo, with reference to the allocation of the librarian's room ("E") for the purposes of the Science and Art Museum, and of the room for the accommodation of that officer instead; and, having carefully inspected the rooms in question, they adopted the following resolution, viz.:—

"That as their Lordships require the room ("E"), the Trustees think that the room ("*d*") should be allocated to the librarian. This will involve removing the ladies' reading-room. The Trustees propose accordingly to remove, without delay, Dr. Joly's collection from the rooms ("*g*") and ("F"), and to allocate these to the use of the lady readers, as previously contemplated. The Trustees request that the Board of Works may be instructed to make the alteration so as to maintain undiminished communication between the portions of the Library on the first floor and the floor above."

With reference to this resolution, I beg to remark that the changes proposed appear to be the best which the circumstances will admit of. The communication between the lower and upper rooms of the Library can be easily maintained by the *spiral staircase*, which can be readily railed off, so as to prevent unauthorised persons having access to the Library by its means. A "*lift*" for conveying books to and from either storey could be easily constructed.

As soon as the "Joly Library" is removed from the rooms ("*g*") and ("F"), the Board of Public Works should be instructed to have the necessary alterations made, so as to fit them up with lavatory, &c. adjoining, for the exclusive use of the lady readers.

A grate and chimney-piece will be required to be placed in room ("F"), and the book-cases round both rooms ("F") and ("*g*") should be fur-

nished with lattice doors, to be kept locked and opened only by the Library officials.

The room ("*d*") [now the ladies' reading-room] to be used in future by the librarian must be fitted up with suitable presses for his accommodation.

Ordinary office furniture will have to be supplied for room ("F") as soon as it shall be ready for my use, and a *lift* constructed from it to the room underneath it.

I am, &c.
(Signed) W. E. STEELE,
General Director.

6.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin,
Leinster House, 4th July 1879.

SIR,

I DULY submitted to the Council of Trustees of this Library your letter of the 24th ultimo, with reference to the room to be allotted to the librarian of the National Library in lieu of his present office, which it is proposed to use in future as an office for the general director's staff, and beg to acquaint you that the Trustees suggest that the room (*d*), now the ladies' reading-room, shall be allotted to the Librarian.

As this alteration will involve a considerable number of changes in the disposition and isolation of the Library rooms, I have, in reply to an inquiry by the Board of Works, sent to them the letter, of which the accompanying is a copy, on the subject.

I am, &c.
(Signed) W. E. STEELE,
General Director.

ENCLOSURE.

DR. STEELE to the SECRETARY, BOARD OF PUBLIC WORKS, CUSTOM HOUSE, DUBLIN.

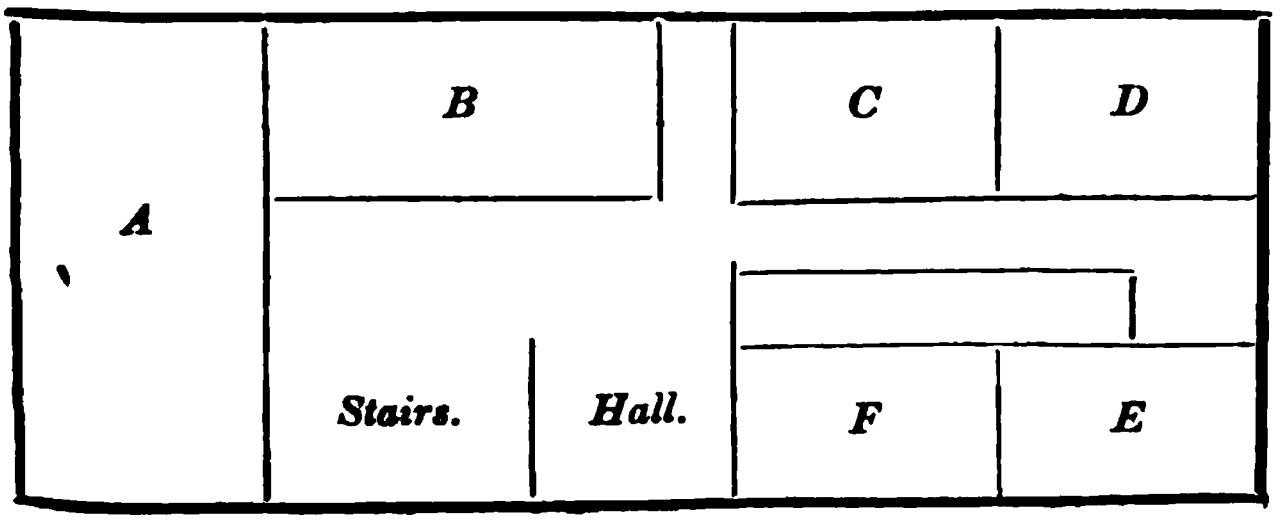
Science and Art Museum, Dublin,
Leinster House, 3rd July, 1879.

SIR,

IN reply to your letter of the 27th ultimo, relative to the removal of the books of the "*Joly Library*" preparatory to the necessary work of fitting up the lavatories, &c. for the use of lady readers, I beg to say that the attention of Dr. Joly has been called to the urgency of this matter, with a view to the removal of the books within the next fortnight. And as soon as the rooms in question are ready to be cleared, I shall take care to inform you of it.

In connexion with the arrangements before mentioned, I take this opportunity of informing you, that in consequence of the recent allotment to the Royal Dublin Society of rooms *A*, *B*, *C*, and *E*, as indicated in the following plan, viz.:—

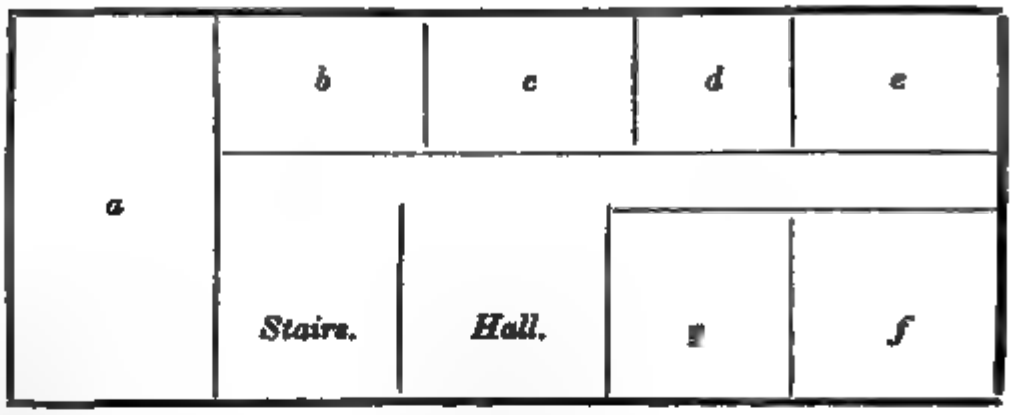
GROUND FLOOR.



Appendix A.

MINUTES AND CORRESPONDENCE.

FIRST FLOOR.



it will be necessary to provide a third room for my staff. To effect this, the room ("*e*") now used by the librarian has been selected: this should be connected by means of a "*lift*" for papers, &c., and also by a speaking tube with my present office, above which that room is situated.

It is proposed to allot room ("*d*"), now the ladies' reading-room, to the librarian, to fit it up suitably for that officer, and to remove the books now shelved there into the present "Joly" rooms ("*f*") and ("*g*").

It will be necessary to have a grate and chimney-piece put up in room ("*f*"), and in order to render the books secure to furnish the book-cases with lattice doors; same to be kept locked and opened only by the library officials.

In order to maintain an uninterrupted communication for the library staff only with the top storey, it has been proposed either to erect a temporary staircase at the end of the long passage, to lead from it to the stairs above, or to utilize the present stone spiral staircase, fixing barriers so as to prevent access that way to the library by unauthorized persons. The latter will involve less extent of alteration, and will not prevent the occasional use of the present staircase.

Although no provision has been made in the estimates for the execution of those works, yet as their necessity has arisen in consequence of the recent agreement with the Government, I trust that steps will be taken for having them carried out immediately, and as nearly as possible as follows, viz.:—

I. To make a proper communication between the lower and upper floors of the Library.

II. To remove the books of the "*Joly Library*" to the rooms in the upper storey.

III. To fix lattice doors to the bookcases in the rooms ("*g*") and ("*f*"), to put up a grate and chimney piece in room ("*f*"), and to connect the lavatory, &c. with that room.

IV. To transfer the books from room ("*d*") to rooms ("*g*") and ("*f*")

V. To fit up room ("*d*") in a suitable manner for the librarian.

I am, &c.

(Signed) W. E. STERLE,
General Director.

7.—MR. NORMAN MACLEOD to the DIRECTOR, MUSEUM OF SCIENCE and ART, DUBLIN.

Science and Art Department,
South Kensington, S.W., 4th July 1879.

SIR,

WITH reference to your recent inquiry with regard to a member of the Royal Dublin Society whose membership had lapsed through the neglect of his agent to pay his subscription for one year, I am directed by the Lords of the Committee of Council on Education to state that under the circumstances, if the gentleman referred to renews his membership of the Society, the privilege of borrowing books from the National Library may be restored to him, so far as this Department is concerned.

I am, &c.

(Signed) NORMAN MACLEOD.

8.—MR. NORMAN MACLEOD to the DIRECTOR, SCIENCE AND ART MUSEUM, DUBLIN.

Science and Art Department,
South Kensington, S.W., 7th July 1879.

SIR,

WITH reference to your letter of the 2nd instant, I am directed by the Lords of the Committee of Council on Education to state that their Lordships think it preferable that the Trustees of the National Library should inform you when they think it necessary to take legal proceedings for the recovery of a book borrowed and not returned. You should then inform the Department, in order that the Treasury may be communicated with.

I am, &c.
(Signed) NORMAN MACLEOD.

9.—MR. NORMAN MACLEOD to the DIRECTOR, MUSEUM OF SCIENCE AND ART, DUBLIN.

Science and Art Department,
South Kensington, S.W., 9th July 1879.

SIR,

IN reply to your letter of the 2nd instant, I am directed by the Lords of the Committee of Council on Education to inform you that their Lordships have been pleased to sanction the arrangements therein proposed with regard to the National Library of Ireland.

I am, &c.
(Signed) NORMAN MACLEOD.

10.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin,
Leinster House, 6th December 1879.

SIR,

I BEG to enclose a copy of a resolution of the Council of Trustees of the National Library of Ireland respecting the slow progress made in the binding of the books.

I also beg to add my testimony to that of the trustees as to the necessity of the more rapid execution of this work, and as to the damage which a large number of books, folio illustrated works especially, are sustaining in consequence of the condition in which they are and have been in for some time past.

I am, &c.
(Signed) W. E. STEELE,
General Director.

ENCLOSURE.

Science and Art Museum, Dublin,
Leinster House, 2nd December 1879.

"AT a meeting of the Council of Trustees of the National Library held on this day it was *Resolved:* That the serious attention of the Science and Art Department be called to the excessive delays that have taken place in the binding of the books in the Library, which at the present rate of its execution, will, it is estimated occupy a period of about five years. That, having regard to the great number of valuable books which are in danger of becoming destroyed, the Trustees urge the Science and Art Department to have the binding executed with as little delay as possible."

Appendix A. — Minutes and Correspondence.

11.—Mr. G. F. Duncombe to the Director, Museum of Science and Art, Dublin.

Science and Art Department, London, S.W.,
11th December 1879.

Sir,

With reference to the resolution of the Trustees of the National Library of Ireland, forwarded with your letter of the 6th December, I am directed to request that you will be so good as to inform me whether the delay in binding the books which they refer to is a delay in carrying out the arrangements made by the Treasury Committee which reported in August 1878, or whether the Trustees wish to convey that those arrangements would entail too long a period.

I am, &c.
(Signed) G. F. Duncombe.

12.—Dr. Steele to the Secretary, Science and Art Department.

Science and Art Museum, Dublin,
Leinster House, 15th December 1879.

Sir,

With reference to Mr. Duncombe's letter of the 11th instant as regards the binding of books of the National Library, I beg to enclose a copy of a letter received from the librarian on the subject.

I am, &c.
(Signed) W. E. Steele.

Enclosure.

Mr. W. Archer to Dr. Steele,

Dear Dr. Steele, 13th December 1879.

The delay as regards binding is owing to the second of the causes as put by Mr. Duncombe, or perhaps more precisely, it is due to the inability of the binder with his present staff to cope with the quantity of work in addition to his ordinary business, public and private.

They aver they can turn out only 500 vols. per two months = 3,000 vols. a year. I calculate it would take pretty nearly five years to overtake arrears at that rate.

Then there is the "Joly Library" and the Parliamentary papers, a very important item, and certain "newspapers" too. If the present binder cannot employ or find room for more hands, as to which I can say nothing, why should not the authorities give some of the work to other binders till the hurry is over?

Yours truly,
(Signed) Wm. Archer.

13.—Mr. Norman MacLeod to the Controller, Her Majesty's Stationery Office.

Science and Art Department,
South Kensington, S.W., 29th December 1879.

Sir,

I am directed by the Lords of the Committee of Council on Education to transmit the enclosed copy of a correspondence which has taken place with regard to the binding required to be executed for the National Library of Ireland.

See preceding Correspondence.

I am, &c.
(Signed) Norman MacLeod.

14.—Dr. Steele to the Secretary, Science and Art Department.

Science and Art Museum, Dublin,
Leinster House, 7th January 1880.

Sir,

I beg to acquaint you that at a meeting of the Council of Trustees of the National Library, held on the 6th instant, the resolution of which the annexed is a copy was agreed to.

I am, &c.
(Signed) W. E. Steele.

Science and Art Museum, Dublin,
Leinster House.
Tuesday, 6th January 1880.

At a meeting of the Council of Trustees of the National Library of Ireland held on this day—

The Right Hon. the Master of the Rolls in the Chair,

"The librarian having reported that he has now ready for the printer the catalogue of the additions made to the Library in the last five years, in continuation of the catalogues prepared by the Royal Dublin Society," it was—

Resolved:—"That the Department of Science and Art be requested to take steps to have it printed. That from the information before the Trustees they anticipate that the work will extend to 400 or 500 octavo pages of printed matter. They think that the number of copies should be about 1,000, and they recommend that the catalogue be sold to the public at the lowest possible cost, in order to increase the utility of the Library."

(Signed) Edward Sullivan, M.R.,
Chairman.

15.—Mr. Norman MacLeod to the Controller, Her Majesty's Stationery Office.

Science and Art Department,
South Kensington, S.W., 12th January 1880.

Sir,

I am directed to transmit for your information the enclosed copy of a resolution of the Council of Trustees of the National Library of Ireland. Resolution as above.

I am, &c.
(Signed) Norman MacLeod.

16.—Mr. Norman MacLeod to the Director, Museum of Science and Art, Dublin.

Science and Art Department, London, S.W.,
20th January 1880.

Sir,

With reference to your letter of the 15th December, I am directed to transmit, for the information of the Council of Trustees of the National Library of Ireland, the enclosed copy of a letter which has been received from the Stationery Office with reference to binding books for the Library.

I am, &c.
(Signed) Norman MacLeod.

Appendix A.

MINUTES AND CORRESPONDENCE.

ENCLOSURE.

The CONTROLLER of HER MAJESTY'S STATIONERY OFFICE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

SIR, Stationery Office, 17th January 1880.

I HAVE the honour to acknowledge the receipt of your letter of the 29th ultimo, enclosing copies of correspondence with regard to the delay in binding the books for the National Library of Ireland.

It was arranged in accordance with the recommendation of a Treasury Committee, which met in August 1878, that until the arrears in the binding for the Library had been made good, the books should be sent to the binders in batches of 500 volumes, a demand being sent to the Dublin Stationery Office with each batch, and the necessary provision was made in the estimates to meet the expense.

Up to this time it appears that two batches only have been sent in, and that of these the second was not received until nearly a month after the completion of the first.

The responsibility for the delay appears, therefore, to rest with the authorities of the Library, and it seems premature to consider the necessity of removing any part of the work to other binders until the capacities of the present contractors have been more fully tested.

The contractors have been warned of the necessity of executing the orders when they are received with as little delay as possible.

I am, &c.
(Signed) T. D. PIGOTT,
Controller.

17.—MR. NORMAN MACLEOD to the DIRECTOR, MUSEUM OF SCIENCE AND ART, DUBLIN.

Science and Art Department, London, S.W.,
24th January 1880.

SIR,

WITH reference to your letter of the 7th instant, I am directed to transmit, for the information of the Council of Trustees of the National Library of Ireland, the enclosed copy of a letter which has been received from the Stationery Office, as to printing the catalogue of additions made to the Library in the last five years.

I am, &c.
(Signed) NORMAN MACLEOD.

ENCLOSURE.

MR. T. D. PIGOTT to the ASSISTANT SECRETARY, SCIENCE AND ART DEPARTMENT.

SIR, Stationery Office, 16th January 1880.

I HAVE the honour to acknowledge the receipt of your letter of the 12th instant, transmitting a resolution of the Council of Trustees of the National Library of Ireland, as to printing the "Catalogue of additions made to "the Library in the last five years," and to acquaint you that there will be no objection to the execution of the work, provided the size of the book does not exceed the limits proposed.

The price in paper covers will probably be about 2*s*., if sold at the Library, and 3*s*. if sold through publishers.

It would be convenient that any exceptional service of this nature should in future be noticed in the reply sent to the circular of inquiries issued before the preparation of the estimates, in order that special provision may, if necessary, be made.

I am, &c.
(Signed) T. D. PIGOTT,
Controller.

18.—LIEUT.-COLONEL DONNELLY, R.E., to the DIRECTOR, DUBLIN MUSEUM.

Science and Art Department, London, S.W.,
7th April, 1880.

SIR,

ADVERTING to your letter of the 15th ultimo, I am directed to request that you will have the goodness to inform me whether you have communicated the letter from this Department of the 4th March as to the librarian moving out of room "E" into room "D," to the Trustees of the National Library of Ireland, and whether they have expressed any opinion on the subject.

I am, &c.
(Signed) J. F. D. DONNELLY.

19.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin, Leinster House,
8th April 1880.

SIR,

IN accordance with the request contained in your letter of the 7th instant (No. 12, 395) as regards the removal of the librarian from room "*e*" his present office, into "*d*" previous to my occupation of the former room, I beg to state that it is impossible that I could use that apartment unless it shall be provided with the same extent of press accommodation as it now possesses.

As it appears that the librarian will require but three *lock-up* presses for his use in room "*d*" *at present*, I yesterday made an application to the Board of Public Works on the subject, and as the cost of such work would be very trifling indeed, I have some hope that the Board will be able to have it carried out.

I am, &c.
(Signed) W. E. STEELE.
General Director.

20.—DR. STEELE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Science and Art Museum, Dublin, Leinster House,
8th April, 1880.

SIR,

WITH reference to Lieut.-Col. Donnelly's letter of the 7th instant (No. 12,395) relative to your communication of the 4th March last on the subject of the removal of the librarian from room "*e*" into room "*d*," I beg to refer you to my letter of the 15th ultimo and to acquaint you that the subject having been brought under the notice of the Trustees at their meeting on Tuesday last, the resolution of which the annexed is a copy was agreed to.

I am, &c.
(Signed) W. E. STEELE.
General Director.

ENCLOSURE.

NATIONAL LIBRARY OF IRELAND.

Science and Art Department,
Leinster House, Kildare Street, Dublin.

At a meeting of the Council of Trustees of the above Library held on Tuesday 6th April 1880:

His Grace the Duke of Leinster in the chair, it was—

"*Resolved*: That as the Trustees are anxious to assist, within their province, in carrying out the arrangement which my Lords made last May with the Royal Dublin Society, and as it has been reported to them that the

Appendix A.

MINUTES AND CORRESPONDENCE.

Commissioners of Public Works are not yet in a position to supply the fitments of a librarian's room, they request that the presses in the librarian's present room, which belong to the Library, and are a necessary part of the Library fitments, may be removed into the room which the librarian is to occupy, so that the removal may be effected without further delay."

"The Trustees beg to explain to my Lords that it is necessary for the transaction of the librarian's business that he should have presses with locks to them. There are such presses in the librarian's present room, which will suffice if removed. There are no fittings except *shelves* in the room into which the librarian is to be removed."

CORRESPONDENCE relating to CHARTER for ROYAL DUBLIN SOCIETY.

1.—MR. T. H. BURKE to the SECRETARY, SCIENCE AND ART DEPARTMENT.

Dublin Castle, 24th July 1879.

SIR,

I AM directed by the Lords Justices to transmit herewith, for the information of the Committee of Council on Education, copy of a letter addressed to the Chief Secretary for Ireland by the Royal Irish Academy, relative to the grant of a new charter to the Royal Dublin Society; and I am to request that you will move their Lordships to favour me with any observations which they may wish to make thereon, for their Excellencies' information.

I am, &c.
(Signed) T. H. BURKE.

ENCLOSURE.

MR. ROBERT ATKINSON to the HON. JAMES LOWTHER, M.P., CHIEF SECRETARY FOR IRELAND.

Royal Irish Academy,
19, Dawson Street, Dublin, 1st July 1879.

SIR,

THE Council of the Royal Irish Academy having reason to believe that a new charter with extended powers is being sought for by the Royal Dublin Society, I am directed to draw the attention of Her Majesty's Government to the letter addressed by the Council of the Academy to the Secretaries of Her Majesty's Treasury on the subject of the proposed charter, dated May 22, 1877, and a copy of which I herewith send.

I am to draw special attention to the concluding paragraph of that letter, in which the Council humbly submit that the word "scientific" in article 4, must be construed as relating not to abstract Science, but to the practical application of Science in the useful arts, and that no papers of the former class which may be proposed for publication by the Royal Dublin Society should be printed at the public expense, so long at least as that Society is governed by its present charter.

And if it should be proposed to grant a new charter, with such extended powers as have been above referred to, the Council respectfully claim to be allowed to submit to Her Majesty's Government their reasons for objecting to the adoption of such a course.

I am, &c.
(Signed) ROBERT ATKINSON,
Secretary of Council.

2.—DR. J. K. INGRAM to the LORDS COMMISSIONERS OF HER MAJESTY'S TREASURY.

Royal Irish Academy House, Dublin,
22nd of May 1877.

GENTLEMEN,

I AM directed by the Council of the Royal Irish Academy to ask your attention to one of the heads of agreement between the Government and the Royal Dublin Society, embodied in the memorandum of provisions agreed to on the 5th of March last.

The Royal Dublin Society was established by charter in 1750, under the name "Dublin Society for promoting Husbandry and other useful Arts in Ireland."

A supplemental charter was granted in 1866. Nothing is enacted in it respecting a change of the objects of the Society, which is described as the Dublin Society for the Promotion of Husbandry and other useful Arts and Sciences in Ireland. The intention was plainly not to alter the sphere of

Appendix A.

MINUTES AND CORRESPONDENCE.

labour which it had always honourably fulfilled, namely, that of advancing the agricultural and industrial interests of the country, and the phrase "useful Arts and Sciences" shows that it was meant still, as before, to occupy itself not with abstract Science (which had been provided for in the Royal Irish Academy), but only with Science in relation to its industrial or economic applications. The fact of some papers not answering to this description having been read at its meetings in recent years cannot affect the true character of the Society, or the correct interpretation of its charters and its history. At present, however, as we have reason to know, some of its most active members entertain the project of diverting it from the objects which it was founded to promote, and embarking it in the cultivation of abstract Science. To enable it to alter its character in this way, a new charter would be necessary.

If such a charter should be sought it will become the duty of the Royal Irish Academy, which was established by Royal Charter for the cultivation of Science in the largest acceptation of the word (as well as of other studies), and has fully and faithfully discharged its duty in that field, to represent to the Government the impolicy of public resources being used for the establishment in a city like Dublin of a second society which would occupy the same intellectual domain, and thus carry on an active competition with the Royal Irish Academy, whilst, on the other hand, Ireland would be deprived of the valuable services in relation to industrial subjects which are performed for England by the Society of Arts, and have hitherto been rendered to this country by the Royal Dublin Society.

But the point to which the Council desire at present to ask the attention of the Government is a less general one, which, however, requires more immediate notice.

In article 4 of the terms of agreement lately entered into between the Government and the Royal Dublin Society it is stated that the Government will authorise the Stationery Office to continue to print the *proceedings* and *transactions* of the Society, limiting them strictly to its scientific work, for a period of five years from the date of the transfer of the collections referred to in preceding articles. We believe that the intention of the Government in using the words "limiting them strictly to its scientific work" was not to sanction indirectly an enlargement of the sphere of the Society's operations, or the diversion of them into a new channel, but to exclude such publications as might relate to the practical action of the Society in connexion with Agriculture. And if the words be so interpreted we are far from objecting to the privilege thus accorded to the Royal Dublin Society. On the contrary, we regard it as dictated by the kindest feelings and as a seasonable and thoughtful aid to the Society, whilst re-organising itself on an independent basis. But we have reason to believe that the intention is entertained by some members of the Society to take advantage of the word "scientific" used in this article, as if it authorised the printing of matter belonging to abstract, as distinguished from practical Science, and to the exclusion of industry and art. This, we beg to represent, cannot be done under the existing charter of the Society, and we must respectfully express our opinion that it would be a misapplication of public funds to use them for that purpose.

The Council, therefore, humbly submit that the word "scientific" in article 4 must be construed as relating, not to abstract Science, but to the practical application of Science in the useful arts, and that no papers of the former class which may be proposed for publication by the Royal Dublin Society should be printed at the public expense, so long at least as that Society is governed by its present charter. And if it should be proposed to grant a new charter with such extended powers as have been above referred to, the Council respectfully claim to be allowed to submit to Her Majesty's Government their reasons for objecting to the adoption of such a course.

I am, &c.

(Signed) JOHN K. INGRAM, LL.D.
Secretary of the Council.

3.—LIEUT.-COLONEL DONNELLY, R.E. to MR. T. H. BURKE.

Science and Art Department, London, S.W.,
9th August 1879.

SIR,

IN reply to your letter of the 24th ultimo, transmitting by direction of the Lords Justices a copy of a letter addressed to the Chief Secretary for Ireland by the Royal Irish Academy relative to the grant of a new charter to the Royal Dublin Society, I am directed by the Lords of the Committee of Council on Education to state that their Lordships see no reason to alter the opinion which they formed when this question was raised in 1877. They believe that the strictures contained in the letter from the Royal Irish Academy to the Lords Commissioners of Her Majesty's Treasury, dated 22nd May 1877, were fully met by the reply of the Delegates of the Royal Dublin Society, and therefore that it could not be said that the former Society had any claim to a monopoly as against the Royal Dublin Society in the cultivation of abstract Science.

At the same time my Lords see the great disadvantage of granting State aid to two societies in Dublin with analogous objects, and the loss to Ireland which such a diffusion of energy must entail.

They were in hopes that the negotiations commenced in 1876 for the purpose of establishing a Science and Art Museum would have been taken advantage of by these two societies and the Royal Agricultural Society, to form three societies, with distinct and different aims, one for the cultivation of literature and archæology, another for the cultivation of Science, and another for the advancement of Agriculture. Though, owing to various circumstances, this most desirable object has not been attained as yet, my Lords trust it may still be brought about. This can only be through the action of the societies themselves, by negotiations among themselves, and by mutual concessions. But my Lords hope that the Lord Lieutenant will, if the opportunity should arise, exert his influence in forwarding the matter.

I am, &c.

(Signed) J. F. D. DONNELLY,
Lieut.-Colonel, R.E.

Appendix A.

MINUTES AND CORRESPONDENCE.

CORRESPONDENCE with the ROYAL SOCIETY relating to ADDITIONAL STATE AID for SCIENTIFIC RESEARCH, 1878–9–80.

The Royal Society, Burlington House,
March 1, 1878.

SIR,

I AM directed by the President and Council of the Royal Society to communicate to you, for the information of the Lords of the Committee of Council on Education, their recommendations respecting the appropriation of the 4,000*l.* voted by Parliament for the promotion of scientific research. The recommendations headed respectively "not personal" and "personal" are contained in the two lists inclosed herewith. In the case of that headed "not personal" it is to be understood that the sums appropriated will be expended upon apparatus, materials, and assistance.

I am further directed to apply for a sum of 75*l.* to defray administrative expenses.

I have, &c.,

The Secretary of the Committee of Council on Education, Science and Art Department.

(Signed) G. G. STOKES, Secretary, R.S.

GOVERNMENT FUND of £4,000.

Not Personal.

	£
David Gill, 93, Wimpole Street, W., to defray expenses connected with a determination of the solar parallax by observation of the diurnal parallax of Mars	250
Rev. Dr. S. Haughton, Trinity College, Dublin, for aid in the numerical reductions of the tidal observations made on board the "Discovery" and "Alert" in the late Arctic expedition	75
Professor Fleeming Jenkin, 3, Great Stuart Street, Edinburgh, for experimental investigations on friction	50
W. Chandler Roberts, Royal Mint, Tower Hill, E., for researches on metals and alloys in a molten state passing though capillary tubes	25
J. Kerr, Free Church Training College, Glasgow, for continuation of electro-optic and magneto-optic researches	50
J. Norman Lockyer, 16, Penywern Road, South Kensington, S.W., for continuation of spectroscopic researches	200
Dr. O. J. Lodge, University College, Gower Street, W.C., for investigations into the effect of light on the residual charge of dielectrics; on the conductivity of hot glass, and other transparent conductors; on electrolytic conduction, and other subjects	100
Thomas Stevenson, Hon. Secretary, Scottish Meteorological Society, General Post Office Buildings, Edinburgh, for aid in carrying on a simultaneous series of anemometrical observations at different heights, and in sheltered and unsheltered situations	50
W. Galloway, Cardiff, for further investigation of the explosive properties of mixtures of firedamp and coal dust with air	100
Sir William Thomson, University, Glasgow, for tidal investigations	100
Sir William Thomson, Glasgow, for experiments in magnetization of different qualities of iron, nickel, and cobalt under varying stresses and temperatures	100

	£
J. E. H. Gordon, Pixholme, Dorking, for continuation of experimental measurements of the specific inductive capacity of dielectrics	100
H. Tomlinson, 36, Burghley Road, Highgate Road, for researches on the alteration of thermal and electrical conductivity produced by magnetism, and on the alteration of electrical resistance produced in wires by stretching	100
Professor H. Alleyne Nicholson, University of St. Andrew's, R. Etheridge, jun., Geological Survey Office, Edinburgh, for aid in examining the fauna of the silurian deposits of the Girvan district, Ayrshire, and in publishing a descriptive list of the same	75
R. McLachlan, 39, Limes Grove, Lewisham, for aid towards the expense of publication of a revision and synopsis of European trichoptera	50
C. Callaway, Wellington, Shropshire, for aid in working out the so-called eruptive rocks of Shropshire, and in verifying certain points in local geology	25
H. T. Stainton, Mountsfield, Lewisham, in aid of the publication fund of the Zoological Record Association	150
Dr. J. W. Dawson, McGill College, Montreal, for aid in excavating erect trees in the coal formation of Nova Scotia, in beds where they are known to contain reptilian and other remains	50
Dr. R. H. Traquair, Museum of Science and Art, Edinburgh, for aid in preparing and publishing a monograph on the carboniferous ganoid fishes of Great Britain	75
W. Saville Kent, St. Helier's, Jersey, to pay for microscopical apparatus for the further prosecution of investigations into the structure and life-history of certain lower protozoa	50
Dr. W. A. Brailey, 38, King's Road, Brownswood Park, Green Lanes, N., for researches on the causes determining the tension of the globe of the eye in man and animals, and on the physiological influence on this tension of such substances as atropia, daturin, eserine, and pilocarpine	25
E. A. Schäfer, University College, Gower Street, for payment of an assistant in continuing his histological and embryological investigations	50
H. Woodward, 117, Beaufort Street, Chelsea, for continuation of work on the fossil crustacea, especially with reference to the trilobita and other extinct forms, and their publication in the volumes of the Palæontographical Society	75
Prof. H. G. Seeley, 61 Adelaide Road, N.W., for an examination of the structure, affinities, and classification of the extinct reptilia and allied animals	75
Dr. C. R. A. Wright, St. Mary's Hospital, Paddington, for continuation of researches on certain points in chemical dynamics; on the determination of chemical affinity in terms of electrical magnitudes; and on some of the lesser known alkaloids	100
Prof. C. Schorlemmer, Owens College, Manchester, for continuation of researches into (1) the normal paraffins, (2) suberone, (3) aurin	100
Prof. E. J. Mills, 234, East George Street, Glasgow, for a research on standard industrial curves	100
	£2,300

Appendix A.

MINUTES AND CORRESPONDENCE.

Personal.

	£
J. Allan Brown, 9, Abercorn Place, St. John's Wood, N.W., for continuation of correction of the errors in the published observations of the colonial magnetic observatories - - -	150
Dr. J. P. Joule, 12, Wardle Road, Sale, near Manchester, for an exhaustive inquiry into the change which takes place in the freezing and boiling points of mercurial thermometers by long exposure to those temperatures - - - - -	200
Prof. W. K. Parker, 36, Claverton Street, S.W., for assistance in continuation of researches on the morphology of the vertebrate skeleton and the relations of the nervous to the skeletal structure, chiefly in the head - - - - -	300
Prof. A. H. Garrod, 10, Harley Street, W., for aid towards publication of the second fasciculus of an exhaustive treatise on the anatomy of birds - - - - - -	100
Rev. J. F. Blake, 11, Gauden Road, Clapham, for aid in continuing the publication of a synopsis of British fossil cephalopada -	100
Dr. W. A. Brailey, 38 King's Road, Brownswood Park, Green Lanes, N., for researches on the causes determining the tension of the globe of the eye in man and animals, and on the physiological influence on this tension of such substances as atropia, daturin, eserine and pilocarpine - - -	25
Dr. C. R. A. Wright, St. Mary's Hospital, Paddington, for continuation of researches on certain points in chemical dynamics; on the determination of chemical affinity in terms of electrical magnitudes; and on some of the lesser known alkaloids -	200
Prof. Schorlemmer, Owens College, Manchester, for continuation of researches into (1) the normal paraffins, (2) suberone, (3) aurin - - - - - - - - -	150
W. N. Hartley, King's College, Strand, for investigation of the fluid contents of mineral cavities, of the properties of the phosphate of cerium, of methods of estimating the carbonic acid in small samples of air, and of photographic spectra -	150
Dr. Armstrong, Lewisham Village, S.E., for continuation of researches into the phenol series - - - -	250
	£1,625

The Royal Society, Burlington House,
March 6th, 1879.

SIR,

I AM directed by the President and Council of the Royal Society to communicate to you, for the information of the Lords of the Committee of Council on Education, their recommendations respecting the appropriation of the 4,000*l.* voted by Parliament for the promotion of scientific research. The recommendations headed respectively "not personal" and "personal" are contained in the two lists enclosed herewith; and a separate list contains the addresses.

In the case of that headed "not personal" it is to be understood that the sums appropriated will be expended upon apparatus, materials, and assistance.

I am further directed to apply for a sum of 75*l.* to defray administrative expenses.

I have, &c.,
(Signed) G. G. STOKES,
Secretary, R.S.

The Secretary of the
Committee of Council on Education,
Science and Art Department.

GOVERNMENT FUND OF 4,000*l.*

Not Personal.

	£
Arnulph Mallock, Brampford Speke, Exeter, for the cost of construction of a machine for ruling diffraction gratings of large size	200
Sir William Thomson, University, Glasgow, for completing a tidal harmonic analyser	50
Sir William Thomson, University, Glasgow, for continuation of experiments on the effects of stress on magnetization	50
J. Kerr, 167, Hill Street, Garnet Hill, Glasgow, for continuation of electro-optic and magneto-optic investigations	50
J. H. Poynting, Monton, Eccles, for continuation of experiments to determine the mean density of the earth, by means of an ordinary balance	93
Rev. Dr. S. Haughton, Trinity College, Dublin, for continuing his discussion of tidal observations made in Arctic Seas	50
J. N. Lockyer, 16, Penywern Road, S. W., for continuation of researches on the solar spectrum	200
W. C. Roberts, Royal Mint, E., for continuation of researches on the passage of metals and alloys in a molten state through capillary tubes	25
R. H. Ridout, Grammar School, Monmouth, to investigate more fully the sound developed in homogeneous conductors by electrical disturbance	15
Professors G. D. Liveing, Newnham, Cambridge, and J. Dewar, Brookside, Cambridge, for continuing their researches into the spectra of elements and compounds under various circumstances	100
W. E. Ayrton, 98, Palace Gardens Terrace, W., for extending to other gases the investigations already made in air (by Prof. Perry and himself)on the electro-motive force of contact of solids and liquids	100

Appendix A.

MINUTES AND CORRESPONDENCE.

	£
J. B. Jordan, Royal School of Mines, Jermyn Street, for the construction of a glycerine barometer, and for carrying on observations thereon	30
W. Galloway, Cardiff, for continuing his investigation of the effect of coal-dust in promoting the explosion of a mixture of air and fire-damp	80
Herbert Tomlinson, King's College, Strand, for a research into the effect of strain and pressure on matter when under the influences of the forces of heat, electricity, magnetism, and chemical affinity	50
J. E. H. Gordon, Pixholme, Dorking, for continuation of experimental measurements of the specific inductive capacity of dielectrics	100
B. T. Lowne, 49, Colville Gardens, Bayswater, for further investigation of the structure and functions of the eyes of invertebrates	20
Prof. M. F. Heddle, University, St. Andrew's, for a research connected with the scientific mineralogy and geognosy of Scotland	50
W. A. Forbes, St. John's College, Cambridge, for an examination of the pterolysis of parrots, with a view to a better arrangement and classification of the genera of that sub-order	7
Dr. C. Callaway, Wellington, Salop, for a research into the relations of the Pre-Cambrian and Cambrian rocks of Shropshire, extension thereof into Scottish Highlands, with a view to the more accurate correlation of the sub-divisions of the lower palæozoic rocks	20
H. T. Stainton, Mountsfield, Lewisham, in aid of the publication fund of the Zoological Record Association	100
Prof. H. A Nicholson, University, St. Andrew's, and R. Etheridge, Jun., Geological Survey Office, Edinburgh, for continuance of aid in examining the fossils of the silurian deposits of Girvan, Ayrshire, and in publishing a monograph upon them	60
Colonel H. H. Godwin-Austen, 17, Bessborough Gardens, S. W. (on behalf of British Association Committee), for investigation of the natural history of the Island of Socotra	175
Rev. A. E. Eaton, 51, Park Road, Bromley, Kent, to defray the cost of printing and publishing a descriptive monograph of the ephemeridæ	75
H. Woodward, 117, Beaufort Street, Chelsea, for continuation of work on the fossil crustacea, especially with reference to the trilobita and other extinct forms, and their publication by the palæontographical society	75
Dr. W. H. Gaskell, Grantchester, Cambridge, for continuation of researches upon vaso-motor action	25
C. Lapworth, 4, Kinburn Place, St. Andrew's, for assistance in work among the silurian rocks of South Scotland, and in special studies of the British graptolites	50
H. G. Seeley, 61, Adelaide Road, N. W., for continuation of investigation into the structure, affinities, and classification of the extinct reptilia and allied animals	20
Prof. W. Stirling, University, Aberdeen, for investigations into the histology and physiology of the nervous apparatus of the lungs	25
C. G. Williams, Keppel House, St. Anne's Hill, Wandsworth, for (1) investigation of the chemical history and physiological action of *s*. lutidine; and (2) for continuation of researches on emeralds and beryls	50

	£
W. N. Hartley, King's College, Strand, for continuation of researches on the action of organic substances on the ultra-violet rays of the spectrum - - - - - -	50
Prof. C. Schorlemmer, Owen's College, Manchester, for continuation of researches into (1) aurin; (2) the normal paraffins; (3) suberone - - - - - - -	50
J. H. Collins, 57, Lemon Street, Truro, for continuation of chemical, mineralogical, microscopical, stratigraphic observations on and investigations of the rocks of Cornwall - - -	10
Prof. E. A. Letts, University College, Bristol, for experiments with hæmatoxyline, to determine its constitution, and, if possible, to obtain it by synthesis; and for experiments on the action of sodium on hydrochlorate of turpentine and others - -	80
G. C. Robinson, University, Edinburgh, for the separation and examination of bases of high boiling points contained as sulphates in the "vitriol tar" of the paraffin oil manufacture, and the determination of composition and properties of higher and, at present, unknown members of the leucoline series of bases - - - - - - - - -	15
Dr. C. R. A. Wright, Chemical Laboratory, St. Mary's Hospital, W., for continuation of researches on certain points in chemical dynamics, and on some of the less known alkaloids; and for a research on the determination of chemical affinity by means of electrical measurements - - - - - -	50
P. P. Bedson and W. C. Williams, Owen's College, Manchester, for an investigation into the specific refractive powers of benzene derivatives, and of the derivatives of other aromatic hydrocarbons - - - - - - - -	50
Dr. H. E. Armstrong, London Institution, Finsbury Circus, E. C., for continuation of observations on the phenols, and for experiments on the action of reducing agents on nitric acid - -	50
	£2,300

Personal.

Dr. G. Gore, 50, Islington Row, Birmingham, for continuation of researches into the thermo-electric properties of liquids; the determination of the electro-motive force, and internal resistance of a liquid thermo-electric battery, and to complete tables of electric relations of metals at difierent temperatures - -	100
J. Kerr, 167, Hill Street, Garnet Hill, Glasgow, for continuation of electro-optic and magneto-optic investigations - -	50
A. Tribe, 14, Denbigh Road, Bayswater, for researches into the distribution of the radical of electrolytes on metallic conductors	50
E. Neison, Scientific Club, Savile Row, for continuation of computations in the lunar theory - - - -	75
A. Buchan, 72, Northumberland Street, Edinburgh, for the expense of collecting and discussing data for determination of the hourly means of the barometer for each month, from a large number of stations, on land and sea, over the globe - -	100
Herbert Tomlinson, King's College, Strand, for a research into the effect of strain and pressure on matter when under the influences of the forces of heat, electricity, magnetism, and chemical affinity	50
Rev. G. Henslow, 6, Titchfield Terrace, Regent's Park, for aid in researches in vegetable physiology; on the absorption of dew and rain, and on the transpiration of plants - - -	50

Appendix A.

MINUTES AND CORRESPONDENCE.

	£
B. T. Lowne, 49, Colville Gardens, Bayswater, for further investigation of the structure and functions of the eyes of invertebrates	20
Prof. M. F. Heddle, University, St. Andrew's, for a research connected with the scientific mineralogy and geognosy of Scotland	50
Dr. C. Callaway, Wellington, Salop, for a research into the relations of the Pre-Cambrian and Cambrian rocks of Shropshire, extension thereof into Scottish Highlands, with a view to the more accurate correlation of the sub-divisions of the lower palæozoic rocks	30
Prof. W. K. Parker, 36, Claverton Street, Pimlico, for assistance in continuation of researches on the morphology of the vertebrate skeleton, and the relations of the nervous to the skeletal structure	300
H. G. Seeley, 61, Adelaide Road, N. W., for continuation of investigation into the structure, affinities, and classification of the extinct reptilia and allied animals	60
Dr. W. R. Hodgkinson, Royal College of Chemistry, Science and Art Department, South Kensington, for continuation of researches on the action of chlorine and of dry ammonia on hydro-cinnamein, and other investigations	175
W. N. Hartley, King's College, Strand, for continuation of researches on the action of organic substances on the ultra-violet rays of the spectrum	100
Prof. C. Schorlemmer, Owen's College, Manchester, for continuation of researches into (1) aurin; (2) the normal paraffins; (3) suberone	100
J. H. Collins, 57, Lemon Street, Truro, for continuation of chemical, mineralogical, microscopical, stratigraphic observations on and investigations of the rocks of Cornwall	20
Dr. C. R. A. Wright, Chemical Laboratory, St. Mary's Hospital, W., for continuation of researches on certain points in chemical dynamics, and on some of the less known alkaloids; and for a research on the determination of chemical affinity by means of electrical measurements	150
Dr. H. E. Armstrong, London Institution, Finsbury Circus, E.C., for continuation of observations on the phenols, and for experiments on the action of reducing agents on nitric acid	100
	£1,580

The Royal Society, Burlington House,
February 26th, 1880.

SIR,

I AM directed by the President and Council of the Royal Society to communicate to you, for the information of the Lords of the Committee of Council on Education, their recommendations respecting the appropriation of the 4,000*l.* voted by Parliament for the promotion of scientific research. The recommendations headed respectively "not personal" and "personal" are contained in the two lists inclosed herewith. In the case of that headed "not personal" it is to be understood that the sums appropriated will be expended upon apparatus, materials, and assistance.

I am further directed to apply for a sum of 75*l.* to defray administrative expenses.

I have, &c.,
(Signed) G. G. STOKES.
Secretary, R.S.

To the Secretary of the
Committee of Council on Education,
Science and Art Department.

GOVERNMENT FUND OF £4,000.

Not Personal.

	£
R. H. M. Bosanquet, (St. John's College, Oxford), for the cost of an engine with clock, bellows, and other appliances to be employed in the solution of various problems in acoustics, the repetition and examination of König's experiments, the determination of absolute pitch, and the transformation of sound into periodic electric currents - - - - -	152
A. Mallock, (Brampford Speke, Exeter), for the construction of a room and foundation for the diffraction grating ruling machine, and for water power - - - - - -	50
Dr. Hopkinson, (78, Holland Road, W.), for continuing experiments on the residual charge of the Leyden jar, on specific inductive capacity, and for other electrostatic experiments -	150
D. Gill, (Royal Observatory, Cape of Good Hope), for the payment of computers to aid in the reduction of heliometric observations made by him at the Cape of Good Hope - - -	75
J. Glaisher, (1, Dartmouth Place, Blackheath), towards the expense of printing the factor table of the fifth million - - -	150
Prof. R. Grant, (The Observatory, Glasgow), for the expense of printing a catalogue of the mean places of 6,350 stars, based on observations made at the Glasgow Observatory - -	300
Profs. Liveing and Dewar, (Newnham, Cambridge, and 19, Brookside, Cambridge), for continuation of experiments in relation to spectroscopic investigations - - - -	200
T. Stevenson, (Scottish Meteorological Society, 6, Shandwick Place, Edinburgh), for averaging and discussing a register of 23 years' observations of temperature of the barometer and thermometer, and of rain, kept at Rothesay - - -	50
A. Tribe, (14, Denbigh Road, Bayswater, W.), for researches into the distribution of salt radicals in metals suspended in electrolytes in the act of electrolysis, and analogies (or otherwise) between phenomena in dielectric and electrolytic media - -	25
J. E. H. Gordon, (British Association, 22, Albemarle Street) for continuation of experimental measurements of the specific inductive capacity of dielectrics - - - - -	73

Appendix A. — Minutes and Correspondence.

	£
B. Stewart, (Owens College, Manchester), for an investigation of inequalities of short periods in a series of observations - -	60
S. Allport, (26 Barker Street, Handsworth, Birmingham), for an accurate investigation of the phenomena of contact metamorphism, especially that produced by the intrusion of granite among sedimentary deposits - - - - -	90
Prof. Heddle, (University of St. Andrew's), for continuation of a research connected with the scientific mineralogy and geognosy of Scotland - - - - - - -	50
H. T. Stainton, (Mountsfield, Lewisham, S.E.), in aid of the publication fund of the Zoological Record Association - -	100
D. Mackintosh, (Whitford Road, Tranmere, Birkenhead), for an examination of the southerly extension of northern erratics into the valleys and up the hill slopes of North Wales, with a particular reference to the extreme height by the great glacial submergence - - - - - - -	15
Prof. H. Alleyne Nicholson, (Saint Andrew's University), and R. Etheridge, Junr., (Geological Survey Office, Edinburgh), for further assistance towards the publication of the third fasciculus of their "Monograph of the Silurian Fossils of Girvan, "Ayrshire" - - - - - - -	75
R. Etheridge, Jun., for the cost of illustrations of new or little known British and Australian palæozoic invertebrate fossils -	25
Major Godwin Austen, (17, Bessborough Gardens, London, S.W.) on behalf of British Association committee, for investigation of the natural history of the island of Socotra - - -	125
H. G. Seeley, (61, Adelaide Road, N.W.), for completion of researches into the structure, affinities, and classification of the extinct reptilia and allied animals - - - -	20
H. Woodward, (British Museum), for continuation of work on the fossil crustacea, especially with reference to the trilobita and other extinct forms, and their publication by the Palæontographical Society - - - - - -	75
Rev. J. F. Blake, (17, Gilston Road, S.W.), for travelling and other expenses in continuing a correlation of the Upper Jurassic deposits of England with those of the Continent -	100
Prof. Schorlemmer, (Owens College, Manchester), for continuation of researches into (1) aurin, (2) the normal paraffins, (3) suberone - - - - - - -	100
C. G. Williams, (St. Stephen's Villa, St. Stephen's Road, Hounslow), for (1) an investigation of the chemical history and physiological action of *β*. lutidine; and, (2), to continue researches on emeralds and beryls - - - -	50
Dr. Dupré, (Westminster Hospital), for investigation of the organic matters dissolved in potable waters - - -	75
J. H. Collins, (57, Lemon Street, Truro), for continuation of chemical, mineralogical, microscopical, stratigraphic observations on, and investigations of the rocks of Cornwall - - -	10
Prof. W. N. Hartley, (Royal College of Science for Ireland, Dublin), for continuation of researches on the action of organic substances on the ultra-violet rays of the spectrum - -	100
Prof. A. H. Church, (Royston House, Kew), for continuation of researches in plant chemistry - - - - -	50
	£2,345

Personal.

	£
G. J. Symons, (62, Camden Square, N.W.), for a computation of the mean annual rainfall at all known rainfall stations in the British isles at which the requisite data exists (*α*) during the 10 years 1867–76 (*β*) and also during the 10 years 1870–79, to thoroughly discuss the same, and to prepare a monograph thereupon	120
Dr. Gore, (50, Islington Row, Birmingham), for further investigation of the thermo-electric properties of liquids; (2), completion of a research into the phenomena of the capillary electroscope; and (probably), (3) examination of the effects of electric currents in friction	100
E. Neison, (Scientific Club, 4, Savile Row, W.), for continuation of computations in the lunar theory	75
J. Kerr, (Free Church Training College, Glasgow), for continuation of electro-optic and magneto-optic researches	100
A. Buchan, (Scottish Meteorological Society, 6, Shandwick Place, Edinburgh), for further aid in the construction of isobaric charts for the United Kingdom	100
A. Tribe, (14, Denbigh Road, Bayswater, W.), for researches into the distribution of salt radicals in metals suspended in electrolytes in the act of electrolysis, and analogies (or otherwise) between phenomena in dielectric and electrolytic media	25
H. Tomlinson, (36, Burghley Road, Highgate Road), for continuation of researches into the effect of strain and pressure on matter when under the influences of the forces of heat, electricity, magnetism and chemical affinity	100
S. Allport, (26, Barker Street, Handsworth, Birmingham), for an accurate investigation of the phenomena of contact metamorphism, especially that produced by the intrusion of granite among sedimentary deposits	10
W. K. Parker, (36, Claverton Street, S.W.), for assistance in continuation of researches on the morphology of the vertebrate skeleton, and the relations of the nervous to the skeletal structure	300
Prof. Heddle, (University of St. Andrew's), for continuation of a research connected with the scientific mineralogy and geognosy of Scotland	100
J. M. Crombie, (1, Spondon Villas, Melbourne Grove, East Dulwich, S.E.), for aid in researches on the origin and structure of the vegetative and reproductive organs of lichens, with special reference to the recent theory that lichens are not antonomous plants	100
B. T. Lowne, (65, Cambridge Gardens, Notting Hill, W.), for further researches on the structure, development, and functions of the eyes of invertebrates	50
H. G. Seeley, (61, Adelaide Road, N.W.), for completion of researches into the structure, affinities, and classification of the extinct reptilia and the allied animals	60
C. Lapworth, (4, Kinburn Place, St. Andrew's), for assistance in continuing studies of the graptolites, and of the silurian rocks of Britain	70
Prof. Schorlemmer, (Owens College, Manchester), for continuation of researches into (1) aurin, (2) the normal paraffins, (3) suberone	100

Appendix A. — Minutes and Correspondence.

	£
Dr. C. R. A. Wright, (Chemical Laboratory, St. Mary's Hospital, Paddington, W.), for proposed experiments on the determination of chemical affinity in terms of electrical magnitudes - -	150
J. H. Collins, (57, Lemon Street, Truro), for continuation of chemical, mineralogical, microscopical, stratigraphic observations on, and investigations of, the rocks of Cornwall - -	20
	£1,580

APPENDIX B.

1. Report on Science Schools and Classes by Lieut.-Col. Donnelly, R.E.

The number of Science Schools examined in May 1879 was 1,355 as compared with 1,297 in May 1878, the number of separate classes under instruction having been respectively 4,564 and 4,049, and of individual students 59,519 and 57,230. It will be seen, therefore, that there was an increase under each of these heads. There was, however, a small diminution in the number of students belonging to these schools who presented themselves for examination, there being only 34,111 in 1879 as compared with 35,711 in 1878. On the other hand, there was a small increase, 4,375 as against 4,504, in the number of persons presenting themselves for examination, who were not registered students in Science classes under the Department.

Notwithstanding the falling off in the number of persons examined, there was, however, an increase in the total number of papers worked and in the number of individual candidates who were successful. The number of papers worked in 1878 and 1879 were respectively 62,608 and 67,031, and of individual candidates successful 26,063 and 26,639. Of these successful candidates, 14,234 passed for the first time as against 14,001 who passed for the first time in 1878. The examinations were held at 897 provincial centres and 97 metropolitan centres, the numbers having been in 1878 respectively 843 and 88.

The number of papers worked in the elementary stage was 51,695, in the advanced stage 14,208, and in Honours 1,128, as compared with 49,173 elementary, 11,878 advanced, and 939 Honours in 1878. There was therefore an increase in each of the three divisions of the examination. The number of successful papers in the elementary stage was, however, not quite equal to the number of successful papers in the same stage in 1878, the actual figures being 32,085 for 1878, of which 9,234 were first classes, and 31,833 for 1879, of which only 8,213 were in the first class. In the advanced stage and Honours the increase in the number of papers worked was also maintained in the number of successes, there being 9,573, of which 2,440 were of the first class as against 8,200, of which 2,254 were of the first class, in 1878. In Honours the number of successful candidates in 1878 was 264, of whom 80 were in the 1st class, and in 1879 the number was 340, of whom 83 were in the 1st class.

2. (a). Results of the Science School Examinations, May 1878 and 1879.

	1878.	1879.
Number of Schools* under Teachers examined - -	1,297	1,355
Number of Classes in the same - - - -	4,049	4,564
Number of individuals under instruction in Classes under Certificated Teachers - - - -	57,230	59,519
Number of the above who came up for examination -	35,711	34,111
Number examined in addition to the above who were not in Schools under Certificated Teachers - -	4,375	4,504
Number of individuals successful - - -	26,063	26,639
Number of these who have not been successful in a previous year - - - - - -	14,001	14,234

* Under the term "school" is included each separate institution in which Science instruction is being given. In some cases a school has only one class in one subject of Science, whilst in others there is a more or less complete course of study.

Appendix B.

LIEUT.-COL. DONNELLY'S REPORT.

RESULTS of the SCIENCE SCHOOL EXAMINATIONS—*cont.*

		1878.	1879.
Number of Papers worked in :—			
Subject.			
I.	Practical, Plane, and Solid Geometry -	2,866	3,102
II.	Machine Construction and Drawing -	4,762	4,931
III.	Building Construction - - -	2,224	2,678
IV.	Naval Architecture - - -	131	158
V.	Pure Mathematics - - - -	9,099	11,047
VI.	Theoretical Mechanics - - -	1,640	1,642
VII.	Applied Mechanics - - -	1,154	1,562
VIII.	Acoustics, Light and Heat - - -	5,481	5,560
IX.	Magnetism and Electricity - - -	9,421	10,835
X.	Inorganic Chemistry - - -	5,744	5,604
	" " (Practical) - -	600	719
XI.	Organic Chemistry - - -	223	266
	" " (Practical) - -	5	84
XII.	Geology - - - - -	2,154	1,702
XIII.	Mineralogy - - - - -	83	77
XIV.	Animal Physiology - - -	6,426	6,236
XV.	Elementary Botany - - -	1,300	1,548
XVI. XVII.	General Biology - - - -	235	192
XVIII.	Principles of Mining - - -	251	233
XIX.	Metallurgy - - - - -	304	285
XX.	Navigation - - - - -	323	320
XXI.	Nautical Astronomy - - -	106	83
XXII.	Steam - - - - -	1,121	1,262
XXIII.	Physical Geography - - -	533	—
	Physiography - - - -	5,157	4,787
XXIV.	Principles of Agriculture - - -	1,265	2,193
	Total number of Papers worked - -	62,608	67,031
Number of Provincial Centres where Examinations were held - - - - - - -		843	897
Number of Metropolitan Centres where Examinations were held (including South Kensington Museum) -		88	97
Number who came up in the Elementary Stage - -		49,173	51,695
" of 1st Class successes - - - -		9,234	8,218
" 2nd " " - - - -		22,851	23,620
" Failures - - - - -		17,088	19,862
Number who came up in the Advanced Stage - -		11,878	14,208
" of 1st Class successes - - - -		2,254	2,440
" 2nd " " - - - -		5,946	7,133
" Failures - - - - -		3,678	4,635
Number who came up in Honours - - -		939	1,128
" of 1st Class successes - - - -		80	83
" 2nd " " - - - -		184	257
" Failures - - - - -		675	788
Total number of Papers worked - - -		62,608*	67,031
Total number of Successes - - -		40,549	41,746
Total number of Failures - - -		21,441	25,285

* This number includes from the United Westminster Schools papers which were cancelled. These papers have been omitted from the following tables of per-centages.

Total - -	8·36	54·05	37·58
	4·49	*32·33*	*63·16*

The average payments to teachers for each student under instruction was 12*s*. 10*d*. The amount in 1878 was 13*s*. per student. The number of teachers paid in 1879 was 1,600 as compared with 1,504 in 1878.

General reports on the examinations have been received from several of the examiners as in previous years. Short extracts of a general nature from these reports are given below, the reports themselves having been already printed in full and circulated among the schools.

Major Seddon, R.E., the examiner in Building Construction, says,—

"Whilst there is a considerable increase in the number of candidates in all three stages, there is a satisfactory decrease in the per-centages of failures as compared with 1878.

"*Elementary Stage.*—There was an increase of 310 worked papers over last year, whilst the failures have decreased by 3·82 per cent., cancelled papers being reckoned as failures.

"*Advanced Stage.*—In this stage there were 103 more papers than last year. The failures have decreased about ½ per cent., but the proportion of first classes is about 5 per cent. lower than last year, thus causing an increase of about 6 per cent. in the second classes.

"*Honours Examination.*—There were 105 Honours candidates, being 36 more than last year, whilst there were 65 home-worked papers, as against 33 last year.

"Only one candidate failed to obtain over 20 per cent. of the full credits."

Mr. Baskcomb, the examiner in Naval Architecture, says,—

"*Elementary Examination.*—These papers, upon the whole, may be considered fully up to the average quality of former years.

"*Advanced Examination.*—The same remarks as applied to the elementary examination are applicable to this."

Mr. Merrifield and Mr. Twisden, the examiners in Pure Mathematics, stages 1, 2, and 3, say,—

" . . . . . . there is a considerable increase in the number of candidates in all three stages, and in Honours. In the first stage this increase appears to have been due rather to the number of badly prepared candidates presented than to any advance in knowledge.

"With respect to the second stage, we beg leave to report that here too there is a considerable increase in the number of candidates; and that the work sent in by the best of them shows no falling off from the standard reached last year. The number of ill-prepared candidates, however, is very large.

"In the third stage there were 275 candidates, and 28 per cent. failures. The paper was on the whole fairly done, although no candidate obtained full marks."

Mr. Twisden, the examiner in Theoretical Mechanics, says,—

" . . . . . . the examination in the above subject has proved on the whole satisfactory, though the number of failures is somewhat larger than it was last year.

"In the *Advanced Examination* the work of those who have passed in the first class is very good, and shows a sound knowledge of the elements of the subject. But the answers, particularly those made by candidates in the second class, bring out several very general deficiencies.

"In the *Honours Examination* the number of candidates was unusually large, and the number of those classified above the average."

Professors Frankland and Roscoe, the examiners in Chemistry, say,—

"We consider this result (Practical Inorganic Chemistry) to be very satisfactory, and to show that these practical examinations should be encouraged."

Mr. Bristow, the examiner in Geology, says,—

"It is curious how much ingenuity is wasted by some candidates in trying to pervert the obvious meaning of questions. This results either from carelessness in reading the questions, or from a feeling of incompetence to answer them, and a wish to replace them by something better known to the candidates; very often, indeed, an answer to a question of some previous year is substituted.

"*Elementary Stage.*—Whilst the per-centage of papers which have passed shows a fractional increase over last year, the per-centage of those which succeed in getting a first class shows a very large decrease. On the whole, however, there seems to be far less of the simply ridiculous answers that were so very common some years ago, even though many of the questions were then of an easier nature, or admitted of shorter answers than those now needed.

"*Advanced.*—I am happy to notice a great improvement in this stage, for though the per-centage of successes in the first class has only increased to a fractional extent over that of last year, the proportion of candidates who have succeeded in getting a second class has increased by over 17 per cent.

"*Honours.*—No candidates gain enough marks to qualify for honours."

Mr. Bauerman, who acted with Mr. Warington Smyth as examiner in Mining and Mineralogy, says,—

"*Honours.*—The quality of the Honours papers is not very good.

"The quality of the Advanced papers is decidedly better than that of the Honours; but the same mistake of devoting too much time to single questions is apparent in many cases. The elementary papers are of all kinds, from good and neatly written compositions to ill written papers in which almost every word of importance is incorrectly spelt.

"As regards the matter of the papers, the best answers are those to the practical questions where the knowledge represents the result of the

Appendix B. — Lieut.-Col. Donnelly's Report.

candidate's working experience, while those involving teaching are not generally so good. There is a marked want of ability to describe simple mechanical combinations, and in the questions relating to explosives there is a great confusion of ideas as to the composition of gun cotton and dynamite, and the functions of the detonator used with these subjects, which is very generally regarded as a percussion cap like any ordinary gun cap. With these exceptions the subjects involved in the mining papers appear to be fairly well taught.

"*Mineralogy.*—The knowledge of the candidates appears as a rule to be fairly good, and in the greater number of papers the specimens have been correctly named and their chemical composition properly given, but as regards crystalline form the result is not so satisfactory."

Professors Huxley and Michael Foster, the examiners in Animal Physiology, say,—

"In our previous reports we have more than once called attention to the fact that the papers sent up in this subject vary most strikingly in merit, after the following manner: in one set of papers, coming from a school or district, the rejections are very few, and the general character of the answers good; in another set of papers the answers are so uniformly bad that very few papers escape rejection; and, even in those which are allowed to pass, the number of marks obtained is very little above the rejection limit. This feature is perhaps more marked than ever in the present year; indeed the total per-centage of rejections indicates not so much the average merit of the teaching as the proportion of "bad" schools to "good" schools. Were the "bad" schools eliminated the per-centage of rejections in the remainder would be exceedingly low.

"Of the bad schools we need only say that, in most cases, the ignorance of even the most simple and elementary facts of physiology is absolute.

"With regard to the "good" schools the general standard seems, on the whole, to be higher than in previous years, but only in the sense that a large number of papers showed ordinary merit.

"Each succeeding year it becomes more and more clear to us that the failures are due not so much to the want of intelligence in the pupil as to the imperfection of the teaching."

Prof. Judd and Mr. Norman Lockyer, the examiners in Physiography, say,—

"In presenting our report on the May examinations in Physiography, we have to record a very marked and satisfactory improvement in the Advanced Papers for the present year as compared with those of 1877 and 1878.

"In the elementary stage there is no sign of improvement upon the low scale of passes, upon which we had to comment last year. This appears to be due to the fact that many schools present large numbers of totally uninstructed scholars for examination, and the complete failure of these causes the average number of passes to be extremely low.

"The number of candidates for Honours this year is small, but two of the papers sent in were of very great merit."

Mr. Tanner, the examiner in Principles of Agriculture, says,—

"The general character of this examination is satisfactory in many respects. In the elementary, advanced, and Honours papers much good and accurate work is observable, and as the teachers secure higher instruction for their own advancement, so will such good work become more general. Some of the papers examined are of very superior character, and in the highest degree satisfactory."

The detailed results of the examinations are given in the following tables. The first table contains the results for 1879 compared with those for 1878 in absolute numbers, while the second gives the same results as per-centages, viz.—

Appendix B.

LIEUT.-COL. DONNELLY'S REPORT.

The examination of Science Classes in Training Colleges was held during the week ending 13th December 1879. As will be seen from the subjoined table, the results show a great improvement upon the examinations of 1878, although they cannot even yet be considered satisfactory. Examinations were held at 37 different Colleges, and a total of 97 classes were examined, the number of worked papers returned being 3,217. Of these 269 were placed in the 1st class, 1,739 in the second class, and 1,209, or nearly 38 per cent. of the whole, were failures. The total number of papers worked at the examinations of December 1878 was 3,757, of which 169 were placed in the first class, 1,215 in the 2nd class, and 2,373, or upwards of 63 per cent., were failures. Careful reports on these examinations have been prepared by the examiners and are being circulated to the Training Colleges. Short extracts from these reports of a general character are given below :—

Mr. Merrifield, the examiner in Mathematics, says,—

"I have to report that the work produced in pure mathematics is exceedingly unsatisfactory this Christmas. . . . . A very careful reperusal of the papers has satisfied me that no unduly high standard has been applied. . . . . I do not see reason for singling out any one training college for special mention in the way of either praise or blame. The work was very indifferent throughout."

Mr. Twisden, the examiner in Theoretical Mechanics, says,—

"The work as a whole is of a fairly uniform character; but few of the students have done very ill, and not many very well."

Professor Roscoe, the examiner in Chemistry, says,—

"The answers are characterised by uniform mediocrity, there being an absence of either very good or very bad papers, and my impression of the power of the students to impart a knowledge of chemistry in a clear and satisfactory manner, I regret to say, is not a favourable one. . . . . I have much pleasure in adding that a very important portion of the examination, namely, the practical work, was extremely well done, showing careful and satisfactory teaching."

Professors Huxley and Michael Foster, the examiners in Animal Physiology, say,—

"The number of papers sent up was 683. Of these about 47 per cent. were rejected, about 43 per cent. passed second class, and about 10 per cent. first class. These results alone show a decided improvement upon the papers of last year. . . . . The improvement, however, is not visible in all the schools. Indeed, the inequality of merit in the several schools is perhaps the most striking result of the whole examination. . . . . This shows very clearly how much depends on the teaching, for it cannot be supposed that all the clever pupils are found in one school and all the stupid ones in another. . . . . The salient errors of the papers as a whole were monotonous repetitions of the errors concerning which we have spoken in detail in our report of the last May examination. Now, as then, and as indeed in all former years, we find the teachers loading the minds of their pupils with abstruse and controversial matters to the neglect of primary and important things."

Mr. Dyer, the examiner in Elementary Botany, says,—

"The papers in this examination exhibited a very great improvement compared with those of the previous year. This is, no doubt, due to the scope of the examination being better understood, and the work of the candidates being more definitely directed to it. . . . . I presume that a large proportion of the candidates examined are taught botany with a view to their teaching it themselves in the future. It is therefore extremely important that they should have a firm grasp of the principles of the subject. In this respect I find the papers very defective."

Professor Judd and Mr. Norman Lockyer, the examiners in Physiography, say,—

"The results of this examination appear at first sight to show a considerable advance upon those of last year, but an analysis of the actual figures proves this to be due rather to the reduction in numbers (owing to the absence of the very bad schools, upon which we remarked last year) than to any general improvement in the character of the answers.

"It is still manifest that competent teachers of Science are greatly needed in nearly all these schools, and we view with the greatest regret the fact, which is rendered obvious by an examination of these papers, that the labour of intelligent pupils has been thrown away in many instances, in consequence of the absolutely erroneous teaching which they have received, and which they too faithfully reproduce."

Short courses of training for Science teachers were given, as in previous years, at the Science Schools, South Kensington. The subjects, &c. were as follows :—

Chemistry, by Dr. Hodgkinson, to 31 teachers; Heat, by Professor Guthrie, to 30 teachers; Electricity, by Professor Guthrie, to 30 teachers; Mechanism, by Prof. Goodeve, to 20 teachers; Geology, by Prof. Judd, to 30 teachers; and Agriculture, by Prof. H. Tanner, to 48 teachers. The courses extended over 20 working days each, except in the case of Heat and Electricity, which lasted only 13 days. The teachers who attended these courses, and who were selected out of 591 applicants were reported to have worked well and profited greatly by the instruction given.

The number of applicants for admission as teachers in training to the ordinary courses of the School of Mines now carried on at South Kensington was 191. Of these 15 were selected to attend the course in Chemistry, 12 in Physics, 11 in Mechanics, 11 in Biology, and 10 in Geology.

The number of applicants for assisted studentships at Owen's College, under the Minute of 5th June 1877, was 11. Of these 7 were either found to be ineligible to receive aid under the Minute, or afterwards declined to fulfil the conditions; the remaining 4 are at present at work in the classes at Owen's College two days each week. It is much to be regretted that a large number of teachers do not avail themselves of the opportunities afforded them by the authorities of Owen's College.

The number of competitors for the Royal Exhibitions to the Royal School of Mines, London, and the Royal College of Science, Dublin, was last year 42 as compared with 47 in 1878. The high standard of the competition is still well maintained, and the Royal Exhibitioners acquit themselves with credit at the annual examinations of both Institutions.

The Local Exhibitions, formed by a local contribution of 25*l.*, supplemented by the grant of an equal sum from the parliamentary vote, were last year 11, of which one was a renewal of an Exhibition held by the same student in a previous year.

The number of Science and Art and Elementary School Scholarships granted in 1879 were 62 and 52 respectively, as compared with 54 and 44 in 1878.

The grants towards the purchase of apparatus amounted to 747*l.* 14*s.* 8*d.* In the previous year they amounted to 890*l.* 0*s.* 6*d.*

The number of candidates for the Scholarships founded by Sir J. Whitworth was last year 75, the number in 1878 having been 78; 39 of these passed in the essential theoretical subjects, and 19 were selected to go forward to the Examination in Practical Workmanship, which was held, as in previous years, at the workshops of Sir J. Whit-

Appendix B.

Lieut.-Col. Donnelly's Report.

worth and Co. at Manchester. The examination for prizes of scholars appointed in 1876, 1877, and 1878 was also held. The results of these competitions are printed on pp. 90–1.

The applications for the circulating collections of scientific apparatus have been very numerous.

A list of the places to which the collections have been sent is given on p. 277.

Officers of the Royal Engineers were employed, as in previous years, in inspecting for the Science and Art Department, a list of their names is given on page 86; at p. 90 is a list of the Royal Exhibitioners. This is followed by the list of the candidates successful in obtaining Whitworth Scholarships in 1879; and the results of the examination in 1879 of the scholars appointed in 1876, 1877, and 1878. To these succeed at p. 91 a list of the Local Exhibitions and Scholarships. At p. 94 is a list of Schools applying for laboratory grants. After which comes at p. 99 the list of Science Schools examined in May 1879, showing the number of students under instruction in 1878 and 1879, with the prizes and medals obtained by each school in those years, and the fees received from students during the session 1878–79. The table showing the classes, subjects taught, and number of students in each subject in the Science Schools in January 1880, is given at p. 134.

The table of payments on results of the examination of Science Schools and classes in May will be found at p. 219, and an alphabetical list of the teachers at p. 261.

The table of payments on the results of the Training College Examinations in December 1878 and December 1879 will be found at pp. 273–5.

In conclusion, I would call the special attention of my Lords to the amount of original scientific investigation which is now carried on at the Science Schools at South Kensington. I append a list of the papers contributed to Learned Societies during the last 2 years which has been furnished to me by the several gentlemen taking part in this work. This list may, I believe, be safely put in comparison with that of any other similar institution in any part of the world. The advantage to the students here of this activity in original research can scarcely be over estimated.

(Signed) J. F. D. Donnelly, Lieut.-Col., R.E.,
Director Science Division.

Original Investigation in Science Schools.

5. Return of Original Investigation carried on in the Science Schools, South Kensington, during the last two years.

Physico-Chemical Laboratory.

Papers communicated to the Royal Society, December 1878 *to May* 1880.

By Mr. Lockyer, F.R.S.:—

1. "Discussions of the Working Hypothesis that the so-called Elements are Compound Bodies." Received 11th December 1878.
2. "Preliminary Note on the Substances which produce the Chromospheric lines." Received 24th December 1878.
3. "Note on some Spectral Phenomena observed in the Arc produced by Siemens' Machine." Received 3rd March 1879.

4. "Note on some Phenomena attending the Reversal of Lines." Received 5th March 1879.
5. "Discussion of Young's List of Chromospheric Lines." (Note 1.) Received 5th March 1879.
6. "Note on a recent communication by Messrs. Liveing and Dewar." Received 30th April 1879.
7. "Note on the Spectrum of Sodium." Received 28th May 1879.
8. "Report to the Committee on Solar Physics on the Basic Lines common to Spots and Prominences." Received 19th June 1879.
9. "On a New Method of Studying Metallic Vapours." Received 19th June 1879. [Distilling in Vacuo.]
10. "On a New Method of Spectrum Observation." Received 10th December 1879. [Passing a spark through flames.]
11. "Note on the Spectrum of Hydrogen." Received 16th December 1879.
12. "Note on the Spectrum of Carbon." Received April 29, 1880.
13. "Further note on the Spectrum of Carbon." Received May 11, 1880.

(All published in Royal Society proceedings.)

Papers in hand in various stages of progress.

1. Researches on Spectrum Analysis in connexion with the Spectrum of the Sun. No. 5. (contains first strip of new map.)
2. New Normal Spectrum Strip. Wave length 40–41.
3. New Normal Spectrum Strip. Wave length 41–42.
4. Metallic coincidences 39–40.
5. Researches on the Spectrum of Magnesium.
6. Spectral Phenomena produced when Metals are heated in vacuo.
7. On the changes in the Spectrum of Iron produced by difference of Temperature.
8. On the changes in the Spectrum of Iron observed in Solar Spots.
9. On the spectra of "ic" and "ous" salts.
10. Metallic Coincidences between wave length 41·20, and wave length 43·50.
11. Metallic Coincidences between wave length 47·00, and wave length 51·90.
12. Continuation of Researches on Carbon.

CHEMICAL LABORATORIES.

E. Frankland and L. Thorne. Luminosity of benzol when burnt with non-luminous combustible gases. Chem. Soc. Jour., 1878, p. 89.

E. Frankland and L. Dobbin. Constitution of the olefine produced by the action of zinc upon ethylic iodide. Chem. Soc. Jour. 1878, p. 545.

W. R. Hodgkinson. Action of sodium on the benzyl ether of iso-butyric acid. Chem. Soc. Jour., 1878, p. 495.

H. Chapman Jones. A simplification of Regnault's method for determining boiling points with small quantities of substance. Chem. Soc. Jour., 1878, p. 175.

E. Frankland and A. Lawrance. On plumbic tetrethide. Chem. Soc. Jour., 1879, p. 244.

Appendix B. Original Investigation in Science Schools.

On the photographic method of mapping the least refrangible end of the Solar spectrum with a map. Bakerian lecture, Royal Society, 1880.

On the use of Iodide in Gelatino-bromide emulsions. Photographic Journal, Vol. IV., p. 104.

Biological Laboratory.

Professor Huxley, Sec. R.S.:

1. On the classification and the distribution of the Cray fishes.
   Published in the Proceedings of the Zoological Society, June 4, 1878.
2. On the characters of the pelvis in the Mammalia, and the conclusions respecting the origin of Mammals which may be deduced therefrom.
   Published in the Proceedings of the Royal Society, No. 194, Feb. 24, 1879.
3. On the epipubis of the Dog and Fox.
   Published in the Proceedings of the Royal Society. Feb. 12, 1880.
4. On the cranial and dental characters of the Canidæ.
   Communicated to the Zoological Society, March 17, 1880.

Mr. T. J. Parker, B.Sc., Assoc. Linnean Soc.:

1. On the Histology of Hydra Fusca.
   Proceedings of the Royal Society, No. 200. Dec. 11, 1879.
2. On the stridulating organ of Palinurus; preliminary note.
   Proceedings of the Zoological Society. March 5, 1878.
3. A second communication upon the same.
   Proceedings of the Zoological Society. May 7, 1878.
4. On the intestinal valve in the genus Raia.
   Communicated to the Zoological Society. Dec. 16, 1879.

Engineer Officers Employed as Acting Inspectors.

6. (*a.*) List of Officers of Royal Engineers who have been employed in Preliminary Inspections of Science and Art Classes during the year 1879. Showing the District and the Number of Classes inspected by each Officer.

Appendix B. — List of Royal Exhibitioners.

8. List of Candidates who have been successful in obtaining Royal Exhibitions of 50*l.* per Annum each for Three Years, and Free Admission to the Course of Instruction at the following Institutions :—

1. The Royal School of Mines, Jermyn Street, London.

Name.	Age.	Occupation.	Address.
Walton, Joseph P. -	23	Clerk - -	Middlesboro'.
Green, John E. - -	17	Student - -	Bristol.
Powell, Charles H. -	16	Student - -	Bristol.

2. The Royal College of Science, Dublin.

Name.	Age.	Occupation.	Address.
Coleman, Joseph B. -	20	Warehouseman -	Nottingham.
Minty, Henry O. -	18	Student - -	Cheltenham.
Mackenzie, John W. -	20	Engineer - -	Cheadle.
*Jordan, Henry G. -	21	Engineer - -	Manchester.

* Appointed to fill a vacancy for one year.

9. (*a.*) Candidates successful in the Competition for the Whitworth Scholarships, 1879.

Name.	Age.	Occupation.	Address.	No. of Marks. Theoretical.	No. of Marks. Practical.	Total.
Hardisty, John - -	20	Engineer - - -	Manchester	983	1,027	1,999
Harrison, George -	20	Millwright - -	Oldham -	1,489	425	1,914
Shaw, Edward - -	19	Engineer Apprentice	Bristol -	990	844	1,834
Simpson, John A. -	21	Engineer - - -	Birkenhead	839	773	1,612
Geddes, John W. -	20	Mechanic - -	Oldham -	1,464	84	1,548
Harris, Sydney J. -	21	Engine Fitter -	Crewe -	1,398	—*	1,398
Sackfield, Thomas E. -	20	Mechanic - - -	Crewe -	916½	443	1,359½
Brodie, John A. - -	20	Engineer Apprentice	Liverpool -	668	654	1,344

* Qualified in Practical Workmanship according to § 13 of the Whitworth Scholarship Prospectus but obtained no marks.

9. (*b.*) Examination for Whitworth Scholarship Prizes, 1879.

1. Scholars appointed in 1876.

Name.	Marks obtained. Theory.	Practice.	Total.	Prize awarded.
Shaw, Henry S. H. -	1,672	877	2,549	First prize, 100*l.*
Nichols, Jerdan -	1,504	555	2,059	Second prize, 60*l.*
Greenhalgh, Robert -	1,071	[illegible]	1,908	Third prize, 50*l.*
Quiggin, Daniel A. -	970	409	1,379	Fourth prize, 40*l.*

2. Scholars appointed in 1877.

Name.	Marks obtained.			Prize awarded.
	Theory.	Practice.	Total.	
Last, William I. -	1,886	952	2,838	First prize, 100*l.*
Ogden, Fred - -	2,085	411	2,496	Second prize, 60*l.*
McKenzie, William S. -	1,507	737	2,244	Third prize, 50*l.*
Low, David A. - -	1,405	692	2,097	Fourth prize, 40*l.*
How, William F. -	1,048	519	1,567	Fifth prize, 30*l.*
Ottewell, Alfred D. -	1,041	293	1,334	Sixth prize, 20*l.*

3. Scholars appointed in 1878.

Name.	Marks obtained.			Prize awarded.
	Theory.	Practice.	Total.	
Needham, Joseph E. -	1,859	405	2,264	First prize, 100*l.*
Groves, William - -	1,454	672	2,126	Second prize, 60*l.*
Mather, Thomas - -	1,239	626	1,865	Third prize, 50*l.*
Duckworth, Thomas -	1,189½	662	1,851½	Fourth prize, 40*l.*
Kingdon, Zachary H. -	881	835	1,716	Fifth prize, 30*l.*
Tozer, William H. -	933	549	1,482	Sixth prize, 20*l.*

4. Final Competition of Scholars appointed in 1876.

Name.	Marks obtained.			Total.	Prize awarded.
	1877.	1878.	1879.		
Shaw, Henry S. H. -	1,754	2,189	2,549	6,492	First prize, 200*l.*
Nichols, Jerdan -	1,690	1,687	2,059	5,436	Second prize, 100*l.*

---

10. List of Local Scholarships and Exhibitions granted for the Year 1879–80.

Town.	School.	No. held.	Name and Address of Correspondent.
ELEMENTARY SCHOOL SCHOLARSHIPS.			
England and Wales.			
Bewdley -	Bewdley and Wribbenhall British School.	1	W. Binns, Esq., Habberley Road, Bewdley.
Calverley -	Wesleyan Day School	2	E. Grimshaw, Esq., Capel St., Calverley, near Leeds.
Keighley -	School of Science and Art.	2	Swire Smith, Esq., School of Science and Art, Keighley.

Appendix B.

LOCAL SCHOLARSHIPS AND EXHIBITIONS.

Town.	School.	No. held.	Name and Address of Correspondent.
Leicester -	Trinity School, Regent Street.	1	G. W. Denton, Esq., Buckhurst, Stoneygate, Leicester.
Llanelly -	Copper Works School	1	Meyler Daniel, Esq., Hendre, Swansea Road, Llanelly.
Newcastle-on-Tyne.	Bath Lane School.	10	E. Towers, Esq., Science and Art School, Corporation St., Newcastle-on-Tyne.
Nottingham -	High Pavement, British School.	5	W. Clark, Esq., The Park, Nottingham.
Pontardulais.	Hendy Public Elementary School.	1	Rev. W. James, Hendy, Pontardulais, R. S. O., Glamorgan.
Salford -	Woodbine Street, Bible Christian School.	2	Rev. J. Clark, 1, Albion Place Crescent, Salford.
Salisbury -	Public Elementary Schools.	6	W. J. Wilton, Esq., 17, Canal, Salisbury.
Sheffield -	St. Mary's Boys' School.	3	Rev. N. A. Holttum, 1, Clinton Place, Broomhall, Sheffield.
SCOTLAND.			
Campbeltown	Grammar Public School	1	D. M. Maxtone, Esq., Burnside Street, Campbeltown, N.B.
Clydebank -	Public School.	1	S. Crawford, Esq., Ship Yard, Clydebank, Dumbartonshire, N.B.
Dumbarton -	Burgh Academy.	5	Rev. D. Gunn, M.A. "Herald" Office, Dumbarton, N.B.
Dumfries -	St. Joseph's College.	1	Rev. A. J. O'Hara, Laurel Mount, Dumfries, N.B.
Kilmarnock -	Academy.	7	J. P. Stevenson, Esq., 99, King Street, Kilmarnock, N.B.
Torphins -	Public School.	2	W. Adams, Torphins, Aberdeen.
Whitburn -	Benhar School.	1	Rev. A. Watt, Harthill Manse, Whitburn, Edinburgh.

SCIENCE AND ART SCHOLARSHIPS.

ENGLAND AND WALES.			
Banbury -	Cherwell British School.	3	S. Stutterd, Esq., 10, West Street, Banbury.
Bewdley and Wribbenhall.	British School.	1	W. Binns, Esq., Habberley Road, Bewdley.
Cambridge -	Higher Grade Boy's School.	3	Rev. J. C. Saunders, Downing College, Cambridge.
Cheltenham -	Parish Church Boys' School.	3	J. S. Philipps, Esq., Eldersfield, Hales Road, Cheltenham.
Derby - -	Wesleyan School, Canal Street.	1	J. N. Johnson, Esq., Hartington Street, Osmaston Road, Derby.
Devonport -	St. James' the Great National School.	1	Rev. J. A. Bullen, St. James' Vicarage, Keyham, Devonport.
Hinckley -	Grammar School.	1	J. D. Cotman, Esq., Regent Street, Hinckley.

Town.	School.	No. held.	Name and Address of Correspondent.
Keighley -	School of Science and Art.	2	Swire Smith, Esq., School of Science and Art, Keighley.
Llanelly -	Copper Works School.	2	Meyler Daniel, Esq., Hendre, Swansea Road, Llanelly.
London - -	Bow, Old Ford Road Science School.	2	B. W. Symonds, Esq., 409, Old Ford Road, E.
„ - -	Islington School of Science and Art.	3	H. J. Wheatley, Esq., 49, Dame Street, Islington, N.
„ - -	Old Kent Road, Asylum Road, Technical School.	3	F. Fermor, Esq., 255, Southampton Street, Camberwell, S.E.
„ - -	St. Thomas Charterhouse.	1	W. Cutler, Esq., 210, Goswell Road, E.C.
Newcastle-on-Tyne.	Bath Lane School	5	J. H. Rutherford, Esq., Elswick Lodge, Newcastle-on-Tyne.
New Quay -	Towyn Grammar School.	1	J. Rees, Junior, Esq., New Quay, R.S.O., Cardiganshire.
Northampton -	Grammar School.	2	J. B. Hensman, Esq., Guildhall, Northampton.
Nottingham -	Bath Street, Board School.	1	W. Packer, Esq., School Board Offices, Nottingham.
Oxford - -	Wesleyan Boys' School.	3	C. Robertson, Esq., Rose Bank, 35, Woodstock Road, Oxford.

13. TABLE showing the CLASSES, SUBJECTS taught, and NUMBER of STUDENTS in each Subject in all SCIENCE SCHOOLS in existence in January 1880.

Owing to the returns from which this Table is compiled being required in September last, only the probable number of students is given, and where the number was unknown at the time the class is identified by an asterisk (*).

Schools established since May 1879 are printed in *italics*.

Appendix B.

List of Science Teachers.

Science Teachers to whom Payments have been made—*cont.*

Name.	Number in preceding Table.	Name.	Number in preceding Table.
Birkmyer, J. B.	[illegible]	Burton, E.	720
Birney, J.	1,045	Burton, J.	327
Birtwistle, J.	721, 722	Burton, J. R.	722
Bissacre, G.	255	Busbridge, J.	484, 540, 696
Black, P. W.	978	Busbridge, W.	479, 495, 491, 502, 531, 532, 533, 539, 596.
Blackman, W.	579, 581		
Blackwall, G. E.	571		
Blackwood, R. H.	601	Bush, G.	125
Blaine, T. J. S.	973	Bush, J.	532
Blair, W.	1,033	Bush, W.	570, 571
Bland, W.	90	Butler, W.	317
Bleasdale, G.	274	Byatt, H.	[illegible]
Boardman, E.	804	Byers, R.	690
Bolam, J.	975		
Bolton, J. E.	1,101		
Bond, J. K.	123	Caldicott, C.	231
Bond, R. A.	548	Caley, A.	513, 543
Booth, W. S.	333	Callum, W.	615
Borland, T.	1,036	Calver, A.	533
Borrows, H.	600	Calvert, L. S.	746
Botherns, R.	307, 366	Campbell, D.	1,201
Bothwell, T. H.	1,160	Campbell, J. C.	1,009
Bourke, W. R.	452, 455, 457	Campbell, W. (Belfast)	1,115
Bourne, C. F.	353	Campbell, W. (Donaghadee)	1,161
Bowden, J. T.	108, 113	Campbell W. (Drum)	1,186
Bowyer, A. W.	760	Cannell, J.	236
Boyd, H.	954	Canning, T.	650, 656, 662, [illegible]
Boyd, J.	1,205		
Boyle, C.	1,158	Card, T. G.	179
Boyle, S.	1,106	Carey, A.	120
Brackenbury, J.	901A	Carlyon, J. T.	113
Bradbury, J.	979	Carr, R.	844
Bradley, J.	344, 345, 347	Carr, G. M.	183, 185
Bradshaw, E.	393	Carter, J.	224
Branston, Z. H.	771	Cassidy, J. D.	1,157
Bray, E.	618	Causer, W. G.	822, 826
Breakwell, W.	661	Chadwick, J.	57
Bremner, A.	[illegible]	Chalmers, R.	961
Brenan, J.	1,073	Chaloner, G.	490
Breslandt, J.	1,104	Chambers, J.	533
Brewer, R. F.	30, 833	Chambers, J. W.	92
Brewer, S. B.	725	Chambers, T. B.	137
Briant, A. J.	517	Chapman, G.	963
Briars, W.	1,115	Chapman, W. S.	717
Briars, W., jun.	1,115	Charlesworth, W.	463, 478

Appendix C.

REPORT BY MR. BOWLER.

APPENDIX C.

1. REPORT of the ASSISTANT DIRECTOR for ART on SCHOOLS of ART and ART EXAMINATIONS.

The extension of Art instruction is promoted by regulations under which aid is given:—

First, to Elementary Day Schools where drawing is taught concurrently with reading and writing, and is specially directed to the improvement and refinement of the perceptive powers of the children;

Second, to Diocesan and other Training Colleges, in which teachers of elementary schools obtain certificates as teachers of drawing;

Third, to Classes for children above 12 years of age and artisans; in these classes the primary instruction of the children is carried further than in the Elementary Schools, and they are associated with adult students in the study of form, light and shade, and linear drawing;

Fourth, to Schools of Art which are entirely devoted to Art instruction, and where the student, after having obtained sound elementary knowledge, pursues the technical study of Art in the direction required by his occupation;

Fifth, to selected students of Local Schools of Art, to enable them to attend the National Art Training School, which is maintained for training Art teachers, designers, and Art workmen.

Elementary Schools.—The number of schools examined in March 1879 was 4,489, an increase of 319 on the previous year.

The exercises worked by children and pupil-teachers under examination were as follows:—

1st Grade Freehand -	474,320	2nd Grade Perspective -	1,770
„ „ Geometry -	75,710	„ „ Model Drawing	7,968
„ „ Model -	82,420		
2nd Grade Freehand -	23,760	Total -	673,678
„ „ Geometry -	7,790		

The total number of exercises worked in 1878 was 609,713, there has therefore been an increase of 63,965 exercises in the past year, while the number of children taught drawing has increased from 660,531 to 725,129.—Table A., p. 280 gives the results of the year's work in Elementary Schools in detail, and shows the expenditure to have risen from 33,115*l.* to 38,822*l.*

Training Colleges.—Table B., p. 366 shows that a somewhat smaller number of students have this year been examined in drawing in these colleges. As at the same time the number of certificates (D.) obtained, for the most part by students of the 2nd year, has increased, it would appear that drawing has received less attention on the part of the 1st year students. The total number of certificates (D.) obtained by students and teachers has been 1088, or 77 more than last year.

Art Classes.—Details relating to these classes will be found in Table C., p. 368. 29,393 students have been taught in 732 classes at a cost of 7,087*l.* 10*s.* 5*d.* in direct payments, prizes, and examples.

In 1878 203 new classes were established, this year only 63 have

been opened, but these are under the instruction of teachers holding the higher certificate required by recent regulations. It may be noticed that although the classes are fewer the number of students and amount of work shown at the examinations still shows an increase.

Science Classes.—The grants to these classes paid on drawings for geometrical projection, machinery, and building construction, continue to increase, having risen this year from 1,180*l.* to 1,541*l.*

Unaided Classes.—127 classes in which drawing has been taught under conditions which do not entitle their conductors to claim grants under the Department's regulations, have been examined with the results shown in Table E., page 409. There has been a slight increase in the number of these classes.

Schools of Art.—Abstracts from the Reports of Committees of these schools extend from p. 412 to p. 489. These are followed at p. 490 by Table F., giving the results of the various examinations. A slight decline in the number of students taught is a less unsatisfactory incident than it would otherwise be, since the numbers who were brought up for examination, and who sent works to the annual competition, are somewhat more than maintained, and a greater number of advanced prizes has been awarded.

The pecuniary resources of the schools are stated in Table G. p. 494. There is, on the whole, but little change from last year, although the grants on account of examples and fittings, which are proportioned payments, and the local subscriptions, have diminished.

Table H. shows the increase in the number of students receiving Art instruction by the aid of the Department during the past 20 years, and now amounting to 795,444.

Table I. is a summary of the aid given to Schools of Art and other classes and schools, and shows a total of 69,423*l.* 8*s.* 7*d.* for the past to local year.

Table J. is an analysis of the increase, where any has taken place, during the five last years.

Table K. gives the names of all Schools of Art which have been aided by building grants and which are, consequently, held under trust for the continuance of the work of Art instruction. Four names have been added to the list in 1879.

The nature of the prizes given by the Department, and their cost, is shown in the Store keeper's return at page 504.

At page 508 is the report of the Examiners of the National Competition, with observations on the advanced works submitted to them, and followed by a list of the successful students.

A list of students who have taken Art masters certificates is given at page 521; the higher certificates are almost exclusively gained by students of the National Art Training School.

The Plasterers' Company continue to offer premiums for designs, with the result shown at p. 524.

A detailed report on the National Art Training School, prepared by the Registrar, Colonel Lennox, is given at page 525. The large number of awards obtainedby the students in the National Competition is shown in list at p. 513, previously referred to.

H. A. BOWLER.

Schools of Art.

7. Abstracts of Returns from Schools of Art for the Year ending 31st July 1879.

Aberdeen.—(Population in 1871—88,125.)

Established in 1853. Situate at Market Street.

The committee of management consists of 18 members. The officers are:—Alexander Walker, Chairman; James Sinclair, Secretary; and John P. Fraser, Head-Master (5 certificates).

The number of students during the year has been 264, showing a decrease of 36 since last year.

The fees received amounted to 219*l.* 0*s.* 5*d.*, showing an increase of 14*l.* 5*s.* 7*d.* over the sum received in the previous year.

Attendance:—Day classes—82 students, who paid 3*s.* 6*d.* to 10*s.* 6*d.* per month. Evening classes—313 students, who paid 2*s.* and 2*s.* 6*d.* per month.

The school received 1 silver medal in the National Competition; 5 students obtained third grade prizes for works sent up for inspection, 1 obtained a prize at the advanced art examination, and 13 obtained prizes at the local second grade examination.

Two hundred and thirty-two students sent 1,910 works to the annual examination at South Kensington. 4 obtained local free studentships.

One student obtained a 3rd grade or Art masters' certificate at the examination at South Kensington.

The advanced Art examination was attended by 3 students of the school, of whom 1 was successful; 85 students were examined at the local second grade examination, and 35 were successful.

The school has expended from its own funds 15*l.* 15*s.* 3*d.* on account of examples, &c. for Art instruction.

The total income of the school was 420*l.* 0*s.* 11*d.*

The total amount of aid afforded to the school by the Department during 1879 was 225*l.* 1*s.* 7*d.*

A native of this city, resident in the United States, gives annually 10*l.* for prizes to house painters' apprentices who excel in the studies of the school.

Andover.—(Population in 1871—5,501.)

The number of students during the year has been 120, showing a decrease of 2 since last year.

The number of pupils taught in private schools has been 175.

The fees received amounted to 148*l.* 1*s.* 10*d.*, showing an increase of 3*l.* 11*s.* 3*d.* on the sum received in the previous year.

Attendance:—Day classes—46 students, who paid 13*s.* 9*d.*, 1*l.* 7*s.* 6*d.*, and 2*l.* 2*s.* per session, and 5*s.* entrance fee. Evening classes—79 students, who paid 2*s.* 6*d.* per month, or 10*s.* 6*d.*, 12*s.* 6*d.*, and 1*l.* 5*s.* per session, and 1*s.* and 5*s.* entrance fee.

The school received 1 bronze medal and 2 Queen's prizes in the National Competition; 8 students obtained third grade prizes for works sent up for inspection; and 3 obtained prizes at the local second grade examination.

Seventy-three students sent 849 works to the annual examination at South Kensington.

The advanced Art examination was attended by 5 students of the school, of whom 3 were successful; 47 students were examined at the local second grade examination, and 18 were successful.

An exhibition of the students' works took place in January 1879, and was attended by many visitors.

The school has expended from its own funds 5*l.* 8*s.* 2*d.* on account of examples, &c. for Art instruction.

The total income of the school was 315*l.* 9*s.* 4*d.*

The total amount of aid afforded to the school by the Department during 1879 was 114*l.* 18*s.* 5*d.*

Several local prizes are awarded.

York.—(Population in 1871—50,765.)

Established in 1842. Situate at Minster Yard.

The committee of management consists of 25 members. The officers are:—S. W. North, M.R.C.S., Chairman; Rev. S. Walter Stott, LL.D., F.R.G.S., Secretary; and J. S. Dominy, Head-Master (4 certificates).

The number of students during the year has been 137, showing an increase of 2 since last year.

The fees received amounted to 189*l.* 15*s.* 6*d.*, showing an increase of 5*s.* on the sum received in the previous year.

Attendance:—Day classes—63 students, who paid 1*l.* 11*s.* 6*d.* or 1*l.* 1*s.* per session of 5 months. Evening classes—74 students, who paid 1*l.* 1*s.* or 10*s.* 6*d.* per session of 5 months.

Seven students obtained third grade prizes for works sent up for inspection; and 8 obtained prizes at the local second grade examination.

One hundred and fifteen students sent 371 works to the annual examination at South Kensington.

One student obtained a third grade or Art Masters' certificate at the examination at South Kensington.

Twenty-six students were examined at the local second grade examination, and 19 were successful.

An exhibition of the students' works took place, and was attended by about 200 visitors.

The school has expended from its own funds 12*s.* 6*d.* on account of examples, &c. for Art instruction.

The total income of the school was 323*l.* 2*s.* 6*d.*

The total amount of aid afforded to the school by the Department during 1879 was 69*l.* 13*s.* 10*d.*

Eighteen local prizes were awarded.

* Students in these colleges were examined in 1867 and previous years, but payments in aid of their instruction were first made under the regulations of the Science and Art Department in 1868.

† Previous to 1866 included under head No. 1.

‡ Since 1868 Teachers and Pupil-teachers have been instructed in Schools of Art, Art Classes, and Elementary Day Schools, and are included in the numbers given under those heads.

REPORT OF EXAMINERS ON COMPETITION FOR NATIONAL MEDALS.

15. REPORT ON THE NATIONAL COMPETITION OF THE WORKS OF SCHOOLS OF ART, 1879.

The number of drawings sent up from Schools of Art for examination this year was 157,566, from 146 schools. Of these works 1,395 were referred to the national competition; being 105 less than in 1878, when the number was 1,500.

1ST DAY'S EXAMINATION.—FIGURE DRAWING AND PAINTING

EXAMINERS:

G. D. Leslie, Esq., R.A.
Ph. Calderon, Esq., R.A.
W. F. Yeames, Esq., R.A.
E. J. Poynter, Esq., R.A., Director for Art.
H. A. Bowler, Esq., Assistant Director for Art.

Drawing from the antique may justly be considered the best test of progress in the national competition; it combines the difficulties of figure drawing with the conditions necessary for comparison with a known standard. An impression evidently still prevails that certain methods of execution are the surest means of success. Whereas formerly a highly elaborated style of work was in vogue, it is now so obvious that the use of the stump in shading is considered to offer the best chance of a prize. An intelligent use of the point, which should combine neatness and precision with simplicity of expression, would be the best method of drawing; but this is apparently the most difficult of acquisition; and if the use of the stump is encouraged by the Department, it is as being the simplest way of expressing the true relations of light and shade, with the least wasteful expenditure of time. The medals and prizes, however, will always be awarded to those drawings which combine the most correct rendering of the proportions and character of the model, with the truest and nicest perception of the gradations of tone, whatever may be the means employed. The most pleasing, and, in all respects but one, the best drawing sent up, was one of the "Dancing Faun" from the Dublin Metropolitan School of Art. The workmanship was clean, and the modelling well expressed both as to detail and general effect: the character of the head, a most important point, was rendered with truth and refinement, and the extremities were nicely finished. The work (to which a silver medal was awarded) would undoubtedly have gained the gold medal, but that the excessive slenderness given to the figure showed that the student had omitted to consider its general characteristics; and there was moreover a fatal fault of proportion in the feet, which were (and especially the left foot) far too small.

An extra gold medal in this stage was awarded to the Edinburgh School of Art for a drawing of the Milo Venus, which did not come within the conditions of size laid down in the Art Directory. This work showed great brilliancy in the execution and rendering of effect: on these points and in the rendering of the general proportions of the figure it was undoubtedly the best drawing; but it failed, as do all the drawings from this school, in the higher requirement of perception of the beauty of the original; the tendency throughout being towards

vulgarity in the expression of the form and face. The latter was in the drawing referred to poorly, if not wrongly drawn, and the student had evidently not appreciated the splendid and subtle properties of modelling to be found in the torso of this beautiful figure. The drapery on the other hand was done with evident appreciation of the qualities of light and shade which give gradation and relief.

The practice of filling in the background from what is actually before the student doubtless helps him in his effort to make a brilliantly effective drawing, and is moreover of real value in the study of relations of tone, and as carried out in this school is not open to the objection of wasted time which was found with the elaborate system of stippled backgrounds formerly in fashion, and which were done without reference to nature or truth of effect. The danger here lies rather in the temptation offered to consider a beautiful antique figure merely in the light of a subject of effective light and shade. When the student is obliged to make his drawing without background, he is led to concentrate his attention more on rendering the subtleties of outline and modelling of the original, and less on its capabilities for an effective drawing, which are equally to be found in the vulgarest subjects.

The figure in question, having neither hands nor feet, requires less of the student than such figures as the "Dancing Faun" or the "Discobolus," and the gold medal may therefore be said to have been rather easily gained; but the examiners felt that it would be discouraging to have withheld it, especially when they took into consideration the general excellence of the competition.

They much regretted, however, that the drawing of the "Dancing Faun," before alluded to, was not sufficiently correct in its general form to admit of the award of the gold medal; the method of work being considered more promising and capable of higher development than that which gained the gold medal.

The gold medal for the drawing from the life was awarded to a figure from the Lambeth School of Art. This drawing was more complete than the one which gained the gold medal from the same school two years ago. There is still a tendency to blackness to be observed in most of the stumped drawings from the living model. As in the competition from the antique, the most pleasing drawing (a figure from the St. Martin's School of Art) obtained only a silver medal; if the head and hand had not been left unfinished the gold medal would have been awarded to this drawing; but the examiners considered that to do so would not have been fair, in view of the many completed works from other schools. The number of medals and other prizes awarded testifies to the improvement in this stage over former years.

The paintings from the life showed no special excellence, certainly no improvement on former years. If some of the time and energy spent on the comparatively easier task of still life painting were given to study from the living model, it would be of immense advantage to the country by raising the standard of art instruction.

Appendix C.

REPORT OF EXAMINERS ON COMPETITION FOR NATIONAL MEDALS.

SECOND DAY.—DESIGN WITH ARCHITECTURE AND MODELLING.

EXAMINERS:

J. E. Boehm, Esq., A.R.A.
Wm. Morris, Esq.
J. J. Stevenson, Esq.
The Director and Assistant Director for Art.

The best specimens of modelling were sent up (as in the last competition) from the National Art Training School, and the competition for the plasterers' prizes brought out some good designs, one of these gaining the gold medal: decidedly original in treatment, and carried out in good taste, the execution of this column left something to be desired on the point of finish and delicacy of treatment of the floriated ornament. A good design for a mosaic pavement in the classical style, from Coalbrookdale, gained a gold medal for its good taste and a certain invention which showed that the student had the power of emancipating himself from the too close imitation of classical models. The arrangement of the border showed much ingenuity (in strict conformity with the style) in adapting the pattern to the corners.

The architecture does not call for much remark. The designs for half-timbered houses from the National Art Training School, almost deterred the Examiners from giving them proper attention by their heavily tinted and vulgar style of colour, which at first put them at a disadvantage in comparison with the neatly executed drawings which obtained the higher awards, none of which, however, were this year considered worthy of the gold medal. A design for a church suffered from the ill-arranged construction of the tower, which was weakened by the introduction of a round window which was too large and ill-placed. Some designs for geometric tracery were most carefully worked out, and showed some novel and ingenious combinations, and so gained a silver medal. Though many of the architectural designs exhibit ingenuity and skill, they were not such as could with advantage be carried out in actual work.

A design for a ceiling from Coalbrookdale, in a good adaptation of the *cinque cento* style, also gained a silver medal, although the arrangement of the panelling was faulty through being somewhat too complicated, and ill-balanced.

THIRD DAY.—DESIGN.

EXAMINERS:

H. S. Marks, R.A.
W. Morris, Esq.
J. J. Stevenson, Esq.
The Director and Assistant Director for Art.

There was evident improvement this year in the general character of design for surface decoration. A set of wall-papers from the Nottingham School of Art gave evidence of excellent instruction in the methods of covering spaces. Great ingenuity in arrangement of the materials of the pattern was shown in these drawings, and the execution was beyond praise. There was also decided advance in the style of design, the surfaces being well broken up, the stiffness incidental to diapers was avoided, and it may be said that the patterns were for the most part founded on thoroughly good principles. The failure was in the first place on the point of colour, which was wanting in freshness and purity

of tint; and, secondly, in the unsuitable treatment of the borders, which, in themselves too small and wanting in richness, consisted generally of an enlarged treatment of the repeated design, separated by a broad plain band from the diaper. This is clearly not sufficient for a border to a large diapered surface. In order to give the necessary richness it may be said to be essential that bands of smaller detail should be added, which should contrast both with the diaper and the principal feature of the border. The borders of Persian and Indian designs should be studied as examples. The set of drawings here referred to were of such nearly equal merit that it was only with difficulty that the Examiners apportioned the various prizes. From the defects explained above none were thought worthy of the gold medal.

The gold medal drawing for lace was more complete and harmonious in design than the prize drawing of last year, and the competition in this class was above the average of former years. The Nottingham School as usual took the highest awards.

A clever and ingenious design for a carpet from Westminster School secured a gold medal. With this exception the carpet designs did not display much advance. It is strange that the numerous and varied specimens of oriental manufacture lately imported into England, and examples of which have been sent to Kidderminster and other manufacturing districts, should not have had more influence on the style of treatment, both as regards design and colour. Merely to imitate such examples would of course result only in the stagnation which is inseparable from mere imitation; but study of the treatment, both in form and colour to be found in them, could not but lead to an improvement in the manufacture by the application of good principles of arrangement to such methods of design as are derived from the study of nature.

The same criticisms will apply to other various specimens of designs; to those for pottery and embroidery for instance, where the design was either no design, but mere sketching, more or less careful, of natural objects, chiefly flowers and birds, applied hap-hazard without reference to the space to be decorated; or again, where it was merely a direct imitation of old patterns, the French and Holbeinesque development of the Italian *cinque cento* style being most in vogue. The only possible development of this fine style lies in its being adapted to a knowledge derived from the study of nature; merely to imitate its caprices and its peculiar treatment of ornamental forms is to restrict it to a vicious circle, within which vital growth is impossible.

It is unfortunate that designing for jewellery, an art in which fancy may be indulged almost to the extent of caprice, should apparently receive so little encouragement. But few designs were submitted, and those of a common-place character, following merely the trade patterns. The whole field of nature is open to proper adaptation in this art.

FOURTH DAY.—PAINTING IN OIL AND WATER COLOURS.

EXAMINERS:

L Alma Tadema, R.A.
G. D. Leslie, R.A.
H. S. Marks, R.A.
The Director and Assistant Director for Art.

The still-life groups were as usual the principal feature of this day's competition. The painting of a group of azaleas, from the Bloomsbury School of Art, to which the gold medal was awarded, was a faithful rendering of a very difficult subject, the difficulty being increased by the

Appendix C.

REPORT OF EXAMINERS ON COMPETITION FOR NATIONAL MEDALS.

introduction of the looking glass, which necessitates two views of each flower being completed in the one painting, a requirement which seems to have been for the most part duly fulfilled. This painting was on the whole fresh and vigorous and clear in tone, and the superior difficulties of drawing flowers (which are by their nature perishable) over unchangeable objects, such as the glazed pots or metal plateaux, frequently so admirably rendered, being taken into account, the Examiners felt that the gold medal was well gained by this work. A painting of a breakfast table, from Newcastle-on-Tyne, was considered to be the next in merit, from the expression of light and unity of effect; but the subject is of course easier to treat, and the execution was inexperienced. The general character of the competition is shown by the awards. The large groups from the National Art Training School were admirably executed, and considering the difficulty occasioned by the distracting multiplicity and variety of textures and patterns, the unity of effect in these groups may be said to be in the best of them perfectly preserved, and in the opinion of the Examiners beyond praise. Much praise was given to the sepia drawings from the cast, a very useful form of instruction, as teaching the student to work with directness and precision, and laying the foundation (where properly directed) of a large style of work.

16. List of Students rewarded at the National Competition, 1879.

Gold Medals.

Name.	School.	Stage.	Subject.
Berkeley, Stanley .	Lambeth . . .	8 c.	Chalk drawing from the nude figure.
Bradburn, John W. .	Coalbrookdale . .	23 c.	Design for mosaic.
Castle Joseph . .	Manchester (Grammar School).	23 c.	Design for chintz.
Cadenhead, James .	Edinburgh (Male) .	8 b. 2	Chalk drawing of figure from the antique.
Denley, Mary A.* .	Westminster (St. Mary's).	23 c. (For 2.)	Design for carpet.
Drury, Alfred . .	South Kensington .	19 d.	Model in clay of figure from life.
Garbutt, Andrew .	Westminster (Royal Architec. Museum.)	23 d.	Modelled design for a twisted column.
Sewell, A. J. . .	Nottingham . .	23 e.	Design for lace curtain.
Shepherd, George W.	Coalbrookdale . .	23 d.	Design for iron gates.
Wood, Catherine M.†	Bloomsbury . .	15 a.	Group in oil-colours.

Silver Medals.

Name.	School.	Stage.	Subject.
Alexander, William .	Salisbury . . .	8 d.	Chalk drawing of a head from life.
Baird, Nathaniel H. J.	Edinburgh (Male) .	16 a.	Monochrome painting of figure from the antique.
Banks, W. H. . .	Rotherham . .	12 a.	Monochrome painting of ornament from the cast.
Bonnallo, R. S. .	Nottingham . .	23 c.	Design for lace curtains.
Borrows, Henry .	Newcastle-on-Tyne .	15 a.	Group in oil-colours.
Boyd, Walter S. .	Birmingham . .	17 b.	Painting from life.
Brown, Thos. A. .	Edinburgh (Male) .	9 a. (For 2.)	Anatomical drawing.
Bulley, Georgina E.	South Kensington .	19 d.	Model of a head from life.
Catchpole, G. F. .	Westminster (St. Mary's).	23 c.	Design for pottery cheese stand.
Davis, William. .	St. Martin's . .	8 c.	Chalk drawing from the nude figure.
Drury, Alfred . .	South Kensington .	19 d.	Model of a head from life.
Dunn, Walter . .	Westminster (St. Mary's).	23 c.	Design for muslin.
Elliott, George H. .	Bradford (Grammar School.)	12 a.	Monochrome painting of ornament from the cast.
Etchells, John C. .	Manchester (Grammar School).	23 a.	Machine drawing.
Gibbs, William .	Burslem . . .	18 b.	Model of ornament from the cast.
Gowans, George .	Aberdeen . . .	23 d.	Design for metal salver, repoussé work.
Hart, Alfred . .	Brighton . . .	15 a.	Group in oil-colours.
Herrington, Frederick W.	St. Martin's . .	8 b. 2.	Chalk drawing of figure from the antique.
Hill, Nathaniel .	Dublin (Metropolitan)	8 b. 2.	Chalk drawing of figure from the antique.
Hitching, H. H. .	Nottingham . .	23 c.	Design for wall decoration.
Hope, Mary . .	Edinburgh (Female).	8 b. 2.	Chalk drawing of figure from the antique.
Jackson, Emily E. .	South Kensington .	22 d. (For 2.)	Studies of historic styles of ornament.
McFadden, F. . .	Southampton (Phil. Hall.)	8 c	Chalk drawing from the nude figure.
Marriott, Frederick .	Coalbrookdale . .	23 c.	Design for ceiling.
Marshall, A. . .	Nottingham . .	23 b. (Set of 5.)	Design for a church.

* The Princess of Wales' Scholarship of 25*l*. has been awarded to this student.
† The Princess of Wales' Scholarship of 11*l*. has been awarded to this student.

Appendix C.

STUDENTS REWARDED AT NATIONAL COMPETITION OF SCHOOLS OF ART.

Silver Medals—*continued.*

Name.	School.	Stage.	Subject.
Marshall, J. F. .	Nottingham . .	23 c.	Design for inlaid marble.
May, Samuel . .	West London . .	15 a.	Group in oil-colours.
Mills, William .	Birmingham . .	15 a.	Group in oil-colours.
Nisbet, Ethel . .	Bloomsbury . .	14 a. (For set.)	Painting plant form from nature.
O'Keefe, Patrick .	Westminster (St. Mary's).	23 d. (For 2.)	Designs for iron gates.
Oakey, H. . .	Nottingham . .	23 c.	Design for wall decoration.
Piper, Lucy . .	Westminster (St. Mary's).	23 c.	Design for pottery centre-piece.
Richards, Sophia .	Westminster (St. Mary's).	23 c.	Design for fan.
Roe, Walter H. .	South Kensington .	8 b. 2. 17 b.	Chalk drawing of figure from the antique. Painting from life.
Rogers, Edith . .	Westminster (St. Mary's).	23 c.	Design for inlaid box.
Rooke, Alfred . .	Brighton . . .	23 d.	Design for the cap of a column.
Savill, Edith . .	Lambeth . . .	8 c.	Chalk drawing from the nude figure.
Schollar, William .	Westminster (St. Mary's).	22 d. (For set.)	Studies of historic styles of ornament.
Spittle, William M. .	Birmingham . .	15 a.	Group in oil-colours.
Surenne, Mary H. .	Edinburgh (Female).	15 b.	Group in water-colours.
Thomas, J. . .	Halifax . . .	23 c.	Design for muslin.
Thomas, William G. .	Westminster (St. Mary's).	23 c.	Design for mosaic.
Wightman, W. H. .	Nottingham . .	23 c.	Design for wall decoration.
Young, Andrew .	Edinburgh (Male) .	16 a.	Monochrome painting of figure from the antique.

BRONZE MEDALS.

Name.	School.	Stage.	Subject.
Adams, Charles I. .	Leicester . . .	8 b. 2.	Chalk drawing of figure from the antique.
Ascough, Edward W.	Birmingham . .	19 d. 23 d.	Model in relief from life (figure). Design for a salver.
Ayers, Ellen M. .	Great Yarmouth .	23 c.	Design for engraved glass claret jug.
Baker, F. . . .	Nottingham . .	23 c.	Design for lace curtain.
Ball, F. . . .	Nottingham . .	23 b. (For 4.)	Design for a church.
Bateman, Herbert J.	Sheffield . . .	23 d.	Design for salt cellars.
Bedford, Fred. . .	Barnsley . . .	23 a.	Machine drawing.
Bell, John M. . .	Birkenhead . .	19 d.	Model in relief of figure from life.
Bonnallo, R. S. . .	Nottingham . .	23 c.	Design for wall decoration.
Brander, Annie E. L.	South Kensington .	23 c.	Design for cretonne.
Brooks, President .	Manchester (Grammar School).	9 a. (For set.)	Anatomical drawing.
Brueton, Frederick .	Birmingham . .	8 c.	Chalk drawing from the nude figure.
Brutnell, A. W. .	Nottingham . .	23 c.	Design for lace curtain.
Butler, James . .	Nottingham . .	23 c.	Design for wall decoration.
Carew-Smyth, P. M. .	Belfast . . .	23 c.	Surface design.
Clarke, A. M. . .	Birmingham . .	15 a.	Group in oil-colours.
Clayton, Edward .	Sheffield . . .	23 d.	Design for a tankard.
Colchester, Charles .	Lambeth . . .	8 d.	Chalk drawing of a head from life.
Colson, A. . .	Southampton (Phil. Hall).	15 a.	Group in oil-colours.
Cone, John . .	Halifax . . .	23 c.	Design for a carpet.
Craven, Joseph. .	Portsmouth . .	12 a.	Monochrome painting of ornament from the cast.
Cruickshank, John E.	Derby . . .	23 b. (For 6.)	Design for village buildings.
Denley, Mary A. .	Westminster (St. Mary's).	23 c.	Design for China plaque.

Bronze Medals—*continued.*

Name.	School.	Stage.	Subject.
Dicksee, Margaret	Bloomsbury	8 b. 2.	Chalk drawing of figure from the antique.
Dunn, Walter	Westminster (St. Mary's).	22 a. (For 2.)	Natural objects treated ornamentally.
Edwards Thomas Geo.	Sheffield	23 b.	Design for staircase.
Elliott, John W.	Preston	12 a.	Monochrome painting of ornament from the cast.
Ellis, Herbert	Lambeth	19 b.	Model of figure from the antique.
Ericksen, Nelly	Lambeth	8 d.	Chalk drawing of a head from life.
Finch, Effie F.	Dudley	8 b. 1.	Chalk drawing from the antique.
Garland, Mary	Gloucester	16 a.	Monochrome painting of figure from the antique.
Gibbons, Francis	Cirencester	23 d. 23 d.	Design for cup. Design for a frieze in monochrome.
Gore, William H.	Lambeth	8 c.	Chalk drawing from the nude figure.
Gray, John N.	Edinburgh (Male)	8 b. 2.	Chalk drawing of figure from the antique.
Hammond, T. W.	Nottingham	23 c.	Design for lace curtain.
Harris, Frederick	Lincoln	15 b.	Group in water-colours.
Harry, Johanna C.	South Kensington	19 b.	Model of head from the antique.
Hayes, Michael	Limerick	23 c.	Design for ceiling decoration.
Hemingway, Abraham.	Barrow-in-Furness	23 b. (For 2.)	Design for church windows.
Holmes, Charles B.	Manchester (Royal Inst.)	23 c.	Design for frieze.
Hoyland, Edwin	Sheffield	23 d.	Design for a twisted column.
Hussey, John S.	Kidderminster	23 c.	Design for a carpet.
Inman, Zoe A.	Birkenhead	8 b. 1.	Chalk drawing from the antique.
Johnson, Emily	Hanley	12 a.	Monochrome painting of ornament from the cast.
Johnston, Annie	Dublin (Metropolitan)	23 c.	Design for muslin.
Keith, Percy	Salisbury	23 c.	Design for wall decoration.
Lambert, George F.	Derby	23 c.	Design for plates, majolica.
Lea, Harry	Hanley	12 a.	Monochrome painting of ornament from the cast.
Leadbeater, William	Hanley	19 b.	Model of head from the antique.
McInroy, John	Dundee	23 a.	Drawing of iron bridge.
Mahomed, Omar	Brighton	23 c.	Design for side of a room.
Marsh, J. Colin	Burslem	18 c.	Model of ornament from a drawing.
Miles, Alice P.	South Kensington	22 d. (For set.)	Studies of historic styles of ornament.
Moore, John I.	Coventry	23 c.	Design for watch backs.
Palmer, Ada M.	South Kensington	19 d. (For 2.)	Models of heads from life.
Peace, Alfred A.	Sheffield	23 d.	Design for salt cellars.
Perry, Alice B.	South Kensington	12 a.	Monochrome painting of ornament from the cast.
Phillips, Miriam M.	Dublin (Metropolitan)	23 c.	Design for damask.
Pratt, Claude	Birmingham	15 a.	Group in oil-colours.
Rogers, Mark	Lambeth	23 d.	Design for salver.
Schell, Lily	Brighton	8 b. 2. 8 b. 1.	Chalk drawing of figure from the antique. Chalk drawing from the antique.
Smith, Sarah M.	City and Spitalfields	12 a.	Monochrome painting of ornament from the cast.
Speirs, John	Edinburgh (Male)	8 b. 2.	Chalk drawing of figure from the antique.
Spittle, William M.	Birmingham	14 b.	Interior architectural view.
Stephenson, Charles	Bradford (Grammar School).	8 d. 22 a.	Chalk drawing of head from life. Natural objects treated ornamentally.
Story, M. S.	Nottingham	23 c. (For set.)	Design for fans.

PRIZES OF THE PLASTERERS' COMPANY.

19. PRIZES of the PLASTERERS' COMPANY, 1879.

The Worshipful Company of Plasterers, London, offered the undermentioned prizes to be competed for by students in Metropolitan and Provincial Schools of Art in connexion with the Science and Art Department:—

I.—MODEL IN PLASTER.

For a twisted column, 3 feet high, decorated with surface ornament, with neck moulding at the top and bottom, but without base or capital.

First Prize, 7*l.* 7*s.*, awarded to Andrew Garbutt, of the Westminster Royal Architectural Museum School of Art.

Second Prize, 4*l.*, awarded to Edwin Hoyland, of the Sheffield School of Art.

II.—A DESIGN IN MONOCHROME.

For a length of 15 feet of a panelled frieze, 3 feet high, to run along the upper part of a room, with cornice above, not more than 12 inches high (the total height therefore not exceeding 4 feet); the panels to contain ornamental designs in low relief, with or without figures or animals. Scale 1 inch to a foot, with section to the same scale; shew also 5 feet of the length, one fourth of full size, to be included in one imperial sheet.

First Prize, 8*l.* 8*s.*, awarded to Francis Gibbons, of the Cirencester School of Art.

Second Prize, 5*l.* 5*s.*, awarded to Arthur Winterbottom, of the Sheffield School of Art.

These prizes are open to all students in the Provincial and Metropolitan Schools of Art, including artisan classes in those schools; but the first and second prizes in either case cannot both be taken by students of the National Art Training School at South Kensington.

The models and designs remain the property of the competitors, but the Plasterers' Company reserves the right of taking copies of them should it be thought desirable.

20. REPORT of the REGISTRAR of the NATIONAL ART TRAINING SCHOOL.

SIR,

I HAVE the honour to submit my report on the National Art Training School for the year ending 31st July 1879.

In the period over which this report extends, viz., from 1st October 1878 to 31st July 1879, the number of "students in training" receiving instruction has been 38, and of "national scholars" 12. These, besides being *free* students, received weekly allowances from 10*s.* to 35*s.* each.

During the year the Art Schools of Bath, Nottingham (on two occasions), and Ryde, have received the temporary assistance of teachers from the Training School.

One student in training has been promoted to assistant master in these schools.

Four students in training have retired from the training class, viz.: two female and two male.

Five national scholars; time expired.

Seven students in training were admitted, viz.: two from South Kensington and one each from the schools at Hastings, Gloucester, Leamington, Nottingham, and Cirencester.

Eight national scholars were admitted, viz., one female from South Kensington (*transferred* from student in training) and males one each from Belfast, Birmingham, Burslem, and two each from Coalbrookdale and Newcastle-under-Lyne.

Ten students in training have been engaged in giving instruction in district schools in London as a part of their training.

One hundred and twenty-two students have attended the schools without payment of fees, viz.: 42 females, and 80 males, made up thus—

Students in training - - - -	38
National scholars - - - - -	12
Royal Engineers - - - - -	21
Having passed higher grade examinations students formerly in training, and national scholars -	51
	122

Fifty-two students have been admitted at *half* fees on fulfilling requirements of paragraph 85 (*a*) Art Directory.

Eight hundred and twenty-four students have attended these schools, viz., 448 females and 376 males.

The total amount of fees received was—

	£	*s.*	*d.*	
	3,161	3	6	from day students,
	326	14	0	,, evening students.
Total -	3,487	17	6	

This amount, as compared with that of the previous year, shows a decrease of 344*l.* 3*s.* 6*d.*, which is accounted for by the number of free and half free admissions.

The schools were open for study 199 days and the total number of attendances was 85,456; the average daily attendance was 429$\frac{3}{4}$; the smallest daily attendance recorded being 203 on the 1st of October 1878, and the largest. 523. on the 21st March 1879.

Appendix C.

NATIONAL ART TRAINING SCHOOL.

These numbers, as compared with last year, show an *increase* of 933 in the number of attendances, and 11¾ in the daily attendance.

Nine is the average number of students attending the etching class.

The general fee-paying students of these schools in the "annual national competition" of 1879, took 1 gold, 5 silver, 7 bronze medals, and 20 Queen's prizes of books.

The students in training and national scholars, 5 gold, 9 silver, 22 bronze medals, and 18 Queen's prizes of books.

In the "local competition" open to all students in these schools the Director's prize of 5*l.* was awarded to Mr. M. L. Menpes, besides which 11 silver medals, 27 book prizes, and 6 book prizes of a lower value were awarded to other students.

At the 2nd grade examination in May last, (consisting of printed papers in geometry and perspective, and timed exercises in freehand and model drawing,) 127 students passed, 63 gained 86 prizes by passing "excellent," and 51 obtained the 2nd grade certificate.

At the 3rd grade or highest Art examination 30 students of these schools obtained 32 "Art Masters' certificates," 4 of Group VI.; 3 of Group III.; 11 of Group II.; and 14 of Group I.

The total number of prizes gained by students of these schools comprised 6 gold, 14 silver, and 29 bronze medals; 38 Queen's book prizes, 27 national competition books, 89 third grade prizes of books and 6 book prizes of lower value, viz.:—

MEDALS AND BOOKS TAKEN BY

——	Gold Medals.	Silver Medals.	Bronze Medals.	Book Prizes.
(I.) General students - -	1	5	7	20
(II.) Students in training - -	5	9	22	18

Extra Prizes.

De Zerffi's prize of 5*l.* 5*s.* for best design of a salver "Trecento style" was awarded to Mr. L. J. Rhead.

Mr. Burchett's prize of 3*l.* 3*s.* for perspective was awarded to Miss Higgs.

The prizes of 5*l.* and 2*l.* 10*s.* offered by the Department, for the two best designs for the new "Art Class Certificate" were respectively awarded to Mr. F. J. Marriott and Mr. J. M. Benson.

(Signed) SUSSEX W. LENNOX, Col.,
Registrar.

APPENDIX D.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

REPORT on the SOUTH KENSINGTON MUSEUM and the BRANCH MUSEUM at BETHNAL GREEN, by SIR PHILIP CUNLIFFE OWEN, K.C.M.G., C.B., C.I.E., Director.

New Buildings.

The additions to the Museum buildings, erected under the authority of Parliament, are still in progress, and will it is hoped be ready for occupation in the course of a year or so. The much needed accommodation for the Art and Educational Libraries, and for the Dyce and Forster Collections, will then be provided, and some extra space will also be secured for other divisions of the Museum.

India Museum. Transfer of contents.

In July 1879 a communication was received from the India Office, to the effect that the Secretary of State for India in Council had come to the conclusion that it was desirable to make some arrangement by which the valuable contents of the India Museum might be removed to other institutions of a kindred nature, needful security being taken to preserve their special Indian character; and suggesting that as some portion of the collection would without doubt be best placed in the South Kensington Museum, it would be well if the Lord President of the Council would depute some officer of the Science and Art Department to confer with representatives of the India Office, with the view of drawing up a scheme for carrying out this proposal.

This suggestion was at once acted on by the Lord President, and as the result of correspondence, and conferences between various departments, it was finally agreed that the zoological examples in the collections should be removed to the new Natural History Museum, the examples of economic botany to the Museum at Kew Gardens, and various archæological and ethnographical examples, including specimens of ancient Indian sculpture and architecture, to the British Museum, and that the remainder, comprising all the examples of industrial art, should be transferred to the charge of the Lords of the Committee of Council on Education, and henceforth be considered a section of the South Kensington Museum.

During the progress of these negotiations H.R.H. the Prince of Wales, as President of the Commissioners for the Exhibition of 1851, to whom the galleries in which the India Museum had of late years been exhibited belong, addressed a letter to the First Lord of the Treasury, expressing the hope of the Commissioners that those portions of the collections illustrating the art manufacture and industries of the Indian Empire might be kept together, so as to be available to the public, and offering the use of the Exhibition galleries occupied by the India Museum at half the rental then paid by the India Office (1,000*l.* instead of 2,000*l.* per annum). This offer was accepted, and accordingly this portion of the collection will for the present remain in the galleries hitherto known as the India Museum, which will thus form an annexe to the South Kensington Museum, and be open to visitors without extra charge.

The transfer was made in November 1879, and the officers of the South Kensington Museum at once set about the preparation of an

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

inventory of the contents of this portion of the collection, which was found to comprise more than 19,000 objects.

The re-arrangement of the galleries, rendered necessary by the withdrawal of large portions of their original contents, and the incorporation with the remainder of the numerous examples of Indian art manufactures already in the South Kensington Museum, was obviously a work of time, and it was judged necessary to defer their opening till May 1880.

The account of this re-arrangement and of the re-opening will more fitly find a place in the next annual report of the Department.

Reports of officers.

In the subjoined reports of the Assistant Directors and Museum Keepers, will be found recorded all that calls for notice in the progress of the various divisions of the Museum during the past year.

Mr. Thompson gives a sketch of the chief additions to the collections as bearing on the arrangement of the Museum and its branch at Bethnal Green. Major Festing gives some account of the experiments that have been tried with various forms of the electric light in the Museum. The results give reason to hope that it may hereafter be adopted with advantage both in the new reading rooms and in the courts.

The keeper of the Art Collection furnishes lists of the acquisitions during the year 1879. The two classes of Italian sculpture, and Spanish industrial art, have been materially strengthened by important purchases.

Circulation.

His report shows the continued development of the system of circulation of examples of fine and industrial Art on loan for exhibition throughout the country, which has always been a marked feature of the administration of the Museum. The pressing and ever increasing demands from provincial towns for loans of this kind tax the resources of the Museum to the utmost. The frequent withdrawal of important objects from the cases for this purpose, and the substitution of labels stating the reason of their temporary disappearance serve to remind the public that it is not at South Kensington Museum alone that the work of the Science and Art Department is carried on, but that the opportunities of seeing the treasures of the collection are largely shared in by many provincial towns throughout the country. From the returns on p. 563, it will be seen that seven permanent museums, including those at Bethnal Green and Edinburgh, have received loans throughout the year, that loans for shorter periods have been sent to 22 exhibitions, and to 103 schools of Art, the number of objects sent out being 6,418, with 4236 paintings and drawings. The number of visitors to these museums and special exhibitions during the year has been—

Bethnal Green Branch Museum - -	444,021
Edinburgh Museum - - -	647,294
Other Museums - - - -	409,533
Special Loan Exhibitions - - -	172,389
	1,673,237

Libraries.

The reports of the keepers of the three libraries give the following as the number of students during the year—

Art Library - - - -	25,453
Educational Library - - -	24,733
Dyce and Forster Library - - -	2,545
Total -	52,731

This total shows an average of 169 students on each of the 311 days on which the Museum has been open.

The number of printed books in these libraries is in round numbers as follows:—

	Volumes.
Art Library - - - -	50,000
Educational Library - - -	40,000
Dyce and Forster Library - - -	32,000
Total -	122,000

Exhibition galleries.

The various Museum collections at present housed in the galleries adjoining the Horticultural Gardens have received several additions. In his report on arrangement, Mr. Thompson notes the alteration in the approach, rendered necessary by the cession of a portion of the southern range to the Commissioners of the National Portraits Commission. The space furnished by these galleries renders it possible to exhibit to the public much that is valuable and interesting, which must otherwise be stowed away or returned to the lenders. From a paper recently prepared, and which is given on pp. 551–2, it appears that 46,311 objects are shown in these galleries, of which 33,106 are loans, and 13,205 the property of the Department; occupying a floor space of 69,519 square feet. This does not not include the Indian Section.

Visitors.

The returns of the number of visitors to the South Kensington Museum during 1879, will be found on p. 575. Owing probably in some degree to the unfavourable weather which prevailed during a great part of the year, the numbers are somewhat lower than in 1877 and 1878.

Bethnal Green Branch Museum.

The Bethnal Green Branch Museum is referred to by Mr. Thompson Mr. Wallis, and Mr. Matchwick. Returns of the number of visitors, &c. appear on p. 576.

Publications.

From a return prepared by Mr. A. C. King it appears that the following publications relating to the Museum have been issued under the authority of the Department during the year 1879.

Inventory of Art Objects acquired during the year 1878.

List of Loans to the South Kensington and Bethnal Green Branch Museums during the year 1878.

List of Works on Lace in the Art Library.

The Commercial Products of the Animal Kingdom, by P. L. Simmonds, a descriptive account of those shown in the Collections at Bethnal Green Branch Museum.

Universal Art Inventory, Part IV., Woodwork and Sculpture. This completes the work.

Inventory of the Collection of Examples of Indian Art and Manufactures transferred to the South Kensington Museum by the India Office.

Catalogue of Models of Machinery, &c.

Besides the above, which have been issued by the Stationery Office, Messrs. Chapman & Hall, Limited, have published under the authority of the Science and Art Department the following, in continuation of the Series of Hand-books to which reference has been made in previous reports.

The Industrial Arts of Spain, by Señor Juan F. Riaño, in two parts.

Persian Art, by Major R. Murdoch Smith, R.E., second and enlarged edition.

Appendix D.

REPORT OF SOUTH KENSINGTON MUSEUM.

Several other volumes of this series are in progress, among them may be mentioned a Hand-book on the Dyce and Forster Libraries and Collections, one on Indian Art by Dr. Birdwood, and one on Japanese Pottery by Mr. A. W. Franks.

At the request of Messrs. Sampson Low & Co. an arrangement has been made for the issue by them in a cheap form of impressions from the etched plates in the possession of the Department, the work of students in the Schools of Art, representing Works of Art in the Museum. These plates, with descriptive letter-press, will appear in parts at regular intervals. The first part was issued early this year.

MAJOR FESTING, R.E., the Assistant Director, specially entrusted with the charge of the buildings, including lighting, heating, ventilation, &c. reports as follows:—

Preparations were made at the close of the year for taking over the galleries east of the Horticultural Gardens containing the India Museum. The additional space, over 45,000 superficial feet, so added to the Museum necessarily entails some increase to the staff engaged in keeping it in order, cleaning, &c.; and the first expenses in fitting up and arranging the collection will also be considerable.

The total consumption of gas in the Museum, Schools, &c. at South Kensington has been 28,820,300 cubic feet, costing 5044*l.* 1*s.* 2*d.* At Bethnal Green 5,224,000 cubic feet of gas have been consumed, costing 914*l.* 16*s.* 1*d.*

Further experiments have been made during the year with electric lights. Arrangements were made in the early part of the year with the British Electric Lighting Company for trying a Wilde's machine and lights in the Raphael Gallery and one of the Sheepshanks Rooms. The machine was worked by the gas engine purchased in the preceding year. These trials, however, were discontinued after a short time on account of the buzzing noise emitted by the lamps, which was found to be very objectionable. The promoters expected to be able to overcome this difficulty, and it was intended to have some further trials when this should have been done; but before long the company was wound up, and no further trials were made.

It was found from the trials that two lamps lighted one of the Sheepshanks Rooms in which the consumption of gas is 600 feet per hour, and that six lamps gave sufficient light for the Raphael Gallery, usually lighted by a consumption of 1,800 feet of gas per hour.

Apart from the noise the light was generally satisfactory, though the lamps required rather better adjustment to make them burn satisfactorily and to enable six of them to be properly worked by the gas engine. This better adjustment could no doubt have been effected with care; but it was not thought advisable to continue the trials with this view as long as the great defect of the noise remained.

As regards cost, the motive power and carbons for this light were found to cost 2*s.* 6*d.*, an hour for the Raphael Gallery, against a cost of 6*s.* 4*d.*, an hour for gas. No determination of the probable cost of wear and tear of the machinery, &c. could of course be arrived at from these limited trials, but the saving of 3*s.* 10*d.* an hour, or nearly 140*l.*

a year, would certainly be ample to cover this cost as well as the interest on the outlay for the machinery.

At a later period Mr. Werdermann, the inventor of another form of electric lamp, lent some of his lamps for trial in the Art Library. They were worked by a Gramme machine hired for the occasion, and afterwards by the Siemens machine mentioned in my report of last year, the motive power in each case being the gas engine. Neither of these machines, however, gave results satisfactory to Mr. Werdermann, and at his request the trials were discontinued until he could get a machine made which he believed would answer his purpose better. He has not, however, resumed the trials as yet.

The Reading Room was satisfactorily lighted by these lamps. The light was steady and of good colour, and the amount of heat given out by them being imperceptible, there was a favourable contrast to the gas lighting, which makes the room very hot. There were no signs of the evolution of any noxious vapours, but this is a point which will require further investigation. Eight of these lamps were used in the Art Library, but the best result was obtained when seven only were used at one time. They were placed at the same height above the tables, about 5 feet, as the gaslights, and the consumption of gas in the lights which they replaced is at the rate of about 6*d*. an hour.

The gas consumed in the gas engine which worked the electric lights cost about 10*d*. an hour, and the carbons about 8*d*, so that these two items alone cost three times as much as the gas lighting. It must be remembered, however, that in the new Reading Room, which will be nearly 35 feet high, it will be necessary to have the gaslight about five times as far above the readers' tables as they are in the present room, the consumption of gas in proportion to the number of readers will therefore be largely increased; but there will be no corresponding increase in the number of electric lamps, which may be as near to the tables as they were in the above mentioned trials, and therefore probably the cost of even the Werdermann electric light will not be much greater than that of gas in this case, and in every other point the advantages will be with the electric light. These lights appear to be particularly suited for the Art Library by reason of their great steadiness, and it may therefore be found advisable to introduce them into the new rooms, notwithstanding the expense of working them.

Trials, however, will be made of other systems of electric lighting as occasions offer, in order to determine which will answer best for the other parts of the Museum.

The heating apparatus in the Museum, as well as that at the Bethnal Green Museum, has worked well, with the exception of the old boilers in the galleries south of the Horticultural Gardens, referred to in my last year's report. The remaining two were replaced in the summer by a new and more powerful boiler, and since this has been done, the temperature has been well maintained in those galleries during the very cold weather which we have had.

The mean temperature of the outside air during the time that the heating apparatus was at work, was nearly 2½ degrees lower than that of last year, or 41·5° as against 43·9°.

The mean temperature of the Museum during the same period was 58·7° against 59·3° in the corresponding period of last year.

Altogether 2,053 chaldrons of coke were consumed at South Kensington, costing 1,183*l*. The consumption at Bethnal Green was 134 chaldrons, costing 76*l*. 5*d*.

Appendix D. — Report on South Kensington Museum.

The annexed table gives an abstract of the temperature in various parts of the Museum, and out of doors throughout the year:—

Station.	Temperature.			Diurnal Variations.	
	Min.	Mean.	Max.	Max.	Mean.
	°	°	°	°	°
Competition Gallery -	45	60·2	78	15	4·5
New Sheepshanks' Gallery-	47	62·1	75	12	4·2
Raphael Gallery - -	46	60·8	75	14	5·5
Old Western Gallery -	44	59·6	72	15	5·8
North Court - - -	52	61·3	72	13	4·5
Lord President's Court -	52	60·4	70	9	3·7
New South Court - -	49	60·1	71	9	2·6
Standard (out of doors) -	18	47·0	83	28	10·6

Art Museum.

Mr. R. A. Thompson, the Assistant Director for Arrangement, reports as follows:—The additions made to the Art collections by purchase during the year have been arranged for exhibition in the Museum. Several fine examples have been added to the collection of Italian sculpture; notably a marble altar or shrine of a female saint from Padua, the work of Donatello, a marble doorway from a Palace at Genoa, 1519; and two black marble doorways, one inscribed as erected by Lazaro Doria in 1472, the other by Georgio Spinola in 1480, a portion of a large series of Spanish Art objects also acquired by purchase, consisting principally of gold and silversmiths' work, iron work, and textile fabrics, these with various other objects will be found arranged in their respective classes.

The most important presentation to the Museum during the year was a collection illustrating the training of students at the Gobelin and Beauvais establishments for the production of tapestries, presented by his Excellency the Minister of Public Instruction; a remarkable silver toilet service was bequeathed by the late Sir Walter Trevelyan.

It having been decided by the Secretary of State for India in Council to transfer to the British Museum and the Science and Art Department the collections of specimens of natural history and objects illustrating the arts and manufactures of India, hitherto known as the India Museum, the natural history and ethnological specimens going to the British Museum, and the Art and industrial specimens to the Science and Art Department, an inventory of the gifts to this department has been commenced.

Various miscellaneous objects have been received on loan, but owing to the difficulty of finding room, no special loan collection of Art objects has been formed this year.

Reproductions.

By permission of the Universities of Oxford and Cambridge, and the various city companies, gelatine moulds have been made of ancient plate in their possession, and electrotype copies will shortly be added to the collection of reproductions in the Museum.

Circulation.

The demands for loans of objects to Schools of Art, provincial museums, and local institutions steadily increases; the number of paintings, drawings, and Art objects circulated during the year amounted to 10,654, showing an increase of 2,334 over the previous year. In addition to the above, small collections of scientific apparatus, amounting in the aggregate to 2,657 specimens, were sent on loan to 38 towns in which science classes were held.

Decorations.

The large fresco of the "Arts of War" by Sir Frederic Leighton, filling one of the lunettes of the south courts has been completed.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

The new reading rooms so urgently required for the Art and educational libraries are slowly advancing towards completion, and it is to be hoped will be ready for occupation in the course of the next two years, meanwhile the inconvenient overcrowding of the present rooms continues and increases.

Art Library. Educational Museum.

No great alteration has taken place in the arrangement of this division of the Museum, the loan collection has been well maintained and numerous additions made, but there has been a falling off in the number of visitors, owing probably to the long miserable passage round the outside of the National Portrait Gallery that visitors have to pass through to reach the educational collections, a passage so narrow, and of so inflammable a nature as to be dangerous both to our own collections and to the National Portrait Gallery.

The Ethnological Collection of General Lane Fox attached to the educational collections has been largely added to, and now fills all the available space that can be set apart for its developement.

Machinery. Naval Architecture, and Munitions of War.

It having been decided to transfer to the trustees of the National Portrait Gallery the large room adjoining the buildings already in their occupation, it became necessary to entirely rearrange the whole of the models of machinery and naval architecture; this was rendered possible by the Office of Works giving up to the Science and Art Department the long room on the upper floor of the western galleries in exchange for the one on the ground floor already referred to, the new room was arranged and opened to the public during the Christmas holidays. The contributions to both collections have been numerous and interesting. There have been a few additions to the collection of munitions of war, the most important being a steel 9-pounder gun, and other specimens lent by Sir Joseph Whitworth.

Bethnal Green Branch Museum.

The exhibition of the loan collection of decorative furniture having been kept open for 12 months, was closed early in May, and the specimens returned to their various owners; it is satisfactory to state that during this period no damage had occurred to any of the beautiful examples so kindly lent for exhibition. To fill the space thus vacated the whole collection of ancient and modern ironwork from South Kensington was sent on loan to Bethnal Green, and is now arranged in the central court on the ground floor, it does not appear to be so much appreciated by the inhabitants of the district as was the previous contribution of ancient furniture.

Many new loans of pictures have been received, and the walls of the picture galleries are well filled. Large additions of Chinese and Japanese porcelain have also been made to the beautiful collection lent by Mr. Franks.

Food and Animal Product Collections.

The food and animal product collections have in like manner received many additions, both by gifts and purchase, especially the former, where many important and interesting analyses of food have been made by Professor Church, and exhibited in the division.

The Doubleday collection of insects, and the general collection of economic entomology have been thoroughly revised and placed in the best possible order.

THE ART COLLECTIONS.

Arrangements and classification.

MR. WALLIS, the Keeper of the Art Collections, reports as follows :— The general arrangements of the Museum remain the same as during the year 1878. The furniture division has however been re-arranged, and the most important examples have been placed in glass cases.

Acquisitions during the year.

The number of objects acquired by purchase, gift, or bequest during 1879 was 333, as against 739 in 1878. The most important purchases were three Greek terra-cotta figures from Bœotia, 100*l.*; a collection of scientific instruments with decorative mountings, 325*l.*; a marble shrine

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

carved in low relief with figures, attributed to Donatello, 186*l.* 7*s.* 6*d.*; an Italian marble doorway from a palace at Genoa, 750*l.*; the first portion of the Robinson Collection of Spanish Art Objects, 3,800*l.*; two Italian black marble doorways from a private chapel in a church at Genoa, 150*l.*; an Arab glass bottle, 270*l.*; an Italian clavicembalo of the 16th century, 120*l.*; a small collection of Spanish art objects, 424*l.*; three alto-relievos in wax by Giovanni da Bologna, 472*l.* 10*s.*

Gifts and Bequests.

The principal gift of the year was an interesting series of examples of the studies and early productions of the pupils of the Gobelins and Bayeux tapestry establishments by his Excellency the Minister of Public Instruction in France. The chief bequest, a silver toilet service by the late Sir W. C. Trevelyan, Bart., on payment of the bullion value of the silver. The toilet service had been on loan many years in the Museum and is of great interest.

Loan Collections.

The Loan Collections have been kept up to their usual standard, and very little change took place during 1879.

Circulation to Schools of Art, &c.

CIRCULATION.—The circulation of objects of study to Schools of Art, and for public exhibition in provincial Museums continues to increase, and the demand frequently exceeds the present means of supply. One of the chief wants at the present time is a more extensive series of good examples of studies in oil. This has always been a difficulty, but as the Schools advance in their operations, and the students require higher examples of study, the difficulty has increased, and will continue to do so.

The principal exhibitions to which loans of objects, paintings, drawings, &c., were sent out during 1879 in addition to the deposit loans to provincial permanent Museums, as recorded in Table 8, p. 563, are as follows:—

Keighley.

1. Keighley; held from 6th January to 1st February as an annual exhibition for the promotion of the interests of the School of Art and general instruction of the public. The number of visitors was 6,203, the receipts 113*l.* 8*s.* 8*d.*, and the reported surplus 20*l.* The value of the Museum contribution of 388 objects was estimated at 2,015*l.* 3*s.* 4*d.*, and the special cost to the Department in carriage, arrangement, &c. was 30*l.* 15*s.* 3*d.*

Sheffield.

2. Sheffield; held from 23rd April to 10th May as an annual exhibition of students' works of the School of Art. The number of visitors was 4,442 and the receipts 80*l.* 13*s.* No surplus reported. The value of the Museum contribution of 570 objects was estimated at 2,351*l.* 7*s.* 4*d.* The special cost to the department in carriage, arrangement, &c., was 22*l.* 7*s.* 7*d.*

Cutlers' Company.

3. Cutlers' Company, City of London; held in Cutlers' Hall, Cloak Lane. This is the first of the City Companies to which the Museum has been called upon to contribute for the promotion of the artistic and technical handicrafts represented nominally by them. The space available for the exhibition was limited, but it was crowded from its opening to its close. It was held from 1st to 17th May. The admission was free; the number of visitors 14,220. The value of the Museum contribution of 507 objects was estimated at 1,827*l.* 2*s.* 8*d.*, and the special cost to the Department of conveyance and arrangement, &c., 10*l.* 12*s.* 4*d.*

Waterford.

4. Waterford; held from 6th May to 7th August in the City Hall for the promotion of a knowledge of Science and Art in the locality. The number of visitors was 13,234, the receipts 345*l.* 6*s.* 11*d.*, and the reported surplus 20*l.* The value of the Museum contribution of 411 objects was estimated at 2,054*l.* 5*s.* 9*d.*, the special cost to the Department of carriage, arrangement, &c., 64*l.* 16*s.* 3*d.*

Bradford.

5. Bradford; held from the 28th May to 30th August in the Museum of the Free Library of the Corporation to obtain funds for a

permanent Museum. The number of visitors was 26,128, the receipts 605*l.* 3*s.* 6*d.*, and the reported surplus 215*l.* 19*s.* 10*d.* The value of the Museum contribution of 185 objects was estimated at 1,128*l.* 17*s.* 6*d.*, and the special cost to the Department of carriage, arrangement, &c., 68*l.* 17*s.*

Macclesfield.

6. Macclesfield; held from 16th June to 2nd August in the newly erected School of Science and Art to provide funds to furnish the building. The number of visitors was 7,077, the receipts 144*l.* 18*s.* 5*d.* The Committee made no report as to surplus or otherwise. The value of the Museum contribution of 310 objects was estimated at 1,559*l.* 15*s.* 8*d.*, the special cost to the Department of carriage, arrangement, &c., 37*l.* 0*s.* 1*d.*

Rugby School.

7. Rugby School; held from 24th June to 26th July in the "Temple Museum" on the occasion of its opening. The number of visitors was 6,263, the receipts 115*l.* 12*s.* 6*d.* No report was made as to surplus or otherwise. The value of the Museum contribution of 231 objects was estimated at 2,372*l.* 4*s.* 1*d.*, the special cost to the Department of carriage, arrangement, &c., 32*l.* 7*s.* 8*d.*

Chesterfield.

8. Chesterfield; held from 14th July to 4th August in the Stephenson Memorial Hall to obtain funds to liquidate the debt on the hall in which the Art Classes meet. The number of visitors was 9,328, the receipts 313*l.* 6*s.* 7*d.*, and the reported surplus 150*l.* The value of the Museum contribution of 110 objects was estimated at 1,209*l.* 13*s.*, the special cost to the Department of carriage, arrangement, &c., 22*l.* 9*s.* 6*d.*

Wakefield.

9. Wakefield; held from 30th July to 27th September in the new Clayton Hospital for the benefit of that institution and the General Dispensary; 10 per cent. of the surplus to go to the Wakefield School of Art. The number of visitors was 79,249, the receipts 1,933*l.* 6*s.* 1*d.* the reported surplus 600*l.* The value of the Museum contribution of 553 objects was estimated at 2,177*l.* 0*s.* 11*d.*, the special cost to the Department of carriage, arrangement, &c., 56*l.* 3*s.* 4*d.*

Chester.

10. Chester; held from 11th August to 13th September in the King's School to obtain funds for the School of Art. The number of visitors was 6,245, the receipts 291*l.* 5*s.* The Committee made no report of a surplus or otherwise. The value of the Museum contribution of 477 objects was estimated at 2,184*l.* 11*s.* 4*d.*, the special cost to the Department of carriage, arrangement, &c., 23*l.* 3*s.* 6*d.*

Reproductions.

REPRODUCTIONS.—A large collection of plaster casts of Greek and Roman architectural details and ornament has been presented by Decimus Burton, Esq., F.R.S., F.S.A.

By the courteous permission of the respective Companies, a selection from the English gold and silver plate of the Clothworkers', the Grocers' and the Salters' Companies has been reproduced in electrotype. The permission of other City Companies, and of Colleges in the Universities of Oxford and Cambridge has been obtained for the reproduction of gold and silver plate in the possession of each of them. These are now in the course of execution. Copies in electrotype by Messrs. Elkington have also been acquired of the crown of St. Louis given to the Dominicans at Liège (A.D. 1226), of a shield, German, 16th century, in the collection of Prince Carl of Prussia, and of the "Pilgrim's Shield," designed and executed for Messrs. Elkington by Morel-Ladeuil, exhibited at the Paris Exhibition, 1878.

Collections of Paintings.

BETHNAL GREEN BRANCH MUSEUM.—The Collection of pictures, water-colour drawings, &c. on loan to this Branch Museum has been fully kept up, both as regards the extent and quality of the works, and the available space for the miscellaneous collection of objects of industrial art has been well filled.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Special exhibition of Ironwork.

On the removal of the furniture lent for the Special Loan Collection of 1877, the whole of the wrought ironwork belonging to the Museum was moved to Bethnal Green and arranged in the space which had been occupied by the furniture. This is the first time this important collection of ironwork made during the last fifteen or sixteen years has been got together and exhibited in consecutive order. The result has been most satisfactory, and it is hoped that some of the local industries of the east end of London have been benefited by the study of it.

THE ART LIBRARY.

Mr. R. H. SODEN SMITH, F.S.A., the Keeper of the National Art Library, reports as follows:—

1. The attendance of readers in the Art Library has increased during the last 12 months, being 25,453 for the year 1879 against 23,821 in 1878. The number of subscribers has been 7,447 compared with 7,979 in 1878; of students 18,006 against 15,842 in the previous year. The attendance of students having been checked by the operation of certain regulations of the Art Training Schools has not risen to what it was in 1877.

2. The accommodation, as it is called by a strong figure of speech, for readers remains unchanged, and the fact that upwards of 25,000 readers have used the rooms, badly lighted by day, and overcrowded at night, speaks much for their zeal and appreciation of the great value of the contents of the Library.

3. The building for the Library which was commenced in May 1878 has made some progress, but has not advanced as far as would have been the case had the sum of money originally devoted to the purpose been granted since in sufficient measure to enable the work to proceed as intended. The delay is unfortunate, as the difficulties in the case of the present temporary premises augment month by month, and the public are ultimately the sufferers.

4. The system of classification of the books on the shelves has been carried out as far as possible in the present position of the collection.

5. The laborious task of counting the whole of the books contained in the Art Library has been accomplished; a matter rendered more tedious and difficult by the crowded state of the shelves, with books sometimes in double rows; the total number in November was 50,388. The work was completed without closing the Library to the public for a single day.

6. Bookbinding in distinguishing colours to aid in marking the classification has been continued, 413 have been bound, and 200 repaired.

7. Experiments have been made in the reading room with electric lighting, sufficient at least to show the advantage that will arise from its employment as far as regards illuminating power; incidental benefits seem also to be likely to result from it, such as, absence of heat, and freedom from the products which render gas destructive to book-bindings; such readers as expressed opinions respecting it were impressed by the advantages it seemed to offer, and inquiries are frequent as to when its use will be resumed. The attendants found its great superiority to the gas in enabling them to read with ease the lettering of books on the shelves, and also considered its freedom from heat a very important point in its favour, as the atmosphere of the reading room at present is apt to be either very draughty or oppressive. The occasional want of steadiness in the experimental light was of course noticed as a drawback.

8. The acquisitions to the Library have necessarily been limited in consequence of the diminished grant for purchases; rare books as well

as great and costly works which being beyond the means of ordinary private buyers should especially be found available in a national public library are thus put out of reach; moreover the possessors of such books are only disposed to make them known where a liberal market value can be obtained.

The number of books acquired has been 1,742.

9. A considerable number of pamphlets, catalogues, and minor works have been presented to the Library; also, through the Austro-Hungarian Embassy, an interesting publication on Ornamental Textile Art in Hungary, by Dr. C. de Pulszky; from the Baron Davillier, his "Recherches sur l'Orfévrerié en Espagne en Moyen Age, &c.;" from M. Giraud, of Lyons, "Recueil des Principaux Objets d'Art ayant Figuré à l'Exposition de Lyon, 1877"; from James White, Esq., a series of volumes on the Art of Pottery in Japan with very interesting illustrations; also an Illustrated Flora of Japan in 20 volumes.

Of works purchased the following may be noted:—Androuet du Cerceau, Livre d'Architecture, folio, Paris, 1559; J. Myller, Ornatus Ecclesiasticus, 2 vols., 4to., Munich, 1591; B. de Montfaucon, Antiquity Explained, &c., (English edition) 10 vols. folio, 1721–25; Nicolas de Nicolai, Le Navigationi e Viaggi, &c. 4to., Antwerp, 1576; a rare Spanish book published at Madrid 1589, entitled "Libro de Geometria Pratica, y Traça" &c., with woodcut illustrations of tailor's patterns both lay and clerical (purchased in Paris); M. J. Doubdan, Le Voyage de la Terre Sainte, Paris, 1666; Antonio Sacchi, Primo e Secundo Libro di Lettere, obl. 4to., (engraved alphabets, &c.); A. C. Redelius, Annus Symbolicus, Augsburg (end of 17th century, engraved emblems); Angelo Vizani, Trattato dello Schermo, Bologna, 1688 (plates of sword exercise), Neufforge, Recueil élémentaire d'Architecture, 10 vols. folio, Paris, 1757–76; G. Virtue, Heads of the Kings of England, folio, London, 1736; Sir J. Ware, History of Ireland, 2 vols. folio. Dublin, 1764; G. Allegrini, Serie di Ritratti d' Uomini Illustre Toscani, 4 vols. folio, Florence, 1766–73; Portraits of Members of Grillions Club, 2 vols. folio, London, 1864; R. W. Eyton, Antiquities of Shropshire, 12 vols. London, 8vo., 1853–60, Sir William Dugdale's England and Wales, 4 vols. 8vo., London, 1854; Historic Society of Lancashire and Cheshire, 12 vols. 8vo., 1849–60; J. M. W. Turner, Views in Sussex, folio, 1819; F. C. Lewis, Liber Studiorum of Claude Lorraine, fol., London, 1840; C. Wild, Foreign Cathedrals (coloured) folio, London; Sir J. Soane, New Law Courts, folio, London, 1828; Colling's Gothic Architecture, 2 vols. 4to., London, 1852–56; Letarouilly and Simil, Le Vatican et la Basilique de Saint Pierre de Rome, folio, 1878; Baudry, Peintures Décoratives au grand Foyer de l' Opera, folio, Paris, 1876; P. de Madrazo, Quadros Antiquos del Museo de Madrid, folio, Madrid, 1878; Paul Mantz, "Hans Holbein," folio, Paris, 1879; also by the same author, "François Boucher," fol., Paris, 1879, R. Kekulé, Die Antiken Terracotten, Stuttgard, 1879 (as far as yet published); Georg Ebers, Ægypten, 2 vols. l. 4o., Stuttgard, 1879.

10. Among the books acquired as illustrations of early wood engraving and other book ornament may be mentioned; a volume of "Horæ" on vellum with full page illustrations and borders, printed by Theilman Kerver, Paris, 1503; "Ritterliche Reutter Kunst" printed by Feyrabend at Frankfort, 1584, with Jost Amman's fine woodcuts; J. Lichtenberger, Die Weissagunge, Wittemberg, 1527 (woodcuts and initial letters); Alciatus, emblems, Italian translation, printed at Lyons, 1551, (woodcut illustrations, elaborate borders &c); Seneca, small folio, printed at Venice, 1522 (fine woodcut title and curious illustrations), Adam Walasser "Kunst Wol zu Sterben," prînted by Sebaldus Mayer, at Dillingen in Swabia, 1560 (woodcuts), in the original stamped binding with brass clasps. A series of fine book-titles and a large number of

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

initial letters have been added to the collection; these are included among the prints. There may also be mentioned a large choral book on vellum of the end of the 16th century with illuminated initials and borders, in its original binding of stamped leather with brass studs and clasps.

Among the specimens of book-binding added to the collection is a good example of English binding in silk, embroidered with an admirable conventional design in colours and silver thread, the silver clasps having the head of Charles I, to the latter part of whose reign the work belongs; also a tortoiseshell binding of nearly the same date, English work, with silver pierced mounts and clasps; another fair specimen of English 17th century binding, is a 12mo., dark morocco, with an elaborate design of gilt tooling; three examples of 18th century English work in crimson morocco tooled; also an example of Scotch binding of the end of the last century, in red morocco richly gilt. Among foreign specimens may be noted a fine folio in red morocco, richly tooled, French of the beginning of the 18th century; an 8vo. in red morocco tooled with an elaborate design, French, Louis XV. period; a 4to. in red morocco from Modena, 1771, richly bordered and stamped with the ducal arms; a very curious Hungarian specimen from Tyrnau. of the end of the 17th century, (purchased in Paris); and a Northern Indian book-cover painted in rich colours and gilt.

11. It has been found necessary to devote as much money as could be spared to the purchase of duplicates of books greatly in demand either by readers in the central library or by provincial schools. Some of these, such as Nash's "Architecture of the Middle Ages" (coloured), and his "Mansions of England," are books no longer very common and now advancing in price. Lewis's Sketches of the Alhambra, a coloured copy, and Robert's Sketches in Spain have been acquired; also Turner's Harbours of England; Petit's Châteaux de la Valleé de la Loire; Viollet le Duc's Habitations Modernes, and various minor works.

12. Booksellers catalogues, British and foreign, advertisements, reviews, sale lists, &c. have been examined as heretofore, the books required for the Library noted and purchased as far as funds permitted. The usual tabular statement drawn up by Dr. Appell, assistant keeper, showing the number of English and foreign works on Art ascertained to have been published during the past year will be found at p. 574. The total number recorded is 896 of which 783 have been acquired.

13. The number of original drawings and designs added to the collection last year has been 1,425. Among these may be mentioned an interesting series of views of cities in Spain taken in the 16th century (1567–70) by Ant. Vanden Wyngaerde, a volume of whose drawings is also preserved in the Royal Library at Windsor; a volume containing a collection of original designs for theatrical scenery of the beginning of the 18th century by F. Juvarra; two volumes, atlas folio, containing 98 drawings, mostly coloured, of antique Roman and other ornament executed in Italy about 1775, by Vicenza Brenna. A collection of 49 sketches and designs chiefly of architecture and ornamental details of the 17th and 18th centuries; an original design by Raphael Mengs for painted ceiling in the Royal Palace, Madrid; a set of drawings, mostly full size, of details of the beautiful inlaid work of the Taj Mahal near Agra. A series of original designs for silversmiths' work, by E. Vittori and J. J. Boileau, (early part of the present century); a volume containing 29 drawings by the late Henry Shaw, F.S.A., including details from illuminated MSS., objects of early art, &c. many finished with admirable skill; a collection of sketches and designs by the late Alfred Stevens; two volumes of Japanese drawings, some of them of great excellence.

14. To the collection of engravings have been added 5,866, of these 17 were presented.

The most important among them are some fine and rare engravings of vases and other silversmiths' work by Paul Flindt; these were in the collection of K. E. Von Lippart, lately dispersed in Germany; a series of woodcuts of book-titles of the early part of the 16th century including some good specimens of Holbein's designs and other German masters; some early initial letters by M. Wohlgemuth; various pieces of goldsmiths' ornament of the 16th century; and some additions to the collection of the works of the "little masters" of the German school of engraving; five Japanese picture books, remarkable as examples of printing in colours, as well as for vigour of design; also a small collection of impressions of early niello plates.

To the class of etchings has been added a volume containing 87 plates of the works of C. W. E. Dietrich one of the most skilful artists of the German school in the earlier part of the last century; also a volume containing 78 plates by J. A. B. Nothnagel; a set of 17 etchings by Edwin Landseer, R.A.; 7 admirable specimens of representations of Art objects by J. Jacquemart, besides various other examples of the modern French school.

15. The number of photographs added to the collection has been 1,314. Among these may be mentioned a series of 151 autotypes of pictures in the Rijks Museum, Amsterdam, received under the system of exchange with foreign museums which has been in operation for some years. A collection of 469 photographs of Italian decoration, sculpture, antique statuary, &c.; 91 autotypes of pictures in the Lille Museum; 155 autotypes of original drawings by old masters; and a large number of photographs taken by the official photographer of objects lent to the Art Museum or belonging to the permanent collection.

16. 1,287 drawings, diagrams, and prints and photographs have been borrowed either by schools of art, or for use in the lecture theatre.

A large collection of drawings, prints, &c. continues in charge of the Art Museum, a portion of which is in use in the circulating series.

17. The cataloguing of books has been carried on, but owing to the illness of the assistant, who has hitherto done much of the work, has fallen temporarily into arrear.

"A list of books on lace and needlework contained in the National Art Library" has been issued; a list of works on Heraldry has also been compiled and has been for some time in the hands of the printers; others are in preparation.

18. The tables given at pages 566–74 furnish, 1st, a comparative statement of the statistics of the Library for 5 years past; 2nd, the return of the number of readers for the years 1878 and 1879, with the average daily attendance; 3rd, the return of the number of books, prints, diagrams, &c. lent to Schools of Art; 4th, the list of donations to the Library; 5th, the list of publications received from various foreign museums and other institutions, in exchange for the publications issued by this department; 6th, the return prepared by Dr. Appell, assistant keeper, of the number of art books and pamphlets published during the year 1879 classed according to the languages in which they are published.

EDUCATIONAL AND SCIENTIFIC COLLECTIONS.

MR. A. C. KING, the Keeper of the Educational Library and Collections, reports as follows:—

1. THE LIBRARY.—1,306 books have been added to the Library in 1879 by donation, loan for exhibition, and purchase.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Of the donations, 406 in number, none call for special notice. They are chiefly reports and other publications of various associations, English and foreign, sent in continuation of those enumerated on former occasions.

Twenty-two publishing firms have sent 355 volumes for exhibition and reference in the reading room.

Among the purchases may be noted a copy of Mulcaster's "Positions for the Training up of Children," issued in 1581, a rare work of great interest in connexion with the history of education in England. The continuations of serial works, educational and scientific journals, proceedings of scientific societies, &c., have been kept up, and form no inconsiderable portion of the addition under the head of purchases.

Return of readers.

The return of readers is as follows:—

Managers and teachers of elementary schools, including pupil-teachers	6,735
Students in Art and Science schools connected with the Department	9,468
Persons reading for examination, and miscellaneous visitors	8,530
	24,733

This shows a slight decrease, 58, as compared with the return for 1878. For the first time since the formation of the Library the numbers fail to show an advance on those of the previous year.

The average attendance is between 79 and 80 for each of the 311 days on which the reading room was open.

The following analysis of the contents of the Library is given in continuation of that which appeared in last year's report:—

Contents of library.

—	At end of 1878.	Added in 1879.	Total.
English language and literature, including grammars, reading lessons, poetry, juvenile books, &c.	5,744	183	5,927
Classical languages and literature	2,261	29	2,290
Modern languages and literature, including examples of school books used in various countries	5,668	26	5,694
Biography and history	2,328	55	2,383
Theology, Church history, &c.	964	16	980
Works on pedagogy, reports, examination papers, &c.	5,740	257	5,997
Political, domestic, and social economy	1,426	85	1,511
Drawing and writing	807	26	833
Music	1,328	15	1,343
Mathematics	1,531	52	1,583
Geography and astronomy	9	85	2,064
Geology and mineralogy	613	55	668
Botany and general natural history	1,908	125	2,033
Chemistry, general physics, and mechanics	2,221	297	2,518
	34,518	1,306	35,824
Special collections of books not separately classified	4,871	- -	4,871
Total	39,389	- -	40,695

2. THE COLLECTION OF EDUCATIONAL AND SCIENTIFIC APPARATUS. —Early in 1879, as anticipated in the last annual report, the Department was called on by the Board of Works to vacate a portion of the gallery to the south of the Horticultural Gardens in order that it might be added to the space assigned for the exhibition of the Collection of Paintings belonging to the National Portraits Commission. The numerous examples of school furniture and fittings, drawing models and appliances for elementary education thus displaced, and which had been removed from the Museum buildings to this gallery so lately as 1876, have now been deposited in the entrance corridor of the gallery, and in a temporary wooden building adjoining. These frequent changes in position are injurious to the efficiency of the educational collections, but notwithstanding the imperfect accommodation now provided for this section of the Museum, the manufacturers of school fittings, &c. are still desirous to contribute, and the offers of apparatus for exhibition are in excess of the space at our disposal.

No change has taken place in the arrangement of the collection of scientific apparatus exhibited in the western galleries since the last report. The classification is still that followed in the special loan collection of 1876. Loans of 192 objects have been received during the past year from 21 contributors. Besides these 2,198 objects have been added to the anthropological collection exhibited by General Lane Fox.

Mr. Decimus Burton, F.R.S., has presented a large and massive table constructed for mathematical work in connexion with Babbage's calculating machine. This finds a fitting place beside the various examples of the late Mr. Babbage's inventions already comprised in the collections.

Sir W. Thomson, F.R.S., has presented a compass and binnacle, with correctors and mirror azimuth instrument, to take the place of one lent by him in 1876, the removal of which had been much regretted by scientific visitors.

Mr. R. Bloxam lends a clock with gravity escapement, designed and made by the late Mr. J. M. Bloxam.

From the India Office have been received on loan several instruments for use in observations connected with solar physics, including an equatorial telescope, a chronograph, an astronomical clock, and three electric clocks.

Several collections of scientific apparatus for use in schools have been sent for exhibition by makers desirous of beingincluded in the lists of those from whom purchases may be made by schools receiving aid from the Department.

From a recently prepared return it appears that the collection of educational and scientific apparatus in the western galleries comprises 4,580 objects, the property of the Department, and 8,840 lent by 284 contributors, together occupying a space of 21,600 square feet. In addition to these are the collection of maps and views of Old London, lent by Mr. J. G. Crace, 3,085 in number, and the anthropological collection, containing 14,860 objects exhibited by General Lane Fox. These two collections occupy 14,400 square feet. The whole floor space thus occupied in the western galleries amounts together to36,000 square feet.

DYCE AND FORSTER READING ROOM.

MR. R. F. SKETCHLEY, Assistant Keeper in charge of the Dyce and Forster Collections, reports as follows :—

During the past year the number of visits paid to this room amounted to 2,545, and the issues of books to visitors to 4276.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

These numbers show a considerable increase over the last return, but as that return was only for the period extending from March 14 (when the Reading Room was first opened) to December 31, 1878, an exact comparison cannot be drawn. 261 drawings and 13 engravings were also issued from the Dyce Collection.

The Reading Room is now open until 6 o'clock during the summer months.

An illustrated Hand-book to the Dyce and Forster Collections is in the press and will shortly be published.

Mr. MATCHWICK, Division Keeper, reports on the Collections of FOOD, ANIMAL PRODUCTS, ECONOMIC ENTOMOLOGY, and WASTE PRODUCTS, all of which are exhibited at the BETHNAL GREEN BRANCH of the SOUTH KENSINGTON MUSEUM, as follows:—

FOOD COLLECTION.—PROFESSOR A. H. CHURCH has continued his services during the past year in respect of the scientific direction and superintendence of the Food Collection. Considerable additions have been acquired, and among them may be noted the following:—

Donations.—Samples of varieties of cultivated Rice, and of Peas, Spices, and manufactured Tobacco, were received from the Paris Universal Exhibition of 1878. Fine crystals of Milk (lactose), and samples of Beans and other vegetable food products from Italy, Roumania, Bosnia, and other countries were presented by Messrs. Cordua of Hamburgh.

Purchases.—Nothing was bought in the way of illustrating specimens; but many of the set up examples in one of the large glazed cases of British Birds used as food, and commonly sold in the London markets, having become partially destroyed by moth, others were procured in their stead and replaced in the case. Messrs. FORTNUM and MASON and a few other exhibitors of edible substances renew their spoiled samples when necessary and that has been done as usual.

An official application having previously been made, as complete a set as could be got together of the printed descriptive labels belonging to the Collection was presented to the proposed Technological and Industrial Museum in Sydney, New South Wales. Duplicate samples of selected Tea substitutes and Narcotics, together with some of the Japanese distilled spirit called "Saki," or "Soki," were transferred to the Museum of the Royal Gardens at Kew.

Circulation.—The set of glazed cases containing substances and preparations typically illustrative of the Food Collection and recently re-modelled and arranged by Professor CHURCH, was sent on loan to the Agricultural Exhibition at Kilburn in the month of June, and duly returned at its close. No other request was made to borrow the series beyond sending one of the cases to Derby.

Adulterants and Adulteration of Food.—No additions or alterations have been made to this series since the last report.

Museum of Economic Fish Culture.—On loan from FRANK BUCKLAND, Esq., H. M. Inspector of Salmon Fisheries, and exhibited since 1870 in the Western Arcade adjoining the Royal Horticultural Gardens at South Kensington. The rules of admission are the same as those of the South Kensington Museum, but it is not open in the evening. Mr. BUCKLAND has made some additions during the year, and the practical illustrations of artificially breeding fresh-water fish, of the *Salmonidæ* family chiefly, for the purpose of stocking rivers and other waters, and by such means increasing the supply as well as cheapening a most important article of diet, have been successfully carried out in the usual manner. Mr. BUCKLAND directs and superintends everything con-

nected with his Museum, which is specially attractive to the general public and of a very instructive nature.

Labels and Labelling.—The total number of labels for the year, without reckoning many printed ones specially done for Professor CHURCH, of which no record has been received, was 582; the greater part of which were printed, and the remainder done by hand. Nothing is exhibited in the Collection without a label of some sort."

ANIMAL PRODUCTS COLLECTION.—No material change has taken place in this Collection since the last annual report upon it. An alteration in the arrangement of some portion of it, however, is in progress, by which some additional space will be secured without detriment to the display of the illustrations. To a considerable extent the Collection is arranged in sloping glazed cases of a desk-like shape; by reversing these cases from a horizontal to a vertical position, and re-arranging their contents, some much wanted additional room is thereby acquired. The considerable and valuable examples of elephants tusks and of the horns of commerce have been entirely re-arranged and newly labelled, and means are being considered for improving the mode of exhibiting many objects in other sections of the Collection.

Additions.—These have been numerous and important, and among them may be mentioned the following:—

A collection of more than a hundred skins of birds from Malacca, remarkable for beauty of plumage, and typical of such as are imported from that country into Europe for ornamental purposes, was presented by J. B. ROLLAND, Esq., who had previously exhibited them at the Paris Exhibition of 1878. A pair of Argus Pheasants, (*Argus giganteus*) from Sumatra, stuffed and mounted in a glazed case. Presented by GEORGE M. E. SNOW, Esq.

Purchased.—A very fine tusk of the Narwhal (*Monodon monoceros*), 8 feet 3 inches in length. An instructive and novel series of recently manufactured articles from Shark and Ray skins, consisting of caskets, boxes, purses, paper-knives, lockets, bracelets, cigar cases, portrait frames, brooches, &c., with specimens of skin in the rough state. Manufactured by Messrs. GIRANDON and REAL, of Paris. A variety of useful articles and applications, most of them novelties, from Feathers and Quills, such as brushes, mats, imitation of fur for trimmings, powder from feathers for wall papers, trimmings for dresses of quill fibre, imitation hogs' bristles, &c. Manufactured by Messrs. BARDIN, Paris.

Labels and Labelling.—The total number of labels prepared for the Animal Products Collection during 1879 was 1,725, including the necessary duplicates for renewal, and of this number 1,033 were printed.

Penny Guide.—Owing to the many changes in the Animal Products Collection since it was first compiled (in 1872,) the Penny Guide has become somewhat obsolete. The illustrated Handbook applies to substances and products derived from the *Mammalia* only and not to the entire Animal Kingdom. To somewhat remedy this, MR. SIMMONDS has been requested to prepare another and much cheaper work, with illustrations, embodying the information contained in the framed descriptive labels exposed in the Collection, to include Birds, Fishes, Insects, and Reptiles, and which may be divisible into sections or parts to be sold separately at 1*d.* each. When this is brought out the present edition of the Penny Guide will probably not be required."*

* This has now been done, and the book is on sale at the catalogue stalls. It is entitled "The Commercial Products of the Animal Kingdom employed in the Arts and "Manufactures, shown in the Collection of the Bethnal Green Branch of the South "Kensington Museum." With 150 illustrations. By P. L. Simmonds, 1*s.*, and in 12 separate parts 1*d.* each.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

ECONOMIC ENTOMOLOGY.—Since the decease of Mr. ANDREW MURRAY in 1878, but little has been done in respect of the special work originated and to a considerable extent completed by him in illustration of Economic Entomology, but arrangements have been recently made for continuing it. The Collection is arranged in the south basement of the Museum and is generally in very good condition.

Additions.—But very few. Dr. M. C. COOKE presented a series of leaves of various trees affected by gall-mites; and Mr. T. EEDLE gave specimens of insects known to be destructive to Bees and Apiaries.

DOUBLEDAY COLLECTION OF BRITISH AND EUROPEAN LEPIDOPTERA.—The popularity of this collection, formed by the late HENRY DOUBLEDAY, of Epping, continues. It is on loan from the trustees, and is deposited for a period of five years from January 1876. Many persons consult the contents of the cabinets in the separate room set apart for the collection. In 1879 the number was 1,136, being on an average about 95 a month; the total number in the year previous was 1,327. These insects can be seen gratuitously every day in the week (except Wednesday), including the evenings of Monday, Tuesday, and Saturday till 10 p.m. The collection is in excellent condition."

WASTE PRODUCTS.—Attached to the Animal Products Collection, and arranged in the north basement of the building, is that illustrative of the utilization of Waste Products, divided into three sections:—1. Vegetable Waste; 2. Animal Waste and Refuse; 3. Sewage Utilization and Mineral Waste. The number of substances shown is very large, and each has an explanatory label. Mr. P. L. SIMMONDS, who formed the collection in 1874 and superintended the arrangement of it, occasionally adds fresh examples, 33 having been received during the past year."

COLLECTIONS IN THE EXHIBITION OF 1862 GALLERIES, EXHIBITION ROAD.

MR. H. SANDHAM, Assistant Keeper in charge of the five following collections of the Museum, reports as follows:—

Building materials. Models of construction.

1. MUSEUM OF BUILDING MATERIALS AND MODELS OF CONSTRUCTION.—This collection during the year 1879 has not made any material advance; the causes for it are those stated in my report for 1878.

The following list shows the nature of the few changes which have occurred during the past year:—

Presented.

Additions.

An old water cistern of lead. English make. 1732.
The Royal Agricultural Society.

Four cardboard models. St. Paul's Cathedral. St. Bartholomew's Hospital. Two pagodas.
Mr. Frederick Wilby.

Plaster model. Obelisk designed by donor, for memorial of the Great Exhibition of 1851.
Mr. John Bell.

Lent.

Stained glass window.
Messrs. Pitman & Co.

Stained glass window.
Messrs. J. Powell and Sons.

Sash window and fittings.
Mr. J. F. Meakin.
Stained glass window, in four frames.
Mr. Alderman Cotton.

Removals.

Seven models were withdrawn during the year. Withdrawals.
One hundred and eighty-six labels were written or printed and attached to the several objects concerned. Labelling.

2. COLLECTION OF SHIP MODELS AND MARINE ENGINEERING. —This collection continues to attract considerable attention and interest. It has received during 1879 some valuable and important additions. Ship Models and Marine Engineering.
The following list presents a summary :—

Presented.

Twelve photographs of high speed torpedo boats, constructed by donors. Addition.
Messrs. J. Thornycroft & Co.
Whole model. The "Cleopatra" ship. Used, 1877–8, for conveying the obelisk, Cleopatra's Needle, from Alexandria to London. Ship is broken up.
Mr. John Dixon, C.E.

Lent.

Forty-one oars. Ships' and other boat; racing and sculling boat oars; barge sweeps; belaying pins; handspikes, &c.
Messrs. Cunningham, Shaw, & Co.
Four sets in working order. Engine room and steering telegraphs, with single and repeating action.
Messrs. Chadburn and Son.
Whole model. A randan pleasure boat.
Mr. David Livie.
Whole model. The Inman Line screw steamship, "City of Berlin."
The Inman Steamship Co., Liverpool.
Nine models. Racing and pleasure boats.
Mr. W. H. Biffen.
Twenty-three drawings, framed. Racing and pleasure boats.
Messrs. Searle and Sons.
Life buoy. Exhibitor's invention.
Major H. B. Rodway.
Photograph. Dockyard at Point House, Glasgow.
Messrs. A. and J. Inglis.
Whole model. The White Star Line steamship "Britannic."
Oil painting, framed. The White Star Company's steamship "Britannic."
The White Star Steamship Co., Liverpool.
Two whole models. H.M.'s gunboat "Medina," 1876. An Atlantic screw steamship, 5,000 tons.
Palmer's Ship Building Co., Jarrow-on-Tyne.
Model, illustrating the application of J. J. Kunstädter's screw rudder for steamships.
Mr. J. J. Kunstädter.

Appendix D. — Report on South Kensington Museum.

Model of screw gunboats "Mexico" and "Democrata."
Working model. Proposed swing bridge over river Thames be- London Bridge.
Messrs. J. and G. Rennie.
Whole model. Steam screw ferry boat, for passenger and he- traffic.
Whole model. Steam screw, hopper dredging machine.
Messrs. W. Simons & Co.
Six whole models. Screw and paddle wheel steamships.
Model, fitted. Bevis' patent feathering from inboard screw prope-
Messrs. Laird Brothers.
Working model. Self-docking floating dock, sustaining a scr steamship model.
Messrs Clarke, Standfield. & Co.
Marine engine governor. Dunlop's patent.
Messrs Cunliffe and Dunlop.
Eleven half-block models. Ships of war and commerce. British an foreign.
Messrs. R. Napier and Sons.
Model. The Mallory screw propeller. Colonel Mallory, U.S.A.
Mr. P. F. Nursey.
Model. Floating swing bridge.
Mr. D. Cunningham.
Two ships' logs. Massey's patent.
Mr. E. Massey.
Model. Exhibitor's patent coupling for repair of broken screw propeller shafts.
Messrs. J. M. and T. D. M. King.
Model. Ship raising pontoon and floating dock.
Mr. D. Halpin.
Two models. Heathorn's muzzle pivoting naval guns and carriages.
Captain T. B. Heathorn.
Ship's chronometer. One day.
Mr. C. Frodsham.
Ship's scuttles. Set of six, full size.
Ship's improved pump. Full size.
Messrs. J. Stone & Co.
Three models. Sterns of ships, illustrating patent steering gear for double rudders.
Captain T. B. Heathorn.
Model. Ship fittings for live cattle transport.
Mr. H. Beavan.
Oil painting. Inman Line steamship "City of Richmond."
Mr. S. E. Slader.
Four models. Screw steam yacht. Paddle river steamer. Steam launch. Torpedo boat. A drawing; sail plan of a steam yacht.
Messrs. Edwards and Symes.

Removals.

Withdrawals. Twenty models, &c., were removed from the collection by their owners during the year.

Labelling. One hundred and thirty-three labels were printed or written in the course of last year for the collection, and displayed on the objects as required.

3. Collection of Models of Machinery.—This collection derived considerable augmentation during the year 1879, chiefly the result

of an evening conversazione held in the Museum in May last by the Institution of Civil Engineers, which collected together for the occasion a very valuable series of models, drawings, and machines. These objects were afterwards entrusted to the custody of the Department for exhibition to the general public.

The following statement shows a summary of the acquisitions :—

Presented.

Additions.

A set of hand tools used by curriers, tanners, and leather dressers. Forty-three in number.
Mr. J. Toleman.

Lent.

A set of improved furnace bars. Twenty-two in number.
Mr. E. Newbold.

Model. Exhibitor's patent Lancashire tubular steam boiler.
Messrs. W. and J. Galloway and Sons.

Model. Norton's patent tube wells. Two in number.
Messrs. Legrand and Sutcliffe.

Working model. Coleman's patent steam boiler.
Messrs. Coleman and Morton.

Water meter. Kennedy's patent. Two in number.
The Kennedy Patent Water Meter Co.

Model. Three-cylinder pumping engine.
Messrs. Chipperfield & Co.

Steam engine. Four horse-power horizontal engine.
Messrs. Robey & Co.

Water guage glasses for steam boilers. Seventeen in number.
Mr. J. Moncrieff.

Model. Set of centrifugal pumping engines erected by exhibitors.
Messrs. J. and H. Gwynne.

Model. Baker's patent blowing machine.
The Savile Street Foundry Co., Sheffield.

Model. Maudslay, Sons, and Field's screw engines for White Star screw steamship "Britannic."
The White Star Steamship Co., Liverpool.

Model. Mine headstock; showing King's patent hooks and grips for cages.
Mr. Stephen Humble, C.E.

Model. Simmon's rotary pump.
Messrs. Whitley Partners.

Steam engine. Forty indicated horse-power high-speed engine.
Mr. John Bourne.

Lifting jacks. Two. One 10-ton hydraulic, and one 10-ton screw traversing jack.
Messrs. Tangye Brothers & Co.

Iron pipes. Illustrating Prof. Barff's process for preventing rust.
Mr. John Spencer.

Model. Pair of Lancashire steam boilers showing exhibitor's fittings.

Drawings. Two colored drawings of detail of steam boiler fittings.
Messrs. J. Hopkinson & Co.

Sugar cane crushing mill. Roussellot's patent.

Model. Watson's patent hydraulic cotton press.
Messrs. Fawcett, Preston, & Co.

Gas engine. 3½ horse-power horizontal engine.
Messrs. Crossley Brothers.
India rubber packing, for steam joints; 10 pieces. Two tram-car springs.
Messrs. Davis and Henwood.
Drawing, coloured. New harbour works at Table Bay, Cape of Good Hope.
Drawing, coloured. Dock works at Melbourne.
Sir John Coode.
Steel rails, joints, and wedges. Eight pieces.
The Acaster Patent Rail Joint Co., Sheffield.
Spielman's patent tramway rail. Two models.
Mr. J. Spielman.
Models. Sleepers and rails for Indian railways. Three models. Denham's patent.
Messrs. Thompson and Browning.
Models and drawings. Livesey's patent tramway.
Mr. E. Livesey.
Specimen and drawing. Mackison's patent tramway.
Mr. W. Mackison.
Two models and drawing. Barker's patent tramway.
Mr. B. Barker.
Models. Wood's patent iron sleeper and clip chair for rails.
Mr. C. Wood.
Miner's lamp. Exhibitor's patent.
Mr. A. M. Steavenson.
Model and drawing. Jordan's patent hand power rock drill.
Messrs. Jordan, Sons, & Co.
Four specimens. Bessemer steel.
Sir Henry Bessemer
Water governor and drawing. Foulis' patent.
Messrs. Alley & Co.
Coloured drawing. Cast-iron blocks for arch groining.
Mr. Watson Buck.
Relievo map. The Suez Canal.
Colonel Sir John Stokes, R.E., K.C.B.
Five varieties of the Rapieff electric lamp.
The National Lighting Co.
Electro-magnetic machine. De Meriten's patent.
The Baron de Meritens, Paris.
Dynamo-electro magnetic machine.
Messrs. Tisley and Spiller.
Four photographs. Electric generators and lights.
Messrs. Sauttier, Lemonnier, & Co., Paris.
Specimen carbons for electric lights.
Mr. J. N. Shoolbred.
Model. Coal screening machine. Hair's patent.
Messrs. A. M. Potter & Co.
Model. Steam engine slide valve with expansion valve.
Mr. D. Halpin.
Model. Marine steam boiler, with Fox's patent corrugated flues and tubes.
Working model. Fox's patent rolling mill for corrugating steam boiler flues and tubes.
Mr. Samson Fox, Leeds Forge Co.
Steam quieting chamber. P. S. Justice's patent.
Mr. P. S. Justice.

Wooden model. Gimson's patent stone breaker.
Messrs. L. Swift & Co.

Model. Everitt's patent, cam motion feed, screwing stock.
Mr. R. Edwards.

Sample. Faull's patent metallic packing for engine rods.
Mr. E. M. B. Faull.

Water-closet valve.
Mr. G. Jennings, Lambeth.

Two electro-induction machines, and a standard light. Wilde's patents.
The Electric Lighting Co., Lothbury.

Models. A roof principal.—Fifty feet span. Two steam valves, gun metal. Relief frame (valve), Dawe's patent. Holt's patent engine reversing gear. Holt's patent starting gear for tram cars.
Mr. H. P. Holt.

Specimens of asbestos. Machine packing.
The Italo-English Asbestos Co., Queen Victoria Street, E.C.

Relievo map. Thirlmere lake, and eight coloured maps of route for water supply to Manchester.
Mr. J. F. Bateman, F.R.S..

Two models. Pumping engines. Davey's patent.
Messrs. Hathorn, Davey, & Co.

Model. Lord Rosse's telescope.
The Earl of Rosse.

Model. Radcliffe's patent electric fog alarm apparatus for railways.
Mr. J. Radcliffe.

Counter. Pocket machine revolution counter. Sainte's patent.
Mr. W. R. Applegarth.

Eight old ploughs. English and foreign ploughs. Eight old chilled cast-iron ploughshares. 1803.
Messrs. Ransomes, Sims, and Head.

Sectional model. Inverted diagonal screw engines. Micrometer measuring instrument. Exhibitor's designs.
Mr. T. F. Chappé.

Model. The wrought-iron tubular railway bridge over the river Conway, North Wales. 1846.
Mr. G. R. Stephenson.

Models. Five-bar parallel motion, in brass.
Mr. Harry Hart.

Photograph. Kirk's patent moist air ice-making machine.
Messrs. R. Napier & Sons.

The Peninsular and Oriental Steamship Co.

Removals.

Withdrawals.

Thirty-seven objects were withdrawn during the year by request of owners and exhibitors.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Catalogues.

The catalogue has been thoroughly revised and considerably enlarged. It was sent to press soon after Christmas.

Labelling.

This work during the year past was heavy. Two hundred and four labels were written for the objects exhibited; they were made as concisely descriptive as possible, and the whole collection has been thoroughly gone through and labelled.

Munitions of War.

4. COLLECTION OF MUNITIONS OF WAR.—During the year 1879 this collection has remained without notable change. For a short time Sir William Armstrong & Co., Elswick, lent for exhibition a complete service equipment for a mountain gun train, including all necessary stores and ammunition; this attracted considerable interest, and it is to be regretted that the exhibitors were compelled to remove it.

Additions.

The following is a statement of the objects relating to war material which were received during last year:—

Presented.

An old military flint-lock musket, cross belt, and bayonet. English. Time of George IV.
Mr. John Bell.

Lent.

9-pounder breech-loading Whitworth rifled, steel field gun:
Mounted on carriage with its necessary stores.
Limber for the 9-pounder field gun.
Glass case containing samples of Whitworth shot, shell, and service ammunition for the gun.
Messrs. Sir Joseph Whitworth Bart., & Co.

Withdrawals.

Nothing was removed by exhibitors during the year from the collection.

Labelling.

The labelling was duly attended to throughout the year for all such objects in the collection as required new or renewed descriptions.

Palestine Exploration Society.

5. COLLECTION OF ANCIENT OBJECTS LENT BY THE PALESTINE EXPLORATION FUND SOCIETY.—Nothing of any great importance was added to this collection during the year 1879.

The society contributed to it the following objects:—
A case of stuffed birds.
Model to scale. King Herod's Temple, Jerusalem.

The general custody and labelling of the collection was duly maintained.

MEMORANDUM on the Space occupied by Collections belonging to the South Kensington Museum, and now exhibited in the Galleries adjoining the Horticultural Gardens.

I. GALLERIES to the SOUTH of the HORTICULTURAL GARDENS originally forming part of the INTERNATIONAL EXHIBITION of 1862.

The two floors of the western wing of this range of galleries, and the ground floor of part of the centre are occupied by the Science and Art Department, and contain collections belonging to the South Kensington Museum, which together fill a run floor space of 534 yards, and cover a superficial area of 33,519 square feet, besides a utilised wall space of 11,925 square feet.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

REPORT of the DIRECTOR for ART as to his Charge of the BRITISH and FOREIGN PICTURES and DRAWINGS in the FINE ART COLLECTIONS at SOUTH KENSINGTON.

I HAVE to report that the paintings under my charge continue to be in a satisfactory condition, every care being taken to prevent any tendency to decay or accidental injury while open for study and inspection by the public.

The whole collection of water-colour paintings in the gallery has been gone through one by one, with a view to re-arrangement and re-framing in cases in which it is thought necessary. Some of these paintings will be removed for circulation to country schools for purposes of exhibition and study, Mr. William Smith's bequest enabling me to fill up these places by important works.

Additions have also been made by purchase to the collections in the gallery and in circulation. Among the water-colour paintings are a sketch in Italy by Turner, and a view of Abbeville by J. Skinner Prout; and among the oil paintings are a portrait of Queen Charlotte by Gainsborough, two landscapes by J. Crome, senr., two pictures by Morland, and a picture by J. W. Oakes, A.R.A., purchased from the Royal Academy Exhibition of this year.

The additions during the past year have been:—

Gift—			
Oil paintings	-	1	Miss Mary Farrier.
Purchases—			
Oil paintings	-	8	
Water-colours	-	19	
Total	-	27	

(Signed) EDWARD J. POYNTER,
Director for Art.

Appendix E.

Report by Prof. A. C. Ramsay.

APPENDIX E.

Report of the Director-General of (1.) the Geological Survey of the United Kingdom, (2.) the Museum of Practical Geology, and (3.) the Mining Record Office.

Museum of Practical Geology,
28, Jermyn Street, London, S.W.,
February 1880.

Sir,

I have the honour to lay before you, for the information of the Lords of the Committee of Council on Education, my Annual Report of the Geological Survey of the United Kingdom, the Museum of Practical Geology, and the Mining Record Office.

(1.) Geological Survey (England and Wales).

Area surveyed, 1,726 square miles, 3,326 miles of boundary lines.

Mr. Bristow, Senior Director, reports that in England and Wales the area surveyed during the year 1879 amounts to 1,726 square miles, and that the corresponding number of linear miles of boundary traced amounts to 3,326.

The area surveyed would undoubtedly have been larger but for the exceptionally bad state of the weather, the resignation of three of the surveyors, the long illness of Mr. De Rance from the effect of a railway accident whilst in discharge of his official duty, and also from the circumstance that Mr. Russell was almost entirely engaged on completing the dry-proofs of maps, coloured copies and sections, and in writing the memoir on the Whitehaven coalfield, and the explanations of maps relating to it.

North-western district, 249 square miles, 901 miles of boundary.

In the north-west of England and in North Wales, Mr. Aveline states that 249 square miles have been surveyed, and the linear miles of boundary traced amount to 901.

The whole is distributed as follows:—

	Square Miles.	Linear miles.
Denbighshire and Flintshire -	86	432½
Cumberland and Cheshire -	110	229
Northumberland - -	53	240

Large parts of this area consist of Carboniferous Rocks, and other formations bearing much on economic questions, both as regards coal-bearing strata and mineral lodes.

For details *see* Table 1.

North-eastern district, 702 square miles, 3,567 miles of boundary.

In Mr. Howell's district, in the north-eastern counties, including Northumberland and Yorkshire, 702 square miles have been surveyed, with 3,567 miles of boundary.

This includes a large area of Carboniferous strata, Porphyrites and other igneous rocks, Magnesian Limestone, New Red Sandstone, and numerous divisions of the Oolitic and Cretaceous formations.

For some months, in Mr. Howell's district, during the last summer and autumn, Messrs. Cortese and Anselma, Italian Government Engineers, received instruction in field geological surveying, at the request of the Italian Government conveyed through General Menabrea, Ambassador of the King of Italy.

South-eastern district, 337 square miles 844 miles, of boundary.

Under the general supervision of Mr. Whitaker, in the south-east of England 337 square miles have been surveyed with 844 miles of boundary lines.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

The formations mapped consist of Cretaceous, Tertiary, and various superficial strata.

Mr. Woodward, in Norfolk, with the assistance of Mr. Reid, has surveyed 119 square miles with 388 miles of boundary, consisting of Cretaceous, Tertiary, and various superficial formations.

Norfolk, 119 square miles, 388 miles of boundary.

In the counties of Lincoln, Leicester, and Nottingham, in charge of Mr. Penning, an area, 167 square miles, involving 395 miles of boundaries have been surveyed. The rocks mapped consist of Triassic, Oolitic, and Cretaceous formations, and recent overlying superficial deposits.

Lincoln, Leicester, and Nottingham, 167 square miles, 395 miles of boundary.

In parts of Devon and Somerset Mr. Ussher has surveyed 152 square miles of Triassic and the adjoining Devonian rocks. In connection with the work on which he was engaged Mr. Ussher was frequently obliged to examine parts of the country further west formed of the Devonian rocks, properly so called. In doing this he obtained much valuable information regarding the various sub-divisions of these strata which will ultimately be of much use.

Devon and Somerset, 152 square miles.

During the year a collection of rock specimens has been made from the southern and eastern side of the Lake district, for the collection in the Geological Museum. A great amount of labour has been devoted by Mr. Rutley, under Mr. Bristow's superintendence to the re-dressing, cleaning, and re-arrangement of the specimens of the collection of rocks, and the whole of the specimens from the Laurentian to the top of the Carboniferous series are now placed in the new cases. During the transfer several hundreds of additional specimens have been incorporated by Mr. Rutley, which involved much microscopic and mineralogical work before the rocks could be properly described. During the progress of this work additional notes have been written for use in a new edition of the Catalogue of Rock Specimens, which is in preparation as far as the present state of the cases will allow.

Mr. Rutley's mineralogical work.

Whilst this work was in progress 485 duplicates were catalogued, packed and forwarded to Professor Judd, in compliance with the orders of my Lords of the Committee of Council on Education, and others will be sent as opportunities offer.

Maps, 1-inch scale, published.

During the year one whole sheet, 47, of parts of Hertfordshire and Essex, and quarter-sheet, 97 S.E. part of Yorkshire have been published.

A revised edition of sheet 44 on a new electrotype plate has been issued. The Rhœtic (Pennarth) beds have been inserted and also the parts resurveyed in the north and north-west.

A revised edition of sheet 71 N.E. has been published.

One-inch maps in preparation.

Sheet 64. The *drift edition* of this sheet has been engraved and will shortly be issued.

Five quarter-sheets, 50 S.E., 66 S.E., 67 N., the adjoining part of 68 No. 2, and 68 S.E , have been finished.

Seven quarter-sheets, 67 N., 68 No. 2, 102 N.E., N.W., S.E., and 106 N.E., S.W. have been dry-proofed.

Three quarter-sheets, 50 S.W., 104 S.W., 107 S.E. have been sent to the engraver.

Total number being engraved.

The total number of one-inch maps now in the hands of the engraver amounts to 23 quarter-sheets.

Maps, 6-inch scale, published.

Thirty-eight maps on the scale of six inches to a mile, have been published during the year, viz. :—

Sheet 56. Cumberland.

Sheets 15, 16, 17, 22. Lancashire.

„ 45, 64, 82, 83, 91. Northumberland.

„ 2, 6, 12, 17, 18, 24, 25, 26, 31, 36. Westmoreland.

„ 5, 12, 20, 25, 32, 35, 39, 46, 47, 50, 53, 62, 66, 82, 84, 97, 99, 200. Yorkshire.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

Six-inch maps completed for reference.

Sixteen six-inch maps, not intended for publication, have been prepared and deposited in the office for reference, viz. :—

Sheets 18, 19, 23, 24. Northumberland.
„ 6, 15, 26, 27, 28, 31, 40, 42, 70, 75, 105, 121, 122. Yorkshire.

Maps, 6-inch scale, engraving.

Fourteen maps on the six-inch scale have been sent to the engravers. viz :—

Sheets 17, 18, 19, 25, 26, 32, 42, 52. Cumberland.
„ 14, 20. Lancashire.
„ 100, 106A. Northumberland.
„ 16, 96. Yorkshire.

Six-inch maps in preparation.

Nine maps on the six-inch scale have been prepared for engraving, viz. :—

Sheets 41, 51, 52. Cumberland.
„ 68, 69, 100. Northumberland.
„ 17, 18, 19. Yorkshire.

Horizontal sections published.

Two sheets of horizontal sections have been published during the year, viz. :—

Sheet 122, from Kimbolton to Melton Mowbray in Leicestershire.
„ 123, illustrating the Geology of part of the Lake district.

Horizontal section engraving.

„ 124 illustrating the geology of the country between Mount Sorel and Peterborough, has been drawn and placed in the hands of the engraver.

Vertical sections published.

One vertical section, sheet 67, illustrating the Oolites of the Yorkshire coast, by Mr. Strangways, has been published.

Explanations and memoirs published.

The following explanations and memoirs have been published during the year 1879, viz. :—

1. Explanation of quarter-sheet 92 S.E. "illustrating the Geology of the country between Bradford and Skipton," by Messrs. Dakyns, Fox-Strangways, Russell, and Dalton (pp. 20).
2. Explanation of quarter-sheet 82 S.E. "The Geology of Parts of Nottinghamshire and Derbyshire," by W. T. Aveline. (pp. 22). Second and revised edition.
3. Explanation of quarter-sheet 82 N.E. "illustrating the Geology of Parts of Nottinghamshire, Yorkshire and Derbyshire" (pp. 32). A second and revised edition has been prepared by W. T. Aveline.
4. Explanation of quarter-sheets 95 S.W., and 95 S.E., "illustrating the Geology of the Oolitic and Cretaceous Rocks south of Scarborough," by C. Fox-Strangways (pp. 44).
5. Explanation of 48 S.W., "illustrating the Geology of the neighbourhood of Colchester," by W. H. Dalton (pp. 26).

Memoir in the press.

The memoir on 51 S.W., and part of 51 N.W., illustrating the Geology of the neighbourhood of Cambridge, by Messrs. Penning and Jukes-Browne, is in the press.

Explanations and memoirs in preparation.

A second and revised edition of the explanation of quarter-sheet 71 N.E., "describing the Geology of the country around Nottingham," has been prepared by Mr. Aveline.

The explanation of quarter-sheets 68 N.E., and 68 S.E., is in active preparation by Mr. Reid; and Mr. Woodward has in hand the explanation of quarter-sheets 66 N.E. and 66 S.E, describing the Geology of the country around Norwich.

Mr. E. T. Newton has been engaged in a critical examination of the vertebrata from the so-called "Pre-glacial Forest Bed Series," of Norfolk and Suffolk, and the result of this work will necessitate the publication of a special memoir, the MS. of which is far advanced.

Appendix E.

Geological Survey (Scotland).

Report by Prof. A. C. Ramsay.

Professor Geikie, Director for Scotland, reports that during the year 604¾ square miles have been surveyed, and the number of miles of boundary traced is 2,124¾. For details of area *see* Table II.

Total area surveyed, 604 square miles, 2,124¾ miles of boundary.

Professor Geikie remarks that, in spite of the long continued wet weather of the summer months, the general amount of field work is larger than it has been during any one of the last five years.

District surveyed.

In pursuance of the system explained in former Annual Reports the whole of the remaining ground in the south of Scotland has been cleared off.

The southern half of the kingdom from the English border northwards to a wavy line drawn from the mouth of the Clyde to Aberdeen has now been surveyed and in great part published. The whole force of the survey has consequently been placed on the northern or Highland portion of the country. It is therefore proposed to distribute the future work partly on the south side and partly on the north side of the mountains, instead of concentrating all the field officers on the southern flanks of the Highlands, and working steadily northwards. By this arrangement the field-work will be carried on on both sides of the mountains in such a manner that the high grounds can be examined, in the earlier half of the year before the shooting begins, while the lower tracts are reserved for the later months, when the weather also is less favourable for mountain work.

On the south side of the Highlands the work has been continued along the lines referred to in the last report. The whole of the Old Red Sandstone region of Kincardine, Forfar, and Perthshire has now been completed, and some progress has been made among the older crystalline rocks of the Grampian mountains.

It has been necessary to transfer two of the surveyors to the valley of the Dee. One of them will work southward and northward from Banchory, the other will work northward from Aberdeen, so that before the end of the year a connexion will have been made between the surveyed ground on the north and south side of the Highlands.

The northern division of the staff has now all but completed the survey of the whole of the Old Red Sandstone tracts bordering the southern shores of the Moray Firth. The examination of the Crystalline Rocks has now been begun, and as good coast sections are available, it is anticipated that considerable progress will be made in tracing the boundary lines southwards into the hill country.

Fossils collected.

During the year 2,409 Fossils have been collected from Silurian, Old Red Sandstone, Carboniferous, and Alluvial formations.

Mineralogical work.

Professor Geikie has continued the microscopic examination of rock specimens collected in the field. 469 slices have been prepared in the office, and in addition he has had a large series of slices prepared from various slags for the purpose of comparison.

Six-inch maps published.

The six-inch maps of the Coalfields have been completed and published, with the exception of two small sheets delayed for further examination. It may, however, be desirable to publish the six-inch maps of those mineral districts in which mining has been carried on extensively among the oil shales of the basin of the Firth of Forth.

One-inch maps.

Three sheets of the one-inch maps are now ready for issue, containing portions of the counties of Edinburgh, Berwick, Selkirk, Roxburgh, Dumfries, and Kirkcudbright. Nine sheets of the one-inch maps are engraving. Their completion has been delayed until the work of the two sides of the border has been satisfactorily joined up.

Vertical sections published.

Two sheets of vertical sections have been published, illustrating the Coalfields of Lanarkshire and Ayrshire.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

Horizontal sections. Explanations.

Several sheets of horizontal sections are in preparation, and have been drawn for the engraver, representing 8,702 linear miles.

Explanations to accompany the three one-inch maps are in progress and will shortly be published.

GEOLOGICAL SURVEY (IRELAND).

Total area surveyed, and parts revised 1,954 square miles, 2,304 miles of boundary.

Professor Hull, the Director for Ireland, reports that during the year 560 square miles have been surveyed, including 1,038 linear miles of boundary and coast. In addition to this 1,394 square miles have been revised, including 1,266 miles of boundary and coast; making in all 1,954 square miles, with 2,304 miles of boundary and coast.

District surveyed.

The area surveyed includes a tract of country extending from Sligo Bay to the coast of Antrim, and also over extensive tracts of the southern and western counties.

One-inch maps published.

During the year three new sheets on the one-inch scale have been published, viz. :—Sheets 52, 63 and 73.

One-inch maps in preparation

Five sheets are in various stages of preparation, viz. :—Sheets 27, 45, 46, 57, 58.

One-inch maps revised.

Revised editions of the following sheets have been issued, viz. :—Sheets 159, 180, 181, 128, 137, 146, 147.

Memoirs completed and in progress.

Four new memoirs have been completed, viz :—illustrating sheets 34, 41, 53, 64, 62, and part of 73, 169, 170, 180, 181. Other memoirs are in various states of progress.

Horizontal sections published.

Two sheets of horizontal sections have been published, illustrating parts of Connemara and West Mayo.

Palæontological department.

Mr. Baily, the Acting Palæontologist, states that about 1,200 Fossils were collected during the year. 2,500 were examined and named.

Palæontological remarks, and lists of species for "Explanations" to sheets 41, 53, 64, and also to sheets 169, 170, 180, 181 were written and compiled.

GEOLOGICAL SURVEY AND MUSEUM OF PRACTICAL GEOLOGY.

PALÆONTOLOGICAL DEPARTMENT.

Palæontological department.

Mr. Etheridge, the Palæontologist, reports that during the year 1,213 specimens of fossils have been received in his Department, from the Officers of the Survey.

The formations from which the Fossils were collected, are as follows :—

Carboniferous - - - -	606
Liassic - - - -	250
Cretaceous - - - -	357
	1,213

1,274 specimens have also passed through Mr. Etheridge's hands for revision and naming, viz. :—

Silurian - - - - -	124
Devonian - - - - -	180
Jurassic - - - -	350
Cretaceous - - - -	250
Forest beds - - - -	170
From various sources - - -	200
	1,274

together making a total of 2,487 named and catalogued.

Appendix E.

Report by Prof. A. C. Ramsay.

9,861 specimens have been transferred from the Palæontological Department to the Museum, from which 5,045 specimens have been selected and placed in the cases for exhibition.

The collection of Trigoniæ purchased from Dr. Lycett, of Scarborough, has been marked and transferred to the Museum, in which it is hoped the specimens will soon be exhibited.

The total number of Fossils thus critically examined during the past year amounts to 7,862 specimens.

5,107 specimens of Fossils were selected from the stores of the Museum and transmitted to Professor Judd for educational purposes in the School at South Kensington.

In addition to the above much time has been given by Mr. Etheridge and Mr. Sharman to the preparation of lists of Fossils for use of memoirs now in course of publication.

Naturalist's Department.

Naturalist's department.

Professor Huxley reports that 9,861 specimens have been received from the palæontologist, and 5,045 of these have been selected for the Museum by his assistants under Mr. Etheridge's supervision. These new specimens have been incorporated with the fossils from the Great Oolite, Stonefield Slate, Fullers Earth, Inferior Oolite, Liassic, and Rhœtic formations already in the Museum.

All the collections purchased or presented to the Museum up to the present date have now been examined, and the specimens needed for the Museum selected from them.

A list of donations of Fossils to the Museum is subjoined. Table 5.

(2). Museum of Practical Geology and Library.

Museum of Practical Geology and Library.

Since the annual report of 1879, we have to lament the death of the late Curator and Librarian, Mr. Trenham Reeks, who for many years so ably performed all the duties connected with his office. His successor, Mr. Rudler, who for many years served under Mr. Reeks, reports that during the year 1879 the Museum of Practical Geology was visited by 24,023 persons in the mornings, and by 14,270 on Monday and Saturday evenings, making a total of 38,293 visitors.

Lists of donations to the Museum and Library during the year are appended. Tables 6 and 7.

(3.) Mining Record Office.

Mining Record Office.

Mr. Robert Hunt, the Keeper of the Mining Records, reports, that early in March he went to Birmingham, and devoted his attention to the South Staffordshire coalfield nearly to the end of the month. He then proceeded to the West Riding of Yorkshire, and was engaged in that district and in South Yorkshire until the last week in April. He then visited the coal districts of Manchester, Wigan, and St. Helen's and after that proceeded to Liverpool to examine into the state of the metal trades, &c.

While in Yorkshire he visited the lead mining districts of Swaledale and Wensleydale, and also the iron mines in the neighbourhood of Whitby. The extreme depression in the tin and copper trades, having interfered with the returns usually supplied to him with readiness, Mr. Hunt devoted his attention, first to the mines immediately west of Exeter, and afterwards extended his inquiries to those around Tavistock, Callington, and Liskeard. Whilst engaged on these duties Mr. Hunt passed through the press the "Mineral Statistics for 1878" nearly two months earlier than usual.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

Mr. Hunt began a series of investigations of all the mining districts of Western England to note those which are at work, to secure the plans of such as have been abandoned, and to have the plans and sections of active mines brought up to the latest date.

The following tabular statements and lists which have been referred to in this report are annexed, viz. :—

(I.) Table showing distribution of field-work in England and Wales.
(II.) Do. Do. in Scotland.
(III.) Do. Do. in Ireland.
(IV.) Do. Do. (re-survey) in Ireland.
(5.) List of donations of Fossils.
(6.) Do. to the Museum.
(7.) Do. to the Library.
(8.) List of plans, &c. deposited in the Mining Record Office.
(9.) A return of maps and other survey publications issued to the Government agents for sale.

The accompanying index maps A., B., C., D., show the state of the surveys in England, Scotland, and Ireland, respectively, on the 31st of December last.

I have the honour to be,
Sir,
Your obedient servant,
ANDREW C. RAMSAY,
Director-General.

The Secretary,
Science and Art Department,
South Kensington, S.W.

5. DONATIONS of FOSSILS, 1879.

CHAMPERNOWNE, A., Esq., M.A.—Two specimens of Caunopora, from the Middle Devonian of Totnes.

COE, Ernest O., Esq.—A mass of Teredo ante-nautæ from the London Clay, obtained in excavating for the Grand Junction Waterworks, between Dunbury and Hampton.

COLMAN, J. J., Esq., M.P.—Two photographs of the teeth of Elephas antiquus from the Forest Bed at Corton, near Lowestoft.

COOPER, Dr. R. S.—A specimen of Ophiocoma, and some plant remains from the Calcareous Grit near Sandsfoot Castle, Weymouth.

DEVAS, Mrs. Ann.—A specimen of Pygocephalus Cooperi from the Coal Shale, at the open working, Tipton, Dudley; contained in a nodule.

EVANS, Dr. John.—One specimen of Pleurotomaria from the Chalk-rock in King's Sutton Village, Herts.

LEE, J. E., Esq.—Seven specimens of Cardium palmatum, one specimen of Turbo, 10 specimens of Clymenia, and eight specimens of Orthoceras; all from the Upper Devonian of Saltern, South Devon.

LUCY, —, Esq.—A specimen from the Upper Lias of Dumbleton containing Euomphalus minutus.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

NEWTON, R. B. Esq.—Four specimens of Coscinopora globularis and C. urceolata from the Upper Chalk of Margate.

PERCEVAL, S. G., Esq.—A specimen of Modiola elegans from the Lon Clay, near Ealing.

PLEYDELL, J. C. Mansel, Esq.—The type specimen of Trigonia cymba the Kimmeridge Clay of Kimmeridge Bay; one specimen of Trig muricata from the Portland Sands of Gad Cliff; and a specimen Exogyra virgula from the Kimmeridge Clay of Kimmeridge.

SANDFORD, W. G., Esq.—Two molar teeth of Ursus spelæus from the F Bed of Overstrand, near Cromer.

SAMPSON, Mrs. A. L.—Portions of three Ammonites found in making Great Western Railway at Christian Malford.

SMITH, W. J. Bernhard, Esq.—A Nautilus from the Calcareous Gri Oxfordshire.

SMYTH, Prof. W. W., M. A.—Five specimens of Anthracosia ovalis the Coal-measures, near Tenby.

THOMPSON, John Esq.—A large cast of a Pterygotus from the quarries Carmyllie, near Arbroath, Forfarshire.

WALKER, J. F., Esq., M. A.—A specimen of Terebratula Oxoniensis the Oxford Clay of St. Ives, and eight specimens of Rhynchonella varia var. spathica, from the same locality.

WARD, Rowland, Esq.—A photograph of a series of Mammalian remains the Gravel Beds at Charing Cross, London.

WHITAKER, W., Esq., B.A.—One Terebratula grandis from the Cora Crag of Sudbourne, and an ear bone from the Red Crag of Woodbridg

WILMER, Capt. L. W.—A series of specimens illustrating the Bracklesha Beds of Alver Cliff, near Gosport.

WOOD, Alfred, Esq.—Twelve specimens from the Coal-measures of Bridgewater Colliery.

ANDREW C. RAMSAY,
Director-General.

---

6. DONATIONS TO THE MUSEUM OF PRACTICAL GEOLOGY, during the year 1879.

BAUERMAN, H., Esq., F.G.S.—Two samples of Ferro-manganese, one containing 75 per cent. of manganese, and the other from the Atlas Works, Sheffield, containing 20·84 per cent.

BLANDFORD, Dr. G. Fielding.—A specimen of the variety of Marcasite locally called "Cupid's Wings," from the Lias of Lyme Regis.

CAMPBELL, A. J., Esq.—Native Silver from Herrerias, Sierra Almagrera, Spain.

CRANHALL, T. Emerson, Esq.—An old Worcester vase with blue chequer mark, incompletely decorated, having been cracked in the firing.

DOCWRA & SONS, Messrs. T.—Four solid cylindrical cores of Fossiliferous Gault, and two of Upper Devonian, 15 to 20 in. in diameter, brought up by the donors with diamond boring machinery, from depths ranging from 908 to 990 feet, in sinking for water for the New River Company at Turnford, near Cheshunt.

FOSTER, Dr. C. Le Neve., B.A., F.G.S.—A sample of striped Lithomarge from Cook's Kitchen Mine, near Redruth, Cornwall.

HANCOCK & SON, Messrs, J.—A porcelain slab, with illustrations of over-glaze colours, prepared by the donors.

KITTO, Capt. W.—A spherical mass of Zinc Blende, and a specimen of finely crystallized Galena from Townshend Mine, Foxdale, Isle of Man.

LOEWE & Co., Messrs.—A specimen of "Black Amber" from South America, cut and polished as a mouth-piece.

LOUIS, H., Esq.—Specimens of Aragonite, Sideroplesite, Ankerite, fibrous and pseudomorphous Brown Iron Ore, Manganite and Wad from Londonderry, Nova Scotia; also rhombohedral Calcite, with drusy faces, from the Mumbles, Swansea.

LYDEKKER, G. W., Esq., MA.—A polished specimen of Hertfordshire Conglomerate from Harpenden.

MARKWALD, S., Esq.—Several amber trinkets of ancient pattern obtained by divers in the Baltic Sea.

MATHESON, R., Esq.—Agglomerated pebbles illustrating the agglutinating effects of ferrichydrate.

MONCKTON, E. P., Esq.—About 50 specimens of minerals, chiefly from Vesuvius.

MORGANS, A. E., Esq.—A sample of Resinous Blende from Santander, Spain.

ORMEROD, G. W., Esq., M.A., F.G.S.—Specimens of Silica from burnt stacks of Esparto grass, wheat, and barley.

PEGLER, O., Esq.—Samples of Auriferous Quartz from the Wynaad district, India.

PHILLIPS, J. A., Esq., F.G.S., F.C.S.—A free doubly-terminated crystal of Quartz found with many others embedded in China Clay, near St. Austell, Cornwall.

POND, J. H., Esq.—Two specimens of rich Sulphur Ore from Whale Island, Auckland, New Zealand.

RAMSAY, Prof. A. C., LL.D., F.R.S.—A specimen of Jasper from Porth Ddiullaen, Carnarvonshire.

ROBERTS, W. C., Esq., F.R.S.—A specimen of Manganese Alum.

ROBINSON, J., Esq.—A number of old stove tiles of Dutch and English manufacture, removed in pulling down Rickards's Distillery in Piccadilly in 1879.

RUTLEY, F., Esq., F.G.S.—An old flint-lock pistol, and a pistol-flint coloured by the action of the melted brass fittings, from the Old Houses of Parliament after the great fire in 1834.

SAWKINS, Mrs.—Several samples of Phosphate of Lime from the Island of Alta Vela in the West Indies.

SILICATE PAINT CO., The.—A specimen of Griffith's Patent White, composed chiefly of Sulphide of Zinc.

SMYTH, W. W., Esq., M.A., F.R.S.—A specimen of nodular crystallized Calcite from the Permian Limestone, near Souter Point, Durham; and of Copper Pyrites associated with Garnet from Belstone Consols, Okehampton, Devon.

TAYLOR, E., Hussey, Esq.—An old eardrop in thin Venetian glass, variously coloured, backed by wax.

TENNANT, Prof. F.G.S.—A sample of Asbestos in unusually long fibres.

THOMAS, J., Esq,—Two specimens of rich Tinstone from Dolcoath Mine, Camborne, Cornwall.

TIARK, C., Esq.—Two specimens of Sandstone used in building from Doulting Quarry, Shepton Mallet, Somerset.

WARNE, Mrs. E.—Fine Stalactites of Carbonate of Lime from O'Brien's Bridge over the Shannon, Castleconnel, Ireland.

WARREN, W., Esq.—A roundel of ancient Venetian glass, believed to be an example of the glass first used for windows, from the Baptistery of St. Mark's, Venice.

WILKINSON, A., Esq.—Romano-British Vase found in Lime Street, London.

WILLETT, H., Esq., F.G.S.—Seven old stove tiles, printed by Sadler and Green of Liverpool.

ANDREW C. RAMSAY,
Director-General.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

8. LIST of DOCUMENTS added to the MINING RECORD OFFICE during the Year ending 31st December 1879, or to which additions were made.

1. West Godolphin Mine, plan ofworkings.
2. Do. longitudinal section.
3. Do. section on Wilson's lode.
4. Polrose Mine, plan of workings.
5. Do. longitudinal section.
6. Trumpet Consols, plan of Bodarvennack part of mine.
7. Do. section of Wheal Whidden lode.
8. Do. scction of Wheal Goblet lode.
9. Do. section of Wheal Union lode.
10. Do. section of Wheal Trumpet lode.
11. Do. section of Wheal Ann lode.
12. Do. section of Wheal Noon lode.
13. Do. section of Wheal Valves lode.
14. Cobre Mines Consolidated, Cuba, longitudinal section of South lode.
15. Do. Do. transverse section through the lode.
16. Devon Great Consols, section of Wheal Fanny.
17. Do. section of New South lode.
18. Do. section of South lode.
19. Do. plan of underground workings.
20. Wheal Basset, plan of workings.
21. Do. longitudinal section.

Appendix E. — Report by Prof. A. C. Ramsay.

22. Hingston Downs, plan of workings.
23. Do. section of Main lode.
24. Do. section of South lode.
25. Carn Brea Mine, plan of South lode.
26. Do. plan of Druid's lode.
27. Do. plan of new dialling.
28. West Godolphin, section of Hope lode.
29. South Wheal Frances, working plan.
30. Do. longitudinal section.
31. Wheal Basset, section of William's South lode.
32. Do. section of Teague's lode.
33. Do. section of William's lode.
34. Do. section of South lode.
35. Do. section of Great lode.
36. Do. transverse section.
37. Do. section of Giesler's lode.
38. Do. working plan.
39. Wheal Peever, longitudinal section.
40. Do. transverse section.
41. Do. working plan.
42. North Tincroft and South Crofty, plan.
43. Wheal Jane, plan of workings.
44. Do. longitudinal section.
45. East Trefusis, plan of surface and workings.
46. Wheal Trefusis, plan of surface and workings.
47. Do. section on North lode.
48. North Buller Mine, plan of surface and workings.
49. Frank Mills Mine, plan of workings.
50. Do. section on East lode.
51. Do. section on West lode.
52. Teign Valley Mine, plan of Adit level.
53. Alston Moor, map of the mining district.
54. Do. series of sections of district.
55. Do. "MS." sketch of geology of the western part of country.
56. Middlehope Mine, plan and section.
57. West Basset, plan of workings.
58. Do. longitudinal section, North lode.
59. Do. longitudinal section, Flat lode.
60. Do. transverse section, Flat lode.
61. Wheal Grenville, plan of workings.
62. Do. longitudinal section, Tin lode.
63. Do. longitudinal section of Main lode.
64. Do. transverse section.
65. Tincroft, plan of surface and workings.
66. Do. plan of part of.
67. Do. plan and transverse section.
68. Do. longitudinal section on Donkin's &c. lodes.
69. Do. longitudinal section on Highburrow lode.
70. Do. longitudinal section on Chapples lode.
71. Wheal Agar, plan of workings.
72. Do. longitudinal section, North lode.
73. Do. longitudinal section, East Pool lode.
74. South Crofty, plan of surface and workings.
75. Do. plan of Dudnance, &c.
76. Do. plan of East part of mine.
77. Do. plan of, and Tincroft.
78. Do. longitudinal section, Penhellick lode.
79. Do. transverse section, South lode.
80. Tolgus Wheal, plan of workings.
81. Do. longitudinal section.
82. Herodsfoot Mine, plan of workings.

83. Herodsfoot Mine, longitudinal section.
84. Drake Walls, plan of workings.
85. Do. section in two parts.
86. Okel Tor, plan and section.
87. Phœnix Mine, plan and section.
88. West Phœnix, plan and section.
89. South Phœnix, plan of workings.
90. Caradon and Phœnix United, plan.
91. Calstock Consols, plan of workings.
92. South Caradon, plan of workings.
93. East Caradon, plan of workings.
94. Crebor Wheal, plan and section.
95. Old Treburgett, plan and section.
96. Brookwood, plan of workings.
97. Brookwood and Wheal Emma section.
98. Crowndale Mine, longitudinal section.
99. South Crowndale, plan of workings.
100. Russell Wheal, plan of workings.
101. East Pool, plan of surface and workings.
102. Do. plan of 48 fathom level.
103. Do. longitudinal section, Main lode.
104. Do. longitudinal section, Engine lode.
105. North Pool, plan of workings.
106. Do. longitudinal section, Danbuz lode.
107. Do. transverse section.
108. Blue Hills, plan of workings.
109. Do. transverse section.
110. Kitty Wheal, Saint Agnes, plan of workings.
111. Do. longitudinal section.
112. Do. longitudinal section, Pryors lode.
113. Do. transverse section.
114. Penhalls Mine, plan of workings.
115. South Molton, plan of workings.
116. Penstruthal, plan of workings.
117. Do. longitudinal section.
118. Roskear West, plan of workings.
119. Do. longitudinal section.
120. Condurrow South, plan of workings.
121. Do. section of Middle lode.
122. Do. section of Basset lode.
123. Jane Wheal, plan of workings.
124. Do. longitudinal section.
125. East Chiverton, plan of workings.
126. Do. section of working.
127. West Great Chiverton, plan of workings.
128. Do. longitudinal section.
129. Owles Wheal, Saint Just, plan of workings.
130. Do. longitudinal section, Edward lode.
131. Do. longitudinal section, Wheal Drea.
132. Do. longitudinal section, Grouses lode.
133. Do. longitudinal section, Grouses Callen lode.
134. Do. longitudinal section, Buzza lode.
135. Do. longitudinal section, Wheal Boys Guide lode.
136. Do. longitudinal section, Wheal Boys Callen lode.
137. Do. longitudinal section, Parkenoweth lode.
138. Do. longitudinal section, Cargotha lode.
139. Stray Park, plan of surface and workings.
140. Do. longitudinal section, South lode.
141. Do. longitudinal section, shallow levels.
142. Do. plan of lower levels.
143. Franco and Massa, plan of workings.
144. Do. longitudinal section.

Appendix E. — Report by Prof. A. C. Ramsay.

145. North Tamy, plan of workings.
146. Do. longitudinal section.
147. North Levant Mine, plan of workings.
148. Do. longitudinal section, Elvan's lode.
149. Do. longitudinal section, Slemmick lode.
150. Do. longitudinal section, South Slemmick lode.
151. Do. longitudinal section, East Levant lode.
152. Levant Mine, plan of workings.
153. Do. longitudinal section.
154. West Basset Mine, plan of workings.
155. Do. longitudinal and transverse sections.
156. Do. sections of Wheal Brothers.
157. Botallack Consols, plan and section.
158. South Basset, plan of workings.
159. Do. longitudinal section.
160. Bowden Hill Mine, plan of workings.
161. Do. longitudinal section.
162. Levant Mine, St. Just, longitudinal section, North lode,
163. North Levant Mine, section, Pig lode.
164. Do. section, Bunny lode.
165. Do. section of Cammer-lode.
166. East Pool Mine, longitudinal section, North lode.
167. Virtuous Lady and Wheal Bedford, section.
168. South Condurrow, plan of West part of sett.
169. West Maria and Fortescue, plan of sett.
170. Do. section of Wheal Maria lode.
171. Do. section of Capel-tor lode.
172. Owles Wheal, St. Just, section of Wheal Edward Cliff.
173. Mary Ann Wheal, plan of workings.

ANDREW C. RAMSAY.
Director General.

APPENDIX F.

Appendix F.

REPORT BY MR. F. W. RUDLER.

ROYAL SCHOOL of MINES.

Jermyn Street, S.W.,
29th January 1880.

SIR,

IN accordance with your request, I have the honour to transmit herewith the annual report of the Royal School of Mines for the session 1878–9. As this is the first report which has appeared since the death of the late registrar, and as the session to which it relates was nearly completed before I entered upon my official duties, I have considered it desirable to adhere as closely as possible to the form which had been adopted for many years by my predecessor. The report is, therefore, confined to a comparative statement showing, in tabular form, the number of students entered, and the amount of fees received during the sessions 1877–8 and 1878–9.

I am, Sir,
Your obedient servant,
F. W. RUDLER.

To the Secretary of the
Science and Art Department,
South Kensington.

THE following tabular statement, prepared from the books of the late Registrar, shows the number of students entered, and the amount of fees received, during the sessions 1877–8 and 1878–9.

Description of Students.	1877–8.				1878–9.			
	Nos.	Amount.			Nos.	Amount.		
		£	s.	d.		£	s.	d.
Students entering for 1, 2, or 3 years, with a view to become Associates.	30	824	0	0	15	340	0	0
Royal and Local Exhibitioners and Gold Medallists.	6	—			8	—		
	36				23			
Students entering for special courses, viz.:—								
Chemistry - -	59	226	0	0	70	270	0	0
Biology - - -	21	47	0	0	27	70	0	0
Physics - - -	24	58	0	0	20	44	0	0
Geology - - -	24	59	0	0	16	32	13	4
Mining - - -	9	31	0	0	5	21	0	0
Mineralogy - -	8	27	0	0	1	1	0	0
Metallurgy - -	14	53	0	0	6	30	0	0
Applied Mechanics -	20	26	0	0	14	22	0	0
Mechanical Drawing -	10	14	0	0	9	11	0	0

	2,285	1,422	2	6	574	856	0	4

Appendix F.

REPORT BY MR. F. W. RUDLER.

With reference to the lectures to working men, it should be observed that when the accounts for the session 1877–8 were made up, the fourth course of lectures had not been delivered, and consequently no record of this course appeared in last year's report.

(Signed) F. W. RUDLER,
Registrar.

METALLURGICAL LABORATORY.

The following return shows the number of students who received instruction in this laboratory during the sessions 1878 and 1879:—

CHEMICAL DEPARTMENT.—SCIENCE SCHOOLS.

REPORT BY DR. FRANKLAND.

SIR, South Kensington, April 15, 1880.

I HAVE the honour to transmit to you, for the information of the Lords of the Committee of Council on Education, my annual report on the laboratories under my direction in this department of the Science Schools.

These laboratories were open daily, except in the short vacations at Easter and Christmas, nine months of the year from 10 a.m. until 5 p.m., except on Saturdays, when they were closed at 2 p. m.

The numbers and classes of students engaged in practical work in the laboratories are specified in the following tabular statement:—

Term.	Students of the Royal School of Mines.	Special Students.	Science Teachers, Royal and Local Exhibitioners.	Total.
Spring - -	16	63	22	101
Summer - -	14	59	21	94
Winter - -	15	54	21	90
	45	176	64	285

The following table compares these numbers with the corresponding statistics of the six preceding years.

——	1873.	1874.	1875.	1876.	1877.	1878.	1879.
Students of the Royal School of Mines.	101	113	99	84	94	86	45
Special Students -	103	125	131	143	127	151	176
Science Teachers and Royal and Local Exhibitioners.	41	56	57	56	61	66	64
	245	294	287	283	282	303	285

Appendix F.

REPORT BY DR. FRANKLAND.

The conduct of the students engaged in practical work has been, with very few exceptions, entirely satisfactory.

The Research Laboratory has been occuped by advanced students, for whom chemicals and apparatus have been provided free of cost. From January 1st to June 31st, five of these students received free instruction and from April 1st to June 30th one other student received instruction at half the usual fee. From the 1st of October to the end of the year, three students received free instruction, whilst four others paid half fee. All these students were provided with apparatus and chemicals free of expense. The cost of this training in chemical research (averaging about 90*l.* per student per annum) was defrayed partly by the Science and Art Department and partly by myself.

The following is a summary of the work executed in these laboratories during the year 1879:—

Mr. J. C. Evans (science teacher) has studied the action of zincethyl on benzonitrile and has produced cyaphenin, an isomer of benzonitrile, together with a complex organic compound belonging to the benzene series. The results already obtained are about to be published, and the investigation will be continued.

Mr. D. A. Louis (special student) has examined the products obtained by the action of zincethyl on benzoylic cyanide. This inquiry is beset with many difficulties, but it is now approaching a satisfactory conclusion.

Mr. H. K. Tompkins (special student) has obtained a new organic compound, cyanbenzin, by the action of zincethyl on benzylic cyanide. Other products of the same reaction are still under investigation.

Mr. C. E. Bean (special student) concluded his experiments on the intrinsic illuminating power of olifiant gas when burnt in admixture with hydrogen, carbonic oxide, and nitrogen. These experiments have yielded results of great interest in connexion with artificial light, but they require to be extended to marsh gas in order to complete the results for publication.

Mr. F. Nettlefold (special student) was occupied since the 1st of October in studying the action of zincethyl on propionitrile. He obtained cyanethine, an organic alkaloid discovered by Professor Kolbe and myself in 1847. At the same time a volatile organic base of an entirely different constitution is formed.

Mr. Woodland Toms (special student) prepared dinitro-ethylic acid by the action of sodic ethide on nitric oxide, a method which offers many advantages over that previously employed. Soon after the commencement of this work, however, Mr. Toms was appointed to an assistantship in the laboratory of Mr. W. H. Perkin, F.R.S., and was thus prevented from continuing the research.

Mr. C. C. Graham (special student) took up, in October, the work thus relinquished by Mr. Toms, and has not only made great improvements in the method of preparation, but has also studied the reactions of dinitro-ethylic acid and obtained results which promise to solve the problem of the molecular constitution of this substance.

Mr. E. Wilcoek (special student) has examined the action of aldehydes on quinones, both alone and in presence of hydrocyanic acid. In this way he has prepared some interesting compounds belonging, apparently, to a new class. The results of this investigation are nearly ready for publication.

Mr. L. L. Stern (special student) has studied the action of chlorine upon ethylic hydride under the influence of diffused daylight, and is still occupied with this investigation.

Mr. B. Smith continued up to the end of the summer session to assist me in my investigation on the source of light in luminous flames.

Appendix F.

REPORT BY DR. FRANKLAND.

Mr. J. J. Hood (Royal Exhibitioner) has examined the accelerating influence of an excess of sulphuric acid on the oxidation of ferrous sulphate by potassic chlorate. He found that the rate increases more rapidly than the quantity of acid, and that this accelerating action is capable of very exact expression by means of a geometrical series. A paper embodying these results was published in the Philosophical Magazine for 1879, under the title "On the Laws of Chemical Change."

Mr. W. H. Perkin, jun. (special student), in conjunction with Dr. Hodgkinson, has studied the action of sodium on phenylic and cresyl acetates. The results, which are of considerable interest, are now ready for publication. They have also investigated the action of benzyl chloride on some etherial salts, especially phenylic and benzylic acetate. Hydrochloric acid and water are separated, and several beautiful crystalline bodies produced. These are now under investigation.

Mr. A. J. Greenaway (assistant in the Analytical Laboratory) and Dr. Hodgkinson have succeeded in preparing ethylic phenethyl aceto-acetate, from which they have obtained phenethyl methyl ketone and an acid homologous with hydro-cinnamic acid. The results are ready for publication, They have also in progress a research on the action of sodium on ethylic and benzylic fumarate.

Dr. F. R. Japp, Demonstrator in the Research Laboratory, has concluded his examination of isomeric acids derived from phenanthrene, and has succeeded in clearing up some points that were doubtful in the constitution of this hydrocarbon. The results have been published in the Journal of the Chemical Society. He has also investigated the action of zinc ethyl on phenanthrene-quinone, and the study of a new compound formed in this reaction has solved the problem of the arrangement of the oxygen atoms in the molecule of phenanthrene-quinone. The results have been communicated, in two memoirs, to the Chemical Society.

Dr. W. R. Hodgkinson, Demonstrator in the Analytical Laboratories, has continued his researches on the aromatic fatty acids, and has succeeded in obtaining, along with other products, atropic acid (previously got from atropine—the active principle of the deadly nightshade) by the action of sodium upon hydro-cinnamene acetate. By the action of sodium on the ethylic, propyl-butylic, and benzylic salts of phenyl-acetic acid he has also obtained a new series of bodies, some of them liquid and some crystalline. These results of Dr. Hodgkinson's work are, at present, in course of publication.

I have continued my researches on the source of light in luminous flames and hope shortly to bring them to a conclusion.

Most of the investigations enumerated above have been devised with the object of determining the molecular structure of organic compounds. Although such inquiries rarely receive immediate practical application, they are most useful for the higher training of teachers of chemistry, and they are essential to the progress of chemical science.

Numerous samples of typical rocks from various parts of the United Kingdom have been sent here for investigation by the Director-General of the Geological Survey of Great Britain and Ireland. They have been reported upon by me, and I have to acknowledge valuable assistance rendered in their analysis by Messrs. T. Hughes, A. Linnell, F. Nettlefold, A. Wingham, E. Wilcock, and Miss Lucy Halcrow.

I have analysed and reported upon the numerous samples of water sent to me from the Local Government Board, and have also continued the monthly analysis of the various potable waters supplied to the inner and portions of the outer circle of the metropolis. These last-mentioned analyses show that of the total average daily volume of 134,443,669 gallons of water supplied to inner London, 68,139,140 gallons were

sometimes grossly polluted by sewage matters, chiefly the soluble constituents of urine and manure, 58,141,767 gallons were occasionally so polluted but to a less degree; whilst only 8,162,762 gallons were uniformly of excellent quality for dietetic purposes. The average daily volume supplied per head of population was 33·5 gallons. This is greatly in excess of what is required and indicates gross waste; but whilst the quantity was abundant the quality of the river water was generally indifferent, and frequently very objectionable.

I have delivered the usual courses of lectures on inorganic and organic chemistry to a mixed and very attentive class, consisting of students of the School of Mines, Royal and Local Exhibitioners, Special Students and Science Teachers. The number of entries to the courses and the regularity of attendance are attested by the official lists which are in the possession of the Registrar.

I have continued to conduct the examinations in chemistry of the students of the Royal College of Science, Dublin, and of the Inland Revenue Laboratory, Somerset House; and in conjunction with Professor Roscoe, the May examinations in inorganic and organic chemistry for the Science and Art Department. Finding, however, that the very heavy work attending the May examinations seriously interfered with my duties in these laboratories, I have reluctantly resigned the examinership after having held it for 11 years.

In connexion with the instruction of the various classes of this department, I have had to deplore the sudden death of my Senior Demonstrator, Mr. W. Valentin, who had most efficiently superintended the students in qualitative and quantitative analysis during the 14 years which have elapsed since I succeeded Dr. Hofmann as professor of chemistry in the Royal School of Mines.

To the important position thus left vacant in May, I appointed Dr. W. R. Hodgkinson, who distinguished himself here as a teacher in training, being first of his year in the final examinations of the chemistry classes in 1874. He afterwards spent five years in the prosecution of original research, partly in the Research Laboratory of this Department and partly in Germany.

In the Research Laboratory I have continued to receive the valuable assistance of Dr. F. R. Japp, whilst the water analysis laboratory has been under the supervision of Mr. W. E. Mathew.

The junior assistants in general analysis have remained unchanged; they were Mr. A. J. Greenaway, Mr. J. M. Cameron, and Mr. H. Chapman Jones. The chemical store room has again been under the care of Mr. L. G. Paul.

The experimental illustrations for the courses of lectures have been carefully prepared by Mr. G. S. Newth, who holds the office of lecture assistant from the Lords of the Committee of Council on Education.

Lastly, Mr. E. Dick has continued to occupy the post of my private secretary.

I am, Sir,
Your obedient servant,
E. FRANKLAND.

The Secretary,
Science and Art Department.

Appendix G.

REPORT BY PROF. ARCHER.

APPENDIX G.

REPORT of the DIRECTOR of the EDINBURGH MUSEUM of SCIENCE and ART for 1879.

Museum of Science and Art,
Edinburgh, 21st January 1880.

SIR,

The past year has been one of unprecedented success for this Museum, the number of our visitors having exceeded that of the previous year by upwards of 249,000. The attendance for the year 1879 was as follows:—

Month.	Free.		Pay Days.	Total.	Amount of Admission Fees.		
	Days.	Evenings.			£	s.	d.
January - -	33,089	24,129	698	57,866	17	9	0
February - -	24,605	30,546	738	55,889	18	9	0
March - - -	43,792	57,775	3,394	104,961	84	17	0
April - - -	33,531	37,230	4,624	75,385	115	12	0
May - - -	27,653	23,916	2,922	54,491	73	1	0
June - - -	21,968	14,639	5,852	42,459	146	6	0
July - - -	32,933	15,675	6,138	54,741	153	6	6
August - - -	28,525	20,596	3,914	53,035	97	17	0
September - -	21,221	22,071	3,324	46,616	83	2	0
October - -	22,066	23,901	1,936	47,903	48	8	0
November - -	13,426	18,191	718	32,335	17	19	0
December - -	12,012	9,272	329	21,613	8	4	6
Total - -	314,771	297,941	34,582	647,294	864	11	0

Average annual attendance for last five years - 444,900.

Average daily attendance in 1879 - - - { pay days 232. free days 3,806.

The very large increase of visitors during the past year is undoubtedly due to the attractions of the collection of Indian gifts so graciously lent by His Royal Highness the Prince of Wales, and to two other loan collections, one of line and mezzotint engravings, illustrative of the history of engraving, contributed by 47 collectors, the other a complete series of the engraved works of the late Sir Francis Grant, P.R.A., lent by his son Lieutenant-Colonel Grant, Messrs Graves and Co., and Messrs. Colnaghi and Co.

The collection of Indian gifts was opened on the evening of 4th March by a conversazione at which the Lord Provost presided, and it remained on view until the 31st October, and was from first to last a source of great pleasure to the public.

My continental journeys enabled me to add many useful and valuable specimens to the permanent collections, and greatly extended the range of my information.

The Piot collection of antique glass, obtained through the good offices of the Department, was one of the most important acquisitions yet made for this Museum, and it was immediately followed by one of scarcely less value, viz., the collection of antique glass made by the

late Earl of Northesk, and generously presented by his son the present earl, who has besides continued and enlarged his extensive and important loan collection of prehistoric antiquities.

The sale of catalogues during the past year has been as follows:—

Outline Guides	198
Mineral Collection	137
Analytical Index to Mineral Collection	17
British Foraminifera	19
Loan Collection of Line and Mezzotint Engravings	427
Loan Collection of Engravings after the works of Sir Francis Grant	221

The following table shows the routine work performed in the Industrial Department of the Museum during the past year:—

Specimens registered	994
Do. labelled	3,212
Do. prepared	1,157
Labels written	1,369
Do. printed	2,893
Do. drafted for printing	2,893
Do. hand printed	256
Inventory lists prepared	38
Catalogue lists prepared	77

THOS. C. ARCHER,
Director.

LIST of DONATIONS to the EDINBURGH MUSEUM of SCIENCE and ART from 1st January to 31st December 1879.

Specimens of nickel ore (garnierite) from New Caledonia; spiess or regulus and metallic nickel.
Presented by Sir Josiah Mason, Birmingham.

Five ornaments of cut and polished garnierite.
Presented by MM. Christofle & Co., Paris.

36 minerals, chiefly auriferous quartz, copper ores, and agates from Queensland.
Presented by Mr. G. E. Forbes, Craiglockhart House, Slateford.

2 drinking "glasses" made of the cannel coal, Heywood, Lanarkshire, with a specimen of the coal.
Presented by Mr. George Dunlop, Fauldhouse.

12 stones (onyx) engraved with various devices for seals.
Presented by Mr. Walter Reid, 76, Queen Street, Edinburgh.

Slab and part of a column of artificial stone.
Presented by Messrs. Hodges and Butler, East Greenwich, Kent.

3 cubes of magnesian limestone, and 1 cube of oolitic limestone from quarries in Nottinghamshire and Lincolnshire.
Presented by Mr. R. C. Lindley, Mansfield Quarries, Notts.

3 polished slabs of Irish marbles.
Presented by Mr. Richard Colles, Kilkenny.

2 specimens of weldless steel chain.
Section of a Bessemer steel rail, forged into an inkstand.
Presented by Messrs. Brown, Bailey, and Dixon, Sheffield.

Silver anklet, ornamented, obtained by the donor in Syria.
Presented by Mr. W. Burns Thomson, through Miss Cormack, Edinburgh.

11 specimens of New Zealand, and 20 specimens of British woods.
2 hand combs for wool, formerly used in Nithsdale.
Presented by Dr. Grierson, Thornhill.

Appendix G. — Report by Prof. Archer.

Collection of fragments of ancient Roman glass, including pieces in imitation of marble, porphyry, chalcedony, &c.; pieces with millefiori and [illegible] ornament; rods for filigree work; beads; pieces of clear glass showing iridescence; 3 ampullae, 9 unguentaria, and lachrymatories; 660 specimens in all.
Presented by the Earl of Northesk.

Fan; the leaf of white figured lace or net work, the brins of ivory. England. Date, 1771.
Presented by Lady Jane Dundas, 46, Charlotte Square, Edinburgh.

Wreath of flowers and basket of flowers, made of the bones of fishes.
Presented by Miss McLeish, Musselburgh.

Bouquet of flowers made of shells from the Firth of Forth.
Presented by Mrs Young, Burntisland.

8 specimens showing the stages in the dyeing and printing of a [illegible] handkerchief with alizarine red.
Presented by Mr. Cooper (Messrs J. Shaw & Co.), Glasgow.

2 West Highland tilling implements.
Presented by Mr. A. A. Carmichael, Oban.

61 specimens of native manufactures from Madagascar, including articles of domestic use, personal ornaments, &c.
Presented by Mr. W. Burns Thomson, Ramsay Gardens, Edinburgh.

Wedding dress of green muslin, with ornaments of silver foil, &c., also a [illegible] and slippers. Indian.
Presented by Mr. Duncan Vertue, H.E.I.C.S.

Maori carved wood idol.
Presented by Mr. John Mackay, Dunedin, New Zealand.

Buttons of black-lipped mother-of-pearl shell, resembling cat's eyes. Chinese.
Presented by Mr. R. Jamie, Singapore.

Stone axe or celt from a temple of the aboriginal tribe on the Shivarai Hills, India.
Presented by Major-General R. Cadell, R. A., Cockenzie.

Specimens added by purchase to the Industrial Section of the Edinburgh Museum of Science and Art from the 1st January to the 31st December 1879.

Metal Work.

Walker, Miss, West Grange, Edinburgh.
Wass, Charles W., 7, Kilburn Villas, Upper Norwood, London.

REPORT of the KEEPER of the NATURAL HISTORY COLLECTIONS for the year 1879.

DURING the past year the Natural History Collections have acquired important additions both by purchase and by gift, and the work of rearrangement and revision has proceeded without interruption.

The appearance of the ground floor of hall No. 1., has been very greatly improved by the replacement of many old and worn out examples of mammalia by new specimens, and by the erection of two additional large cases for their proper preservation from dust and injury.

In due recognition of the great importance, from an educational point of view, of exhibiting a well selected and arranged zoological type collection, a set of cases has been erected and set apart for that purpose on the ground floor of hall No. 2. The work of filling these with illustrative osteological and other specimens has already commenced, and the services of Mr. W. Newton Parker, of London, have, with the sanction of the Department, been secured for the production of a series of dissections of soft parts, similar to those exhibited in the Biological Laboratory of the Science Schools at South Kensington. So large and

Appendix G.

REPORT BY PROF. ARCHER.

increasing is the number of university and other students who frequent the Museum for the purposes of study, that the Type Collection promises to become an important feature in the future usefulness of the Natural History Department.

The revision and rearrangement of the fossil crustacea, echinoidea, and crinoidea, have been finished, and the same work is now nearly completed as regards the fossil cœlenterata (graptolites and corals).

The purchases made during the past year include a magnificent stuffed specimen of *Rhinoceros unicornis*, Linn., large and valuable specimens of polished agate from Oberstein, and many stuffed mammals, birds, osteological preparations, minerals and fossils, which are more particularly noticed in the appended list.

Dr. Thomas Davidson of Blairgowrie has presented to the Museum his extensive collection of eggs of British birds, containing 1,960 specimens, belonging to 225 species, and which constitutes one of the most important donations which has for many years been acquired by the Zoological Section of the Natural History Department. Mr. George E. Forbes has presented an important collection of minerals from Queenstown, including beautiful specimens of opal, gold in calcite, cinnabar, and many others. From Prof. Nicholson of St. Andrews, the Museum has received a collection of 92 specimens of fossil invertebrata, chiefly corals from the Silurian and Devonian rocks of North America. The appended list of additions to the Natural History Collections will be found to contain numerous other donations, with the names of their respective donors, and in conclusion a statement is added of the routine work performed in the Natural History Department for the year 1879.

RAMSAY H. TRAQUAIR, M.D.,
Keeper.

NATURAL HISTORY DEPARTMENT.

DONATIONS during the year 1879.

39 specimens of echinodermata.
Presented by Sir C. Wyville Thomson, F.R.S., Edinburgh.

2 boulders of Marcasite.
Presented by Mr. Hugh Campbell, Leith.

Specimens of globular Vanadinite, and Chrysocolla, from Wanlockhead.
Presented by Dr. J. Wilson, Wanlockhead.

10 minerals from Ayrshire, &c.
Presented by Mr. D. Corse Glen, Glasgow.

A lizard in spirit, from India.
Presented by Mr. Andrew Gibson, Liverpool.

Two heads of the Indian buffalo, *Bubalus buffelus*, Gray.
Presented by Mr. J. N. Wallace, Edinburgh.

343 specimens of foreign shells.
Presented by Dr. Wm. Traill, St. Andrews.

Nest of the spotted flycatcher, *Muscicapa griseola*, L.
Presented by Mr. G. Leslie, Edinburgh.

Skins of the Manx shearwater, *Puffinus anglorum*, Tem., and of the cuckoo (young), *Cuculus canorus*, Linn.
Presented by J. J. Dalgleish, Esq., Edinburgh.

Stuffed specimens of the smew, *Mergus albellus*, L., and of the squacco heron, *Ardea comata*, Pall.
Presented by His Grace the Duke of Buccleuch.

A collection of minerals from the mines of Andacola, Coquimbo.
Presented by Patrick D. Swan, Esq., Provost of Kirkcaldy.

A specimen of galena, from Leadhills.
Presented by Mr. James Aitchison, Leadhills.

4 minerals.
Presented by Mr. Joseph Gill, Leadhills.

9 minerals.
Presented by Dr. J. Wilson, Wanlockhead.

16 minerals.
Presented by Patrick Dudgeon Esq., of Cargen.

2 specimens of Cotterite from Rockforest, Mallow, Ireland.
Presented by the Rev. Geo. E. Cotter, Rockforest.

12 British birds' eggs.
Presented by Mr. J. H. Buchanan, Leny, Perthshire.

The half of a quern formed of a schist containing andalusite and grenatite crystals.
Presented by Professor M. Forster Heddle, St. Andrews.

A rare variety of the carrion crow, *Corvus corone*, Linn., shot in Dumfriesshire.
Presented by M. J. Shaw Stewart, Esq., Ecclefechan.

53 minerals.
Presented by Geo. E. Forbes Esq., Slateford.

2 specimens of the slow worm, *Anguis fragilis*, Linn., from Nithsdale.
Presented by Dr. J. B. Grierson, Thornhill.

Tooth of fossil elephant, from Siwalik Hills.
Presented by W. Coldstream, Esq., Indian Civil Service.

85 insects from the Malay Peninsula.
Presented by Mr. James Meldrum, Edinburgh.

Specimens of the Iceland gull, *Larus leucopterus*, Faber sp., and of the American lynx.
Presented by Mr. Robert Hume, Portobello.

A specimen of the Pomarine skua, *Stercorarius pomarinus*, Tem. sp.
Presented by Dr. Colville Brown, Berwick-on-Tweed.

92 specimens of fossil invertebrata, principally corals.
Presented by Professor H. A. Nicholson, M.D., F.G.S., St. Andrews.

30 specimens of fossil shells, from the Coal Measures.
Presented by J. Ward, Esq., F.G.S., Longton, Staffordshire.

A collection of eggs, skins, &c., of British and foreign birds, consisting of
1960 British birds' eggs, belonging to 225 species.
2 eggs of the ostrich.
3 birds, stuffed.
16 birds' skins.
Presented by Dr. Thomas Davidson, Blairgowrie.

A specimen of the starry ray, *Raia radiata*, Flem.
Presented by Mr. Moffat, Edinburgh.

Natural History Department.

Purchases during the year 1879.

	£	s.	d.
A chalcedony geode, inclosing fluid	4	0	0
A sponge, *Meyerina claviformis*, Gray, from the Philippine Islands	5	0	0
A human skeleton, crustaceans, echinoderms, &c., 33 specimens	16	8	6
16 stuffed British birds and 2 stuffed seals	15	13	0
Skulls, disarticulated skeletons, stuffed mammals, birds' eggs, invertebrates, 99 specimens	77	13	6

REPORT BY PROF. W. F. BARRETT.

REPORT of the COUNCIL of the ROYAL COLLEGE OF SCIENCE FOR IRELAND for the year 1879.

SIR,

IN compliance with your letter of the 8th instant, I have the honour to submit to My Lords the following Report relative to the educational work in the Royal College of Science for the Session of 1878–79.

The programme of studies as detailed in the authorised Directory of the College was, as far as possible, carried out, and the usual examinations were held in June, these being conducted, as heretofore, jointly by the Professors in the College, and the London examiners appointed by My Lords. The prizes awarded to, and the certificates and diplomas obtained by, the successful candidates, are detailed in the Secretary's report.

I have the honour to submit a copy of the examination papers of the past session, and of the Directory for the present session.

The removal by death of Dr. Sidney, who so long and ably filled the post of Secretary, has deprived the College of the advice and experience of an officer who had an unrivalled acquaintance with the history and rules of the College. The Council, at their first meeting, sent a letter of condolence to Mrs. Sidney.

The duties of Secretary during Dr. Sidney's illness and since his death have been discharged by Dr. Steele, through whose valuable co-operation the work of the administration has been satisfactorily carried on.

The chair of Zoology, vacant since November 1878, has been filled by the appointment of Professor Bridge, who entered upon his duties at the end of April 1879. As the course on Zoology commences the first Monday in February, one-half the requisite number of Lectures on Zoology were delivered last session. The frequent changes in the professorship of Zoology are liable to injure the full and efficient teaching of this subject, and the Council therefore desire to bring under the notice of My Lords the possibility of giving greater permanence to the occupancy of this chair. At the same time the Council are of opinion that since the faculty of Agriculture no longer forms part of the College curriculum—and, in view of any future change—a curtailment of the present extensive courses on Zoology and Botany would be advisable for those students entering the faculty of Mining, Engineering, and Manufactures. It is therefore the intention of the Council, in proper course, respectfully to submit to My Lords their carefully considered views on this matter, hoping thereby to render more efficient the three special courses of instruction for which, mainly, the College was founded.

The entrance of Professor Hartley on the duties of the chair of Chemistry, in October last, has been followed by large additions to the Chemical illustrations in the College. Several most urgent repairs and improvements have yet to be executed in the Chemical Laboratory before it can be considered in good working order.

The physiological laboratory at Glasnevin, although still in an incomplete state, has been occupied by the Professor of Botany since August 1879. The facilities afforded by this laboratory have already enabled the Professor to illustrate his lectures and demonstrations much

Appendix H.

REPORT BY PROF. W. F. BARRETT.

more fully than in former years, the autumn months having been utilised in the preparation of microscopical and other specimens required for the Botanical Class of the following session.

Many valuable additions have been made to the collection of Physical apparatus and to the Mining and Mineralogical collection during the past year. But the most conspicuous addition to the rich educational appliances now possessed by the College has been the purchase, for the Engineering School, of a fine series of models in Canal and Bridge work. The telegraph line laid by the postal authorities between the College and the Dublin Museum of Science and Art promises to be of considerable use for educational purposes in the course on Practical Physics, one object for which it was erected being the testing of resistances and the localisation of faults in actual telegraph lines.

In the completeness of its scientific illustrations the College can vie with, if it does not surpass, many older and more richly endowed institutions for the higher education of the youth of the United Kingdom. The progress of science necessarily involves a continual addition to the instruments used in teaching, and a place for their proper protection. At present the want of such space in the College has given rise to the most anxious concern on the part of the Professors. This is a need of the most urgent and serious character. The very fine collection of diagrams which exists in the College should have a far better and ampler place of storage. Much of the Chemical, Mechanical, and Physical Apparatus has to be pulled to pieces after use, and stowed away in already overcrowded cases. Not only do the instruments themselves suffer, but the teaching suffers also, for much labour that is now wasted might be more advantageously expended.

The excellent appointments gained by students of the College continue to be a source of gratification to the Council, and they observe with pleasure the growing desire of former students, who have gained high educational positions, to secure as colleagues or subordinates those who have received their scientific training at the College of Science. This is shown by Mr. Stewart, a former student, and now the head of the Hardwicke Science School, Dublin, selecting Mr. Tutty, Associate of the College, as his Assistant; and by Mr. Coyle, an Associate of the College, and now head of the Derby Science School, having, out of upwards of 100 applicants, selected Mr. Riley, Royal Exhibitioner, as his Assistant-Master.

Signed on behalf of the Council,
W. F. BARRETT,
Dean of Faculty.

January 20, 1880.

Appendix H.

REPORT BY SECRETARY PRO TEMP. OF ROYAL COLLEGE OF SCIENCE FOR IRELAND.

REPORT of the SECRETARY, pro temp., of the ROYAL COLLEGE of SCIENCE, for IRELAND, for the year 1879.

SESSION 1878–79.

During the Session ending in June 1879, the following courses of lectures were given:—

1st Year's Class.

		Students.
58	Lectures in Pure Mathematics by Prof. Hennessy, attended by	6
61	„ Elementary Mechanics „ „	10
80	„ Descriptive Geometry by Prof. Pigot „	12
89	Lessons in Mechanical Drawing by „ „	12
59	Lectures in Experimental Physics by Prof. Barrett „	24
65	„ Botany by Prof. McNab „	9
79	„ Theoretical Chemistry by Prof. Galloway „	16
45	Lessons in Practical Physics by Prof. Barrett „	14

2nd Year's Class.

65	Lectures in Pure Mathematics by Prof. Hennessy „	9
70	„ General Mechanics „ „	7
86	Lessons in Mechanical Drawing by Prof. Pigot „	7
61	Lectures in Experimental Physics by Prof. Barrett „	17
25	„ Zoology by Prof. Bridge „	5
155	Lessons in Practical Chemistry by Prof. Galloway „	7
29	„ Practical Physics by Prof. Barrett „	7

3rd Year's Class.

66	Lectures in Mechanism and Thermo-dynamics by Prof. Hennessy, attended by - - -	4
71	„ Applied Mechanics and Hydro-dynamics by Prof. Hennessy, attended by - -	1
88	„ Engineering and Building Construction by Prof. Pigot, attended by - - -	1
136	Lessons to Drawing Class by Prof. Pigot, attended by -	2
38	„ in Surveying „ „ -	5
26	„ Applied Chemistry by Prof. Galloway „ -	4
29	„ Metallurgy „ „ -	3
155	„ Practical Chemistry and Assaying by Prof. Galloway, attended by - - - -	5
50	Lectures in Geology by Prof. Hull, attended by - -	5
25	Demonstrations in Palæontology by Mr. Baily, attended by	3
42	Lectures in Mineralogy by Prof. O'Reilly „	2
44	„ Mining „ „	1

The total number of individuals who attended these lectures was 60, of whom 21 were associate students prosecuting the full three years' course, with a view of obtaining the diploma of associate; the corresponding numbers last year were 75 and 22 respectively.

Mineralogy - - -	1	—	1	[illegible]
Metals - - - -	1	—	1	[illegible]

The Royal scholarships were awarded to Alfred E. Johnson and John Henry Smith, and a scholarship, which had been vacated by the retirement of the holder at the expiration of the first year, was granted, on the recommendation of the Council of Professors, to Joseph Berry.

The silver medal for best answering on the whole of the first two years' course, was awarded to John T. Riley.

The diploma of Associate was awarded to—

Sexton, F. M.		
Terry, Edward J.	}	in the Faculty of Manufactures.
Weston, Louis		Mining.
Kinnear, G. A.		Engineering.

In the month of May 1879 the annual Science Examinations of the Department were held in the College. There were 339 entries in 19 subjects, the number of individuals being 146, of whom 135

presented themselves for examination. The number of papers worked in each subject was as follows:—

Subject.	
I.	Practical Plane and Solid Geometry - 8
II.	Machine Construction and Drawing - 12
V.	Mathematics (stages 1, 2, and 3) - 70
V.	„ (stages 4 and 5) - 17
V.	„ (stages 6 and 7) - 2
VI.	Theoretical Mechanics - - 30
VII.	Applied Mechanics - - - 15
VIII.	Acoustics, Light, and Heat - - 39
IX.	Magnetism and Electricity - - 56
X.	Inorganic Chemistry - - - 13
XI.	Organic Chemistry - - - 1
XII.	Geology - - - - 4
XIV.	Animal Physiology - - - 4
XV.	Botany - - - - 12
XVI. and XVII.	General Biology - - - 2
XIX.	Metallurgy - - - - 1
XX.	Navigation - - - - 16
XXII.	Steam - - - - - 1
XXIII.	Physiography - - - - 14
XXIV.	Principles of Agriculture - - 1

SESSION 1879–80.

The number of students registered up to the 31st December 1879 for the present session, is as follows:—

1st Year's Class.

Pure Mathematics - - -	11
Elementary Mechanics - - -	11
Descriptive Geometry - - -	11
Drawing - - - -	12
Experimental Physics (Electricity and Magnetism) - - - -	16
Botany - - - - -	11
Theoretical Chemistry - - -	17
Practical Physics - - -	15

2nd Year's Class.

Pure Mathematics - - -	6
General Mechanics - - -	6
Mechanical Drawing - - -	7
Experimental Physics (Heat, Light, and Sound) - - - -	10
Zoology - - - -	6
Practical Chemistry - - -	7
Practical Physics - - -	6

3rd Year's Class.

Mechanism and Thermodynamics -	4
Applied Mechanics and Hydrodynamics	5
Engineering - - - -	7
Drawing - - - -	5
Surveying - - - -	3
Applied Chemistry - - -	2
Practical Chemistry - - -	2
Geology - - - -	5
Mineralogy - - - -	2

Appendix H.

REPORT BY SECRETARY PRO TEMP. OF ROYAL COLLEGE OF SCIENCE FOR IRELAND.

EVENING LECTURES.

I have much pleasure in reporting the marked success that has attended the establishment at the college of evening classes, which have been voluntarily undertaken by some of the professors, primarily for the benefit of industrial students. There have been 160 entries for these classes up to the 31st December, 144 of these being artisans. In addition to this, 409 persons have purchased tickets for single lectures, 237 of them being artisans.

The following statement shows the number of students in each of the subjects dealt with in the lectures, with their average attendance :—

Class.	Regular Students.	Average Attendance.	Average Number of Occasional Students present at Lectures.	Total Average Attendance.
Botany - - - - -	19	17	9	26
Chemistry - - - -	107	89	24	113
Geology - - - -	23	18	14	32
Electricity and Magnetism - -	111	93	31	125

Of the regular students 74 have entered for a single course of lectures, 73 for two courses, 12 for three courses, and one for four courses.

The fees paid up to the end of the year by regular and occasional students amount in the aggregate to 64*l.* 7*s.* 3*d.*

The number of visitors to the Museum during the year was 3,321.

The number of volumes added to the library was 185, besides periodicals.

There were also added to the Library by purchase :—

A series of maps, in 51 folio sheets, forming part of the new enlarged Geological Map of France, and comprising the following :—
Vertical and longitudinal sections,
Photographic perspectives,
Palæontographic series.

A Geological Map of Austro-Hungary in one sheet.

The following donations were made to the Library during the year :—

A series of 500 volumes on various branches of Physical and Natural Science.
Presented by the late Secretary of the College, Dr. Sidney.

Proceedings of the Institute of Civil Engineers, Great George Street, Westminster. for the years 1878 and 1879.
Presented by the Institute.

On Molecular Physics and Sound, by F. Guthrie, F.R.S., Professor of Physics at the Royal School of Mines, London.
Presented by the Author.

Photograph illustrating the discovery of Oxygen in the Sun by Professor H. Draper, M.D.
Presented through Wentworth Esk, Esq.

Geology of the Henry Mountains, by G. K. Gilbert, of the United States Geological Survey.
Presented by the United States Geological Survey, Washington, through Professor Hull.

On the Osteology of Polyodon Folium, by Professor T. W. Bridge.
Presented by the Author.

Transactions of the Royal Irish Academy. Vol. 26 and Vol. 27. Parts 1, 2, and 3.

Proceedings of the Royal Irish Academy. Vol. I. Series II. Parts 12 and 13. Vol. II. Series II. Parts 1 to 7. Vol. III. Series II. Parts 1 to 3.
Presented by the Royal Irish Academy.

Aeneidea, with critical remarks on the Aeneis, by J. Henry. Vol. I. and part of Vol. II.
Presented by the Trustees of the late J. Henry, Esq., through the Royal Irish Academy.

Catalogue of Scientific Papers, compiled by the Royal Society of London. Vol. 8.
Presented by the Royal Society.

Memoirs of the Geological Survey of India. Vol. XV. Part I., and Vol. XVI. Part 1.
Palæontologia Indica—
Series II. The Fossil Flora of the Upper Gondwanas.
Vols. 1, 4. Outliers of the Madras Coast.
Series XII. The Fossil Flora of the Upper Gondwanas.
Series XIII. Salt Range Fossils.

Records of the Geological Survey of India. Vol. XI. Parts 1, 2, 3, 4. Vol. XII. Parts 1, 2, 3.

Index to the first 10 volumes.
Presented by the Secretary of State for India in Council.

A Manual of the Geological Survey of India, with separate map of India, by Medlicott and Blanford.
Presented by the Authors.

Astronomical observations and researches made at the Observatory, Dunsink. Part III.
Presented by the Provost and Senior Fellows of Trinity College, Dublin, through Dr. Ball, Astronomer Royal for Ireland.

On the 20th February 1879, T. W. Bridge, Esq., was appointed to the Chair of Zoology, in the room of Professor Leith Adams, who had accepted a similar Professorship in the Queen's College, Cork; and W. N. Hartley, Esq., was appointed, on the 4th July 1879, to the Professorship of Chemistry, previously held by Professor Galloway.

In conclusion I have, with extreme regret, to record the death, after much suffering, of Dr. Sidney, who filled the office of Secretary of the College from its formation, and whose intimate acquaintance with, and ability in conducting the business of the College, render his loss to be much deplored.

W. EDW. STEELE,
Secretary, pro temp.

22nd January 1880.

Appendix I.

REPORT BY DR. STEELE.

APPENDIX I.

REPORT of the DIRECTOR of the SCIENCE AND ART MUSEUM, DUBLIN.

Leinster House, Dublin.
17th January 18[illegible]

SIR,

I BEG to submit the Report of the Science and Art Museum, Dublin, the National Library of Ireland, the Metropolitan School of Art, (Class 6,111) and the Botanic Gardens, Glasnevin, for the year 1879.

It is much to be regretted that no progress should as yet be made towards the erection of a building suitable for the formation and display of an Art Collection, and that even the temporary accommodation for such objects as suggested by me in my report of 1878, has not yet been provided.

Meanwhile, I am engaged, with the aid of Mr. Thomas Longfield, who was recently appointed as the Art and Industrial Assistant, in forming a Museum of Art Objects, which, with those at present in the Royal College of Science, would become the nucleus of such a collection.

From the interest taken by several persons in the formation of an Art Museum, I have no doubt that an extensive loan collection could be readily formed were there space available for its exhibition. At present I endeavour to keep alive such interest by exhibiting articles of this nature for a limited period in a confined space in the passage leading to the Natural History Museum, exchanging them from time to time with others, either lent or purchased.

In the course of the last year I was enabled to have the majority of the casts of the works bequeathed by the late Mr. Foley to the Royal Dublin Society placed in the entrance hall and in different parts of Leinster House, in which they appear to much advantage.

A list of the specimens purchased for the Art Museum, as well as those deposited on loan during the past year is appended.—Appendix A.

Reports of the Director of the Natural History Museum (Appendix A), of the Librarian of the National Library of Ireland, of the Curator of the Botanic Gardens, Glasnevin, and of the Head Master of the Metropolitan School of Art, are annexed, which give details showing the progress of those departments respectively during the past year.

The attendance of the public at the Science and Art Museum, Dublin, has numbered 163,881, showing an increase of 40,237 visitors for 1879, compared with those of the previous year.

The Report of the Librarian of the National Library of Ireland also records the gratifying fact of a large increase in the number of public readers. Thus, in 1878, the readers numbered 27,452, in 1879, 31,120, showing that the latter has exceeded the former by 3,668.—Appendix B.

The attendance of visitors at the Botanic Gardens, Glasnevin, has also increased; thus in 1879 the number amounted to 223,725; in 1878, 214,086, the increase in favour of the past year being 9,639. This fact is the more remarkable when the unfavourable weather which prevailed during almost the whole of 1879 is considered.—Appendix C.

In connexion with the Botanic Gardens, it is with deep regret I have to place on record the death of Doctor David Moore, the Director.

Dr. Moore was appointed by the Royal Dublin Society in the year 1838, and his merits soon became apparent not only to the Society but to the large circle of scientific correspondents, with whom his official duties brought him into communication. The high reputation acquired by the Botanic Gardens, Glasnevin, is due to the excellence of Dr. Moore's management. He was not only eminent for his skill as a horticulturalist, but he likewise attained a high repute as a scientific botanist.

The report of the Head Master of the Metropolitan School of Art is also annexed.—Appendix. D. Although the number of students is not so large as that of previous years, yet it is satisfactory to find that their works have maintained the reputation of the school. The amount received from the Science and Art Department as payment on results having been the largest since the connexion of the school with that department.

Class Lectures in Anatomy, and on Botany applied to the Fine Arts, were delivered in the course of the session by Professor MacAlister and Professor McNab respectively. For the more efficient illustration of the former course an admirable anatomical figure, the several layers of muscles, &c. being removeable, has been purchased from M. Azoux of Paris. For the purpose of studying artistic anatomy it is as well, if not better adapted, than the dead subject.

The life models are regularly posed in the schools, and such students as have qualified themselves for admission are permitted to study in the life class free of charge.

In order to afford facilities for sketching and painting landscapes from nature a special class was formed during last summer, who were provided with every facility, including a tent for shelter, for studying at the Botanic Gardens, Glasnevin.

It is much to be regretted that no steps have been taken towards erecting the building intended for the School of Art, which was sanctioned by the Science and Art Department some years ago. The structure now used for that purpose is admirably adapted for a temporary Art Museum, and could be applied at once to that object were a new and appropriate building for the Art School provided.

The following is a statement of the attendance of the public during the year 1879, viz. :—

		Persons.
1. Science and Art Museum, visited by - - -		163,881
2. National Library of Ireland :—		
Readers, males - - - - -	26,119	31,120
„ females - - -	5,001	
3. Metropolitan School of Art :—		
Students - - - -	424	1,434
Exhibition of students' works visited by	1,010	
4. Botanic Gardens, Glasnevin :—		
Sunday visitors - - -	156,275	223,725
Week-day visitors - - -	67,450	
		420,160

(Signed) WM. EDW. STEELE,
General Director.

Appendix I.

APPENDIX A. TO DR. STEELE'S REPORT.

REPORT BY DR. STEELE.

REPORT of the NATURAL HISTORY MUSEUM, from the 1st January to the 31st December 1879.

I beg to report that, during the past year, four important typical skeletons have been added to the mammalian class, viz:—those of the chimpanzee (*Troglodytes niger*,) the red deer (*Cervus Elephus*), the Wapiti deer (*Cervus Canadensis*) and the white-cheeked tapir (*Tapirus leucogenys*). The skeleton of a large Indian elephant (*Elephas Indicus*) has also been mounted, and will be placed in the Museum as soon as a pedestal shall be provided by the Board of Public Works.

Among the stuffed mammalia the most important additions are two adult specimens of the Rocky Mountain sheep (*Ovis Montana*), two lion-monkeys (male and female) (*Gelada Ruppellii*), a guereza, (*Colobus Guereza*), a nylghau (*Portax picta*), and a Chinese musk-deer (*Hydropotes inermis*).

Sir Victor Brooke, with his usual liberality, has presented the skins of six antelopes, and in conjunction with his brother, Mr. Basil Brooke, a very dark coloured grey seal (*Halichœrus grypus*), shot by the latter off the coast of Kerry.

To the ornithological collection have been added a fine pair of the recently discovered paradise birds (*Paradisea Raggiana*) and the rare and beautiful pheasant (*Lobiophasis Bulweri*) from Borneo, has been most generously presented to the Museum by Mr. F. W. Burbidge, Curator of the College Botanical Gardens, who obtained it during his recent botanical expedition to the East.

A rare gull (*Larus Sabini*) one of the scarcest of our native birds, has been obtained by purchase from Mr. Williams, who has already provided so many useful additions to this collection.

Several specimens of Irish birds have been contributed by Dr. H. L. Cox, who takes great interest in this branch of natural history.

A number of foreign snakes have been identified and preserved in spirits, and will form an important addition to the series already in the Museum.

A good series of sewin, (*Salmo cambricus*) and other species of fish have been obtained from various quarters, a part of which will, after supplying our own wants, be available for exchange with foreign museums, and most valuable assistance in obtaining these specimens has been received from Major Hayes of the Irish Fishery Office, from Sir Watkin W. Wynn and Mr. John Williams of Bala, North Wales, from Colonel Romer, Dolgelly, and Mr. Walter Jackson, and other gentlemen, who kindly took an interest in this matter.

A noble specimen of the rare shell (*Kuphus giganteus*) has been placed in the conchological cabinet; and a very fine specimen of the giant clam shell (*Chama gigas*) now serves to supply a want long felt of this the largest of living bivalves.

In the entomological department, the Museum has suffered a severe loss by the transfer of Mr. W. F. Kirby to the British Museum, which took place on the 11th of August last. It is my pleasant duty, in recording the value of his long services, to call attention to the satisfactory state which the collection of exotic butterflies and hawk moths have attained under his care, and of which he has prepared a full catalogue, which will be shortly published.

A fine skull, and other bones of the cave bear (*Ursus spelæus*) from a cave at Jerzmanowice, near Cracow, in Poland, have been obtained by purchase; and from Dr. Battersby, the well known geologist of Torquay, a collection of tertiary remains from "Kent's Hole" cavern, and other fossils from Devonshire.

To the ethnological department, Sir J. Joscelyn Coghill, Bart., has presented a number of assegais and other weapons obtained by his son, the late Lieutenant Coghill of the 24th Regiment while on service in South Africa. General Thomas Moore has also contributed several examples of Indian arms, and the Museum has acquired a large ethnological collection, made in India by Mr. Valentine Ball of the Indian Geological Survey.

PURCHASES from 1st January to 31st December 1879.

	£	s.	d.
A collection of marine animals from the Coast of Norway. Two instalments of 100*l.*	200	0	0
Two specimens of precious coral	20	0	0
Three rare sponges	8	0	0
A nylghau (stuffed), *Portax picta*	18	0	0
A rare pheasant (*Lobiophasis Bulweri*)	9	0	0
Ethnological collection from India	35	0	0
Skeleton of chimpanzee (*Troglodytes niger*)	60	0	0
Seven Chinese corals	3	10	0
Skeleton of (*Tapirus leucogenys*)	19	0	0
A stuffed young do.	9	0	0
Gelada Ruppellii, male and female	14	0	0
Hydropotes inermis	7	10	0
Phœnicopterus minor	1	15	0
Eclectes polychloros	0	15	0
Paradisea Raggiana, male and female	12	0	0
Ptilopus sp.	3	0	0
Syma torotoro	0	16	0
Ptilopus sp.	0	15	0
Artamus melaleucus	0	5	0
Rhipidura Verreauxii	0	6	0
Lalage Montrousieri	0	6	0
Pachycephala Littagei	0	10	0
Aplonis caledonicus	0	8	0
Merula Pritzbuerii	0	15	0
Rhipidura tricolor	0	5	0
Colobus Guereza	10	10	0
Crax Daubentonii	3	0	0
Ibis Nippon	2	5	0
Cuscus maculatus	4	15	0
Dactylopsila trivirgata	8	10	0
Sabines gull (*Larus Sabini*)	2	0	0
Bittern (*Botaurus stellaris*)	2	0	0
Bean goose (*Anser ferus*)	1	0	0
A Ghoorka Kookerie	0	5	0
Kuphus giganteus	1	10	0
Skull and bones of *Ursus spelæus*	8	0	0
Eleven specimens of sewin (*Salmo Cambricus*)	1	0	4
Ten ethnological specimens from Solomon Islands and a gigantic clam shell (*Chama gigas*)	5	0	0
Three shells from the Indian Ocean	0	5	0
A collection of fossils from Kent's Hole, Devonshire	10	0	0

DONATIONS received from 1st January to 31st December 1879.

Two specimens of char (*Salmo colei*) from Lough Eske, Co. Donegal.
Presented by A. R. Wallace, Esq.

Belt of a Naga chief from Assam.
Presented by J. G. Robertson, Esq.

A pair of slippers from Mecca.
Presented by French McDermott, Esq.

A fossil (*Euomphalus pentangulatus*).
Presented by French McDermott, Esq.

Two long-tailed field-mice (*Mus sylvaticus*).
Presented by Miss M. Barrington.

A Common guillemot (*Uria Troile*) from Limerick.
Presented by W. Corbett, Esq.

Appendix I.

REPORT BY DR. STEELE.

An adult male golden-eye duck (*Clangula glaucion*).
Presented by Dr. H. L. Cox.

An oyster-catcher (*Hæmatopus ostralegus*) and three purple sandpipers (*Tringa maritima*).
Presented by Dr. H. L. Cox.

A horned toad (*Phrynosoma cornuta*).
Presented by John Longfield, Esq.

A matchlock, a sword, a Ghoorka kookerie, an Assamanese dhao, and tiger's skull, all from India.
Presented by Major-General Thomas Moore.

Two specimens of a small cuttle fish (*Sepiola Rondeletii*).
Presented by Mrs. J. P. Vereker.

A whimbrel (*Scolopax Phæopus*) and two turnstones (*Strepsilas interpres*).
Presented by Dr. H. L. Cox.

A knife from Singapore.
Presented by Mr. H. Tugwell.

Thirteen nests of native birds.
Presented by W. W. Flemyng, Esq.

A collection of assegais, &c. from South Africa.
Presented by Sir J. Joscelyn Coghill, Bart.

A grey seal (*Halichærus grypus*) and the skins of six species of antelopes.
Presented by Sir Victor Brooke, Bart.

One sea trout and one common trout.
Presented by Major Hayes, Inspector of Irish Fisheries.

Bearded loche (*Nemachilus barbatula*), minnow (*Leuciscus pharinus*) from the co. Louth.
Presented by Mr. John Boshell.

A common trout from the Vartry reservoir.
Presented by Francis Falkner, Esq.

Two sewin (*Salmo Cambricus*) from North Wales.
Presented by Colonel Romer.

Four gwyniad (*Coregonus clupeoides*), two trout, one pike, one perch, from Bala Lake.
Presented by Sir Watkin W. Wynn, Bart. through John William, Esq., Gwyn-hefin, Bala.

Two sewin (*Salmo Cambricus*), and some fry of the same from Dolgelly.
Presented by Walter Jackson, Esq.

An adult sewin (*Salmo Cambricus*), from the River Dysinni, North Wales.
Presented by W. W. E. Wynn, Esq.

One young sewin (*Salmo Cambricus*).
Presented by Mr. Richard Lewis.

A fine male specimen of the rare pheasant (*Lobiophasis Bulweri*) from Borneo.
Presented by F. W. Burbidge, Esq.

Three shells from the Indian Ocean.
Presented by Miss Ferguson.

Sixteen specimens of insects.
Presented by Percy Freke, Esq.

Twenty-nine specimens of insects.
Presented by Dr. W. H. Hart.

Ninety-three lepidoptera from Vancouver's Island.
Presented by Dr. E. L. Moss, R.N.

Eight specimens of rare Lepidoptera.
Presented by W. F. Kirby, Esq.

Five specimens of *Scoparia basistrigalis*, and one of *Scoparia Zelleri*.
Presented by the Rev. G. Madden.

(Signed) *Alexander Carte, M.D., F.L.S., &c.*
Director, Natural History Museum.

Art and Industrial Collections. Purchases from 1st Jan. to 31st Dec. 1879.

APPENDIX B. TO DR. STEELE'S REPORT.

To the Council of Trustees of the National Library of Ireland.

National Library of Ireland,
Kildare Street, Dublin.
1st January, 1880.

My Lords and Gentleman,

I beg to submit to you my report for the year ended 31st December 1879, as follows:—

The attendances of the public have been as follows, leaving out of view, as

Appendix I.

REPORT BY DR. STEELE.

has always been done, those of the members of the Royal Dublin Society who do not put down their names.

		Daily average.
Gentlemen, morning - -	16,696 -	- 58·6
„ evening - -	9,266 -	- 32·5
	25,962	
Ladies - - - -	5,009 -	- 17·6
Total - - -	30,971	
Gross average -		- 108·7

It is gratifying to note an increase in the number of readers as compared with last year, especially of the evening readers (of which the increase is about 25 per cent.), a result I attribute to the additional lighting, consequent on the introduction of lamps, which as supplied, and so far as they go, are excellent. I regret, however, that the whole number I had hoped we should have obtained have not yet been supplied. Those furnished are fixed, and as they are unevenly distributed through the reading room, the readers, being attracted by the better light, become crowded towards it, to the neglect of the other parts. The Royal Dublin Society's Members' reading room and the ladies' room, as well as the connecting parts, and my own office, are greatly in want of a few similar lamps, the latter being but dismally lighted by two or three of the old inefficient oil lamps.

The accessions to the Library have been 1,726 octavos, 123 quartos, and 147 folios = 2,096 volumes. Of the folios 58 were volumes of old newspapers—of the whole number, 302 volumes were presented.

This aggregate includes all the Periodicals, but only such Proceedings and Transactions of Learned Societies as are subscribed for by you out of the Parliamentary grant, inasmuch as those coming to the Royal Dublin Society in exchange are its property.

The accessions fall under the following general categories or classes:—

Bibliography - - - - -	18
Polygraphy - - - - -	52
Newspapers - - - - -	58
Philosophy - - - - -	29
Theology - - - - - -	54
Sociology, Political Economy, Political Science, &c.	180
Philology - - - - - -	94
Science - - - - - -	296
Useful Arts - - - - -	88
Fine Arts - - - - - -	95
General Literature - - - - -	12
English „ - - - - -	459
German „ - - - - -	204
French „ - - - - -	136
Italian „ - - - - -	3
Spanish „ - - - - -	5
Greek „ - - - - -	5
Latin „ - - - - -	3
Egyptian „ - - - - -	1
Keltic „ - - - - -	1
Scandinavian Literature - - - -	2
Slavic „ - - - -	1
Travels, Guide books, &c. - - - -	103
Biography - - - - - -	87
History - - - - - -	110
Total - - -	2,096

The following is a return of the number of volumes lent to the borrowing members of the Royal Dublin Society for the year, and of those in their hands at 31st December 1879 :—

Number of volumes in member's hands at 31st December 1878 - - - - - - -	1,064
Lent during the year - - - - -	5,484
	6,548
Returned during the year - - - -	5,724
Number of volumes in member's hands at 31st Dec. 1879	824

During the year 500 volumes only have been bound and returned to the Library, and a second parcel of 500 is in the binders' hands. I have already drawn your attention to the fact that, at the rate of progress contemplated (no more than 3,000 volumes per annum), several years (at least five) must elapse, before our arrears be overtaken, and that, meantime, much valuable property is going to loss, and much inconvenience experienced.

I am ready to begin to hand to the printer the copy for the combined Supplemental Catalogue of the accessions for the past five years, but doubtless it will take some time to see this through the press. Meantime, I hope to continue with as much regularity as possible, the temporary monthly catalogues of current accessions, which are of the greatest possible daily practical advantage to the frequenters of the Library.

During the year the two rooms at the opposite side of the corridor have been undergoing preparation for the reception of the lady readers, and the whole of the "Joly Library" which was therein has been removed to the upper storey. When the volumes of this collection come to be placed out on the shelves I greatly fear the space afforded by the whole of the newly acquired upper rooms will scarcely contain this section of the Library, unless by adopting the objectionable plan of placing two or three rows of the smaller books behind one another on the shelves. I had, however, been in hopes that some additional space would have been to spare for other sections of the Library.

I presume a commencement will now soon be made by the Board of Works on the necessary alterations on the former "ladies' room," to convert it into the Librarian's office, by the removal of the fittings, &c., and the books from that apartment of the Library hitherto so used. These alterations and changes will involve an immense upset, long delay, and the derangement of a great number of volumes—so much that I can hardly suppose, that if my Lords were aware of it, they would have insisted on the abstraction of so large a space from an already cramped and overcrowded Library.

I have, &c.
(Signed) *William Archer*,
Librarian.

APPENDIX C. TO DR. STEELE'S REPORT.

Annual Report on the Condition of the Botanic Garden, Glasnevin, for the year 1879.

The Curator has the honour to submit for consideration, his Report on the condition of the Gardens under his care, and on the state of the various collections of plants, &c.

Number of Visitors.—The Gardens continue to be frequented annually by increasing numbers of visitors; the number for 1879 being 223,725, showing an increase on 1878 of 9,639. Sunday visitors = 7,754, week-day = 1,885.

1878.		1879.	
Sundays - -	154,390	Sundays - -	156,275
Week-days - -	59,696	Week-days - -	67,450
	214,086		223,725

Appendix I.

REPORT BY DR. STEELE.

This cannot but be considered as a very gratifying result, when the very wet and inclement season, through which we have passed is taken into consideration. The increase in the number of visitors was chiefly noticeable towards the latter half of the year, and was partly due to the fine autumn, but chiefly to the more interesting objects in the collections, being, at Dr. Steele's suggestion, brought under the notice of the public by short paragraphs about them published from time to time in the daily papers.

Condition of the Conservatories.—1. During the year the tree-fern house was thoroughly repaired, new woodwork being substituted in place of the old, which was very much decayed.

The old Norfolk Island pine had outgrown the house and had to be cut down. This can scarcely be regarded as a calamity as it gives more room to the large and increasing collection of tree-ferns.

2. *House for Tropical Aquatics.*—No repairs were necessary in this house. Some of the tanks leaked rather badly towards the close of the season and will require to be carefully repaired next spring.

3. *The Curvilinear Range* continues in good condition, and at present requires no repairs. The boilers were re-set during the summer and now work better. The large plant of Chamærops excelsa in the centre of the range has reached the glass, and will have to come out. There is no house in the garden large enough to contain it, it will therefore be impossible to preserve it alive. The plant of Corypha Australis has also reached the roof, and will require to be lowered from the stonework on which it now stands, this will be a rather difficult undertaking.

4. *The Orchid House* has required but few repairs during the year, these were well and promptly executed. The new boiler works satisfactorily.

5. *The Tropical Palm House* is perhaps the least satisfactory house in the Garden. Owing to its shape it is very difficult to group the plants in natural and effective masses. The fine collection of palms are beginning to crowd on each other, and some extra room is urgently required if they are to be retained in their present healthy condition. The shelving all round the house is very much decayed, and will require to be entirely replaced next year. Owing to the mode of growth of a palm it is impossible to see it to advantage from the floor of the house in which it grows.

In Kew and Edinburgh galleries have been constructed so that the public can be admitted to them; this proves a great attraction and adds greatly to the interest of the houses. The gallery here is too small and too difficult of access for this purpose.

6. *Camellia House* requires to be painted, and a new boiler put in place of the old one, which can now no longer be trusted.

7. *Propagating Pits* are in very good order, and are excellent structures for the growth of plants. A few alterations are required in the pit at the back of the curvilinear range. The stove pit also requires some repairs to the roof. It would be very desirable if the double glazed roof of this house could be replaced by a single roof, too much light being excluded from the plants at present.

8. *The Filmy-fern House* has proved a suitable structure for its delicate occupants which continue to thrive, and are slowly increasing in number.

Succulent Plants. Botanists and horticulturalists are aware of the almost insurmountable difficulties of growing a collection of succulent plants in the same houses with other plants. The atmospheric conditions required for the two being so different that any attempt to keep the two collections in health in the same structure must in the end prove futile and disastrous to one or the other.

In Glasnevin there is a pressing want for a "succulent plant house." During the latter part of his life the late Dr. Moore laboured incessantly at increasing his collection of these plants, and the result of his labours may be observed in a fairly representative collection of plants, many of which are very uncommon; if a suitable structure be not provided a large part of the stock will be lost. Mr. Peacock has also kindly consented to aid with some duplicates from his unrivalled collection as soon as a house has been erected to receive them.

Museum.—The interesting collection in this department cannot be properly shown to the public owing to want of space.

Many visitors evince great interest in it, and have offered donations for which there is no room at present. Several English manufacturers of fibres, tobacco, &c., have expressed their willingness to assist with collections for which no accommodation now exists, and which have for the time being been reluctantly refused.

The roof of the Museum is also in bad condition, water leaking freely through in wet weather.

Outside Grounds.—1. The pleasure grounds have been efficiently maintained during the year and proved a source of general attraction. Some changes in the forms and disposition of the flower beds are now being effected, and some clearing made where the shrubs had grown too thick. 2. *Botanical Arrangements.*—Both British and foreign have continued to receive a large amount of care and attention and are very complete. To the foreign arrangement a large number of new plants were added, some of considerable interest. This collection promises to be very fine, and every effort is made to make it as useful and instructive as possible. Both arrangements were much frequented by students and classes, and where practicable liberty was granted to take specimens. 3. *Arboretum.*—(i.) Some important additions have been made to the collection of hardy trees and shrubs, a few were too small to be planted out at once, and are for the present in the nursery ground. (ii.) The new piece of land purchased for the extension of the arboretum has informally been placed under the care of the Department. An entrance walk was at once made to it from the garden, but nothing further can be done until the boundary wall has been removed, and a grant of money made to defray necessary expenses. This addition to the grounds of the garden will prove of great importance and enable the extension of the present limited collection, this will hereafter be one of the most instructive and important features in the garden. It will supply a want long felt in the country, not one representative reference collection existing in Ireland. (iii.) *The Willow field* has been gone through, old plants being replaced by young and more vigourous specimens, all vacancies being as far as possible filled up. To properly finish this work it will be necessary to visit some good collections to select such plants as will prove most instructive. (iv.) *Culinary Department,* has been much frequented by visitors especially on Sundays. Small patches of the more important vegetables are here cultivated, and are labelled with the dates of sowing and planting. Many persons come regularly to take notes for their guidance in cultivating their own gardens.

Supply of Specimens to Places of Instruction.—Many specimens were regularly sent to the School of Art, with which the professors expressed themselves satisfied. The College of Science through its professor, obtained all requisite specimens, and for part of the year the Queen's College, Galway, was supplied twice and sometimes three times weekly. The Queen's Institute and other educational establishments obtained also many specimens from time to time. Plants were always freely given when to spare.

Interchange of Plants and Seeds.—Since my appointment this important work has been actively pushed, and wherever correspondents could be found additions of rare plants and seeds have been obtained. An exchange list of such duplicates as were to spare was made out, and sent to many leading plant establishments, many plants being given from the garden, and valuable additions received in exchange. The total number of plants and seeds received during the year was 2,455, seeds 1,569, plants 886. The donations from the garden during the same period were 1685, plants 872, seeds 813. There were 56 donors of plants and seeds, 16 in England, 22 in Ireland, 3 in Scotland, 2 in Italy, 2 in Russia, 2 in America, 2 in Australia, 1 in Mauritius, and 1 in Sierra Leone. Amongst those from whom large and valuable collections have been received are Sir J. D. Hooker, Kew; Rev. Mr. Newport, Mauritius; Dr. Regel, St. Petersburg; C. Moore Esq., Sydney; M. Makoi, Liege; Rev. H. Ellacombe, Bristol; J. Niven, Hull; Veitch and Sons, London; B. Williams and Son, London; W. Bull and Co, London; Rodger, McClelland and Co., Newry; Miss Owen, Gorey; and others.

Appendix I.

REPORT BY DR. STEELE.

Purchase of Plants.—396 plants were added to the collection by purchase from English and continental nurseries during the year. The total amount paid for these purchases was 122*l.*, this sum includes florists, flowers and collections of bulbs for bedding purposes, &c. In connection with these purchases two journeys were made by me to visit plant collections, arrange exchanges, &c. The first to London and Belgium was productive of several important exchanges and additions. The principal plant establishments, both public and private, were visited by me, and I obtained many rare and valuable plants, and also much information. The second journey to Scotland was made with the object of making arrangements for planting the new Arboretum, and was also satisfactory. Some Scotch firms promising, besides donations, to supply plants at trade price. The Curator of the Botanic Garden, Edinburgh, has promised specimens of any of the rarer Coniferæ of which he has duplicates, and other plants. It was impossible to extend this journey owing to the severity of the weather.

The excellent supply of Vartry water has been of the greatest service, and on no occasion has there been the slightest scarcity of water. The hydraulic ram continues to be used from time to time, but fails to send up a sufficient quantity of water to the houses.

(Signed) *F. W. Moore*,
Curator.

APPENDIX D. TO DR. STEELE'S REPORT.

METROPOLITAN SCHOOL OF ART, CLASS 6,111.

SIR,

IN reporting upon the operations of this institution for the past year it may be remarked that the inconvenience consequent upon re-arrangement, repairs, alterations, and improvements of the building and its class-rooms having now terminated, better opportunity for uninterrupted study is afforded. Such work as that referred to, has, I may observe, along with the selection of examples, and their arrangement, occupied no inconsiderable portion of my time.

During the school year of ten months commencing 1st October 1878, and ending 31st July 1879, this Institution has been attended by 403 students, and of this number 340 were students who entered upon the lower scale of fees.

The amount of fees has been 457*l.* 10*s.* 6*d.*, 367*l.* 5*s.* of which has been received from students attending the day classes, whilst 90*l.* 5*s.* 6*d.* has been paid by those attending the evening classes.

In the month of April, 1753 works, executed by 283 students, were forwarded to South Kensington for examination, or to compete with similar works executed in the various Art Schools of the United Kingdom.

In the National Competition nine awards were obtained in the higher stages of study. In the competition of the third or highest grade 35 students obtained 47 awards. During the first week in May, the local examination of the second grade took place, when 144 students were examined in the four subjects belonging to that grade, viz., Practical Geometry, Perspective, Freehand Drawing, and Model Drawing; of these, 44 students were successful in passing in 97 papers.

The examination held in February, for the first certificate of the third grade (Art Teacher's Certificate) was attended by six students. The first certificate of the third grade (Elementary Drawing and Colouring) has been obtained by Miss Dora Bradley, who has in consequence been appointed mistress of the evening female class. Miss Hilda Douglas has been appointed as a student in training.

During the session courses of lectures were delivered in the theatre as follows:—By Dr. MacAlister on Anatomy, and by Professor MacNab on Botany, as applied to the Fine Arts.

Such lectures, intended more particularly for the students attending the School of Art, were opened also to the public generally on payment of a registration fee.

An exhibition of students works took place during the Christmas vacation 1878 which was attended by 1,010 persons.

Still-life objects for study, and also pictures in oil, water-colour, &c. have been received by the school on loan from South Kensington during the past session.

£102 8*s.* 1*d.* has been expended by the school out of the Parliamentary vote, for the purchase of examples, &c. for instruction.

Study, based more largely upon the consideration of solidity, has been encouraged in the school, even in connexion with the most elementary work.

It is worthy of remark that the attendance of students has been slightly influenced by the exceptionally severe character of the year and commercial depression, notwithstanding it has been more largely frequented by students of the artizan class, than any other institution of a similar kind in this country.

The value of the teaching of Art Schools, as at the present time established is but imperfectly understood by the general community; their special functions and clear intentions if more widely comprehended would doubtless rapidly tend to influence most beneficially and directly all mechanical production.

(Signed) *Robert Edwin Lyne*,
Head-master.

REPORT BY DR. HAUGHTON.

APPENDIX K.

REPORT of the ROYAL ZOOLOGICAL SOCIETY of IRELAND.

THE forty-eighth Annual Meeting of the Royal Zoological Society of Ireland was held in the College of Physicians on Tuesday, 13th January 1880.

Mr. J. Lentaigne, D.L., President, in the Chair.

REPORT OF COUNCIL.

During the year 1879 the number of visitors to the gardens and the receipts at the entrance gate, were as follows :—

Admission to Zoological Gardens, 1879.

		£	s.	d.
Members - -	14,289			
Public institutions -	3,698			
Visitors tickets - -	1,233			
Visitors at 5*s.* - -	29	7	5	0
Visitors at 2*s.* 6*d.* - -	310	38	15	0
Visitors at 1*s.* - -	10,699	534	19	0
Visitors at 6*d.* - -	7,571	189	5	6
Schools at 3*d.* - -	2,774	34	13	6
Visitors at 2*d.* - -	49,689	414	1	6
Visitors at 1*d.* - -	12,863	53	11	11
Books of Admission Tickets -		25	10	0
Total admissions -	103,155	1,298	1	5

During the preceding year (1878) the corresponding numbers and receipts were as follows :—

		£	s.	d.
Members - - -	11,952			
Public institutions - -	3,931			
Visitors tickets - -	1,882			
Visitors at 5*s.* - -	117	29	5	0
Visitors at 2*s.* 6*d.* - -	283	35	7	6
Visitors at 1*s.* - -	13,387	669	7	0
Visitors at 6*d.* - -	5,896	147	8	0
Schools at 3*d.* - -	1,484	18	11	0
Visitors at 2*d.* - -	57,290	477	8	4
Visitors at 1*d.* - -	13,944	58	2	0
Total admissions -	110,173	1,435	8	10
Books of admission tickets -	—	53	14	6
Garden Lectures (Alexandra College)		5	0	0
		£1,494	3	4

The total numbers of visitors and receipts at gate during the past 10 years were as follows :—

Year.	Visitors.	Receipts.		
		£	s.	d.
1870	151,785	1,359	16	6
1871	167,692	1,352	0	5
1872	147,184	1,502	9	10
1873	147,762	1,450	4	3
1874	109,923	1,442	14	4
1875	104,945	1,500	4	8
1876	98,491	1,353	8	7
1877	102,416	1,367	4	10
1878	110,173	1,494	3	4
1879	103,155	1,298	1	5

During the corresponding years the total receipts from entrance fees and subscriptions were as follows :—

Year.	Entrance Fees and Subscriptions.
1870 - - -	378
1871 - - -	435
1872 - - -	496
1873 - - -	404
1874 - - -	610
1875 - - -	429
1876 - - -	448
1877 - - -	595
1878 - - -	580
1879 - - -	551

The sums expended in the purchase of animals during the last 10 years were as follows :—

Year.	£	s.	d.
1870 - - -	435	6	6
1871 - - -	351	13	8
1872 - - -	416	6	11
1873 - - -	143	0	0
1874 - - -	234	18	9
1875 - - -	107	6	4
1876 - - -	185	4	5
1877 - - -	180	4	6
1878 - - -	202	5	11
1879 - - -	307	4	2

The promenades of May, June, and July were continued in 1879.

Appendix K.

REPORT BY DR. HAUGHTON.

The numbers of members and visitors on the promenade days of t last 10 years were as follows:—

Year.	Members.	Visitors.	Total.	Receipts.
				£ s. d.
1870	986	3,633	4,619	88 3 6
1871	2,030	4,193	6,223	104 16 6
1872	1,488	2,710	4,198	135 10 0
1873	1,738	2,075	3,813	99 5 0
1874	1,814	1,741	3,555	86 2 6
1875	1,390	1,572	2,962	78 12 0
1876	1,729	2,050	3,779	92 0 6
1877	1,892	1,562	3,454	74 13 6
1878	1,567	1,402	2,969	64 14 0
1879	2,049	1,632	3,681	65 14 0

The receipts from Sunday admissions during the past 10 years ha been:—

Year.	£	s.	d.
1870 - - -	472	6	6
1871 - - -	515	1	5
1872 - - -	471	14	7
1873 - - -	477	1	3
1874 - - -	497	8	4
1875 - - -	561	10	11
1876 - - -	521	8	7
1877 - - -	523	6	7
1878 - - -	535	10	4
1879 - - -	467	13	5

During the course of the year the lioness, presented to the gardens by the Reception Committee of the British Association, has produced and reared two healthy male cubs; and the magnificent lioness, imported direct from South Africa, and purchased by your Council *during* the same period, has successfully reared four male cubs. The attractions of the gardens have thus become substantially increased by the addition of six fine young lions, whose prospective value cannot be estimated at less than 500*l*.

Success has at last crowned your Council's efforts to rear Brazilian ocelots, and our collection now contains several of these rare and beautiful cats, born and reared in the Dublin Gardens.

Two Himalayan bear cubs have been successfully reared *during the* year, a circumstance entirely without example in the history of zoological gardens.

Many distinguished naturalists among our members availed *themselves* of this unique opportunity of observing the sanitary precautions of the mother bear, who at a fixed hour each morning, when the sun shone, might be observed airing the straw bed of her cubs in the sunshine, turning it over literally straw by straw; and as the process was noted to last from 35 to 55 minutes, all curious naturalists had ample time for observation.

In the early part of the year, the sudden death of Mr. Robert J. Montgomery, Assistant Secretary, deprived the Council of the services of an officer who had acted with them for upwards of 20 years, and

whose practical knowledge of animals had been of great use to the society. Appendix K.

The Council give notice of the following proposed alteration in byelaw (9), chapter 2. REPORT BY DR. HAUGHTON.

Notice from Council of proposed alteration of the Byelaws.

That byelaw (9), chapter 2, be altered to the following :—

"(9.) Members of the Society, and such members of their families as are *bonâ fide* resident with them, shall have the privilege of free admission to the gardens, on their names and addresses being inserted in the admission book; and in the case of children of members, the name of the person in charge of them being also signed."

(Signed) SAMUEL HAUGHTON,
Secretary.

17th January 1880.

Appendix L.

REPORT BY THE COUNCIL OF THE ROYAL HIBERNIAN ACADEMY.

APPENDIX L.

ROYAL HIBERNIAN ACADEMY of ARTS.

REPORT of COUNCIL for the YEAR 1878–9.

The Council, in presenting to the Academy the Annual Report of its proceedings for the year 1878–9, regret to state that a slight falling off is shown as compared with the results of the last two years.

The exhibition opened on Wednesday, February the 19th, and closed on Saturday, the 31st of May, remaining open fourteen weeks and four days, during ten of which it was open by gaslight at a reduced charge of one penny.

The exhibition, containing 562 works as against 607 in that of the preceding year, made a greater demand on the limited space at the disposal of the Academy; there was an unusual number of pictures of increased size and importance, and consequently an exhibition marked by progressive improvement and general merit. As a result, there was an unavoidable rejection of a larger number of works than usual, a necessity which in many cases was matter of regret to the Council.

The season tickets numbered 536 as against 531 in 1878. The day admissions at 1*s.* 4,652 as against 5,239. The evening admissions at one penny, 26,348, against 22,739, showed an increase of 3,609. The purchases amounted to 2,247*l.* 15*s.* including the Art Union Prize Fund which, amounting to 380*l.*, was supplemented by prize holders to the extent of 149*l.*, making a total of 529*l.* 15*s.*

It will be seen that the interest shown by the public and its support was nearly equal to that of the preceding year. It is in the difference of the amount of sales (2,247*l.* 15*s.* as against 3,329*l.* 10*s.* in the previous year) that the depression which has affected all undertakings in the country has manifested itself; but, as the sales were greater than the year 1876 by 300*l.* 1*s.*; greater by 680*l.* 1*s.* than 1875, and greater by 927*l.* than the year 1874, there is abundant proof shown of the steady improvement of taste and culture, and appreciation and encouragement of art by the general public, and the Council consider it a matter of congratulation that under such untoward circumstances as at present prevailing a greater falling off has not been experienced.

The following is an analysis of the attendance and receipts:—

		£	s.	d.
536	Season tickets at 3*s.* - - -	80	8	0
4,652	Day admissions at 1*s.* - - -	232	12	0
26,348	Evening admissions at 1*d.* - - -	109	5	8
1,947	Catalogues at 6*d.* - - - -	48	13	6
3,446	Evening catalogues at 3*d.* - - -	43	1	6
	Commission on sales - - . -	108	15	0
	Total -	£623	5	0

During the exhibition the pupils of the following Educational Institutions were invited to visit the exhibition gratuitously:—

King's Hospital.
Masonic Male and Female Orphan Schools.
Deaf and Dumb Mutes, St. Mary's, Cabra.
Clergy Daughters' School.
Pleasants' Asylum.
Orphanage, Presentation Convent, George's Hill.
Royal Hibernian Military School.

Drummond Institute for Daughters of Soldiers.
The Marine School.
St. Peter's Orphanage.
St. Vincent de Paul Male Orphanage.
St. Mary's Industrial School.

The alterations necessary to adapt Mrs. Anne Johnston's gallery to the purposes of an exhibition room, which were not entirely effected at the opening of the exhibition last year from pressure of time, have been carried out, and the additional windows have added materially to its effective lighting; other permanent improvements have also been effected by the construction of screens for the hanging of pictures, the purchase of new turnstiles, &c., &c.

The Council have to report the receipt of a second donation of 10*l.* from J. R. G. Grundy, Esq., Bankfield, Bury, Lancashire, to be given in prizes to the students of the Academy. This sum has been divided into two prizes of 5*l.* each, one for the best study from the living model, and the other for the best study from the antique.

The schools of the living model, and for the study of the antique, opened on Monday, the 14th of October, and closed on Friday the 13th of June, being open 33 weeks, and the average attendance weekly in the school of the living model was 35, and in the antique school 30.

The day painting school opened on Monday the 11th of November 1878, and closed on Friday the 13th of June, the average attendance weekly being 30. The Council have to acknowledge with gratification the development of this department, and of the useful and improving work done in it under the supervision of Mr. Augustus Burke, who, entering on the office of Professor of Painting, has heartily identified himself with the progress of the schools, and has devoted much time, and his experience of academic study, to the organizing of a properly useful school of painting.

At a meeting of the Council, July 22nd, 1878, it was decided to offer an Albert prize of 20*l.* for the best picture, figure, or landscape, painted by any Irish artist or Art student, being under 30 years of age, who is or has been a student of the schools of the Academy. This offer drew forth eight competitors whose pictures were exhibited in the annual exhibition of 1879, when the prize was awarded to Mr. Michael Fitzgerald.

During the past year Mr. Francis S. Walker and Mr. Stephen Catterson Smith were elected constituent members of the Academy, and Mr. G. C. Ashlin was elected an associate, Sir Frederick Leighton, P.R.A., was elected an honorary member, and Messrs. R. Burnier, Otto Weber, and Victor Gilbert, were elected honorary foreign members of the Academy.

The annual visit of the inspector from the Department of Science and Art, F. B. Barwell, Esq., took place on the 2nd of July 1879, who, in conjunction with the President, Thos. Alfred Jones, Esq. and the keeper, P. Vincent Duffy, Esq., made the following awards :—

SPECIAL COMPETITION.

Drawing from the Living Model.

Silver medal—Not awarded.
Bronze medal—Nathaniel Hill.

Drawing from the antique.

First prize—Bronze medal, J. M. Kavenagh.
"The Grundy Prize" of 5*l.*, for the best drawing from the life—J. M. Kavenagh.

Appendix L.

REPORT BY THE COUNCIL OF THE ROYAL HIBERNIAN ACADEMY.

Second best drawing from the life, Prize of 3*l.*, F. W. Osborne.
"The Grundy Prize of 5*l.*," for the best drawing from the antique—F. W. Osborne.
Second best drawing from the antique, Prize of 3*l.*, F. W. Osborne.
Prize of 5*l.*, for the best study in the painting class, J. M. Kavenagh
Prize of 3*l.*, for the second best study in the painting class—F. W. Osborne.
Prize of 2*l.*, for the best drawing from the anatomical figure—J. B. S. M'Ilwaine.

Annexed is the abstract of income and expenditure as furnished by the treasurer, Thomas Farrell, Esq., R.H.A.
